8. HVAC Project
9. State Capital Outlay Project Request – Fiscal Year 2017
    a. Renovations to the East and West Technology Buildings
10. Instructions for Master Plan Report

INTRODUCTION

Executive Summary

Monroe County Community College embarked on the process of master planning to provide a foundation for the creation and maintenance of an ideal campus environment. This master plan is a living document, which will continue to evolve as it provides a framework for addressing the challenges of growth, academic change and aging facilities.

The Master Planning Committee and other contributors, as part of working through the process:

- Identified the existing and potential future physical and programmatic challenges.
- Created guidelines and requirements to which the proposed solutions should adhere.
- Proposed and tested multiple solutions to each challenge, presenting the best conclusions in this document.

As stated, this plan is a living document. It is the sixteenth year that such a plan has been submitted to the State Budget Office and each year it has undergone review, resulting in revisions and changes to reflect current information, projections, and needs. Fourteen years ago the College contracted with SHW Group (formerly Duce Simmons Associates), Troy, Michigan, to assist in the planning process and the production of the final document. SHW Group also conducted a comprehensive facilities assessment. The assessment included in this plan was updated in 2011. The Five-Year Master Plan has incorporated many of the architect's findings, drawings, and recommendations, and the College continues to thank SHW Group for its prior work and contributions.

The challenges identified and discussed in the following pages include:

- **Facilities Condition –** Outdated classrooms, labs, and HVAC systems.
- **Barrier Free Accessibility –** Elevators and location of Learning Assistance Lab.
- **Programs –** Location of, and limited space for, certain specialized programs.
- **Student Support Services –** Location and coordination of services.
- **Landscaping/Site –** Maintain and improve views and vistas; improve building interconnection and relationships; address pedestrian and vehicular circulation.
- **Growth -** Develop placeholders for future project sites.
- **Student Retention –** Maintain student population through completions of goals and incorporating the Master Plan into enrollment management decisions.

The guiding principles for the solution development process were identified as follows:

- Physically support the College Mission Documents and Strategic Plan.
- Improve student retention and assist in marketing the College to prospective students.
- Address technological changes and the need for technological flexibility.
- Provide classroom flexibility for different uses and teaching methods.
- Simplify student and visitor interaction with the College.

Solutions developed to address the challenges identified include (but are not limited to):

- Development of technologically appropriate classroom space to meet changing educational needs, including the construction of the Career Technology Center.
- Updating of existing classrooms and instructional laboratories to provide a model space for traditional learning, distance learning and conferencing, in a computer intensive environment.
- A plan to address deferred maintenance issues throughout all campus facilities, continuing College efforts to properly maintain building systems in order to reverse or avoid deterioration.
- Reconfiguration of existing buildings to accommodate growth and simplify student interaction with College departments.

The following chapters present the overall Master Plan and explain the process and effort made by all participants in producing this vision for Monroe County Community College.

Planning Process

Before embarking on the Master Plan document, a brief overview of the master planning process is in order. The Master Plan process is comprised of five phases: strategic review, functional analysis, physical analysis, solutions development, and final documentation.

The first phase, strategic review, includes a review of the existing Master Plan and other information including the mission statement and strategic goals of the College.

The next two phases, functional and physical analysis, include the collection of data required to develop solutions for the Master Plan. The functional analysis includes development and issuance of surveys to individual departments within the College, interactive workshops, and interviews with key members of the College. The physical analysis includes the collection of existing documentation, confirmation of physical conditions and an overall review of the adequacy of existing facilities in supporting the Master Plan.

The above phases create the framework for solution development. Solution development includes developing planning options based on the functional and physical analysis, cost estimating and the development of schedule and phasing options. The options are refined and presented at a series of interactive workshops for analysis and feedback from College and community representatives. These options are then further refined and finalized into a plan for future facility development, culminating in the creation of the final Master Plan Report.

Most importantly, the Master Plan is a living document. It is not a final plan for the College, but the present vision for the potential growth of Monroe County Community College. This document should not be considered "set in stone", but should be reviewed and updated as dictated by changes in education, information and College and community goals. And while many of the components of the various phases require completion every year, others do not. Although this is a "5-Year" Master Plan, it is the College's intention to update the Plan annually, have a facilities assessment done every three to four years, and perform all phases every seven to eight years. Unfortunately, due to budget constraints, the comprehensive Campus Master Plan has not been updated in fourteen years. Currently, through the College's Strategic Planning process, this update is being forwarded as a necessary tactic to meet the Physical Resources objective of "effectively utilize and maintain current facilities while continuously assessing future need."

History

Monroe County Community College is a public two-year institution supported by property tax monies from Monroe County, educational funds from the State of Michigan and student tuition. The Community College District of Monroe County, Michigan was formed on June 29, 1964 by the electors of Monroe County. On July 3, 1964, the district was given statutory authority under the provisions of Michigan Act 188 of the Public Acts of 1955 to function as a community college.

The original four academic buildings on the 210 acre Main Campus, located on South Raisinville Road, opened for students in 1968. The College has grown from these beginnings to a plant now totaling over 461,870 square feet, including eight academic buildings, four physical plant buildings and four maintenance/storage buildings at the main campus. Total square footage on main campus increased 60,425 square feet with the completion of the new Career Technology Center in August of 2013. Also part of this total is the 17,650 square foot Whitman Center, opened in 1991 and located on 25 acres in Bedford Township near the Michigan-Ohio border, and a property donated to the College in October 2010 consisting of an 18,910 square foot building situated on 4.9 acres in Frenchtown Township.

Monroe County Community College is accredited by the Higher Learning Commission and has received 10-year accreditation, the highest HLC rating possible, during the most recent evaluation in 2009.

Mission Documents

As part of the College's Strategic Planning process, the College's Mission and Vision were reviewed and updated over the last two years. This comprehensive review, involving all College stakeholders, concluded in the Board of Trustees' approval of the revisions on April 27, 2015:

Mission Monroe County Community College enriches and transforms lives by providing a opportunity and excellence in higher education.

Vision Monroe County Community College will be an innovative and progressive higher education institution and our community's first choice for quality post-secondary education.

Core Values

Monroe County Community College is dedicated to these core values

- Comprehensive educational offerings
- Instructional excellence
- Transformational learning
- Cultivation of informed and participating citizens
- Entrepreneurial and responsive leadership to community needs
- Cultural enrichment
- Affordability
- Accessibility
- Valuing human diversity
- Ethical integrity
- Accountability to students and stakeholders
- To be a source of pride for the residents of Monroe County

Educational Objectives

MCCC provides higher educational opportunities to the community through

- Offering freshman and sophomore college-level programs in the liberal arts, sciences, and pre-professional fields for students who plan to transfer to four-year colleges and universities;
- Offering one- and two-year occupational and/or career programs for students preparing for employment in technical, business, or health-related fields;
- Providing general education courses and experiences integrated throughout the curriculum which will enable students to write and communicate effectively, utilize mathematics, and employ appropriate methods of critical thinking and problem solving;
- Providing intellectual, cultural, and personal development for adults in a wide range of lifelong learning opportunities;
- Working with governmental agencies and employers to develop training and retraining programs to meet the needs of an evolving economy;
- Providing a strong complement of comprehensive support services to assist students in pursuit of their educational goals;
- Collaborating with school systems, civic groups, educational institutions, individuals, employers, and other constituencies to offer educational services and opportunities.

Strategic Plan

The Strategic Planning Process at Monroe County Community College is the culmination of the combined efforts of the shared governance structure coordinated by the Strategic Planning Committee. It stands in support of the College's Mission Documents and provides the roadmap for future direction.

As the plan is developed, it passes through the shared governance structure, including the Board of Trustees, president, vice presidents, and councils, as well as the various divisions and departments. This process maximizes the opportunity for faculty and staff participation.

The priorities (strategies) and objectives are developed in support of the College's Mission Documents and are the result of environmental scans, research, and input from faculty, staff and students.

Strategic Initiatives represent the highest level of what the college wants to achieve over the next three years. Objectives, through their specific tactics, delineate how the strategic initiatives will be accomplished, as the tactics serve as the work plan to accomplish the objectives. The strategic initiatives and objectives are developed with input from a number of internal and external stakeholders. The tactics developed by the work groups supported by individual divisions, departments support the objectives.

Although the document is developed every three years, addenda may be included whenever appropriate, as this document is a work in progress. The annual assessment of the plan and progress being made in support of the priorities and strategies may serve as the catalyst for additions or changes to the plan. The 2014-2017 Strategic Plan addresses the need to provide educational excellence through high-quality teaching and learning, create and support an evidence-based culture, strengthen financial resources, embrace shared governance, and increase collaborative partnerships. The plan was thoroughly vetted through a comprehensive and inclusive review process and was adopted by the Board of Trustees on April 27, 2015.

Following is the 2014-2017 Strategic Plan:

***Strategic Initiative #1*: Educational Excellence –** The core of MCCC's Mission is to provide educational excellence by facilitating high-quality teaching and learning. To this purpose, the following strategies have been identified:

Instructional Excellence – Develop and facilitate effective pedagogical practices.

Student Success – Provide wraparound services to support student success and assist students with challenges they encounter while pursuing their goals.

Higher Educational Opportunities – Support and develop a wide variety of educational opportunities.

Campus Environment – Continue to develop and maintain a safe, accessible, welcoming, and student-focused learning environment.

Diversity – Expose learners to diversity.

Technology – Provide and promote the use of technology.

Strategic Initiative #2: **Evidenced-Based Culture** – In support of MCCC's Mission, create an evidence-based culture by committing to data-driven planning, evaluation, and decision making. To this purpose, the following strategies have been identified.

Planning – Gather data as evidence to establish institutional strategic planning priorities.

Assessment – Establish processes that will provide reliable evidence of student learning.

Evaluation – Implement valid and reliable methods for evaluating performance across all areas, departments, and divisions.

Strategic Initiative #3: **Resource Management** – Sound resource management will play a critical role in supporting MCCC's Mission. To this purpose, the following strategies have been identified.

Integrity – Support transparency, disclosure, stewardship, and understanding of resource management.

Physical Resources – Effectively utilize and maintain current facilities while continuously assessing future need.

Accessibility – Maintain an affordable tuition rate, and promote, create, and expand scholarship opportunities and financial aid programs.

Human Resources – Attract, support, and retain a highly-qualified and diverse workforce.

Financial Resources – Effectively manage college financial resources and pursue alternative funding.

Strategic Initiative #4: **Governance** – The governance practices of MCCC are essential to fulfilling its Mission. To this purpose, the following strategies have been identified.

Shared Governance – Evaluate the college governance system to ensure two-way communication and accountability in decision making.

Communication – Disseminate information through an inclusive communication model.

Transparency – Embrace a decision-making model that fosters transparency, trust, and accountability.

Engagement – Increase participation by all stakeholders in the governance process.

Strategic Initiative #5: **Partnerships** – In support of MCCC's Mission, the college will seek opportunities to increase collaborative partnerships with the community. To this purpose, the following strategies have been identified.

Community Engagement – Establish pathways to increase collaboration.

Service Learning – Provide learning opportunities that promote volunteerism and community service.

Accountability – Demonstrate ways the college responds to the community's learning needs.

ANALYSIS OF EXISTING CONDITIONS

Summary

The following analysis and synthesis of information is driven by the above principles, values and goals set out by Monroe County Community College. When coupled with faculty and staff surveys, site and facility assessments and participant workshops, the groundwork is laid for development of the final Master Plan.

In preparation for the preliminary planning and development of the Master Plan for Monroe County Community College, the existing conditions of the campus and facilities were studied to identify both the opportunities and constraints that will affect future development. This, along with an understanding of program offerings and enrollment and staffing, will allow challenges to be analyzed and addressed, enhancing and preserving areas of value.

Site Analysis

Main Campus

The main campus comprises 210 acres located on Raisinville Road, which forms the western edge of the township. The general land use pattern surrounding campus is agricultural, with the following exceptions:

Property to the north of the campus is occupied by the Monroe County Intermediate School District and the Monroe County Fairgrounds (at the corner of Raisinville Road and M-50). A residential community and golf course adjoins the campus property to the east. Across Raisinville Road to the west are single family homes fronting large tracts of agricultural property. The south portion of campus includes a wooded area followed by additional farmland.

Some campus property, specifically to the north and east of the Welch Health Education Building, is currently being used for agricultural purposes.

There is also a potter's field cemetery, identifiable only by a State of Michigan Historical Marker, located on campus between parking Lot 2 and Raisinville Road.

The entire site, most of which is former farm fields, has in the past had flooding and standing water issues due to poor soil porosity and very flat terrain. The result has been erosion, landscape damage and paving deterioration.

As a result of a Landscape Master Plan prepared in 1991, the College performed re-grading and drainage work, including creation of a retention pond. This, coupled with replacement of damaged landscaping and paving, has considerably reduced the standing water problems throughout campus. The only area still visibly exhibiting this flooding is behind the Welch Health Education Building.

The balance of the landscaping throughout campus is newer focusing on low maintenance planting such as trees, with some smaller scale plantings used as accents.

Various species of trees are interspersed across the site, which is mostly planted with turf grass. There are some mature trees lining Raisinville Road near the main entrance, causing the balance of plantings to appear immature. The area surrounding the Plum Creek is the exception to this rule. This portion of the site is more heavily treed, with a mix of vegetation typical of a creekside ecosystem.

Numerous ash trees were used in the campus landscaping. All of these were in very visible locations, lining drives, walkways, and parking lots. There were 210 ash trees on the Main Campus and another 15 at the Whitman Center. All fell victim to the borer. In the spring of 2006, all of the ash trees were removed and replaced with a variety of species.

Continued efforts to annually add to the landscaping will be required throughout campus to create more pedestrian-friendly pathways, reduce the apparent distance between buildings and create more inviting outdoor gathering areas. Future site development should continue to address potential safety issues, including appropriately scaled and located plantings and increased pedestrian-scale lighting.

Previously, the Main Campus could be divided into a North Zone and South Zone, split by the main entry drive from Raisinville Road. The Welch Health Education Building being the only building in the North Zone with the balance of the academic buildings surround the campus quad, creating the only semi-enclosed exterior space on campus. However, with the construction of the Career Technology Center, a more cohesive campus footprint has been created thus eliminating the "zones" on campus. By placing the Career Technology Center between the Life Sciences Building and the Welch Health Education Building, rerouting the main road, and using existing parking and circulation, as was identified in the Master Plan as a goal for future facilities, all main campus facilities are connected and campus has an interconnected feel.

Whitman Center

The Whitman Center campus, opened to students in 1991, is located on 25 acres in Bedford Township. This facility chiefly serves the southern portion of Monroe County, northern Lucas County, and Lenawee County, although marketing efforts focus primarily toward Monroe County residents.

Access to the property is on Lewis Road. The predominant land use type surrounding the property is mixed between single family residential and some commercial.

This facility consists of a classroom/administration building, a small storage garage and a single parking lot split by an entry drive. The Whitman Center Building and the surrounding site were planned to accommodate expansion at both ends of the building. A purchase of 14.5 adjacent acres will allow for additional parking in the future, as well as providing for buffer zones from surrounding development. Building and program expansion would be impossible without this additional land and parking.

The landscaping between the building and the parking is attractive. The area immediately west of the building is a much more mature wooded area providing shade and a pleasant view from the classrooms. Future site development should not only minimize disruption of this area, but

promote expansion of it. The presence of ash trees is a major concern at the Whitman campus. Although all infested ash trees have been removed from landscaped areas, they still remain in this wooded section.

Hurd Road Property

In October 2010 the College received a donation of a new property located on Hurd Road in Frenchtown Township. The property consists of an 18,910 square foot building situated on 4.9 acres. The predominant land use type surrounding the property is farmland. Uses in the immediate area of the property include a 30,000 square foot warehouse to the SE across the railroad tracks, farmland both to the east and west and two single family homes and farmland across the road and to the south.

The building is a one story pole frame built over a period of 19 years from 1990 when the first structure was build until the most recent addition in 2006. The property includes 19,000 square feet of asphalt driveway and parking.

During 2011, the College renovated 6,770 square feet of the facility to house the Welding Center of Expertise. Funded through a U.S. Department of Labor Community-Based Training Grant, the renovation included development of a cross-categorical welding skills laboratory and classroom.

Access and Circulation Analysis

Main Campus

Vehicular access to the Main Campus is from Raisinville Road to the west. There are currently three entries to the site, with the center entry being emphasized by signage and plantings as the main entry.

The northernmost entry serves primarily the Welch Health Education Building, although the parking lot connects through to the main access road.

The southernmost entry road runs between the southern end of the developed campus and woods to the further south. It continues behind the Student Services/Administration Building and completes the ring road that connects the entire site. The layout of this ring purposely confines vehicular access to the edges of campus, minimizing the opportunities for pedestrian/vehicle conflicts.

<u>Parking Lot Capacities</u>

Lot	Total	Student / Public	Handicap	Staff	Police	Other
Lot 1	150	125	9	16		
Lot 2	519	487	11	20	1	
Lot 3	163	139	8	16		
Lot 4	204	197	7	0		
Lot 5	69	0	4	65		

Lot	Total	Student / Public	Handicap	Staff	Police	Other
Lot 6	39	36	3	0		
Lot 7	144	139	5	0		
Learning Assistance Lab	6	0	6	0		
Board/Visitor	15	6	2	6	1	
Physical Plant	11	0	0	11		
CTC Auto Lab	7	0	0	0		7
Total Main Campus	**1,327**	**1,129**	**55**	**134**	**2**	**7**
Whitman Center	**252**	**244**	**8**	**0**		
Hurd Road	**28**	**26**	**2**	**0**		
Grand Total	1,607	1,399	65	134	2	7

One way to calculate parking needs is to compare the number of staff and students with the number of spaces available.

Number of staff 337
Less number of designated staff spaces 134
Number of staff needing to park in "student/public" areas 203

Number of students (3,482 credit hour + 1,200 non-credit) 4,682
Add the number of staff needing to park in "student/public" areas 203
4,479
Less number of "student/public" spaces 1,399
Need number of spaces 3,080

There are several basic inaccuracies when using the preceding method. One is that not all staff and all students will be on campus at the same time. Another is that it does not address the fact that at anytime during the day or evening there may be members of the public (non-staff and non-students) on campus for an event or conference. Although this may happen when the majority of staff and students are not on campus, this is not always the case. And, at times, the numbers of public on campus can be significant.

A third inaccuracy is that the total number of spaces includes parking lots at three different campus locations: the main campus, Whitman Center, and Hurd Road. When in reality, parking needs at each location could be entirely different.

Manipulation and estimations could be used with this method, but the accuracy of the results may be highly questionable.

Perhaps a more accurate method is one that is sometimes used by architects and planners, which uses specific ratios to calculate parking needs. For students, the ratio of 1 to 0.2 is used. For full-time equivalent staff (FTE) the ratio of 1 to 0.9 is used.

This method results in the estimated needs as shown in the following table:

	Headcount		Ratio		Needed Spaces
Credit hour students (fall 2014 headcount)	3,482	x	0.2	=	696
Non-credit hour students	1,200	x	0.2	=	240
FTE staff *	218	x	0.9	=	196
					1,132

*171	Full-time staff	÷ 1	=	171
23	Part-time support staff	÷ 2	=	11.5
143	Adjunct faculty	÷ 4	=	35.75
337				218.25

Prior to the construction of the Career Technology Center, the College was faced with two specific parking concerns. One was growing enrollment (which reached its peak in the fall of 2010). The other was the fact that two-thirds of the parking is in lots located on the northern end of campus, while the majority of buildings were located at the southern end. In addition, projected usage of the La-Z-Boy Center created a need for additional parking.

To address these problems, in the summer of 2005 the College constructed a new parking lot: Lot #7. This lot contains 144 parking spaces and is located between the West Technology Building and Raisinville Road. This lot addressed all parking capacity concerns for the Main Campus at that time. With the opening of the Career Technology Center for fall 2013 classes, parking needs for students have shifted toward the largest lots on main campus.

Pedestrian circulation consists of typical campus walkways connecting building and parking lots in a fairly direct manner. Circulation through the main quad at the south end of campus focuses around a central paved plaza surrounding a raised planted area. A number of these walkways have been replaced or redesigned in recent years to replace deteriorated walks and to create more pleasing circulation paths.

Site and directional signage for vehicular and pedestrian traffic is under constant review. When all exterior signage was replaced several years ago, large building letter signs were added to each building to assist visitors and students with building identification. Also, at that time, two kiosks identifying the location of all campus building were added. A third directional kiosk was added with the construction of Lot 7. Campus way-finding continues to be a concern, however, and signage remains a topic of review and improvement.

Whitman Center

Access to the Whitman Center is from a single divided entry off of Lewis Road. This access road leads to the front of the building and divides the two parking lots. Pedestrian circulation consists of a main walk leading from the parking lot to a central entrance and two secondary entrances, one at each end of the L-shaped building.

Parking is provided for approximately 250 vehicles. The purchase of an additional 14.5 acres was made partly to address the need for additional parking if the building is ever expanded.

Hurd Road Property

Access to the Hurd Road Property is from a single entry off of Hurd Road. The building has multiple entry points served from this main access road and parking lot. Parking is provided for 28 vehicles.

Facility Analysis

MCCC opened its campus doors to students in 1968 and is currently comprised of sixteen facilities on the main Raisinville Road Campus, two on the 25 acre Whitman Center property in Bedford Township, and one on the 4.9 acre Hurd Road property.

The facilities at Monroe County Community College are routinely reviewed, including an annual insurance appraisal and an assessment of deferred maintenance conditions throughout campus. The results of these investigations are included in this document to present a clearer picture of the condition of the campus.

In FY2014-15, the Board of Trustees authorized a $16 million HVAC replacement project on main campus that includes a geothermal heating and cooling system for the majority of the main campus buildings. The College is currently seeking to borrow funds to meet this financial obligation. An overview of the HVAC project is included later in this document.

Some recent construction and renovation has received matching State funding. Since this funding was generated by the State through the sale of bonds, affected College buildings and property had to be pledged as collateral. The West Technology, Campbell Learning Resources Center, La-Z-Boy Center, and the Career Technology Center are obligated to the State Building Authority as part of recent construction and renovation work. Once the bonds are paid, all property will revert back to full ownership by the College.

A majority of the buildings on the main campus are earth-toned brick buildings with muted trim, all of which are structurally sound. These buildings are indicated in the following table:

Facility	Area (sq. ft.)	Year Built
Main Campus		
Campbell Learning Resource Center	52,369	1968
Warrick Student Services/Administration	72,219	1968
Life Science	54,905	1972
East Technology	28,523	1968
West Technology	32,180	1968
Welch Health Education	50,700	1997
La-Z-Boy Center	53,329	2004
Career Technology Center	60,425	2013
Power Plant	9,394	1968
Boiler House	2,184	1978
Boiler House 200	2,184	1978
Boiler House 300	1,924	1978
Maintenance Butler Building	1,500	1980
Technology Butler Building	1,830	1983
SAE/Construction Building	768	2005
Salt Storage	400	1999
Subtotal	**424,834**	
Whitman Center Campus		
Whitman Center	17,650	1991
Garage	480	1991
Subtotal	**18,130**	
Hurd Road Property		
Hurd Road Property	18,910	1990
Subtotal	**18,910**	
TOTAL	**461,874**	

INSTRUCTIONAL PROGRAMMING

Much of the information regarding instructional programming is available in the College Annual Report. The 2013-2014 Annual Report is included in this planning document.

