General Education
Assessment Rollout
(Proposed)

Winter 2015
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Spring/Summer 2015
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Fall 2015
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Winter 2016
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting
Spring/Summer 2016
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Fall 2016
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Winter 2017
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Spring/Summer 2017
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Fall 2017
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting
Winter 2018
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Spring/Summer 2018
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Fall 2018
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Winter 2019
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting

Spring/Summer 2019
- Understand and apply current and appropriate technology tools and resources
- Understand the processes that influence human values, thoughts, social systems, and behavior
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting
Fall 2019

- Understand and apply current and appropriate technology tools and resources
- Understand and apply the elements of scientific inquiry and scientific principles in a natural science college laboratory course setting
- Recognize expressions of the human experience
- Write effectively
- Use mathematics to effectively model and evaluate quantitative relationships
- Understand the processes that influence human values, thoughts, social systems, and behavior

This could go on *ad infinitum* (*ad nauseam?*), but you get the point.

Green Assessment

Red No Assessment (under review by *ad hoc* groups)
