Adjusting Internet Explorer Compatibility View Settings

Internet Explorer instructions:

1. Go to Tools in your Internet Explorer menu bar and make sure that Compatibility View is NOT enabled (If it has a check by it, it is enabled. To disable Compatibility View, click it and the check should go away. See image below).

2. Now click Compatibility View Settings (See image below)
3. Uncheck "Include updated websites list from Microsoft"
4. Uncheck "Display all websites in compatibility view" if it is checked
5. Click on close and then refresh the web page
STEP 3: Uncheck "Include updated websites list from Microsoft"

STEP 4: Uncheck "Display all websites in compatibility view"