Service Areas

Monroe County Community College's tax base is located in Monroe County, and this is the primary focus for its service area.

Program Offerings

In keeping with the programmatic goals set forth in the mission documents, Monroe County Community College offers the following programs:

Transfer/University Parallel/Pre-Professional Programs

The university parallel and pre-professional programs are designed for the students who will eventually finish their education at a four-year college or university. Credits earned in the parallel or pre-professional programs are generally transferable to four-year colleges or universities if the credits meet the following criteria:

1. Satisfactory grades. Grades of "C" or better are necessary for a student to transfer the course to most colleges or universities.
2. Proper selection of courses. A student must select courses designed for college transfer which are consistent with the requirements of the school to which the student plans to transfer. Since no two schools have identical requirements, students should consult with their faculty adviser or counselor to discuss any questions regarding specific programs.

Students following a transfer guide provided by a particular four-year college can complete the first two years of a baccalaureate program at MCCC. In addition, students fulfilling appropriate graduation requirements of Monroe County Community College will be eligible to receive an associate degree.

Career/Occupational Certificate and Degree Programs

Individuals completing a prescribed course of study in one of the career program areas will receive an Associate of Applied Science or Associate of Commerce Degree.

Individuals who wish to upgrade their knowledge and skills or prepare for new areas of employment may choose from a wide variety of source offerings. Special sequences of courses may be designed to meet these objectives.

The following is a list of career/occupational degree and certificate programs available:

Program	Degree	Certificate
Accounting	•	•
Administrative Office Assistant		•
Administrative Office Specialist		•
Administrative Professional	•	

Application Software Specialist	•	•
Automotive Engineering Technology	•	•
Business Management	•	
Chemistry	•

Certificate Programs

A certificate of completion will be granted upon completion of certain specialized certificate programs. Certificate programs are listed in the career program listing.

MACRAO Agreement

Students who started prior to fall 2014 may complete the MACRAO Agreement until the end of the summer 2019. Following is the agreement:

The MACRAO agreement is an agreement between Monroe County Community College and many Michigan four-year institutions. Depending upon the institution and the program, satisfying the requirements of this agreement could allow a student greater flexibility in meeting general education requirements at the four-year institution.

- 6 semester hours of English composition
- 8 semester hours of Humanities (courses must be taken in more than one discipline and must not include English Composition)
- 8 semester hours of Social Science (courses must be taken in more than one discipline)
- 8 semester hours of Natural Science: 1) At least one science must have a lab, 2) One of the sciences may be Math (151 or above), 3) Science courses must be from more than discipline

Fifteen of the 30 credits must be completed at Monroe County Community College.

Courses, which are not transferable, (i.e., technical, vocational, or developmental) are not part of the agreement.

New Michigan Transfer Agreement (Beginning Fall 2014)

In 2012 the Michigan legislature included language in the community college appropriations bill calling for improvement in the transferability of college courses between Michigan colleges and universities by revising the MACRAO Agreement. The Michigan Transfer Agreement has been created in an effort to increase the transferability of lower level general education courses across all Michigan's public institutions. To fulfill the Michigan Transfer Agreement, student must successfully complete at least 30 credits, with at least a 2.0 GPA in each course. These credits should be met according to the following distribution:

- 1 course in English Composition
- A second course in English Composition or 1 course in Communications
- 1 course in one of the following Mathematics pathways: College Algebra or Statistics or Quantitative Reasoning or an upper level course in one of these subject areas
- 2 courses in Social Science (from two disciplines)
- 2 courses in Humanities and Fine Arts (from two disciplines and excluding studio and performance classes)

- 2 courses in Natural Sciences including one with laboratory experience (from two disciplines)

If these courses do not add up to 30 credit hours then the student must take an additional course from one of these groups. One of the above courses must be completed at Monroe County Community College.

Bachelor's Degree Completion Programs

2 + 2 and 3 + 1 Agreements

Monroe County Community College has developed articulation agreements with a number of four-year colleges and universities. These agreements (sometimes called bachelor's degree completion agreements) provide students who are pursuing one of Monroe County Community College's specific two-year associate's degree programs an opportunity to continue their studies and complete the requirements for a baccalaureate degree. The 2 + 2 agreements provide that the student will be able to transfer a minimum of 60 semester credit hours from one of Monroe County Community College's associate degree programs toward selected bachelor's degree programs at the four-year institution. The 3 + 1 agreements are similar but give students the opportunity to transfer more than 60 credits of MCCC coursework for specified degree programs at four-year institutions.

The College has a university center, housing Siena Heights University. SHU has an office on the College's main campus and uses college classrooms and labs to offer classes at the junior and senior level for bachelor's degree programs.

Joint Programs

MCCC has cooperative agreements allowing student to complete components of certain programs at the college and the remainder of these programs at participating community colleges.

Dual Enrollment Programs

State sponsored dual enrollment programs are offered to local high school students as an opportunity to begin their college studies while still attending high school.

Monroe County Middle College

The Monroe County Middle College is a partnership between the Monroe County Intermediate School District (MCISD), Monroe County Community College, and Mercy Memorial Hospital System (Promedica Monroe Regional Hospital) and is designed to provide students with early entry into a health careers program.

Students enter the Monroe County Middle College in the 9th grade with a comprehensive curriculum that will culminate with award of a high school diploma upon graduation. Students in the program also have the opportunity to earn up to 60 transferable college credit hours or an associate's degree and/or a certificate in the field of health science.

Distance Learning Initiatives

MCCC also offers a number of courses through electronic means, including a web-based curriculum. The College utilizes Blackboard Course Management Software for web-based courses. The College is a member of the Michigan Community College Virtual Learning Collaborative. Through this and other systems used by the College, students at MCCC have access to courses offered by other colleges, while students not attending MCCC have access to numerous programs at the College.

Online courses are available in both credit and lifelong learning programs.

Corporate and Community Services Programs

The basic mission of the Corporate and Community Services Division is to provide a variety of educational opportunities to adults within the College service area. Courses and programs are designed in response to expressed community needs, interest of individuals and groups, needs of business and industry, as well as demands for enrichment and recreational activities. The CCS Division is involved in many aspects of the instructional programs offered by the College including: Business Development and Employment Services; Community Services; Economic Development and Corporate Relations; Extension Center Operations and Lifelong Learning. The CCS Division serves about 7,000 non-credit students annually.

The CCS Division provides work force training programs, offering education to area business and industry, often at the business site. CCS personnel are regularly involved in integrated programs with the Chamber of Commerce, Monroe County Business Development Cooperation, and a variety of local and state agencies and organizations dedicated to economic development activities.

Community service programs and activities are an on-going part of the Division. Community services programs include the annual Business and Industry Luncheon.

The Lifelong Learning Office provides educational opportunities for adults in a wide range of non-degree programs. It renders services to individuals and groups having needs which can be more adequately satisfied by short informal educational projects and activities rather than by traditional courses.

STAFFING AND ENROLLMENT

Student Body Composition

Based on demographic data collected by the College for the fall 2015 semester, the typical Monroe County Community College student has a mean age of 23.4, resides in Monroe County (85%), attends as a part-time student (68%), and is enrolled in a transfer program (52.8%).

Detailed demographic data on the student body composition is contained later in this document in the Student Profile section.

Enrollment Trends and Projections

Enrollment for the fall 2015 semester produced an 8.3 percent decrease in headcount (3,192) over the previous fall (3,482), and a 8.7 percent decrease in credit hours (27,011 as compared to 29,571). Fall student enrollment has declined for the fifth time in 10 years. The enrollment decline is not unique to MCCC as the Michigan Association of Collegiate Registrars and Admissions Officers' report on community college enrollment shows 24 community colleges with negative headcounts. Lower fall enrollments are also the case with the neighboring Ohio institutions.

Barring a few exceptions, class size is limited to 30 students per class. Currently, the College is able to handle its existing population, but scheduling demands can sometimes make this difficult on certain days and at certain times. Some scheduling changes can be made to increase the number of students per section, but limiting the number of available sections in an attempt to improve efficiency will likely prove counterproductive as many class times are scheduled to meet scheduling needs of students. If classes are not offered at certain times, students are sometimes unable to take the class at a different time.

Staffing Levels and Projections

Monroe County Community College currently employs 165 full-time staff: 63 faculty, 52 support staff, 25 administrative, 6 professional, and 20 maintenance. In addition, there are approximately 140 adjunct faculty, 25 part-time support staff, and 100 student assistants.

Full-time faculty teach approximately 53.5 percent of all sections. The full instructional load for full-time faculty is approximately 16 contact hours per semester, or 480 student contact hours (30 students max/class x 16 contact hours).

SPACE DEMANDS AND PROJECTIONS

Instructional Space

Monroe County Community College has available at the main campus a total of 86 classrooms, comprised of:

- 37 general purpose classrooms (some also double as conference rooms)
- 15 conference rooms (some also double as classrooms)
- 2 lecture halls
- 10 science labs
- 11 computer labs
- 12 technology labs
- 3 health sciences labs
- 2 art classrooms
- a culinary arts kitchen, a small performance theatre/lecture hall, a distance learning classroom, a fitness center, a childcare lab, an aerobics/dance studio, a gymnasium, a band rehearsal room, and a 500 seat theater/auditorium.

The Whitman Center has available nine general purpose classrooms and a multi-purpose lab.

Long term recommendations (beyond five years) are that the College plan for future growth by creating "placeholders", or specific locations for future development. This will ensure that space remains available when it is needed because of added programs or increased enrollment.

In conjunction with creation of additional classroom space, the College has determined that existing classroom space should also undergo the updates necessary to improve teaching effectiveness. Technology needs at the College for student learning continue to grow at exponential rates. Such needs can be found not only in every classroom and lab, but have permeated outside the walls of the classroom into hallways, the cafeteria, and lobbies, as the demand for individual and group study areas that offer and support technology need to be addressed.

In doing so, three apparent areas of need have surfaced. The first is systems need. This is the various technology systems that are needed at this point in time, at this campus, to provide the most effective and efficient support and delivery for student learning. The second is the infrastructure needed to support these systems, including items such as lighting, electrical power, acoustics, and flexibility. The third factor is the human resources that will be needed for systems training and support.

To address these critical needs of space, new curriculums, and changing technology the College constructed a Career Technology Center and will perform major renovations to current buildings in the future.

Support Spaces

Campbell Learning Resources Center

The main floor of the library was totally renovated in 2000 to upgrade facilities and technology, creating a modern learning resources facility. The Learning Assistance Lab on the second floor was renovated in the summer of 2005. In 2009, technology upgrades were made to classrooms in the Campbell Learning Resources Center.

Warrick Student Services/Administration Building

The Warrick Student/Services Administration Building currently houses most of the student services in a traditional, departmental fashion. In order to provide a simpler interaction between students and College services, a reorganization of departments into a One-Stop Shop model is something the College might explore for the future. This model would allow students to deal with fewer locations throughout the entire Admissions / Registration / Financial Aid / Cashier process.

To improve operational efficiency, to better identify the services offered, and to make the areas more welcoming, renovations did take place in 2009 in the Admissions/Counseling/Registration area.

The building did have an added wing in 1988 to provide office, classroom, and conference room spaces.

The building also houses a kitchen for culinary instruction (built in 1988), a bookstore (renovated in 1990), a student activity area (renovated in 2000), and a cafeteria (kitchen and serving areas renovated in 2002). In 2005, a variety of other offices also underwent renovations, including payroll and accounting, mailroom, accounts payable, human resources, and campus security. In 2009, work was completed on renovations to the Admissions/Registrar offices as well as the adjacent entryway and hallway. In 2014 due to water remediation issues, renovation was done to a student activity area in the basement.

Welch Health Education Building

The Welch Health Education Building, completed in 1997, provides state-of-the-art space for Nursing, Respiratory Therapy and Physical Education Program classrooms and laboratories, a multi-purpose room, a dance/aerobics studio, and a fitness center.

The facility is located at the north end of the site. The site to the east of the building is not currently landscaped and, with proper drainage systems installed, would be a prime candidate as a placeholder for any outdoor athletic fields and additional parking.

La-Z-Boy Center

A 53,700 square foot, $12 million, multi-use Instructional Center for Business Training and Performing Arts (La-Z-Boy Center and Meyer Theater) was completed in 2004. This facility houses a 500 seat auditorium with full support facilities, a pre-function assembly space, a multi-

purpose lecture hall, dividable classrooms and rehearsal spaces, a computer classroom, offices for the Corporate and Community Services Department, choir and band rehearsal rooms, a scene shop and dressing rooms.

Training for existing and new industries has become a priority, and appropriate facilities are required to effectively meet the expressed need. Cultural development has been a long-standing component of the College Mission, and construction of the facility completes the original campus plan, which called for a facility to house many of these functions. This building, while designed as a conference center, enables the College to contribute to the cultural arts – a true example of a liberal arts approach to economic development.

The building is located at the northwest corner of the Quad with the main entrance facing the existing parking lot #2 and a student entrance facing the Quad. This location was chosen to help complete the enclosure of the Quad, create a highly visible presence from Raisinville Road and to take advantage of the available 519 parking spaces in lot #2.

The College received funding from the State for 50 percent of building costs. Two million of the College's $6 million match was gifted by the La-Z-Boy Foundation. Hence, the building was officially named the La-Z-Boy Center.

Career Technology Center

A 60,425 square foot, $17 million, Career Technology Center was completed in 2013. This facility houses the classrooms and labs in support of the Applied Science and Engineering Technology Division.

The Career Technology Center was designed to support the delivery of instruction necessary for developing the skill set required by today's high-demand, high-skill jobs. The facility will allow for expansion of existing programs in the areas of nuclear engineering, welding, construction, computer-aided drafting and manufacturing, electronics, quality assurance and automotive engineering and service with an emphasis on hybrid and battery technology. In addition, it provides the infrastructure and equipment required to develop technology programs in the emerging areas of advanced manufacturing, renewable energies (wind, solar, fuel cell technology) and sustainable green technologies.

The building is located between the Life Sciences Building and the Welch Health Education Building facing parking lot #2. This location was chosen to create a more cohesive campus footprint thus eliminating what many felt was a large separation on main campus between the majority of buildings on main campus and the Welch Health Education Building.

The College received funding from the State for 50 percent of building costs. A capital campaign in support of the project raised $2.4 million in support of the facility.

Whitman Center

The Whitman Center provides general purpose instructional space and a multi-purpose lab in a building that was planned for expansion from the end of each wing. Current enrollment does not justify expansion of the facility. This will, however, be a topic of continued review and

monitoring, possibly resulting in a recommendation of building expansion and additional parking in the future should enrollment growth dictate a need for such expansion.

Survey Summary

The input of faculty and staff was enlisted through past surveys to assist in the planning process in uncovering trends, needs, successes and deficiencies that the Master Plan would need to address. The responses were useful in confirming that the priorities the College was pursuing for future growth were in line with needs of the users.

In general, respondents felt that the College was above par in its programs and in producing a pleasant, relaxed and open place. Recent surveys of staff and students indicate a high level of satisfaction that the campus is well-maintained and safe and secure.

Need for updates to existing classrooms and laboratories were voiced as a common concern. This included updates to classroom environment, such as improved HVAC, lighting and acoustics to provide better conditions for learning. There was also repeated mention of a need for flexible classroom design that would be adaptable to a myriad of teaching techniques.
In a staff survey (July 2007 Budget Updates Survey), 81 percent of respondents indicated that they believed the campus facilities and grounds needs were being adequately addressed.

Summary - Challenges

Based on the research, analysis and synthesis outlined in the previous pages, the following challenges were developed. These challenges are vital in creating the "problem" to be solved, acting as catalysts to the thinking process that takes place throughout the entire master planning process. Often these challenges drive discussions among the members of the Master Planning team, bringing undiscovered challenges to light and producing a more cohesive final product.

The main challenges faced by Monroe County Community College as part of the development of a Master Plan are as follows:

- **Facilities Condition**

  Building exteriors and physical structures are an ongoing challenge as they age

  Aged and outdated HVAC and other operational systems
    At end of life, malfunctioning
    Unable to meet demands, especially from computer heat loads

  Electrical capacities

  Outdated classrooms
    Technology, furniture, finishes, equipment, acoustics, lighting, accessibility

- **Programs**

  Need for modern facilities for technology programs (addresses through construction of Career Technology Center)

  Need for additional lab and classroom space for health programs

  Limited space for Culinary Arts program

- **Barrier Free Accessibility**

  Learning Assistance Lab on second floor, difficult to access

- **Student Support Services**

  Located in several areas, some not easily accessible

- **Growth**

  Update placeholders

  Future project sites
  Building additions

  Whitman Center

- **Site**

  No athletic fields

Many of these future facility needs, as well as their projected costs, can be found in the Maintenance and Replacement Fund section.

Solution Criteria

Before master plan solutions are developed to address the above list of challenges, certain criteria are agreed upon to act as litmus tests for each solution to successfully pass.

Similar to architectural guidelines that provide a framework for future facilities that ensures a common theme among buildings; these planning guidelines ensure that any proposed solutions all adhere to a common theme, helping to avoid planning conflicts.

Following is a list of the solution criteria that was used to measure each proposed solution:

- Should physically support the College Mission Documents and Strategic Plan.
- Should improve student retention and assist in marketing the College to prospective students.
- Should address technological changes and the need for technology flexibility.
- Should provide classroom flexibility for different users and teaching methods.
- Should simplify student and visitor interaction with the College.

MASTER PLAN

At this stage of the master planning process, the vision for the College and the needs dictated by the programs are translated into physical projects based on the opportunities available within the attributes and constraints of the facilities and site. This is the point where the needs, desires and abstractions of the program take on structure and purpose, creating a blue print for the future development of the College.

When potential and expanded facilities are organized on the site, the Master Plan provides placeholders for future projects – an overall scheme ensuring that any new building will be well integrated into the whole campus, with forethought to the infrastructure needed to support that facility.

Phase 1
2009-2011

Deferred Maintenance

The College has made a priority over the last several years to address issues of deferred maintenance throughout the campus. This included completion of re-roofing all campus buildings, replacement of all parking lots, replacement of emergency alarm systems, retrofitting all interior lighting, replacement of its energy management system, and maintenance work on several HVAC systems.

Three years ago, the College completed its second college-wide facilities assessment, resulting in a prioritized list of building systems requiring attention. As part of the assessment, an easily updateable database was created, allowing the College to monitor and record systems condition and complete repairs. This assessment and database, with detailed facilities conditions and associated repair and/or replacement cost was performed by SHW Group and is included in this document. Examples of items requiring repair and/or replacement include:

- Isolated HVAC problems throughout campus, including air leakage, condensation and systems unable to meet increased cooling loads.
- Non-functional site lighting, due to deterioration of underground conduit.
- Deterioration of building entries.
- Electrical systems operating at maximum capacity.
- Original galvanized piping deteriorated to the point of replacement.

(A more comprehensive list of such projects can be found in Appendix 6, *Maintenance and Replacement Fund*.)

The College intends to continue its efforts toward improving the condition of the facilities throughout the campus, repairing and replacing systems as necessary to avoid the potential complications and exponential costs associated with deferring needed maintenance.

Renovations and Updates

A separate component of facilities upgrades, renovations and updates fall under the category of capital improvements. These recommendations were placed in this first phase as they are essential in providing the flexibility and technology required by current and future teaching needs.

Capital improvements of this type are also essential in marketing the College to students, business and industry in a highly competitive environment. This is an essential, but often overlooked part of attracting and retaining students and business partners.

Observation of classrooms, labs and equipment, and information collected from surveys indicate that the College needs to continue its efforts to improve the physical learning environment in all departments.

Many existing general classrooms are in need of technology and environmental upgrades to meet the needs of current technology and teaching methods. In the majority of College buildings, these improvements include:

- Upgraded HVAC systems to improve acoustics and allow for better control of temperature in each classroom.

- Improved technology support, including lighting and window shading designed for intensive multimedia equipment use.

- Upgraded finishes (carpeting, ceilings, whiteboards) and furniture.

- Integration of new teaching delivery technology into classrooms. These upgrades would include installation of wireless networks, low cost multimedia projectors and other classroom learning equipment.

Landscape and Site

In the summer of 2003, landscaping around the Welch Health Education Building was accomplished. Landscaping was one of the components removed from the plans when this building was constructed in 1997 to help in reducing costs. (A parking lot was the other major component.)

Also in 2002 was the construction of a 26’ x 40’ building that served as a garage and storage area for the College’s SAE car and equipment, and a lab area for “dirty work” for construction classes. This is a heated, block building with two garage doors and is located to the south of the West Technology Building. With the construction of the Career Technology Building, this facility is now being used by the Maintenance Department for landscape equipment.

Much of the landscaping was also removed from the La-Z-Boy Center project to reduce construction costs. This work was completed in the summer of 2005 and 2006.

In 2006 a total of 184 ash trees were replaced on the Main and Whitman Center campuses.

In the summer of 2005, a plan to replace much of the campus sidewalks was initiated and implemented over the course of the next five years.

Career Technology Center

Technology has changed in leaps and bounds over the last forty years when the College was first built. Unfortunately, the College's facilities housing technology instruction have not been able to keep pace with these changes due to physical limitations, and building constraints, and the requirements of newer technology systems.

To address this need the College constructed a Career Technology Center. The new facility offers classrooms and labs in support of the Applied Science and Engineering Technology Division course offerings as well as business training contracted through the College's Corporate and Community Services Division.

With the opening of the Career Technology Center, vacated areas have been reviewed as possible spaces to address other facility concerns such as adequate classrooms and labs for the College's Information Assurance and Security Program, the Culinary Skills and Management Program, office and classroom space for the Monroe County Middle College, the consolidation of areas used for art instruction, and the relocation of the Learning Assistance Lab to ground level.

Phase 2
2011-2014

Whitman Center

In October 1999, the College purchased an additional 14.5 acres of property immediately to the west of the existing Whitman Center site. As the Whitman Center itself was designed for expansion on the existing site, the proposed use for the new property is to provide an additional buffer from surrounding properties and, most importantly, to provide additional parking, if needed.

If enrollment at the Center were to increase, MCCC, as part of Phase 2, would investigate the need for building expansion and additional parking at the Whitman Center.

Warrick Student Services/Administration Building Addition and Reconfiguration

In prior surveys and Master Plan Committee meetings, a desire was voiced to consolidate all student services in one location on campus. This consolidation would be in a One-Stop Shop format, leading students through the process of admissions, registration, financial aid and payment in fewer steps, rather than the current model of moving between offices and dealing with numerous personnel. The recommended changes would include:

- Potential relocation of the Learning Assistance Lab (LAL) to the East Technology Building, creating an assistance office that would be able to aid the student from entrance to job placement in the same location as other student services. An

alternate would be to locate the LAL to other available ground floor space on campus.

