

Security Warning

When trying to connect to audio, video or other websites from within the Blackboard system, the user will receive a Security Warning indicating that a connection is trying to be made to a source that is not using a secure connection.

If the user trusts the link that they are trying to connect to, click **No** when prompted by the Security Warning. The user will have to click No to be connected to the link:

If the user clicks Yes, they will receive a error stating “Navigation was cancelled”

The user will need to close the Internet browser and log back into Blackboard to reconnect to the resource.

If you have additional questions about Blackboard, please call the Blackboard Help Desk at 734-384-4328 or via email at elarning@monroeccc.edu.
