

Compatibility View

Since Internet Explorer 9 is not compatible with Blackboard, users will need to enable Compatibility View for Blackboard to work correctly.

STEP 1

In the browser menu, click Tools. Then choose Compatibility View Settings.

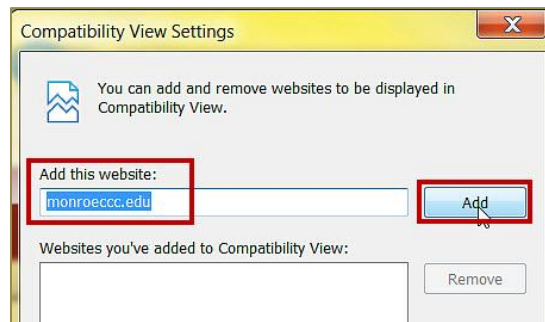

NOTE: If you **do not** have the menu bar enabled, place your cursor on a blank part of the browser window then right click your mouse. Choose Menu Bar.

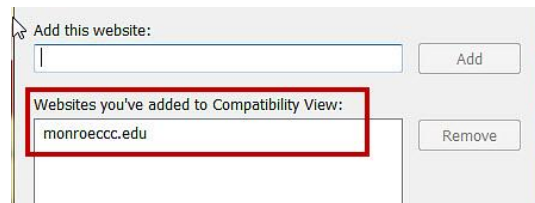

STEP 2

If you are on the Blackboard website when you go to the Compatibility View Settings, you will find monroeccc.edu in the "Add this website" row. If you are not on the MCCC Blackboard

website then you will need to type in *monroeccc.edu* in the “Add this website” row. Then click the Add button.

Once you have clicked the Add button, *monroeccc.edu* will be moved to the second section Websites you’ve added to Compatibility View. Then you can click the Close button.

If additional assistance is needed with this issue, or any other Blackboard questions, please contact the eLearning/Blackboard Help Desk at 734.384.4328 or via email at elarning@monroeccc.edu.