- Construction of an addition to the building in order to meet the logistical needs of a Student Services One-Stop Shop format is desirable. Such an addition should also take into consideration the consolidation of Business and Administration offices in order to more effectively address operation, and student and constituent access.

- Potential relocation and enlargement of the Bookstore.

- Potential relocation of Financial Aid and Cashiers Office to adjoining suites.

Phase 3
2014-2018

Athletic Fields

There has been considerable debate over the merits of outdoor athletic fields at Monroe County Community College. Concerns range from the need and projected use of athletic fields, to the ability of the soil to support athletic fields over the long-term without installation of sub-surface drainage system.

One point that cannot be disputed is the question of land availability. The Main Campus currently has enough property available in the immediate vicinity of the Welch Health Education Building to support numerous different athletic fields.

As part of Phase 3, it is recommended that the College undertake a study to determine the need of athletic fields and if the study warrants, proceed with planning, design and initial construction of athletic fields for sports determined as viable. This construction will include the additional parking necessary to support both the field and proposed future development (Phase 3 and beyond).

This recommendation is an example of what was described earlier as a “placeholder”, or a setting aside of land for a specific use to ensure that future development does not proceed without taking this use into account. Construction of these fields may or may not occur, but planning for this potential is prudent.

Construction would commence as needed, with the project phased in as funds became available. An alternative to funding solely by the College would be to share funding and use between the College and the community.

As the exact mix of potential athletic fields has yet to be determined, the level of planning at this point only indicates the most likely location for this project.

Warrick Student Services/Administration Building Addition and Reconfiguration

The second part of the proposed changes to the WSSA Building assumes the completion of the first group of recommended changes to this building and a demonstrated need for additional space. These recommendations are long term and will need review in future revisions of this Master Plan to determine their continued viability. These changes focus on three areas of the building:

Culinary Arts

The recently renovated Culinary Arts kitchen is able to meet current space needs, but will be unable to accommodate program growth without either additional space or additional sections (a difficult proposition to market to working students).

Student Lounge and Basement Storage

One issue that arose during the facilities walkthroughs is the difficulty physically handicapped students face in accessing the basement student lounge known as the "Cellar". Recently renovated, this space is an attractive, multipurpose lounge with television, vending, a pool table and informal seating. Unfortunately, the only access for the mobility impaired is through the freight elevator located off the loading dock.

An immediate, but temporary solution is to convert the elevator and lobby to a more passenger-oriented and less freight-oriented space or, even better, to construct an exterior entrance.

Life Sciences Building Expansion/University Center

Although available space at the College is thought to be capable of accommodating projected program and enrollment growth for the next two to three years, it is prudent to plan locations where potential facility growth could occur.

The existing Life Sciences Building is the logical location to construct new classroom facilities for several reasons:

- Originally designed for expansion, the building is able to accommodate an addition in several locations.

- This building and the site immediately to the north are located closer to the majority of existing parking than any other potential sites on campus.

- Expansion of the building to the north would address one of the challenges laid out in this Master Plan – to draw the campus buildings closer together through improved building interconnection. The proposed addition would considerably reduce the outdoor travel distance between the Quad and the Welch Health Education Building.

The proposed addition to the Life Sciences Building consists of two parts, the first being development of a University Center. This facility type was considered in previous Master Plans

as a way of addressing the conferencing needs of business and industry as well as programs needs of four-year institutions wishing closer affiliation with the College.

Many of the business and industry and conferencing needs will be met in the La-Z-Boy Center. Offices and classroom for university partners, however, are still unaddressed in the currently available facilities.

The proposed University Center would, in its program, include the following:

- Technology intensive, distance learning enabled general classroom space available to both College and university programs.

- Office space for university partner administration and faculty.

- A new, much more open entrance and lobby facing Raisinville Road serving both the University Center and the Life Sciences Building.

The second part of this addition is an unprogrammed space to the north of the University Center. Potential uses for this space include:

- Additional general classroom space for University Center or College programs, if warranted by growth in this area.

- A permanent, state-of-the-art space for IT Department and computer classrooms. This would allow the IT Department to relocate from the basement of the Campbell Learning Resources Center into a space designed specifically for this use, eliminating power and HVAC problems that often arise when large computer systems are housed in older buildings. If a new technology building was to be constructed, it may be possible to relocate the IT offices to the vacated technology buildings, assuming those facilities would be renovated.

Long Range Priorities
2019

As part of the Master Planning process, ideas are considered and developed that, due to priorities and circumstances do not fit well into the scope of a five to ten year plan. The following projects are examples of ideas that should be recorded for future planning efforts.

Campbell Learning Resources Center Library Expansion

There is an understanding that the existing Campbell Learning Resources Center, specifically the library, may not always be able to adequately house the collection required by a modern institution. Unfortunately, between the design of this building and proximity of neighboring buildings, the CLRC becomes somewhat landlocked.

Several directions for expansion were considered for this building, with the final conclusion being that the best direction may be none at all. One solution to this potential problem would be

to relocate programs housed on the second floor and basement of the CLRC to other buildings, possibly including the proposed University Center or East and West Technology buildings that has been be vacated with construction of the Career Technology Center.

This would make available up to the entire second floor of the building to house a growing collection and new, as of yet undeveloped multimedia information delivery systems.

Welch Health Education Building Expansion

In order to pull the disparate parts of the campus closer together, any proposed expansion of the Welch Health Education Building would best be toward the south, in the direction of the main part of campus. Potential uses for the additional space, if warranted, may be as follows:

- Additional health education classrooms and labs.
- Racquetball courts.
- Indoor tennis courts.
- Early childhood education classrooms and child development learning labs.

Future Campus Expansion Zone

This is another placeholder, indicating the most likely location for as of yet unplanned campus facilities. Part of any development planning in this area should include additional parking, possibly in the format indicated on the site plan. Any detailed planning in this area should consider the potential for reorienting the main entry to campus, possibly locating it further north along Raisinville Road.

ARCHITECTURAL GUIDELINES

Architectural guidelines are an important part of a master plan, providing a design framework for future development. The goal is not to stifle creativity or the use of new materials or techniques, but to foster a harmony between existing and future facilities, thus avoiding a disjointed appearance that can easily occur on a campus built up over several decades.

Suggested architectural guidelines are as follows:

- New facilities should embrace sustainable design with the goal of meeting LEED certification.
- New buildings should compliment the scale of existing buildings, maintaining a story limit of fewer than five stories.
- Building materials, although not needing to exactly match, should not look out of place with the dominant facing material of earth-toned brick.
- Designs should add character to the campus, but not create architecture that is disparate to the whole campus image. In other words, a "signature building" should be read as the signature of Monroe County Community College.
- Building should not have a readily apparent back side, but address on all facades the adjacent use and context, and be oriented to compliment existing buildings and the surrounding landscape. This does not preclude well defined building entries, which should use pedestrian-scaled detail and landscape to ensure easy identification.
- Interior finishes should be durable and low maintenance, but not overly hard and uninviting and strive for using renewable materials. Acoustics and lighting should be considered important in every space.
- Landscape materials should be a continuation of current plantings and should be as low maintenance as practical, emphasizing "broad brush strokes" of similar planting instead of numerous installations of mixed vegetation. Examples of groupings include trees evenly spaced along walks to emphasize pathways, trees planted as windbreaks, and selected vegetation planted to act as backdrops and to identify gathering spaces.
- Flowering annuals and other high-maintenance plants should be used minimally and only as accents to reduce maintenance requirements. Planting should emphasize indigenous vegetation over exotic species.
- Site lighting should be appropriately scaled for its use, emphasizing pedestrian-scaled fixtures wherever possible.
- Vehicular access roads should not cross pedestrian paths. These walkways should be easily identifiable from a moving vehicle, possibly through a change in material, to help improve pedestrian safety.

- **Cafeteria**
- **A-154 –** Office of Institutional Advancement
- **A-159 –** Financial Aid Office
- **A-165 –** Art Studio
- **A-173 –** Conference Area
- **Information Window/Switchboard –** Lost and found, notify sheriff in case of emergency
- **Admissions and Guidance Office –** Academic advising and counseling
- **Registrar's Office –** Transcripts
- **Cashier –** Pay fees, ticket sales for special events
- **Bookstore**
- **Culinary Arts Office**
- **Cellar –** Student Government Office, vending machines, microwave, recreation area
- **Administrative Offices**
- **Campus Security**

C CAMPBELL LEARNING RESOURCES CENTER

(Includes the Library, Learning Assistance Lab, Information Systems, as well as classrooms and faculty offices for the Humanities/Social Sciences and Business Divisions)

Elevator available in south hallway

Downstairs:

- **C-3 –** Little Theatre (seats about 65)
- **C-8 –** Computer Lab (by faculty appointment only)
- **C-10 –** eLearning and Instructional Support

Main Floor: Library

- Art display in front which regularly rotates with displays from visiting artists
- Quiet study area
- Copy machines for student use
- Computer area for library research

Second Floor:

- **C-201 –** Humanities/Social Sciences Division Office
- **C-218 –** Learning Assistance Lab
- **C-227 –** Faculty Workroom
- **C-233 –** Business Division Office

E EAST TECHNOLOGY BUILDING

(Houses various classrooms, labs and the Monroe County Middle College offices)

- **E-107 –** Ceramics Lab
- **E-121 & 123 –** Computer Classrooms
- **E-109, 111, 113, 115, 117 & 119 –** Monroe County Middle College offices

H WELCH HEALTH EDUCATION BUILDING

(Houses the Health Sciences Division, Nursing and Respiratory Therapy classrooms, Multipurpose Room, Fitness room, and Dance Studio)

- **H-103 & 105 –** Nursing classrooms and labs
- **H-110 –** Fitness Center
- **H-115 –** Health Sciences Division Office
- **H-131 –** Multipurpose Room
- **H-139 –** Dance/Aerobics Room
- **H-157 & 159 –** Respiratory Therapy classrooms and labs
- **H-164 –** Physical Education Classroom

L LIFE SCIENCES BUILDING

(Houses the faculty offices for the Science/Math Division as well as classrooms and labs)

First Floor:

- **L-102 & 104 –** Anatomy and Physiology Labs
- **L-105 –** Greenhouse
- **L-108 & 110 –** Biology Labs
- **L-112 –** Siena Heights University Office
- **L-113 –** Physical/Earth Science Lab
- **L-126 –** Science/Mathematics Division Office
- **L-140 –** Largest lecture hall on campus
- **L-145 –** Math Den

Second Floor:

- **L-201 –** Lecture hall
- **L-202 –** *AGORA* (student newspaper) Office
- **L-203 –** Practical Nursing Lab
- **L-205 & 207 –** Chemistry Labs
- **L-210 –** Physics Lab

W WEST TECHNOLOGY BUILDING

(Houses the Regional Computer Technology Center, classrooms and some Business Division faculty offices)

- **W-157 –** Regional Computer Technology Center

T CAREER TECHNOLOGY CENTER

(Houses the Applied Science and Engineering Division offices, classrooms, labs and the Enrico Fermi Atomic Power Plant Historical Exhibit)

- **T-116 & 122 –** Electronics/Electrical
- **T-149 –** Applied Science and Engineering Division Office
- **T-152 –** Video Over IP Classroom
- **T-154 –** Construction Management
- **T-156 –** Rapid Prototyping
- **T-158 –** Mechanical Design/CAD
- **T-159 –** Metrology
- **T-160 –** Renewable Energy
- **T-161 –** Construction/Sustainability
- **T-164 –** Automation/Fluid Power
- **T-166 –** Nuclear Engineering Technology
- **T-167 –** Materials Science
- **T-169 –** Welding
- **T-173 –** Product and Process (CAD)
- **T-180 –** Automotive

Student Concourse:

- Enrico Fermi Atomic Power Plant Historical Exhibit
- ASET Division Displays
- Student Study/Lounge Areas

Z LA-Z-BOY CENTER

(Houses the Meyer Theater, Atrium, make-up and dressing rooms, Band/Choir Rehearsal Hall, various conference rooms, Corporate and Community Services Division Office, Workforce Development and Lifelong Learning Offices)

- **Z-203 –** Board Room
- **Z-275 –** Band/Choir Rehearsal Hall
- **Z-286 –** Corporate and Community Services Division Office/Workforce Development and Lifelong Learning Offices

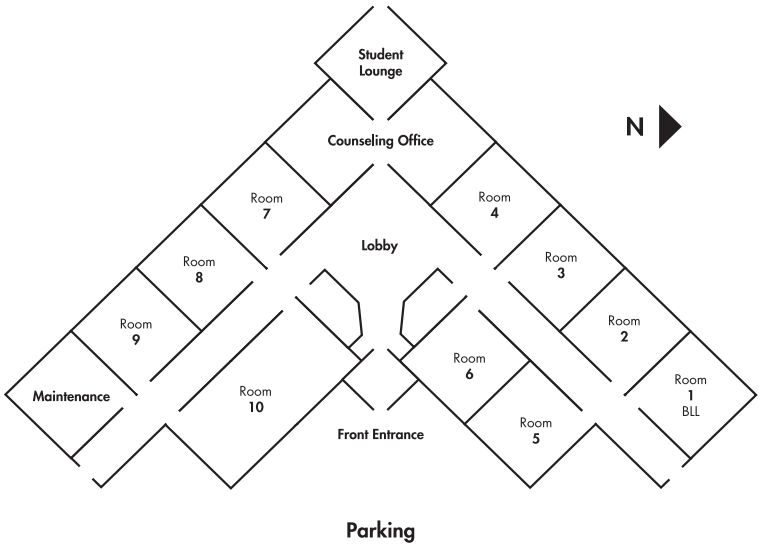
Whitman Center

Designed to serve the residents of Southern Monroe County and Northern Toledo, the Whitman Center in Temperance offers a wide range of credit courses applicable toward an Associate Degree, as well as many Lifelong Learning classes.

- **Whit 1 -** Business Learning Lab - Open Access Computer Lab
- **Whit 5 -** Computer classroom
- **Whit 10 -** Multipurpose Lab (Art/Biology)
- **Whit 2, 3, 4, 6, 7, 8, 9 -** Standard Classrooms
- Whitman Center Office and Faculty Conference Room

Some services provided to students at the Whitman Center campus are:

- Career counseling
- Placement testing
- Academic advising
- Registration
- Processing Add/Drops, transcript request, fee payments
- Test proctoring
- Open Computer Lab



Office Hours:

GOING GREEN at MCCC

MONROE COUNTY COMMUNITY COLLEGE'S RECYCLING PROGRAM

We wish to thank you for doing your part to protect our environment. Your efforts truly do make a difference! Please follow these guidelines when gathering and preparing your materials for MCCC's Recycling Program.

What can be recycled through MCCC's Recycling Program?

The complete list of materials is graphically displayed below. Please post this in your area. You can recycle office paper (any color), paperboard (such as tissue boxes), newspapers, magazines, junk mail, plastic bottles, metal cans, glass bottles and jars, plastic bags and cardboard boxes.

How does it work?

Employees have "paper mix" recycling containers available for use at their desks. Larger, 23-gallon bins are strategically placed throughout campus for all other recyclables. Staples do not need to be removed from papers. Please empty and rinse all containers.

Items in Group #1 need to be placed in paper-mix containters. Items in Group #2 need to be placed in appropriately labeled 23-gallon containers. Items in Group #3 need to be broken down and placed next to the nearest recycling container.

Can I bring materials in from home?

Please do not bring materials from home. Storage is limited, and MCCC is contracted for a certain amount of recyclables.

What about office "clean outs" or items that need to be shredded?

The Recycling Program is to be utilized for daily activities. For a large office area "clean out," please contact the Maintenance Department to get extra containers. Please continue to perform shredding duties as you have in the past.

Why is it important to recycle at MCCC?

It is projected that MCCC produces nearly **1 million pounds of waste** a year, which equates to **500 tons**. Without recycling, all of that would go into landfills. Through the MCCC Recycling Program, **43 percent of that waste will be recycled and diverted from landfills**. That's about **205 tons** or **410,000 pounds**.

ACCEPTABLE MATERIAL GUIDELINES (Please save these guidelines for future reference.)

GROUP #1 (must be placed in paper-mix containers)

Newspaper
Remove bags, strings and rubber bands

Office Paper
All types and sizes

Paperboard
No wax coated paperboard

Magazines and Catalogs
All types and sizes

Phone Books
All types and sizes

Junk Mail
Envelopes, flyers, brochures, postcards, etc..

GROUP #2 (must be placed in appropriately labeled 23 gallon containers)

*Clear Glass
Empty, clear glass only

*Plastic Bags
Most retail and grocery bags

*Aluminum Cans
Empty cans only

*Plastic Jugs/Bottles (#1 & #2)

*Household Plastic (#3 - #7)
Empty containers only

*Steel and Tin Cans
Empty cans only

* Please rinse/clean containers before putting into recycling bin.

GROUP #3

Cardboard and Paper Bags
Flatten cardboard and cut into pieces
No wax coated cardboard

(Must be broken down and placed next to the nearest recycling container)

UNACCEPTABLE ITEMS

- Paper milk or juice cartons
- Styrofoam containers/packing
- Garbage
- Propane tanks
- Paint cans
- Colored glass
- Medical waste/syringes
- Flammable liquids
- Household cleaners
- Chemicals (dry or liquid)
- Wood items
- Concrete
- Garden hose
- Electrical cords

PLASTIC REFERENCE GUIDE

- Plastic soft drink and water bottles, catsup, mouthwash and salad dressing bottles; peanut butter, mayo, pickle, jelly & jam jars.
- Milk, water, juice, shampoo, dish and laundry detergent bottles; yogurt containers, cereal liners, grocery, trash and retail bags.
- Clear food and non-food packaging and electrical cable insulation.
- Dry cleaning, bread and frozen food bags, squeezable botteles (e.g honey, mustard, BBQ sauce, etc.)
- Catsup bottles, yogurt containers, margarine tubs, medicine and vitamin bottles, etc.
- Compact disc jackets, food service applications, grocery store bags, aspirin bottles, cups and plates. (No Styrofoam)
- Three- and five- gallon reusable water bottles, some citrus juice and catsup bottles.

*See bottom of container for plastic type

OPPORTUNITY
ONLY YOU CAN MAKE
POSSIBLE THE MUCH-NEEDED
Monroe County
COMMUNITY
COLLEGE
VOTE
MONDAY, JUNE 29

Honoring the past. Focusing on the future.

A Message from the President

Fifty years ago, Monroe County Community College brought something to Monroe County that had not existed here before – the opportunity to obtain a college education locally.

Since June 29, 1964 – the day MCCC was officially created by the voters of Monroe County – it has remained a constant within the community, evolving with the times to adapt to changing needs and continuing a record of excellence and service.

Throughout all of last fiscal year, which coincided with my first full year as MCCC's president, the college and the community celebrated the many watershed moments and accomplishments of MCCC throughout its history.

The year culminated with a daylong festival and all-class reunion in June right in the center of campus. It was a fitting tribute to all the visionaries, employees, alumni and community members who built this college into what it is today: a high-quality higher educational institution that over the years has served, according to our internal studies, seven out of 10 Monroe County residents or members of their immediate families.

As we honored our storied history, we also began preparing for the college's next 50 years. Last year, MCCC embarked on two extensive college-wide planning initiatives – a new strategic plan and the college's first-ever enrollment management plan. We also reached several milestones and completed initiatives that will prepare the college and the community for what the future holds for our region.

I invite you to turn the page to find out more about Monroe County Community College and our accomplishments over the past year, and how we honored our past while preparing for the future.

Kojo A. Quartey, Ph.D.
President

*"In short, Monroe County Community College is **your** college, Mr. and Mrs. Citizen. **You** created it, **you** support it, **you** use it. That's why we're here, and that's why we operate with **you** in mind."*

Dr. Ronald Campbell
MCCC's First President

Celebrating 50 Years of Enriching Lives

Fifty years. A half century. More than 18,000 days. In 2013-14, MCCC commemorated 50 years of continuing excellence and service.

Festival, All-class Reunion Mark Milestone

In June, MCCC hosted an all-ages, community-wide celebration and all-class reunion on the central mall of the Main Campus to mark the college's 50th anniversary. The event began at 1 p.m. and culminated in a spectacular fireworks show at dusk. Headlining the festival was "American Idol" winner and national recording artist Kris Allen. Also featured were multi-platinum rock group The Verve Pipe; Toledo-area band Madison Avenue; Chelsea's Ben Daniels Band, led by the son of Emmy-award-winner Jeff Daniels, and Baskery, a Swedish folk rock band.

The event also included a children's zone with a bounce house, obstacle course and 20-foot slide; fun and educational games; face painting; a dunk tank; college exhibits; an alumni art show; a culinary cooking exhibition; lifelong learning demonstrations, and a showcase of current credit and non-credit academic offerings.

The festival was made possible by a grant from The Foundation at MCCC and through the support of sponsors, including Laibe Electric/Technology, DTE Energy, Dolce Vita and Nick & Nino's. No college funds were used to underwrite the event.

An 'Encore' Season of Events

Some of the best acts to grace the La-Z-Boy Center, Meyer Theater stage returned last year for an "encore" season in honor of the facility's 10th anniversary and the 50th anniversary of the college. Among those who returned were 1964 (The Tribute), Heywood Banks, Crystal Bowersox, "Late Nite Catechism," Hotel California (A Salute to The Eagles) and Livingston Taylor.

Promotional Campaign Highlights Anniversary Year

MCCC's traditional advertising campaign took on a new twist last year with added emphasis on the college's 50th anniversary. A special anniversary logo was created, and print and Web advertisements, billboards and radio commercials all featured the message, "50 Years of Enriching Lives." A special large-format banner commemorating the anniversary was mounted on the side of the Life Sciences Building and was visible to all who visited campus, as well as motorists on Raisinville Road. A slide show of historical college photographs was utilized at the college's Monroe County Fair booth and at other community events. A special anniversary tabloid that retold the college's history was inserted in nearly 30,000 issues of the Monroe Evening News and Bedford Now. The tabloid was also given to patrons as they entered the college's 50th anniversary festival in June.

CELEBRATING 50 YEARS OF ENRICHING LIVES

A Historical Timeline of MCCC's First 50 Years

1964
- Citizens of Monroe County vote by a nearly two-to-one margin to establish a community college district.
- First college trustees are elected.

1965
- First president, Dr. Ronald Campbell, is hired.

1966
- First MCCC classes are offered at Ida High School; 469 students enroll.

1967
- Classes begin in the technology buildings on the new MCCC campus on Raisinville Road for more than 1,000 students.

1968
- The Student Services/Administration Building and the Learning Resources Center open.
- MCCC's inaugural commencement exercises are held in conjunction with a campus dedication.

1971
- Construction of the Life Sciences Building is completed.

1972
- MCCC is notified of its accreditation by the North Central Association of Colleges and Secondary Schools.

1977
- South Center (in rented facilities from Bedford Public Schools) opens.

1980
- Voters approve millage increase, providing much needed financial stability for the college.

1986
- Jefferson Center, north of Monroe (in rented facilities from Jefferson Public Schools) opens.
- The college's second president, Gerald D. Welch, takes office.

1990
- Siena Heights University begins offering baccalaureate completion programs on MCCC's Main Campus.

1991
- Whitman Center opens in southern Monroe County.
- Topographical makeover of Main Campus is completed.

1997
- Health Education Building opens.

1998
- Fiberoptic network is installed on Main Campus.
- The Foundation at Monroe County Community College is established.

2000
- The Jefferson Center is closed due to declining enrollment and a decision by Jefferson Public Schools that eliminated staff support for the MCCC center.
- The college's third president, Audrey M. Warrick, takes office.

2002
- Expanding four-year university offerings on campus, Eastern Michigan University opens EMU-Monroe.

2003
- The college's fourth president, Dr. David E. Nixon, takes office.

2004
- The La-Z-Boy Center, featuring the 550-seat Meyer Theater, opens.

2007
- The installation of wireless Internet capabilities throughout Main Campus and the Whitman Center is completed.

2011
- A major Detroit Edison solar array is installed on the MCCC Main Campus.

2013
- Dr. Kojo A. Quartey becomes the fifth president in the history of MCCC.
- The Career Technology Center opens.

2014
- MCCC celebrates its 50th year of existence.

Preparing for the Next 50 Years

More than 15,000 students have graduated from MCCC since its creation 50 years ago, and the college continues to evolve to best serve the higher educational needs of the community-at-large.

Quartey Leads Community Engagement, Strategic Planning and Enrollment Management Initiatives

On August 1, 2013, Dr. Kojo A. Quartey became the fifth president in the history of MCCC and brought with him an unwavering commitment to promoting the power of education – specifically community college education. He immersed himself in the culture of MCCC and the community by individually meeting with as many faculty and staff members and community residents as possible and making countless appearances at local schools, civic clubs, non-profit organizations, small businesses and corporations. Quartey also led the college in two extensive, college-wide planning initiatives – a new strategic plan and the college's first-ever enrollment management plan.

Residents Give Input on MCCC's Future

Residents across Monroe County got the opportunity to give input on the future of MCCC in November during the "MCCC Presidential Listening Tour of Monroe County." President Dr. Kojo A. Quartey engaged in direct conversations with community members to get a first-hand feel for what different areas of the county desire from the college in the future in terms of programs and services. There were six stops on the tour – all Monroe County Library System branches – including Ellis Library and Reference Center in Monroe,

Frenchtown-Dixie Branch Library in Monroe, Bedford Branch Library in Temperance, Dundee Branch Library in Dundee, Dorsch Memorial Branch Library in Monroe and L.S. Navarre Branch Library in Monroe.

Career Technology Center Opens

In fall 2013, students began taking classes in the newly opened Career Technology Center, a $17 million, 60,000-square-foot facility with state-of-the-art classrooms and lab space designed for instruction in high-growth, high-demand fields. The CTC allows for the updating and expansion of existing programs previously housed in the East and West Technology buildings, which had become inadequate to meet modern technology needs. Sustainable systems were integrated into the design of the facility and are being incorporated into the curriculum. The building serves as a learning laboratory for students in applied science and engineering technology fields.

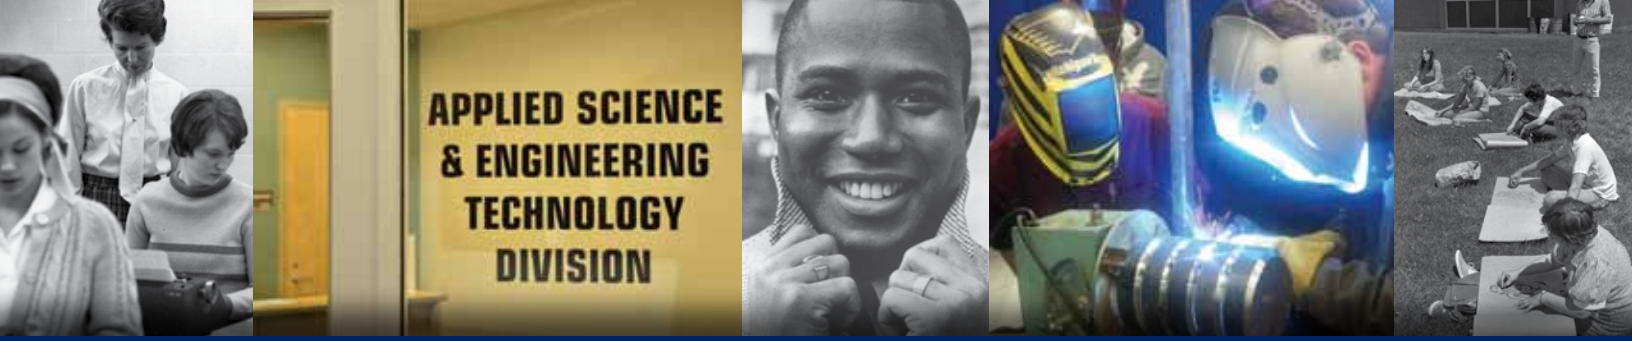
The state of Michigan financed half of the cost of construction. The college funded the other half through existing funds and a capital campaign in support of the facility. Among the major gifts were a $1 million donation from the DTE Energy Foundation (which is also being used to promote diversity at the college) and a $500,000 donation from the La-Z-Boy Foundation.

Nursing Program Granted Continued Accreditation through 2021

In the spring, Monroe County Community College was granted continuing accreditation of its associate degree in nursing program by the Accreditation Commission for Education in Nursing with the removal of warning status and the next evaluation visit scheduled for fall 2021. ACEN is the entity that is responsible for the specialized accreditation of nursing education programs, both postsecondary and higher degree, which offer a certificate, a diploma or a recognized professional degree (clinical doctorate, master's/post-master's certificate, baccalaureate, associate, diploma and practical).

The college was found to be in compliance with all of the ACEN's Accreditation Standards, including Mission and Administrative Capacity, Faculty and Staff, Students, Curriculum, Resources and Outcomes.

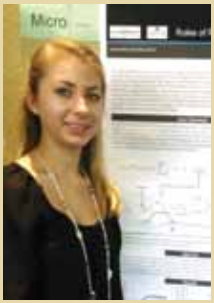
MCCC is one of only 17 associate degree in nursing programs in Michigan that are accredited by ACEN.



Practical, Personal Learning

MCCC provides hands-on, personal mentorship from dedicated faculty who have extensive experience both inside and outside the classroom. Students graduate with the knowledge they need to succeed and the ability to apply this knowledge in the real world.

MCCC Grad Participates in Summer Research Program at University of Georgia



A member of Monroe County Community College's 2014 graduating class, Jenna Olson, was selected to participate in the University of Georgia-Athens Department of Microbiology's Research Experience for Undergraduates (REU) program in the area of prokaryotic biology. She was one of nine selected for the program out of more than 170 applicants nationwide and the only participant out of a two-year college. The program is funded by the National Science Foundation and allows students to conduct supervised, independent research projects using state-of-the-art technology and methodology.

Dr. Maris Fonseca, associate professor of biology at MCCC, encouraged Olson to apply for the research program. While attending MCCC, Olson gained experience by working in several student positions. At the urging of Tracy Rayl, assistant professor of biology, she became a supplemental instruction leader and later served as biology laboratory assistant. Olson went on to complete much of her laboratory science curriculum toward her bachelor's degree while at MCCC, which included courses in general microbiology, zoology, general chemistry and physics.

Miller Electric Brings Virtual Welding Demo Trailer to Campus

Miller Electric Manufacturing Company brought its virtual welding demonstration trailer to Monroe County Community College in June for viewing by participants in the college's welding summer camp, as well as students and the public. The trailer was staffed by Miller Electric professionals who demonstrated the latest welding and cutting products and provided educational information. In addition, Miller Electric set up a generator welder with various accessories.

Two Former MCCC Journalism Students Get On-camera Experience at Local ABC Affiliate

Two former MCCC journalism students completed internships in summer 2013 at Toledo's ABC television network affiliate, Channel 13, WTVG. Besides valuable behind-the-scenes experience, Kaitlyn Durocher and Veronica Gabriel both got the chance to spend some time in front of the camera at Channel 13, reporting on news and sports stories in the Toledo area. Durocher, who attended MCCC in 2011-2012, attends the University of Southern

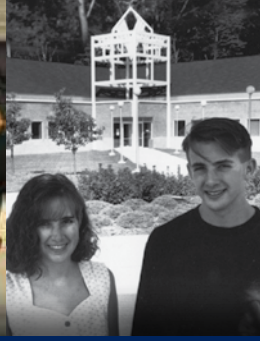
Gabriel

California and majors in broadcast journalism. Gabriel spent her freshman year at MCCC in 2012-2013 and transferred to Central Michigan University in Mt. Pleasant, where she is pursuing a degree in broadcast and cinematic arts.

Innovative Projects that Enhance the Educational Experience

The Foundation at Monroe County Community College's Enhancement Grants Program provides funding for the development and implementation of innovative projects that support the MCCC mission and enrich or improve the quality of education for students. The funded projects for 2014 and their recipients included:

- Michigan Society for Respiratory Care's Annual Sputum Bowl Trivia Contest, Bonnie Boggs, director of respiratory therapy
- MCCC Suicide Prevention Candlelight Vigil, Penny Bodell, administrative assistant to the vice president of student and information systems and advisor to the MCCC Gay/Straight Alliance
- National Student Day, Jean Ford, director of auxiliary services and purchasing
- MCCC Prelude Children's Chorale, Catherine Brodie, Agora Chorale director
- Career & Opportunity Expo, Barry Kinsey, director of workforce development
- International Trade in Real Time – Canada, Dr. Patrick Nedry, professor of business
- MiAEYC Early Childhood Conference, Felice Moorman, assistant professor of early childhood education
- Student Experience with International Refugees – International Studies on U.S. Soil, Dr. Joanna Sabo, professor of political science
- Visiting Professor from China, Dr. Joanna Sabo, professor of political science
- Bacchus Society Community Crush, Chef Kevin Thomas, instructor of culinary skills, Paul Knollman, dean of the Business Division, and Mark Spenoso, MCCC Bacchus Society chairman
- Pride Prom, Penny Bodell, administrative assistant to the vice president for student and information services and advisor to the MCCC Gay/Straight Alliance
- One Book, One Community of Monroe County, Cheryl Johnston, assistant professor of reading and English
- Southeast Michigan and Northwest Ohio SolidWorks User Group, Dr. Dean Kerste, professor of mechanical design technology
- Tour of International Machine Tool Show, Parmeshwar (Peter) Coomar, dean of the Applied Science and Engineering Technology Division, Marty Dubois, assistant professor of mechanical engineering technology, and Cameron Albring, administrative assistant to the dean of the Applied Science and Engineering Technology Division
- Heart and Lung Dissection Presentations to Monroe County Elementary and Middle School Children, Bonnie Boggs, director of respiratory therapy
- The Agora, 2015 College Media Association National Convention, Dan Shaw, assistant professor of humanities and journalism
- MCCC Family Fun Night, Tom Ryder, campus/community events and student activities coordinator



Milestones, Partnerships and Events

As a student- and community-focused institution, MCCC strives to make life more meaningful and rewarding for everyone we serve. This effort is never the product of a singular act; rather, it is the result of many people working together to support the events and partnerships that fulfill our mission of 'enriching lives.'

Paul W. Smith Named 2014 Alumnus of the Year

The 2014 Monroe County Community College Alumnus of the Year Award was presented to Paul W. Smith at the 47th Annual Commencement Ceremony in May.

A 1973 graduate of MCCC, Smith continued his education, earning a bachelor's degree from the University of Michigan. Since 1996, he has hosted the morning show on WJR-AM 760 in Detroit. In 2013, he was inducted into the National Radio Hall of Fame. Smith has been a generous supporter of MCCC, delivering the keynote address at the 1987 MCCC Commencement Ceremony, serving as the master of ceremonies at the Career Technology Center Ribbon Cutting Ceremony, and sharing his talent as the voice of the "Realizing the Vision Capital Campaign" video and the Shirley A. Meyer memorial tribute video. Since 2007, Smith has broadcast his award-winning show – The Paul W. Smith Show – live from MCCC's La-Z-Boy Center as part of his annual Pure Michigan Tour. In May, he hosted a special broadcast live from the La-Z-Boy Center in celebration of the College's 50th Anniversary.

MCCC Launches Culture and Current Affairs Speakers Series

Last year, MCCC launched the Culture and Current Affairs Speakers Series, which is led by MCCC faculty, staff, students and alumni with expertise on a variety of cultural, political or social topics of importance and interest at the present time. Among the many events hosted as part of the series were:

- A panel discussion on race relations
- A presentation on the situation in Nigeria
- A presentation on the crisis in Ukraine
- A panel discussion on the heroin epidemic in Monroe
- A panel discussion entitled "What You Should Know About Native Americans"

Michael R. Meyer Named College Supporter of the Year

In April, Michael R. Meyer was named MCCC's College Supporter of the Year for his strong support of MCCC and advocacy of the value and worth of higher education. Meyer served three consecutive six-year terms as an elected trustee on the MCCC Board of Trustees, spanning the years 1994 to 2012,

and served as vice chairman of the Board from 1996-2003. As a college trustee, he championed the initiative to create The Foundation at MCCC and has served as its board chairman since its incorporation in 1998.

Meyer proceeded to lead The Foundation through two successful capital campaigns while growing resources to include a $2.3 million endowed scholarship portfolio, a $1.1 million cultural enrichment endowment and the development of the MCCC Grants Office, which has secured more than $8.3 million.

Meyer was appointed to the Michigan Public School Employees Retirement Board and served as a designated representative of Michigan's community colleges from 1998-2006.

MCCC Hosts Events Celebrating Diversity

In addition to a Dr. Martin Luther King Day celebration and Celebrate Diversity Month in April, Monroe County Community College hosted a number of presentations, panel discussions and fairs to celebrate diversity during several months of the year that are dedicated at the national level to honoring various groups. Among these were Black History Month in February, Women's History Month in March and Arab-American Month in April.

Linking Community Members through Reading

One Book, One Community of Monroe County featured a full calendar of events planned around Reyna Grande's immigrant experience memoir, "The Distance Between Us." Modeled after a program developed by the American Library Association and coordinated by humanities faculty Cheryl Johnston and Dr. Carrie Nartker, One Book, One Community promotes the value of reading by recommending a compelling book that links community members in a common conversation through readings, group discussions, programs and other events. Founding partners include Monroe County Community College, The Foundation at Monroe County Community College, Monroe County Library System and Monroe Publishing Company.

Whitman Center in Temperance Hosts Full Slate of Events

MCCC's Temperance location, the Whitman Center, hosted numerous events throughout the year, including an open house/financial aid night, a presentation on the history of women writers, a transfer fair, a home safety seminar and a scrapbooking event to raise funds for the Kimberly Reaume scholarship.

MILESTONES, PARTNERSHIPS AND EVENTS

MCCC Nominee DTE Energy Named National Benefactor of the Year

DTE Energy was named a 2013 national Benefactor of the Year by the Council for Resource Development at the organization's annual conference held in November 2013 in Washington, D.C. The company was nominated for the Benefactor of the Year award by Monroe County Community College in recognition of its longstanding support for the college.

Some of the partnerships cited in the college's nomination were the creation of a renewable energy program at the college, support for the establishment of the area's first construction management technology certificate program, joint development of the nuclear engineering technology program, the installation of a 500-kilowatt solar installation on MCCC's campus and annual sponsorship of the college's campus/community events series. Most notably, the DTE Energy Foundation made a $1 million gift to the capital campaign for the college's Career Technology Center.

MCCC Wins 7 Marketing Awards

MCCC's Office of Marketing and Communications won seven District 3 Medallion Awards for community college communications in October 2013 from the National Council for Marketing and Public Relations – more than any other community college in Michigan. NCMPR is the only organization of its kind that connects marketing and public relations professionals at community and technical colleges, and its Medallion Awards recognize outstanding achievement in communication, honoring excellence exclusively at two-year colleges. District 3 includes Michigan, Ohio, Indiana, Illinois, Wisconsin and the Canadian province of Ontario.

Winning entries included the Season Events Poster, Alumni Newsletter, Viewbook, Annual Report to the Community, Electronic Newsletter of the Applied Science and Engineering Technology Division, Lifelong Learning Catalog and Commencement Program.

Connecting SolidWorks Software Users

The Applied Science and Engineering Technology Division hosted the inaugural Southeast Michigan and Northwest Ohio SolidWorks User Group Conference in October 2013. SolidWorks is 3-D parametric modeling software that is widely used in mechanical design and engineering applications. The conference allowed users to network with colleagues and peers to see how others are using the software in their workplace. It was free and open to students, teachers, designers, engineers, employers and anyone with an interested in SolidWorks and the mechanical design industry. The Southeast Michigan and Northwest Ohio SolidWorks User Group is led by Dr. Dean Kerste, MCCC professor of mechanical design technology.

MCCC Hosts First-ever 'Color Dash' to Raise Funds for Scholarships

Monroe County Community College hosted what campus officials dubbed a "Running Festival" in fall 2013. In addition to the 4th-annual Great Pumpkin Pursuit 5K, the college put on the inaugural MCCC Color Dash, a 5K fun run/walk with an emphasis on fun to raise funds for scholarships. Participants were bathed in a rainbow of colors and laughed all the way to the finish line.

DTE Energy, MCCC Develop Fermi 1 Historical Exhibit

In August 2013, DTE Energy and MCCC dedicated an extensive exhibit built into the student concourse of the college's Career Technology Center that details the history and importance of the Enrico Fermi Atomic Power Plant (Fermi 1). At the time it began operation in the mid 1960s, Fermi 1 was the world's largest liquid-metal cooled, fast breeder reactor. The Fermi 1 exhibit stemmed from DTE Energy's license application for a new unit (Fermi 3) on the current Fermi site. As a result, DTE Energy officials agreed to create a public exhibit on the history of Fermi 1 and partnered with MCCC faculty and staff to develop an exhibit housed at MCCC.

In conjunction with the exhibit, a sculpture of a suspended, spinning atom that stood for many years at the Fermi Visitor Center was relocated to the MCCC campus.

DTE Energy made donations to MCCC to pay for the entire cost of the display, which includes artifacts from the original Fermi 1 site, many of which are on loan from The Henry Ford Museum.

Giving to The Foundation

Listed here are the individuals, corporations and organizations who have given annual gifts to The Foundation at Monroe County Community College between July 1, 2013 and June 30, 2014.

All gifts are recognized for this specific financial year in the appropriate giving level. Cumulative gifts – a total of all gifts given over time – are recognized separately according to giving level, beginning with the Trustee's Society.

We are pleased to recognize the support of each of our donors. We have made a great effort to ensure the accuracy of this list; therefore, we regret any omissions or errors. Please notify us in writing of any concerns.

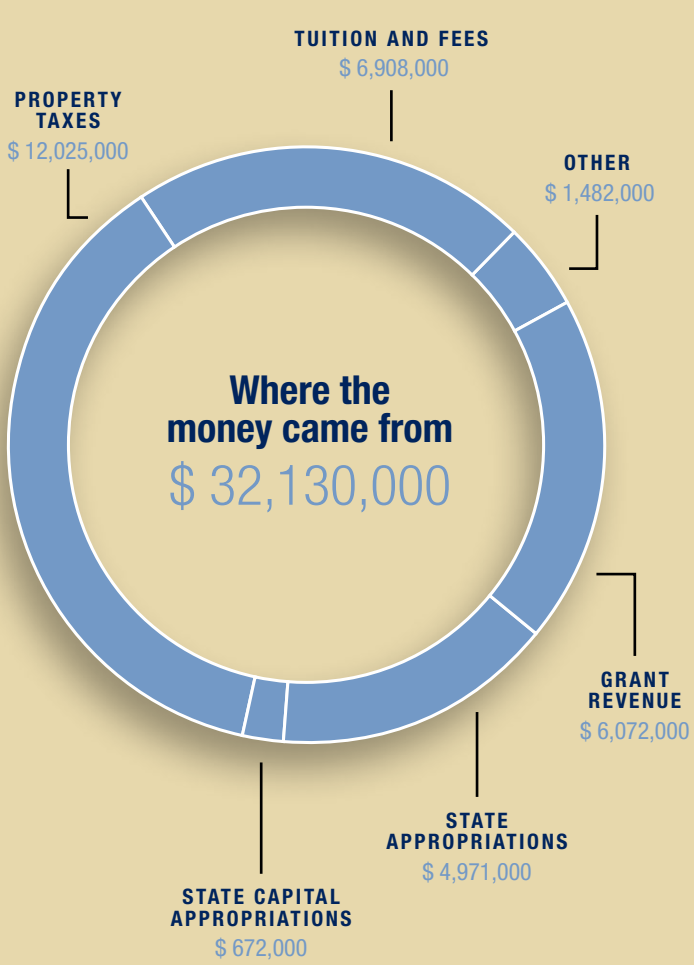
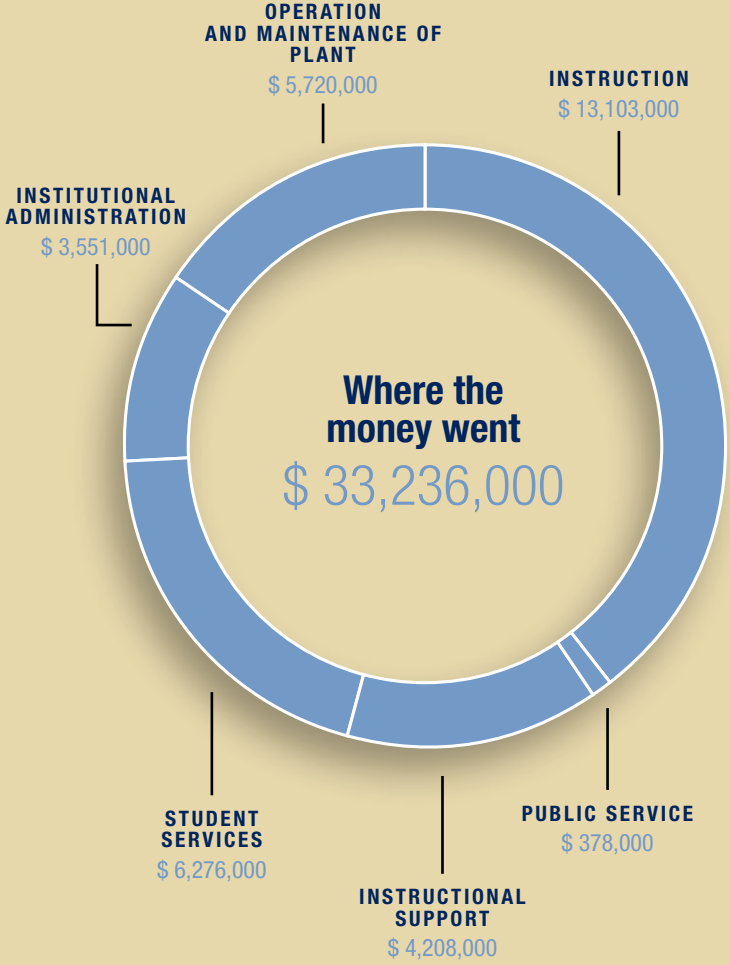
Revenues and Expenditures

MCCC Revenues and Expenditures

*Fiscal Year Ended June 30, 2014**





**Pre-audit figures*

The Foundation at MCCC

*Fiscal Year Ended June 30, 2014**

DURING THE FISCAL YEAR ENDED JUNE 30, 2014	
We received contributions totaling	$618,993
Investment gains of	$468,949
Special event revenues of	$47,281
We received in-kind contributions for administrative services from MCCC and other in-kind support of	$225,302
Federal funds	$0
Which resulted in total revenues of	**$1,360,525**
We distributed to MCCC for scholarships and program funds	($661,504)
And had administrative and fund raising expenses of	($225,302)
And had other expenses of	($5,039)
Which resulted in total expenditures of	($891,845)
Resulting in a total net asset increase of	$468,680
When combined with our net assets at June 30, 2013 of	$5,013,700
Resulted in new net assets at June 30, 2014	**$5,482,380**
The June 30, 2014 net assets are represented by	
Cash of	$999,960
Investments of	$3,770,142
Accounts and pledges receivable of	$813,253
Our total assets as of June 30, 2014 were	$5,583,355
Our total liabilities as of June 30, 2014 were	($100,975)
Our net assets, therefore, as of June 30, 2014 were	**$5,482,380**

**Pre-audit figures*

MISSION

Monroe County Community College provides a variety of higher education opportunities to enrich the lives of the residents of Monroe County.

Monroe County Community College is accredited by the Higher Learning Commission and is a member of the North Central Association. For more information, visit www.ncahigherlearningcommission.org or call 800-621-7440.

Monroe County Community College is an equal opportunity institution and adheres to a policy that no qualified person shall be discriminated against because of race, color, religion, national origin or ancestry, age, gender, marital status, disability, genetic information, sexual orientation, gender identity/expression, height, weight or veteran's status in any program or activity for which it is responsible.

Summary

Enrollment at Monroe County Community College continues on a downward trend for a fourth year. Fall 2014 enrollment declined by 295 students. Total enrollment stands at 3,482 or 7.8% less when compared to 2013. The total of enrolled credit hours is also down by 10%.

The under 21 age group remains the largest age group category on campus. More than 50% of all MCCC students fall into this age group. The group is comprised primarily of recent Monroe County high school students and dual enrollment students. The 2014 Monroe County high school graduate class remains equal when compared to 2013 in total size and the percentage enrolled at MCCC. The dual enrollment student population remains strong with a 20% increase for 2014. With the continual growth of programs like Monroe County Middle College, Monroe High School's Direct College and Ida High School's Middle College, MCCC should continue to serve a large number of dual enrollment students.

Statistics of note:

Dual Enrollment students +81

Part-time male student enrollment -8

Part-time female student enrollment -127

Female student enrollment -198

Under 21 age group enrollment -14

21 and above age group enrollment -281

Out of District – In State enrollment -112

In District enrollment -156

REAL ESTATE - BUILDING - MONROE COUNTY COMMUNITY COLLEGE

NAME OF BUILDING: HEALTH EDUCATION BUILDING

QUALITY OF CONSTRUCTION: VERY GOOD

TYPE OF BUILDING: CLASS C

NO. OF STORIES: ONE, WITH MECHANICAL PENTHOUSE

DIMENSIONS: MAIN LEVEL - 46,850 SQUARE FEET
PENTHOUSE - 3,850 SQUARE FEET

TOTAL SQUARE FEET - 50,700

FOUNDATION: POURED REINFORCED CONCRETE

SUPERSTRUCTURE:

FRAME - STRUCTURAL STEEL

FLOORS - CONCRETE SLAB, 5", STEEL JOIST, CORRUGATED DECK AND CONCRETE; PENTHOUSE

FLOOR COVERINGS - HARDWOOD IN GYM, DANCE STUDIO
CERAMIC TILE IN LOCKER ROOM, SHOWERS
CARPETING IN OFFICES, CHILD CARE
RESILIANT FLOORING IN CLASSROOMS
PORCELAIN TILE IN CORRIDOR
RUBBER FLOOR IN WEIGHT AREA

CEILINGS - SUSPENDED ACOUSTICAL THROUGHOUT EXCEPT GYM

ROOF STRUCTURE - WOODEN DECKING ON GLUED LAMINATE TRUSSES OVER MULTI-PURPOSE GYM, SKYLIGHT, TRANSLUCENT STEEL DECK ON I-BEAM JOISTS THROUGHOUT

ROOF COVER - SINGLE PLY MEMBRANE ROOF WITH INSULATION

INTERIOR CONSTRUCTION - CONCRETE MASONRY PARTITIONS
GYPSUM BOARD PARTITIONS IN OFFICES AND CLASSROOMS

BUILT-IN FIXTURES - CHALKBOARDS, TACKBOARDS, AS REQUIRED.
- METAL TOILET PARTITIONS
6 - BASKETBALL BACKSTOPS - MOTORIZED
2 - TELESCOPING BLEACHERS, HUSSEY - 35' LENGTH
118 - MEDART METAL LOCKERS, SINGLE TIER
2 - STEEL STAIRWAYS TO PENTHOUSE
- LAMINATED CLASSROOM CABINETRY INCLUDING:
NURSING LAB COUNTER WITH STAINLESS STEEL SINK
CHILD CARE KITCHENETT COUNTER WITH SINK
- CASEWORK IN ROOMS 157 - 159 INCLUDING OXYGEN LINES, STATIONS
- CASEWORK IN ROOMS 164 AND 165

HEALTH EDUCATION BUILDING: continued

SUPERSTRUCTURE: CONTINUED

ELECTRICAL - AN APPROVED SYSTEM OF WIRING ALL IN CONDUIT WITH NECESSARY WALL PLUGS AND SWITCH BOXES, FLUORESCENT TUBE FIXTURES, TRANSFORMER

PLUMBING - AN APPROVED SYSTEM OF MODERN SANITARY FIXTURES CONSISTING OF:
27 - LAVATORIES
26 - WATER CLOSETS
10 - URINALS
6 - STALL SHOWERS
4 - COLUMN SHOWERS
6 - DRINKING FOUNTAINS
1 - JANITORS SINK
4 - HANDICAPPED STALL SHOWERS

HEATING AND AIR CONDITIONING -
1 - MCQUAY MODEL LSL150DH AIR HANDLER, #35M0075304
1 - MCQUAY MODEL LSL141DH AIR HANDLER, #35M0075404
1 - MCQUAY MODEL LSL122DH AIR HANDLER, #35M0122904
1 - MCQUAY MODEL RTAA-155 PACKAGED OUTDOOR MOUNTED AIR COOLED WATER CHILLER, #55M8132501
2 - COOK MODEL 225 CPV FAN UNITS
3 - COOK MODEL 445 CA-SWSI RETURN FAN UNITS
2 - STERLING MODEL HS-118A HOT WATER UNIT HEATERS
1 - STERLING MODEL HS-72 HOT WATER UNIT HEATER
1 - STERLING MODEL HS-36 HOT WATER UNIT HEATER
1 - PATTERSON-KELLY MODEL PK404-20 DOMESTIC WATER HEATER
3 - ARMSTRONG KELLY MODEL HEM 93 STEAM HUMIDIFIER
1 - ENERGY MANAGEMENT SYSTEM
1 - CHILLER STANDBY PUMP
1 - STEAM FLOW METER
2 - WEIL-MCLANE MODEL 1078 GAS/OIL COMBINATION BOILERS
2 - LOCHINVAR MODEL 150-CHP-36 AUTOMATIC ELECTRIC STORAGE WATER HEATER, 150 GALLON CAPACITY
2 - MCQUAY AIR COMPRESSORS

EXTERIOR WALLS - BRICK ON CONCRETE BLOCK
METAL WALL PANELS
WINDOWS IN ALUMINUM SASH

HEALTH EDUCATION BUILDING: continued

MISCELLANEOUS
- MIRRORED GLASS IN DANCE STUDIO, 14 - 4' X 8' PANELS
- FIRE ALARM CONTROL SYSTEM WITH SPRINKLERS THROUGHOUT
- SOUND SYSTEM IN FITNESS CENTER, MULTI-PURPOSE, DANCE STUDIO EACH INCLUDING: EQUIPMENT RACK WITH AMPLIFIER, TUNER, DECK, MIXER, SPEAKERS AS REQUIRED
- CORRIDOR PAGING SYSTEM, PEAVEY AMPLIFIER
- TELEPHONE WIRING AS REQUIRED
1 - GYMNASIUM DIVIDER CURTAIN
2 - ELECTRONIC SCOREBOARDS - DAKTRONICS
- PLASTIC VERTICAL BLINDS - OFFICES
1 - METAL ROLLIN ACCESS DOOR, 20' X 12' WITH OPENER
- MEDICAL GAS DISTRIBUTION SYSTEM
- PROJECTION SCREENS
- SIGNAGE
- FIRE EXTINGUISHER CABINETS

Purpose of the Study

This Facilities Assessment and Deferred Maintenance Capital Planning Study, developed through a combination of personnel interviews, facility walk-throughs and building system analysis, was performed to accomplish the following objectives:

- Provide an inventory of the College's facilities in a database format to be easily updated and maintained by Monroe County Community College personnel and allow for quick access to facilities information.
- Determine the general condition of the facilities owned by Monroe County Community College and provide the data in a concise format, allowing quick determination of the current replacement value and condition of each facility.
- Determine a Facilities Condition Index (FCI) for each assessed building and an aggregate FCI for all facilities at Monroe County Community College. The FCI is a benchmark index that rates the condition of existing College buildings and used by facilities managers nationwide to quantify and prioritize deferred maintenance projects for capital planning purposes.
- Assist Monroe County Community College in meeting its Mission Statement, Strategic Goals, and Institutional Vision through timely maintenance of the physical backbone of the College – the buildings of MCCC.

Glossary

Vital Statistics
Basic building information– building use types (classroom, library, and administration), year built, building area in square feet, and number of floors.

Observation Highlights
This is a focused list of field observations, highlighting major repair/replacement items and recently completed work. For a more complete list of field observations, see the individual building data sheets in the appendix.

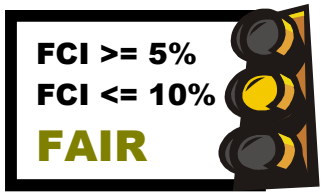
Current Replacement Value (CRV)
The CRV is the cost to construct a typical replacement building in today's dollars. The figure is based on the square footage of the current structure and the estimated current construction cost for that type of structure. Since some buildings are conglomerations of different uses (i.e.: classroom, library, administration) the CRV is based on estimated proportions of use types in each building. By the nature of the calculations and square foot construction costs, the current replacement value has a ±20% margin of error and will increase annually due to inflation.

Priority Issues/One Year Deferred Maintenance Backlog (1YR DMB)
The 1YR DMB is the value of projects that is deferred and requiring completion in order to maintain facilities and related infrastructure for safe use. The 1YR DMB amounts shown are for items requiring immediate attention to fix critical problems. ***A long-term investment strategy should also include items that require repair or replacement within 5 years, thus avoiding the increased repair costs resulting from deferred repairs (i.e. leaky roof damaging interior finishes).***

Facilities Condition Index (FCI)

Simply put, the FCI is the current DMB divided by the CRV. The resulting number is compared against nationally accepted standards and used to determine the condition of the building, campus or college.

The Association of Higher Education Facilities Officers (APPA) recommends that the FCI for any given building should not exceed 5% for the building to be considered in "Good" condition. The rating of "Fair" indicates that the building requires some attention to bring it up to standard, with some problems areas potentially requiring immediate attention. The rating of "Poor" indicates that the building needs urgent attention to prevent the existing problems from affecting other building systems and compounding future repair costs.



The APPA FCI Ratings, indicating the general condition of the building, are shown here along with the corresponding "traffic signals" that give a quick visual indication of the FCI rating.

Priority Issues/One Year DMB Excess

This represents the amount the DMB exceeds the APPA benchmark of a building with a 5% FCI – essentially the dollar amount to be spent immediately to reduce the DMB to attain the APPA rating of "Good". In situations where a building is in better than "Good" condition (FCI<5%), the one year DMB excess is shown as zero.

For example, if a building has a CRV of $1,000,000 and an FCI of 10%, the DMB would be $100,000. This would leave a DMB excess of $50,000 – the amount to be spent to reduce the FCI to within the APPA 5% benchmark

Zero-Five Year Cumulative Deferred Maintenance Backlog (5YR DMB)

Similar to the One Year DMB, the Five Year DMB represents the total value of projects that will require attention within the next five years, including those that fall under the One Year DMB. This value is included to help determine the investment required over the next five years to repair and/or replace problem items before they become critical.

The Zero-Five Year DMB is often more telling of a buildings' condition than the One Year DMB, since the first year number focuses primarily on life safety, code compliance and collateral damage. Most maintenance issues are not so critical as to fall into this category but often become so within 5 years.

Looking at the previous example, if the building condition survey indicated an additional $250,000 in repairs from years 1-5, then the 0-5 Year DMB would total $350,000 (including $100,000 from the first year).

Zero-Five Year DMB Excess

Similar to the One Year DMB Excess value, this amount represents the investment to bring the DMB in line with the APPA benchmark of 5% of the Current Replacement Value. In situations where a building is in better than "Good" condition – a bit more difficult over a five year span, the five year DMB excess is shown as zero.

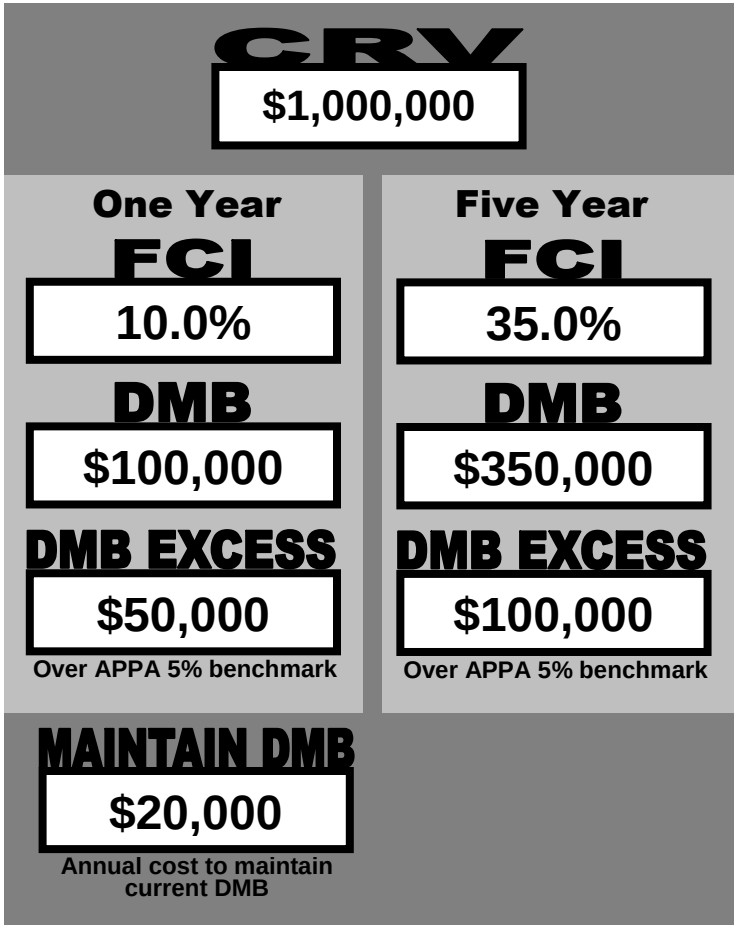
This number is a good starting point for determining budgets – it allows the college to see what to spend to bring buildings into the APPA "Good" range – with the understanding that complete elimination of the Deferred Maintenance Backlog is not a likely scenario.

DMB Equilibrium (Annual cost to maintain current DMB)
This is the dollar amount to be invested annually to keep the FCI (and DMB) from deteriorating – regardless of the current condition of the building.

Reusing the previous example, the amount required to maintain the FCI at current levels would be $20,000 annually (2% of $1,000,000).

The number is based on a nationally accepted rule of 2% of the CRV and assumes that building components have a 50-year renewal cycle and depreciate along a straight line. The assumptions were made to simplify calculations; in reality, building components DO NOT expire according to straight-line depreciation, and most components will require replacement within 30-40 years (excluding structure and foundation).

To restate – this annual investment will only maintain the existing FCI and do little or nothing to reduce any existing backlog.



Generic Example of how the aforementioned data appears in this report

Building Use Types

The tables below shows building Use Types and their respective current construction costs per square foot used to develop this database. As some of these use types are not found on all campuses, not all Use Types are used in the database. These costs, based on regionally weighted, preliminary construction cost data provided by contractors, historical cost databases and data from RS Means and Marshall and Swift, are for typical college and university buildings.

Use Type	*Cost/SF*
Administration	$175
Athletic	$190
Auditorium	$290
Boiler House	$215
Classroom	$185
Kitchen/Food Service	205
Lab	$245
Library	$190
Storage/Maintenance	$115
Student Union	175
Vocational Lab	175

Building Components

The table below shows the building components used in the report. These are the basic components having a major influence on the replacement value of a building. The buildings were evaluated during walkthroughs with the facility personnel to determine how much of each component made up the CRV. It was then determined what percentage of each component required repair or replacement within one year, five years, ten years, and beyond. This data is used to determine the investment required to reduce the current and future deferred maintenance backlog.

Category	*Component Name*
Structure	Structure
Envelope	Roof
	Glazing
	Cladding
Mechanical	HVAC Equipment
	Plumbing
Electrical	Primary/Secondary
	Distribution
	Lighting
	Voice/Data
Finishes	Ceilings
	Walls
	Doors
	Floors
Safety/Code	Building, Fire, ADA
Other	Site Repair, Ext. Light, etc

Deferred Maintenance Backlog

A Brief Background

The problem of deferred maintenance at colleges and universities has been studied and better understood over the last decade. From an article by Dan Hounsell, in the magazine Maintenance Solutions, discussing how universities are addressing the issue of deferred maintenance:

> "Maintenance management professionals, who once seemed to be one of the few parties giving serious thought to the issue, now have been joined in the debate by growing numbers of sympathetic voters and far-sighted facility decision makers."

The Association of Higher Education Facilities Officers (APPA) concluded in a 1995 report titled "A Foundation to Uphold: A Preliminary Report" that the national backlog of deferred maintenance at colleges and universities exceeds $26 billion, up 27 percent from estimates made in a similar report from 1988.

$5.7 billion of that $26 billion backlog is classified as "urgent deferred maintenance" – projects that require immediate attention and that will cost far more if they are not completed within a year. Although spending this sum will eliminate current urgent needs, in only a few years there will be a new roster of items to replace them – if future budget planning is not undertaken. According to the APPA report, the current backlog "represents a threat to the capability of higher education facilities to support college and university missions."

Other conclusions from the report include:

- More than 50 percent of all college types reported that deferred maintenance increased or stayed the same since 1988; only 25 percent reported decreases.
- 20 percent of the colleges in the study accounted for nearly 60 percent of the accumulated deferred maintenance.
- Public colleges typically have a greater deferred maintenance backlog than private universities, with 78 percent of the public research universities reporting an increase in deferred maintenance backlogs.
- By assuming that deferred maintenance of the infrastructure – site repairs, road and parking lot maintenance, exterior lighting, etc. – was not included in the figures provided by the campuses in the study, the estimated cost to eliminate accumulated deferred maintenance increases to $32.5 billion – with urgent needs increasing to $7.1 billion.
- When senior school administrators made deferred maintenance a priority, the institution made progress in reducing its backlog.

The most important point to remember is that even if universities and colleges spend these amounts, this will only eliminate the existing deferred maintenance backlog. There needs to be a coordinated, funded plan put into place at colleges and universities to maintain the condition of the facilities once they have been repaired – or time will again take its toll.

Vital Statistics:

This updated assessment for Monroe County Community College (MCCC), focuses on 18 buildings totaling almost 390,000 square feet at the Monroe main campus, Whitman Center campus, and Hurd Road Center campus. The estimated Current Replacement Value for these facilities is approximately $80.7 million.

The date of completion for the assessed facilities ranges from 1968 to 2004. While almost all mission critical buildings are currently in good condition, the buildings contributing most significantly to overall long-term deferred maintenance and end-of-life issues are the original academic buildings. Factors contributing to the condition of these buildings include the age and condition of plumbing and mechanical systems, typical wear and tear on high-use items such as doors, and building use.

By APPA standards, short-term critical issues (those considered critical to operation, safety-related or having potential for collateral damage) are minimal. This situation is typical for most institutions, but MCCC has done a particularly good job containing these issues. Few items of great cost are likely to fail or significantly impact building viability within the next year. When looking forward five years, however, long-term conditions for several buildings quickly become rated fair to poor. This is also common, as over this longer timeframe, systems in older buildings become critical due to age or failure. The significantly higher five-year Facility Condition Index (FCI) for these buildings is predictive of these failures and based on two assumptions: that everything anticipated to fail will do so, and nothing is invested to correct the problem proactively.

Issues found across campus include:

- Several roofs are near the middle of their service life, with leaks and other issues typical for roofs of this age. A roof condition assessment was performed by Professional Services Inc. prior to this assessment.
- HVAC systems near or past the end of their service life indicate a need to budget for replacement in the next few years. Valves on some systems are also failing.
- Original window systems are showing air infiltration, failed hardware, and deteriorated glazing compound.
- Doors are past the end of their service life on older buildings, especially exterior main entrance doors. Hardware is failing, thresholds are deteriorating, and hinges are wearing out. All require increasing levels of maintenance.
- ADA compliance issues in older buildings include knob-style door hardware, non-compliant dimensions of entrance vestibules, and some toilet rooms limited by available space. To meet current accessibility codes, any significant renovations will trigger modifications to meet current ADA requirements.

Summary:

The jump from the “Priority Issues FCI” of 1.6% to the long-term “0-5 Year FCI” of 7.3% is typical for older campuses and, at a campus the size of MCCC, represents a sizeable capital investment, even to maintain conditions in their current state. These numbers also represent an increase from the 2008 Assessment, primarily driven by long-term issues that are becoming more urgent.

This potential FCI increase, while driven by many buildings, is most attributed to a few older facilities facing equipment end-of-life issues, including significant HVAC equipment in the Physical Plant Building. As an example, the 5-year FCI numbers for the CLRC and the two Technology Buildings contribute almost 50 percent of the total deferred maintenance backlog although they comprise less than 30 percent of the College’s square footage.

As stated in the Deferred Maintenance Backlog background, the investment solution has two facets:

- The funds needed for immediate repair projects – repairs and/or replacements that will prevent further deterioration of the buildings and infrastructure and help the college stay ahead of life-safety concerns.
- The funds required to maintain and/or improve the condition of the buildings. These funds need to be budgeted in advance to

allow for repairs at the appropriate time - before items become critical or cause additional damage.

The following pages of this report break this data down into a building-by-building review to clarify where attention is most needed.

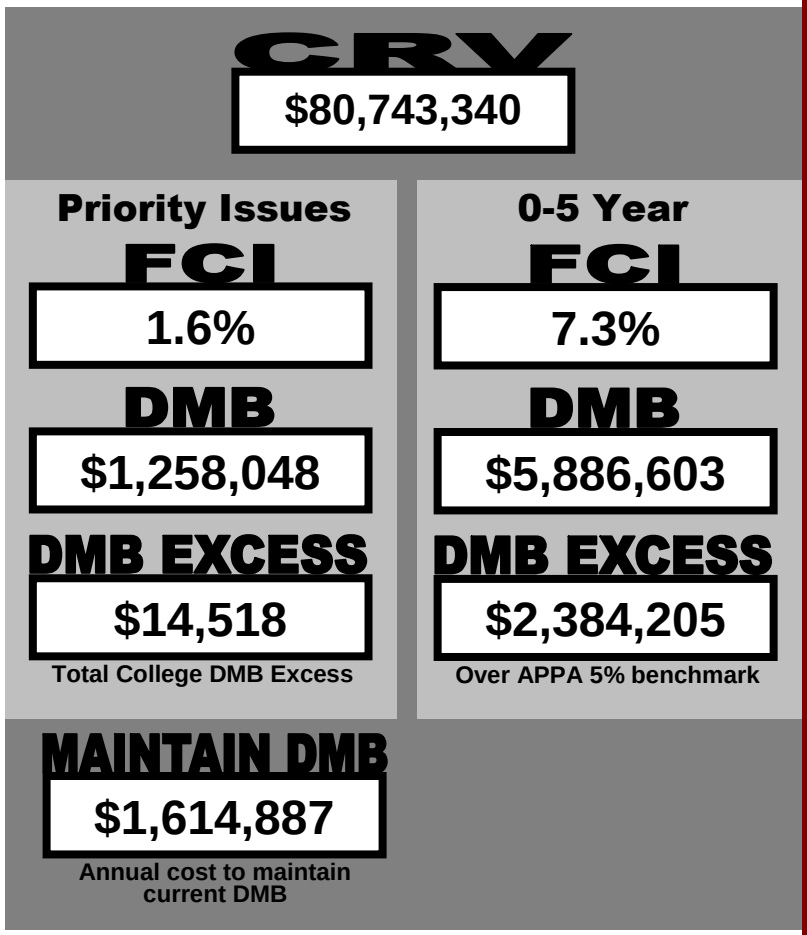
Recommendations:

Short Term Recommendation:
Monroe County Community College should review the items that comprise the One Year Deferred Maintenance Backlog of approximately $1,258,000 and address those affecting life/safety issues, those having the greatest potential for future damage to other building components, and those that are code compliance issues.

In addition to the first year issues that will carry over into the next five years, the College should also immediately begin budgeting for the projected $5.89 million in deferred maintenance issues over the next five years and evaluate alternative solutions where the cost of repairs outweighs the benefits.

Long Term Recommendation:
The College should budget as much as possible of the industry recommended "2% of CRV" maintenance fund of $1.6 million annually for ongoing repairs to maintain the buildings once they are upgraded. While this benchmark is difficult for most institutions to attain, the goal of setting aside as close to this amount annually as possible is to ensure the buildings remain in stable condition and that funds are available in advance when systems reach the end of their lives.

*Note: The DMB Excess value listed on the summary table to the right is the sum of all individual building excess values, not calculated at the campus-wide level. Therefore, a College DMB Excess number is present even though the College-wide FCI number is well below the APPA 5% threshold value.



Campus Condition Examples

The following images are indicative of some of the deferred maintenance issues present across the campus.

Whitman Center – breach in fire-rated ceiling assembly.

Whitman Center – water infiltration along exterior wall has caused deterioration of the plastic-laminated windowsills.

Whitman Center – settlement/heaving of exterior concrete slab (at main entrance) presents a tripping hazard.

Student Services/Administration - Aluminum entrance doors and hardware at end of life.

La-Z-Boy Center – It appears there is a void within the exterior aluminum, curtain wall assembly allowing the environment to enter the interior.

Health Education Building – Typical sealant joint is at end of life.

Physical Plant – Cooling tower and basins are near end of life.

Health Education Building – Daylighting controls for the Atrium would save energy.

Vital Statistics:

Campbell Learning Resources Center

Use Type(s): Library, Classroom, Lab

Built: 1968

Area: 52,369 SF

Floors: 3

Observation Highlights:

- Moisture problem in basement in Room C-3 requires additional investigation and remediation.
- Professional Services Inc. (PSI) rates the roof condition as "generally fair to good, no current roof leaks were reported." Roof perimeter at the gravel stop edges was repaired in 2010.
- Windows (glazing and frames) on levels 1 and 2 are due for replacement. Some window units are fogged at the first floor.
- Minor amount of brick tuck-pointing required at north elevation. Sealant joints at fascia panel joints were replaced in 2010.
- Level 2 ductwork and selective ceiling replacement is scheduled for rework as part of 2009 classroom renovations.
- Chilled water valves are at end of life and due for replacement.
- Reduced voltage starter for 40HP fan motor is at end of life.
- Electrical Room areaway floor drain is either too small or partially plugged. Damage has occurred to ventilation dampers.
- PRV is needed for elevated City Water pressure issue.
- Domestic water piping will need epoxy lining or replacement.
- Wireless equipment is at end of life and requires replacement.
- Investigate and remediate why battery-backup for digital PBX is not connected and in use.
- Minor cracking observed in brick walls at main stairwell. Recommend monitoring condition.

Use Type(s): Kitchen/Food Service, Classroom, Student Union, Administration

Built: 1968, additions in 1978, 1988

Area: 72,219 SF

Floors: 1

Observation Highlights:

- PSI rates the roof condition as “generally in fair condition.” Minor leaking reported.
- Previous infrared images indicate areas of moisture within the insulation. Leaks at penetrations will require corrective action. Some repairs made in 2010.
- Original anodized aluminum window framing with non-insulated glazing not energy efficient.
- Sealant joints at fascia panel joints were replaced in 2010.
- Reheat control valves, isolation valves, and thermostats are at end of life and are due for replacement.
- Outside air damper for main air handler is not bolted to concrete wall.
- Galvanized piping throughout is near or at end of life. Assume replacement or epoxy lining within 10 years.
- PRV is needed for elevated City Water pressure issue.
- Wireless equipment is at end of life and requires replacement.
- Original exterior aluminum doors, frames, and hardware are nearing end of life.
- East entry concrete steps poorly constructed - risers vary in height, treads are too shallow and uneven. Creates tripping hazard.
- Glass covered walkway between this and East Technology Building leaks in multiple locations. Repaired repeatedly, but steel rusting, paint peeling.

Technology Butler Building

Monroe County Community College

Vital Statistics:

Salt Storage

Use Type(s): Storage

Built: 1999

Area: 400 SF

Floors: 1

Observation Highlights:

- Salt has pushed the rear wall of the building out of plane. Currently the wall is restrained using a series of wooden braces. Wall should be restored to plumb and level condition once the salt supply is emptied.
- No reported roofing problems. Roof evaluation was not included in PSI's roofing condition report. No visual defects were noted.
- Overhead door tracks and associated door hardware are failing due to the corrosive nature of the salt and are nearing end of useful life.
- No visual inspection of floor surface was possible.

Salt Storage

Monroe County Community College

Vital Statistics:

La-Z-Boy Center

Use Type(s): Auditorium, Classroom, Administration

Built: 2004

Area: 53,329 SF

Floors: 1 with mechanical mezzanine & balcony

Observation Highlights:

- Coping metal at metal panel system does not properly slope back to the roof. A line of sealant was added to keep water from streaking the visible face of the metal panels. Condition should be carefully monitored for evidence of water infiltration into and behind the metal panel system
- PSI rates the roof condition as "generally in fair to good condition." Roof to wall transitions may need to be repaired as they are identified.
- Sealant where window frames abut metal panel system is failing and is due for replacement.
- Exterior soffit: Synthetic stucco on cementitious backer panels is cracking at panel joints.
- Exterior masonry joints are beginning to age and will require tuck-pointing in the near future. Masonry expansion / control joint sealants are likewise nearing end of life and will require general repair and replacement. Slight efflorescence was returning in selected areas.
- IT Room H143 needs a door grille added to provide proper ventilation.
- PRV is needed for elevated City Water pressure issue.
- Wireless equipment is at end of life and requires replacement.

Vital Statistics:

SAE Building

Use Type(s): Storage

Built: 2005

Area: 768 SF

Floors: 1

Observation Highlights:

- Cracks in CMU exterior wall, primarily at the ends of steel lintels over the overhead sectional doors should be monitored.
- No reported roofing problems. Roof evaluation was not included in PSI's roofing condition report. No visual defects were noted.
- Gutters currently drain to immediate grade. Splash blocks should be installed to limit splash onto the building
- Doors and frames are protected with primer only. Doors and frames should be painted to protect them from moisture damage.

SAE Building

Monroe County Community College

Vital Statistics:

Whitman Center

Use Type(s): Lab, Classroom

Built: 1991

Area: 17,650 SF

Floors: 1

Observation Highlights:

- PSI rates the flat roof condition as “generally in fair to good condition” and the sloped roof is in “generally good condition.” Flat roof over Main Entry is in generally poor condition.
- Plastic laminate windowsills are failing and due for replacement. Evidence of moisture infiltration at and around windows.
- Monitor moisture levels within CMU veneer masonry. Topical sealer may aid in limiting moisture infiltration and reduce evidence of moss/mildew on the north side of the building.
- IT closet near the Lobby requires ventilation to remove heat build-up.
- Repair 12” x 12” hole in closet fire-rated ceiling near Lobby.
- Repair small hole in Maintenance Room fire-rated wall near Lobby.
- Wireless equipment is at end of life and requires replacement.
- Corrections to cracking and moisture damage at Lobby were performed, recommend that condition is monitored. Isolation joints were installed to reduce the appearance of future cracking in some locations. This may prove to be a temporary correction.
- College has replaced fire alarm panel.
- Student Lounge Area exterior concrete slab joint material between sections needs replacing.

60 % Classroom

Notes: lower level below grade.

System	CRV of System %	CRV of System $	Pct. of system value to budget for repair/replacement: Immed. Priority 1	1-5 Years Priority 2	6-10 Years	11+ Years	System/Component Notes
Structure	20	$1,958,601	0	2	5	93	Description: Poured concrete basement with slab on grade foundation. Concrete frame with concrete masonry block infill. Priority 1: None observed / reported Priority 2: Moisture problem in basement (at room C-3) requires additional investigation and remediation 2011: It was reported that problem in Room C-3 still exists, the problem in Room C-16 appears to have been corrected. 2008: -Ongoing water / moisture infiltration through the foundation walls. The moisture appears to be the result of underground or hydrostatic sources; minimal leaking is associated with heavy rains. Efflorescence / evidence of moisture was specifically noted in the small theatre and within IT storage area. Problem is on-going. -Limited masonry cracking observed at main stairwell. The fractures appear to be stabilized. Previous Comments: -Room C-3 leaked from cracks, room C-10 leaked at roof conductor exit. In-house team excavated, waterproofed and backfilled in 2001

System	CRV of System %	CRV of System $	Pct. of system value to budget for repair/replacement: Immed. Priority 1	1-5 Years Priority 2	6-10 Years	11+ Years	System/Component Notes
HVAC	17	$1,664,811	2	3	20	75	Description: - Steam provided from Boiler House 200 and shared with East/West Technology Buildings - Physical Plant provides chilled water - Independent heat pump split-system installed to cool Server Room C-12 (2005) - Independependent split Acsystem serves IT in basement - Pneumatic terminal controls on an Apogee DDC framework Priority 1: Replace ventilation dampers in Electrical Room. Replace chilled water valves. Replace reduced voltage starter for main AHU. Priority 2: None observed / reported 2011: -Chilled water valves are due for replacement. -Reduced voltage starter for main AHU 40-HP fan motor at end of useful service life. 2008: -Building has a new condensate return system to address failing components (pumps, vacuum breaker, valves, etc.). Work completed in 2007 -Level 2 ductwork is scheduled for rework as part of 2009 classroom renovations. -Controls air compressors were rebuilt (2004); no reported problems -Perimeter FTR is set up on two centrally controlled loops; one for perimeter and one for the interior re-heat coils. Siemens controls renovation linked the two loops resulting in reduced operating efficiency. -Secondary AHU (lower capacity) maintains humidity levels during unoccupied mode; No reported problems. -A sump and pump were installed within the AHU to remove moisture correcting the problem. Correction has reduced ongoing building humidity problems. -Ductwork was cleaned following correction of AHU moisture problem. -Rolled filters were upgraded to pleated media -Chilled water valves are at end of life and are due for replacement. Glazing	4	$400,530	5	5	10	80	Description: Aluminum storefront and curtain wall glazing Priority 1: No reported problems Priority 2: Minor leaking still occurring in the system. 2011: Failed flashings at storefront system and second floor level windows were replaced in 2009. Failed (fogging) glass units were replaced in 2009. 2008: -Clerestory windows have a number of failed glazing units; seals have failed trapping moisture within the unit. On-going failure may be due to excessive system deflection. -Window framing (Tubelite 1400 Series) has a number of water handling / weep problems resulting in moisture problems within the building. Structure Tek has conducted field-testing to identify sources of leaks. The College continues to address this ongoing concern. Previous Comments: Clerestory windows at entry leaked - repaired seal problem.

Cladding	6	$600,795	5	5	10	80	Description: Concrete masonry block, composite metal panels, and aluminum framed storefront / curtain wall glazing systems. Priority 1: No reported problems Priority 2: Some building control joints and some gaskets at the metal panels are at the end of life. 2011: It has been reported that the installation of new building control joints has occurred. It was observed that some building control joints and some gaskets at the metal panels are at the end of useful life. Masonry veneer repairs have been made. 2008: -Masonry veneer was apparently installed with insufficient expansion / movement control joints. As a result the building experienced some masonry failures. The installation of movement joints have addressed the problem. Previous Comments: -Mechanical room louvers are re-sealed; minor water infiltration will require on-going monitoring. -Felt wick weeps failing, falling out of brick joints (above windows and doors and at grade) -Base course of brick adjacent to rear entry slabs cracking from foundation movement

Roof	3	$411,967	3	5	70	22	Description: EPDM (Fully-adhered) - 2004 EPDM (Ballasted) - 2007 Priority 1: A majority of the roof to wall transitions are not yet repaired and will require corrective action. Priority 2: -Coping metal at metal panel system does not properly slope back to the roof. A line of sealant was added to keep water from streaking the visible face of the metal panels. This corrective action results in small areas of ponding water. Condition should be carefully monitored for evidence of water infiltration into and behind the metal panel system 2011: No changes reported. 2008: -Structure Tek rating is 85 out of 100 score -Previously identified leaks have been repaired -Masonry removed, original failed flashing was removed and replaced with new work. Previous Comments: Original EPDM roof Multiple roof leaks since new, all repaired under warranty,. Currently 6 known leaks, condition requires continued monitoring.

Cladding	7	$961,255	2	3	10	85	Description: Split and smooth face Concrete Masonry Units Priority 1: No reported problems Priority 2: -Exterior masonry joints are beginning to age and will require tuck-pointing in the near future. Masonry expansion / control joint sealants are likewise nearing end of life and will require general repair and replacement. 2011: Some of the synthetic stucco issues have been corrected at the north exterior soffit. Repair of exterior masonry issues, i.e.: replacement of joint sealants, correction of improperly installed wall flashings and investigation of water intrusion and failed mortar joints, is on-going. An "open gap" (to the building interior) was observed in the curtain wall system at the North elevation. 2008: -Exterior CMU masonry was cleaned to remove evidence of masonry efflorescence. At time of walk-through efflorescence was returning in selected areas. The source of the moisture within the masonry is unknown. -Exterior soffit: Synthetic stucco on cementitious backer panels is cracking at panel joints. At time of walk-through one panel had failed, fell from the building, and needed to be refinished.

Cladding	7	$242,158	5	15	25	55	Description: Burnished concrete masonry units (CMU) with 4x4 and 8x8 scored faces. Metal fascia panels along continuous, integral gutter. Priority 1: No reported problems Priority 2: Monitor moisture levels within CMU veneer masonry. Topical sealer may aid in limiting moisture infiltration and also reduce evidence of moss / mildew on the north side of the building. Exterior building ceiling joints are at the end of life, replace. 2011: No changes reported. Exterior building sealant joints are failing and at the end of life. 2008: Burnished CMU were cleaned in 2007 to remove efflorescence. Walls were also tuck-pointed and re-sealed. Aluminum fascia panels were replaced in 2006 when the composition roofing was replaced. Previous Comments: Ongoing efflorescence problem full height of walls, possibly partly due to water wicking from ground. Problems have appeared to stabilize - no recent increase in efflorescence. Anodized aluminum fascia panels pitting.

HVAC	14	$484,316	2	13	20	65	Description: One (1) rooftop mounted, gas-fired, AHU with on-board air-cooled DX cooling. Two (2) Weil-McLain hot water boiler supplying heating hot water to a coils for heating. Unit is original to the building and functional. Air distribution is by VAV boxes above the ceiling w/pneumatic controls. Finned-tube radiant heat under all windows. Exhaust fans with light switch control in meeting rooms. Controls: Pneumatic controls except at RTU, upgraded for remote monitoring using Siemens system. Remote access is limited to monitoring only and does not allow for remote diagnostic or operation. Priority 1: Provide ventilation for IT closet near lobby - too warm. Repair hole in other closet ceiling near Lobby; has a hole in the fire-rated ceiling gyp-board. Repair small hole through fire-rated gyp-board wall in Maintenance Office. Priority 2: No reported problems. 2011: - During interview and walk-through inspection, no significant issues were noted. - New gas-fired roof top unit installed for whole building. 2008: Previous Comments: The combination of energy inefficiency and limited capacity for expansion reduce the unit's serviceable life; the unit remains functional but is nearing end of life. Leaking condenser coil requires additional refrigerant occasionally. Previous Comments: Original rooftop unit and 2 boilers, functioning, but at capacity. No expansion capability is available. RTU operates on 208V and is inefficient. Scroll fan failed since last assessment damaging coils. Previous Comments: HVAC System at maximum capacity with computer heat loads. Fin tubes, No reported problems

CHAPTER 8

MAINTENANCE AND REPLACEMENT FUND

The Maintenance and Replacement Fund is used to account for major repairs and maintenance of College facilities.

At Monroe County Community College, the objective of this fund is to set aside and account for funds that will be necessary to meet the expenses of major plant maintenance and replacements as well as to provide a contingency to help assist in meeting certain physical plant emergencies that may arise. This fund may also be used as a source for inter-fund borrowing, as well as direct funding to other funds such as the Unexpended Plant Fund through Board approved transfers.

Other than some interest earned from its fund balance and a minor endowment distribution, the fund does not generate revenue. Since the establishment of the Maintenance and Replacement Fund in the 1980-81 fiscal year, its primary source of funding has been transfers from the College's General Fund.

There are five projects proposed for next year as well as contingency funding for emergencies that may arise for a total cost of $665,000. The table below lists the projects planned for FY 2015-2016. A complete listing of the projects requested for the upcoming fiscal year can be found on the following pages.

As reported in the Unexpended Plant Fund, the College is beginning a major HVAC project on main campus that will cost an estimated $15 million. The work being done through this project, will reduce the College's deferred maintenance backlog from over $10 million to approximately $6 million.

2015-2016 Projects

BUILDING	REPAIR	COST
Main Campus	Temporary Chiller Replacement	$90,000
Whitman Center	Structural Monitoring	$5,000
Life Sciences Building	Structural Monitoring and Design Work	$60,000
Main Campus	Loop Drive and Entrance Renovations	$270,000
Health Education Building	Roof Repair	$190,000
	Contingency	$50,000
TOTAL		$665,000

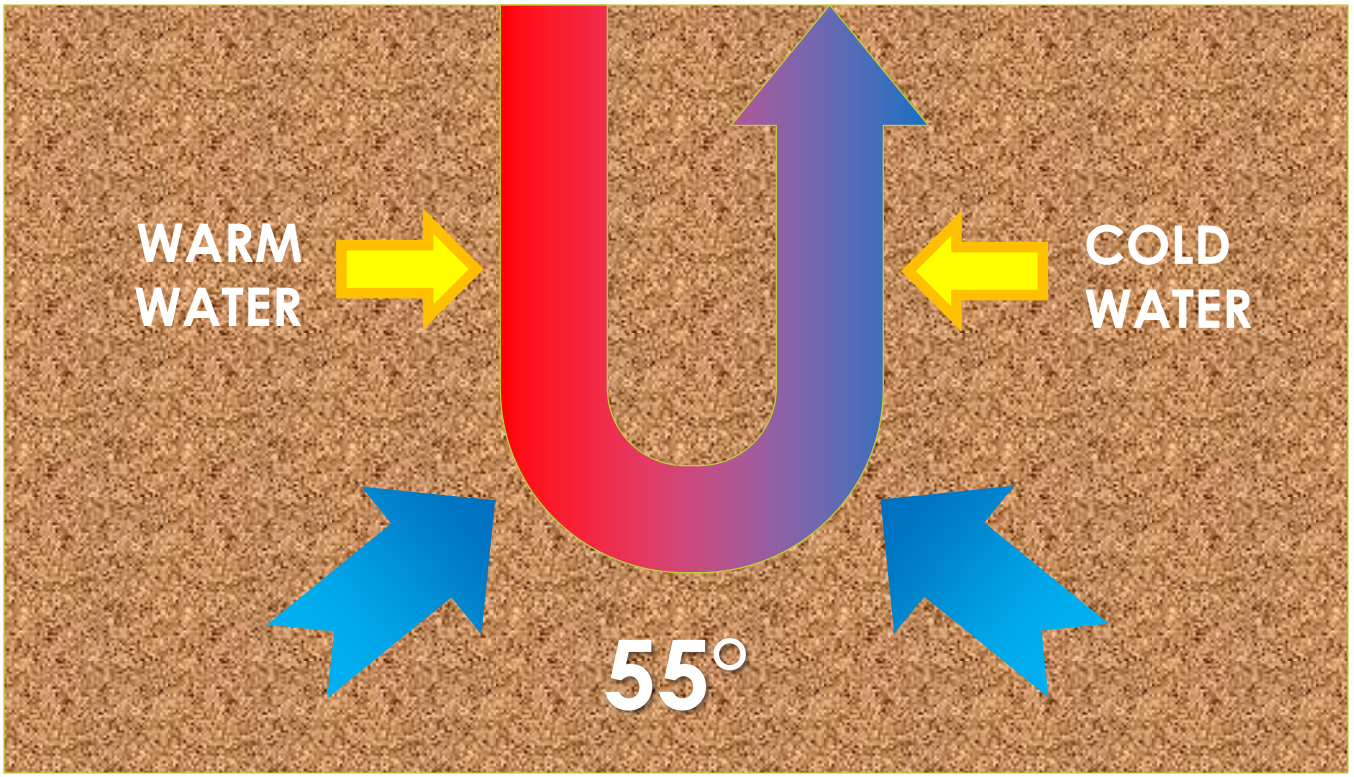
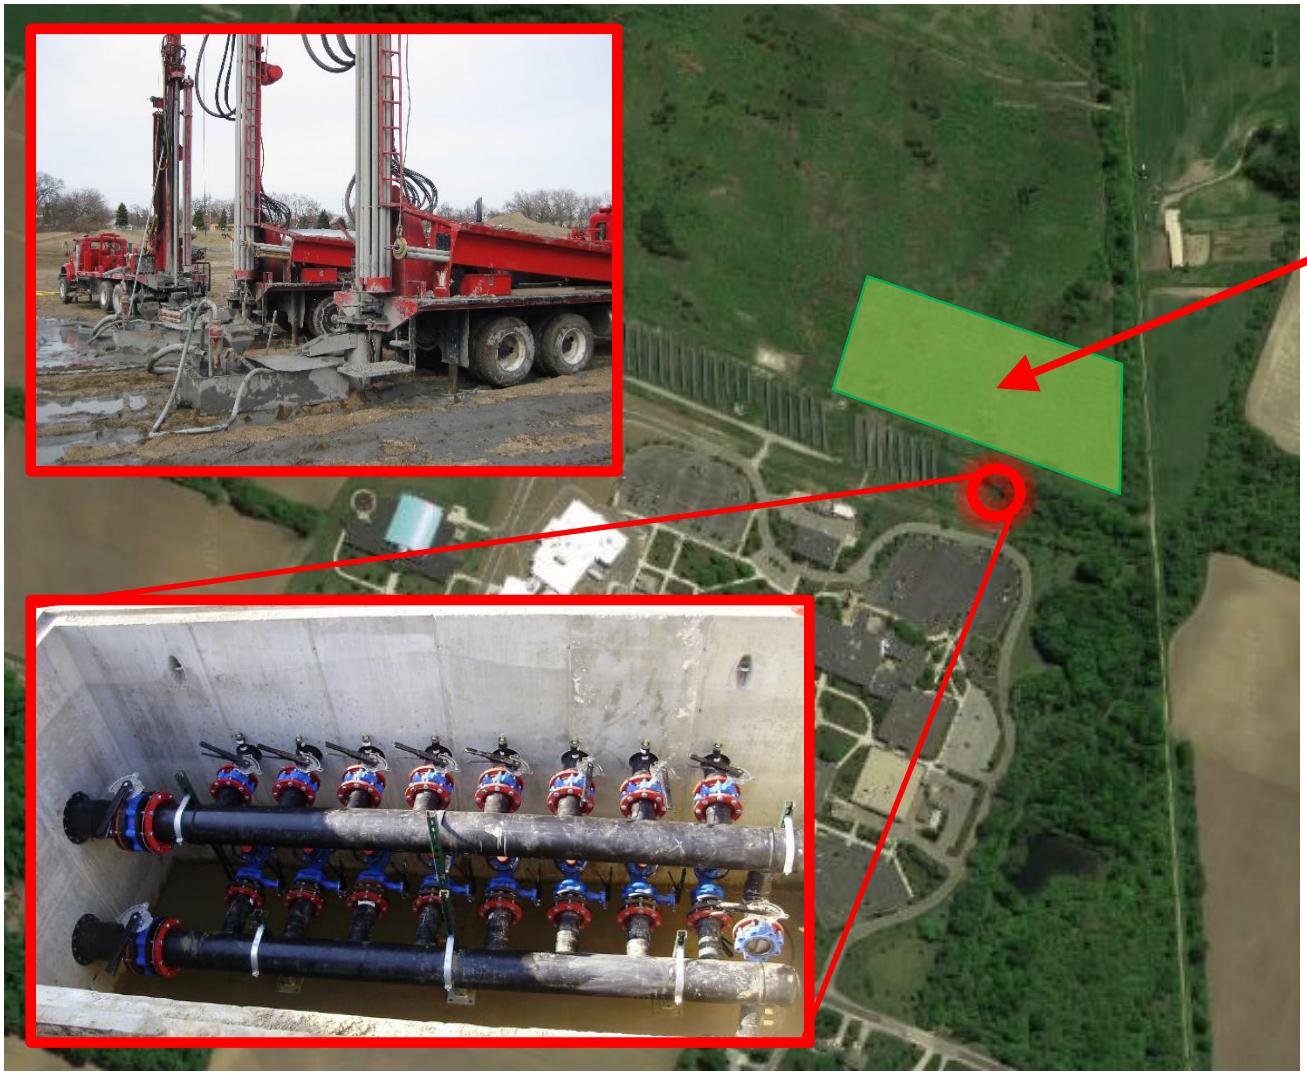
GEOTHERMAL

- How does it work?

SUMMER



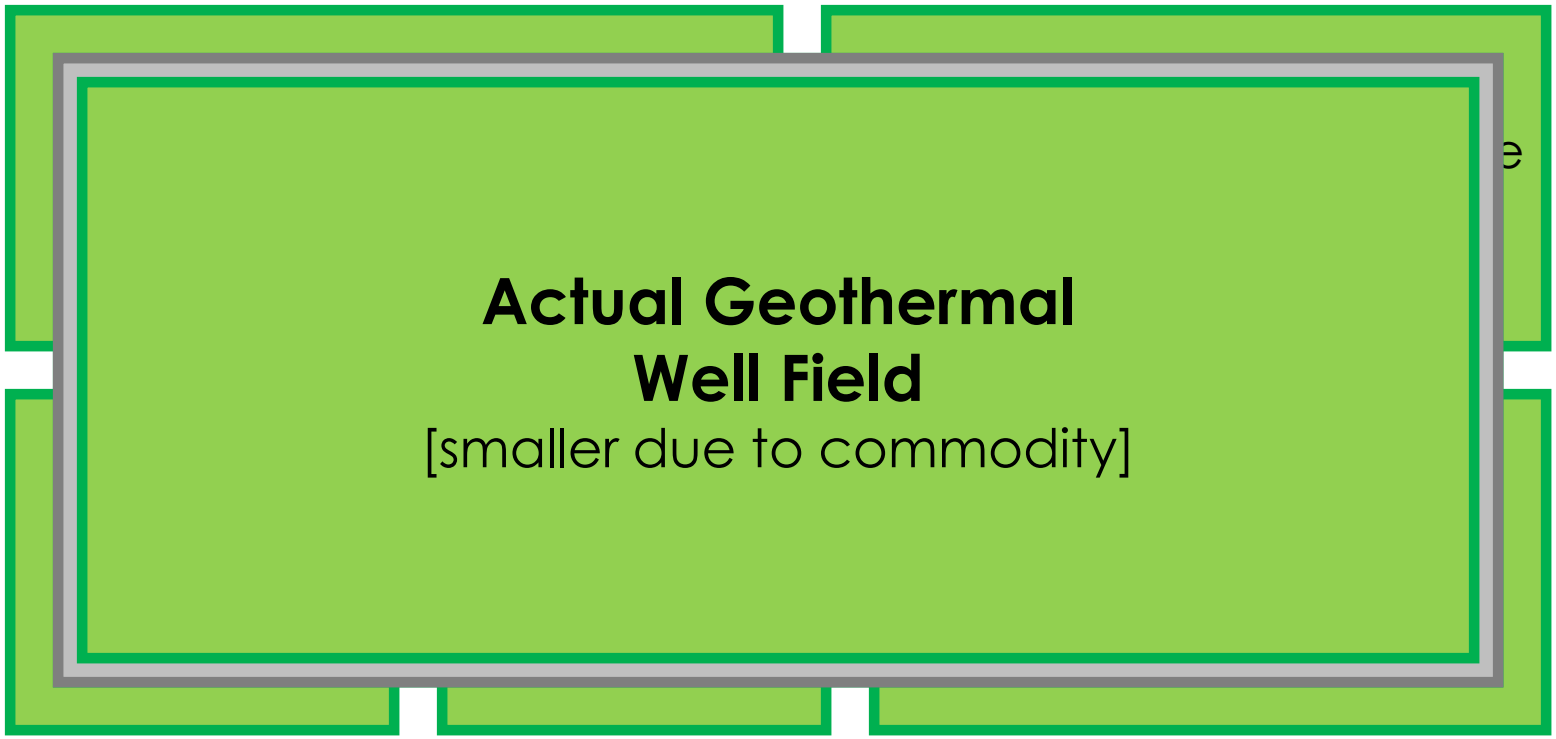
GEOTHERMAL | WELL FIELD



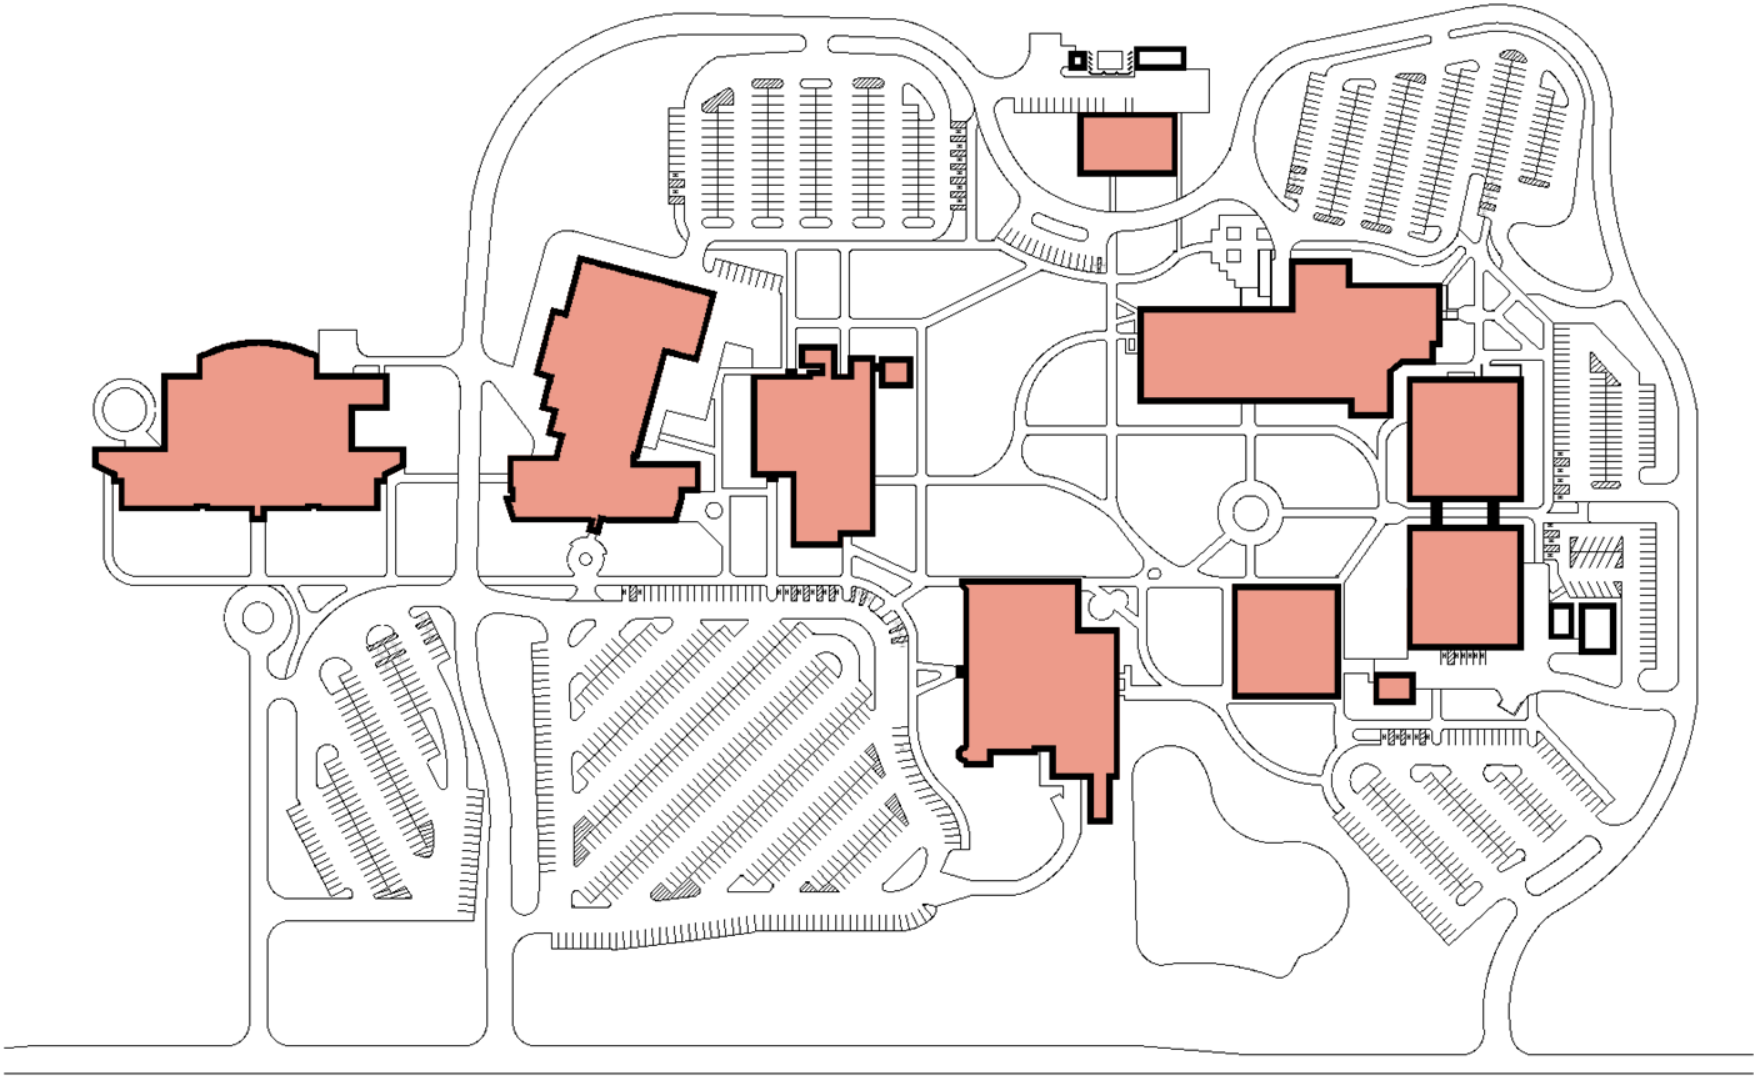
Approximate area and location of geothermal well field:

- 270 wells @ 350-400 feet deep
- field size 2.18 acres
- Modular design makes it easier to expand

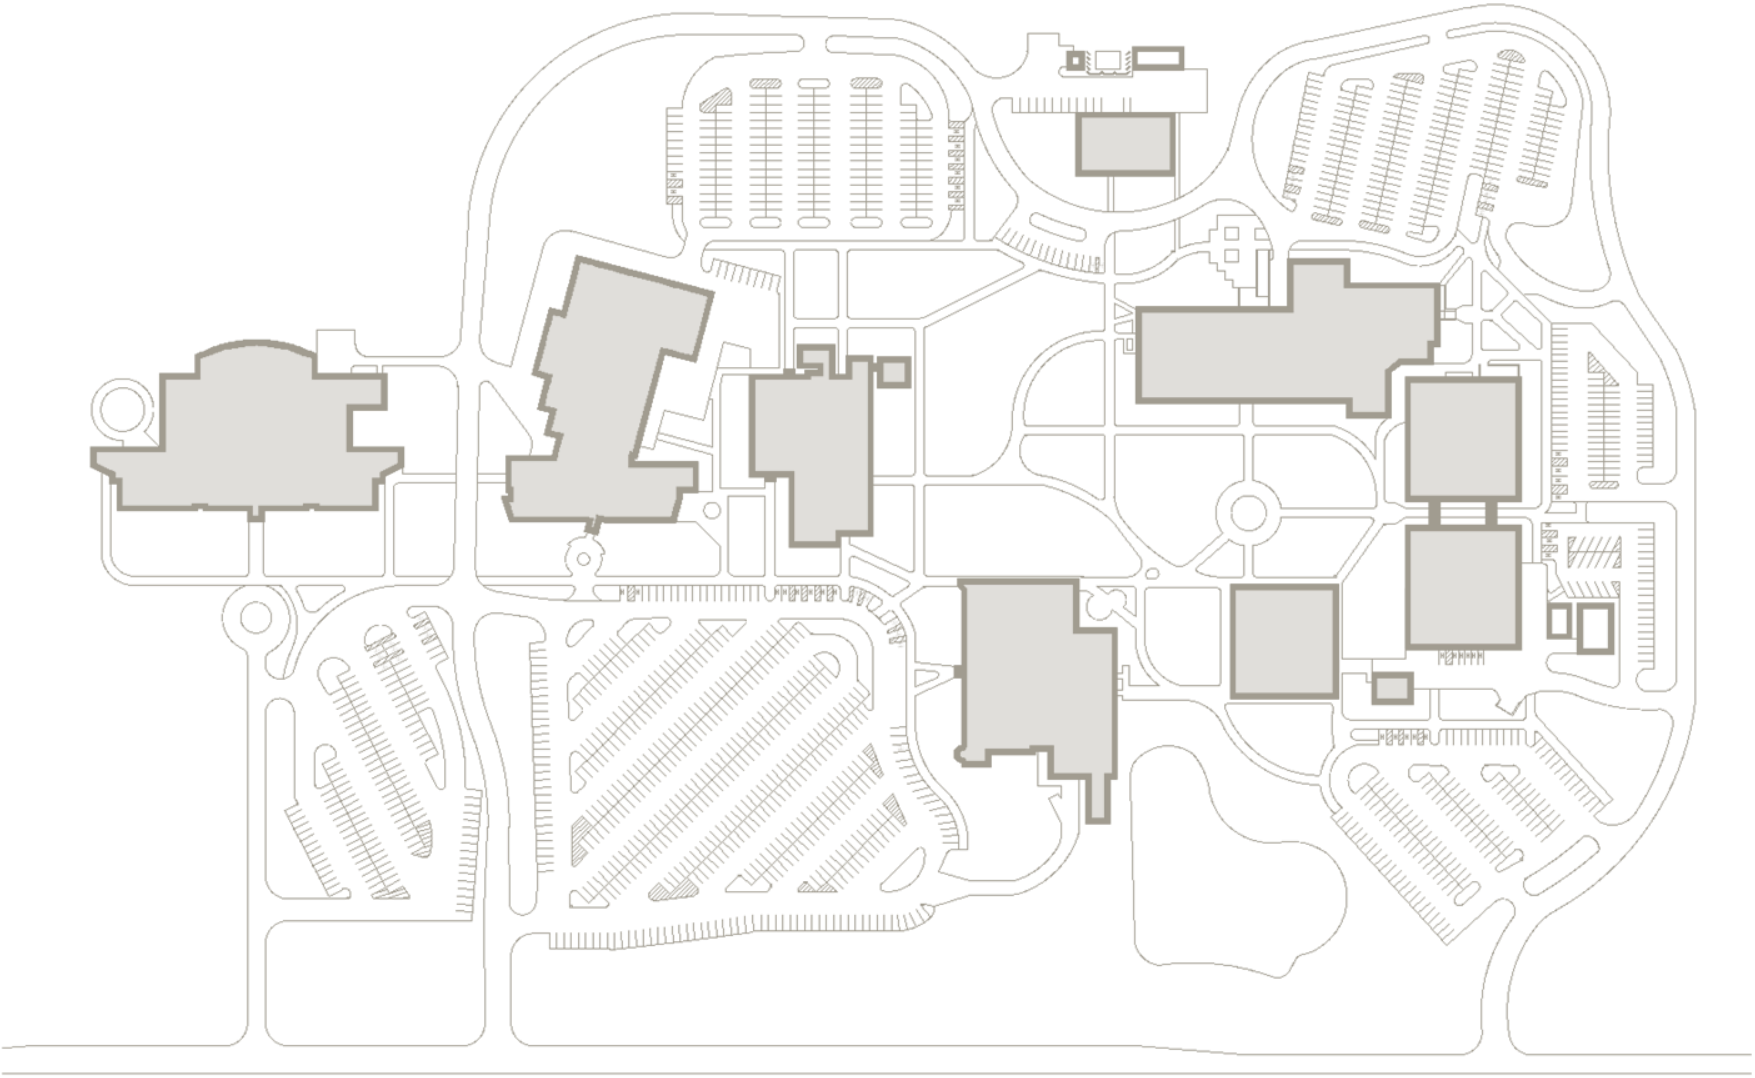
GEOTHERMAL | WELL FIELD



GEOTHERMAL | FEED LOOPS

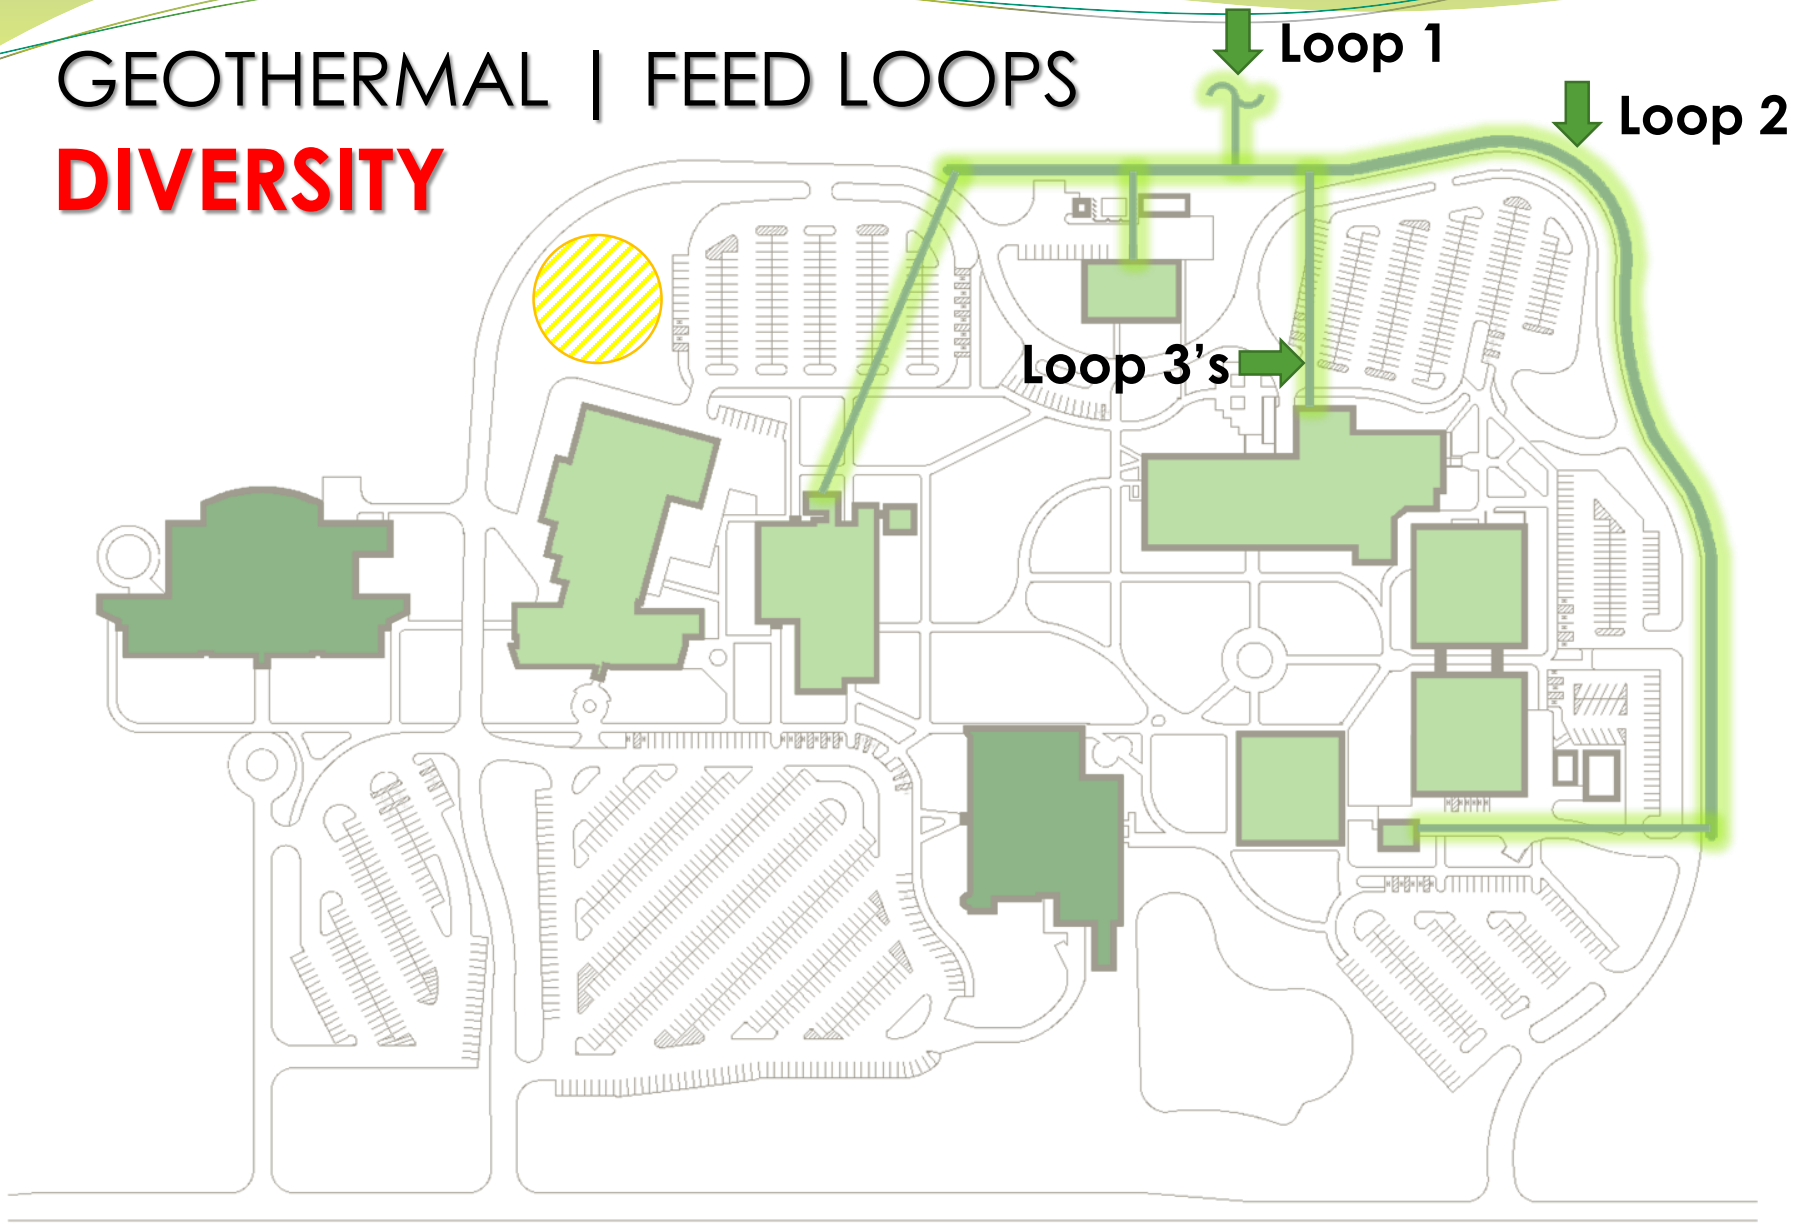


GEOTHERMAL | FEED LOOPS



GEOTHERMAL | FEED LOOPS

DIVERSITY



GEOTHERMAL SYSTEM

Preliminary Geothermal System Installation Costs:

- Replacement of *HEATING & COOLING SYSTEM*:
  - Demolition of mech. & elec. components
  - Installation of (7) water based chillers
  - Installation of new control systems for all buildings
  - Installation of new well-field and supply loop

Total: $11,000,000

GEOTHERMAL SYSTEM

Preliminary Geothermal System Installation Costs:

- Replacement of *VENTILATION SYSTEM*:
  - Demolition of mech. & elec. components
  - Installation of (8) new air-exchangers
  - Installation of control systems
  - Rehabilitation/rework/replacement of both existing piping and ductwork

Total: $4,000,000

GEOTHERMAL SYSTEM

Summary Costs:

• Well field:	$4,000,000
• Chiller [heat] pumps:	$5,500,000
• Ventilation system:	$4,100,000
• *Electrical Upgrades:*	*$1,000,000*
• *Asbestos Abatement:*	*$1,500,000*
Projected Total:	**$16,100,000**

GEOTHERMAL COSTS & DEBT SERVICE

COSTS:

- Clg./Htg.: $5,500,000
- Ventilation: $4,100,000
- *Electrical Upgrades: $1,000,000*
- *Asbestos abatement: $1,500,000*
- Well field: $4,000,000

Total $16,100,000

DEBT SERVICE:

- Project Cost: $16,100,000
- Period Interest: ?
- Financing Costs: ?
- Utility Rebates: ($100,000)
- Total Financed: ?

- Terms of financing: ? years
- Estimated rate: ?%
- Annual Payment: ?

- Annual savings: $202,000
- 20 Year Savings: $4,040,000

- Impact on GF: ?

BENEFITS OF SUSTAINABILITY

Values of a geothermal system over conventional:

- Well field life span = 50 years+ (double the life of a conventional system)
- Significant reduction to our greenhouse gas emissions by over 2,000 metric tons or the equivalent of converting approximately 100 cars to electric or planting 200 acres of trees (electric vs. natural gas)
- MCCC would be the ***FIRST*** community college in the United States to have a geothermal based campus HVAC system according to the IGSHPA (International Ground Source Heat Pump Association)
- The College began its commitment to sustainable systems and green technologies with the construction of the CTC. A geothermal HVAC system is the next logical step in our plan for an environmentally responsible campus.

DEFERRED MAINTENANCE

This project eliminates the following items from the College's current deferred maintenance backlog:

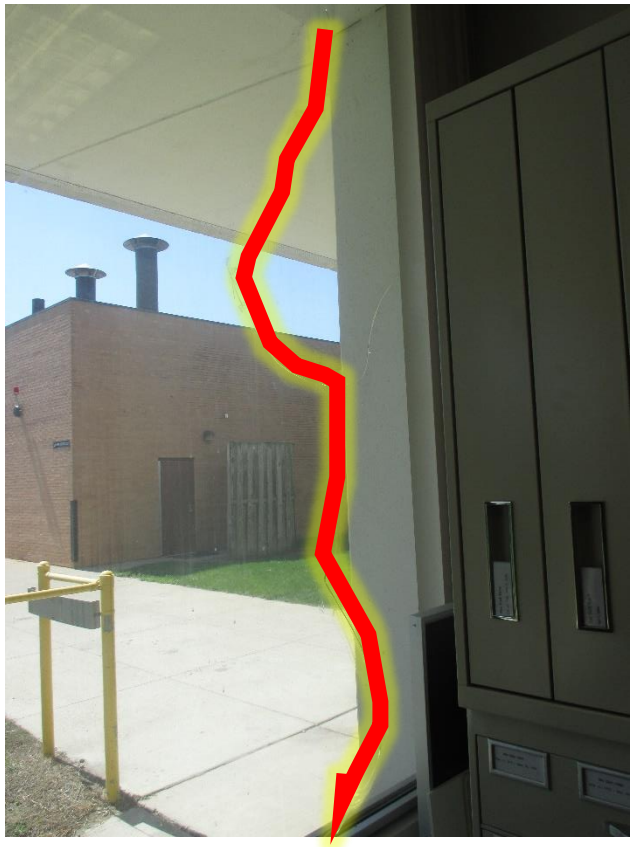
• Administration Building	$161,000
• Boiler Houses	$1,350,000
• General Campus	$500,000
• Campbell Center	$220,000
• East/West Tech	$230,000
• Life Sciences	$165,000
• Physical Plant	$1,550,000
Projected Total:	**$4,176,000**
Total from Deferred Maintenance:	*41%*

FUTURE ENERGY SAVINGS PROJECTS

- Convert entire campus over to LED lighting

FUTURE ENERGY SAVINGS PROJECTS

- Convert entire campus over to LED lighting
- Replace windows/doors/curtain walls on all the original buildings



FUTURE ENERGY SAVINGS PROJECTS

- Convert entire campus over to LED lighting
- Replace windows/doors/curtain walls on all the original buildings
- Finish upgrading plumbing fixtures to low-flow (Health Ed Building, Whitman Center, and Physical Plant)
- Weather-seal all buildings (especially original buildings and Health Ed)

Projected Phase II Costs: $10,000,000

Projected Total Additional Yearly Savings: $88,000

WHY PERFORMANCE CONTRACTING?

- Energy savings is what they do!
  - RFQ process / selection committee
- Access to quality engineering and design services up front for all systems
- Design/build contract
  - "One-stop" shop
  - Value engineering
  - Designs based on first-hand knowledge of the operators – employee input on systems
  - Emphasis on local contractors
- GUARANTEED SAVINGS!

PROPOSED CONSTRUCTION SCHEDULE

- Preliminary findings: March 6, 2015
- Financial review: March 20, 2015
- ESA delivery: September 4, 2015
- Signing of ESA: October 2015
- Contracts issued: October 2015
- Well field drilling begins: October 2015
- Construction begins: December 2015
- Construction completion: October 2016

AMERESCO

FISCAL YEAR 2017
CAPITAL OUTLAY PROJECT REQUEST

Institution Name: Monroe County Community College

Project Title: Renovation to East and West Technology Buildings

Project Focus: Academic and Administrative/Support

Type of Project: Renovation

Program Focus of Occupants: All Students

Approximate Square Footage: 60,000

Total Estimated Cost: $12,000,000

Estimated Start/Completion Dates: July 2016 – December 2017

Is the Five-Year Plan posted on the institution's public internet site? Yes
Is the requested project the top priority in the Five-Year Capital Outlay Plan? Yes
Is the requested project focused on a single, stand-alone facility? Yes (the buildings are connected by a covered walkway and function interdependently)

Please provide detailed, yet appropriately concise responses to the following questions that will enhance our understanding of the requested project:

Describe the project purpose.

With the opening of the Career Technology Center in August 2013, the Applied Science and Engineering Technology Division classrooms and labs were relocated out of the East and West Technology Buildings to the new building. The East and West Technology Buildings need major renovations especially in the lab areas to make it possible to convert these spaces into useable classroom and lab spaces for other programs needing to relocate or expand.

Describe the scope of the project.

The project is a renovation of interior spaces as well as retrofitting the buildings' mechanical and electrical systems and improving the energy efficiencies of the exterior envelopes with the goal of integrating sustainable design principles and systems throughout the project.

The project includes the following:

- Relocation of the Learning Assistance Lab, Writing Center, and Math Lab to an accessible and visible location
- Renovation of space to accommodate the Information Assurance and Security Program

- Renovation of space to support the expansion of the Viticulture and Enology Program
- Renovation of two existing computer labs that are used for multiple programs
- Renovation of six traditional classrooms and creation of a lecture hall
- Addition of student collaborative work spaces and commons area

1. **How does the project enhance Michigan's job creation, talent enhancement and economic growth initiatives on a local, regional and/or statewide basis?**

   As the only higher education entity in Monroe County, MCCC plays a key role in the region's economic development. The college remains committed to providing comprehensive educational opportunities, offering transformational learning through educational excellence, and delivering entrepreneurial and responsive leadership to address community needs. Our community's ability to attract new investment and jobs, as well as retain existing employers, is dependent upon developing new pathways to certificate and degree credentials that align with emerging business and industry needs. This renovation project is necessary to deliver the elemental instruction in the classrooms and labs essential to meet this need.

2. **How does the project enhance the core academic and/or research mission of the institution?**

   The renovation project will perfectly align with the college's mission and is in support of our core values of providing comprehensive education offerings, instructional excellence, accessibility, valuing human diversity, and accountability to students and stakeholders.

3. **How does the project support investment in or adaptive re-purposing of existing facilities and infrastructure?**

   The project requested is a renovation of classrooms and laboratories vacated after over 40 years of use as industrial technology instructional facilities as well as renovation of two 1960s vintage buildings. The Capital Outlay Project Request will provide investment in re-purposing these existing facilities into useable classroom and laboratory spaces for high growth, high demand instructional programs and for expansion of critical student support services delivered in an easily accessible location.

   The project includes a renovation of interior spaces as well as retrofitting the buildings' mechanical and electrical systems and improving the energy efficiencies of the exterior envelopes with the goal of integrating sustainable design principles and systems throughout the project.

4. **Does the project address or mitigate any current life/safety deficiencies relative to existing facilities? If yes, please explain.**

At this point, no life/safety issues have been identified relative to this project. The relocation of the Learning Assistance Lab will provide a far more accessible space for students utilizing the College's disability services.

5. How does the institution measure utilization of its existing facilities, and how does it compare relative to established benchmarks? How does the project help to improve the utilization of existing space and infrastructure, or support the need for additional space and infrastructure?

Space identified for renovation was made available by the construction of the Career Technology Center and the relocation of the Applied Science and Engineering Technology classrooms and labs. The space is being reallocated based upon the needs identified in the Campus Master Plan (relocation of the Learning Assistance Lab) and as identified by the divisions and departments of the College in keeping with program growth and development.

There is currently 40,506 net assignable square feet (NASF) between the East and West Technology Buildings. Net assignable square feet, in this case, refers to classroom space, halls, restrooms, offices and lounges and does not include mechanical spaces. Of the NASF, approximately 46 percent, or 18,601 square feet, of the space has been assigned a level 4 or 5 due to considerable wear of the interior or it has been used as heavy industrial lab space which is not easily occupied for a different use. An additional 21 percent, or 8,633 square feet, of the space has been assigned a level 3 indicating that the space is adequate but is due for renovation.

The College evaluates the usability of space and determines the need and timing for renovations for interior spaces by using a 5 point scale, or appearance level assigned as follows:

1 – Excellent condition, newly renovated space;
2 – Good condition, no renovation necessary;
3 – Adequate condition, could be used in current state, finishes are nearing the end of their useful life;
4 – Fair condition, interior finishes in need of replacement, should only be used on a case by case basis;
5 – Poor condition, spaces must be renovated in order to be occupied by another program.

East and West Technology Buildings Appearance Level Evaluation Results		
Type	**Score**	**Total Percentage**
Other *(classrooms,*	1 2 3	8.17 % 4.68 % 13.15 %

offices, lounges)	4	4.13 %
	Total Other	30.13 %
Industrial Technology Related Spaces *(vacated as result of new building)*	1 2 3 4 5	11.24 % 7.21 % 7.81 % 3.14 % 25.74 %
	Total Tech Related Spaces	55.14 %
Halls	4	12.91 %
Restrooms	1 3	1.46 % .35 %
	Total	100 %

6. How does the institution intend to integrate sustainable design principles to enhance the efficiency and operations of the facility?

The college is committed to incorporating sustainable design features into all of its renovation and new construction projects as was done in the construction of the Career Technology Center. All designs will include appropriate green options to improve efficiencies.

7. Are match resources currently available for the project? If yes, what is the source of the match resources? If no, identify the intended source and the estimated timeline for securing said resources?

The College does not have matching funds available for the project. The College will be evaluating multiple options in regard to securing the matching resources including but not limited to private donations, tax payer support (millage campaign), and private/public collaborations.

8. If authorization for construction, the state typically provides a maximum of 75% of the total cost for university projects and 50% of the total cost for community college projects. Does the institution intend to commit additional resources that would reduce the state share from the amounts indicated? If so, by what amount?

The College does not intend to add additional funds to reduce the State share. The request is for full funding of 50 percent of the project.

9. **Will the completed project increase operating costs to the institution? If yes, please provide an estimated cost (annually, and over a five-year period) and indicate whether the institution has identified available funds to support addition cost.**

   There should be no significant impact on operating costs since these facilities are currently in operation. It is quite possible that the overall operating costs will be reduced through sustainability efforts.

10. **What impact, if any, will the project have on tuition costs?**

    There should be no impact on student tuition and fees.

11. **If this project is not authorized, what are the impacts to the institution and its students?**

    The majority of these facilities have been taken off-line as they are not useable spaces for instruction. Without renovation, the majority of the spaces will remain off-line and potential program growth could be affected due to infrastructure limitations.

12. **What alternative to this project were considered? Why is the requested project preferable to those alternatives?**

    There are no practical alternatives for addressing this need. The option chosen is the best alternative to balance investment with efficient utilization of space.

Monroe County Community College

Monroe, Michigan

Monroe County Community College

Project Title: Renovation to the East Technology and West Technology Buildings

Project Focus: Academic and Administrative/Support

Type of Project: Renovation

Program Focus of Occupants: All Students

Approximate Square Footage: 60,000

Total Estimated Cost: $12,000,000

Estimated Start/Completion Dates: TBD (6 months)

Renovation to the East and West Technology Buildings

Purpose

Renovation of classrooms and laboratories vacated after over 40 years of use as industrial technology instructional facilities as well as renovation of two 1960s vintage buildings. The Capital Outlay Project Request will provide investment in **re-purposing these existing facilities** into useable classroom and laboratory spaces for **high growth, high demand instructional programs** and for expansion of **critical student support services** delivered in an easily accessible location.

Renovation to the East and West Technology Buildings

Scope

The project includes a **renovation of interior spaces** as well as retrofitting the buildings' **mechanical and electrical systems and improving the energy efficiencies of the exterior envelopes** with the goal of integrating **sustainable design principles and systems** throughout the project.

The project includes the following:

- Relocation of the **Learning Assistance Lab, Writing Center, and Math Lab** to an accessible and visible location
- Renovation of space to accommodate the **Information Assurance and Security Program**
- Renovation of space to support the expansion of the **Viticulture and Enology Program**
- Renovation of two existing **computer labs** that are used for multiple programs
- Renovation of **six traditional classrooms** and creation of a **lecture hall**
- Addition of **student collaborative work spaces** and **commons area**

East & West Technology Building Renovations

Building Areas: East Tech = 23,117 sf | West Tech = 23,108 sf

EXISTING FLOOR PLANS

- CLASSROOMS
- COMPUTER LAB
- CIRCULATION
- MIDDLE COLLEGE
- DATA PROCESSING
- UNUSED SPACE
- FACULTY OFFICES
- SUPPORT SPACES

Offline Instructional Space: Classrooms and Labs

Classrooms and laboratories in the East Technology Building and the West Technology Building are currently offline as they need to be renovated before they can be usable instructional space.

East & West Technology Building Renovations

Building Areas : Existing = 46,225 sf | New = 5,245 sf | Total = 51,470 sf

PROPOSED FLOOR PLAN

- CLASSROOMS
- COMPUTER LAB
- DATA PROCESSING
- MIDDLE COLLEGE
- WRITING/MATH LAB
- SUPPORT SPACES
- FACULTY OFFICES
- LEARNING ASSISTANCE
- CIRCULATION

Economic Growth through Talent Enhancement

MCCC plays a key role in the region's economic development. The College provides comprehensive educational opportunities, offering **transformational learning** through educational excellence, and delivering **entrepreneurial and responsive leadership** to address community needs.

Our community's ability to attract **new investment and jobs**, as well as **retain existing employers**, is dependent upon developing new pathways to certificate and degree credentials that align with emerging business and industry needs.

Equally important is our ability to **invest in Monroe County's human capital**…Michigan's human capital…by providing the **student support systems and learning assistance** that enables our students to master concepts, enthusiastically engage in learning, and successfully complete courses, certificates, and programs that elevate them to their educational and career potential.

Space Utilization

Space identified for renovation was made available by the construction of the **Career Technology Center** and the relocation of the Applied Science and Engineering Technology classrooms and laboratories.

Of the 40,506 net assignable square feet between the two buildings (classroom space, halls, restrooms, offices and lounges not including mechanical spaces), 67 percent of the space has been identified as needing immediate renovation with 46 percent classified as “fair” or “poor” condition.

East and West Technology Buildings Appearance Level Evaluation Results		
Type	**Score**	**Total Percentage**
Other *(classrooms, offices, lounges)*	1 2 3 4	8.17 % 4.68 % 13.15 % 4.13 %
	Total Other	30.13 %
Industrial Technology Related Spaces *(vacated as result of Career Technology Center)*	1 2 3 4 5	11.24 % 7.21 % 7.81 % 3.14 % 25.74 %
	Total Tech Related Spaces	55.14 %
Halls	4	12.91 %
Restrooms	1 3	1.46 % .35 %
	Total	100 %

1. Excellent condition, newly renovated space;
2. Good condition, no renovation necessary;
3. Adequate condition, could be used in current state, finishes are nearing the end of their useful life;
4. Fair condition, interior finishes in need of replacement, should only be used on a case by case basis;
5. Poor condition, spaces must be renovated in order to be occupied by another program.

Life/Safety and Sustainable Design

Life/Safety Deficiencies

- New entry/exit to buildings that meet ADA standards
- Relocation of Learning Assistance Lab, Writing Center, and Math Den to a first floor location providing a more accessible space for students (including those utilizing disability services)

Sustainable Design Principles

- LED Lighting Systems
- Incorporation of Renewable Energy Mechanical Systems
- Low-flow plumbing fixtures
- Incorporating Day Lighting throughout the buildings
- Installing energy efficient door and window systems
- Emphasis on recycled and sustainable finishes

Financial Impact

- This project will not have an impact on student tuition and fees.
- It is anticipated that overall operational costs will be reduced due to the energy efficiencies incorporated into the buildings.
- MCCC does not currently have the matching funds available for the project. Multiple options will be evaluated in regard to securing the matching funds including but not limited to private donations, tax payer support (millage request), and private/public collaborations.
- The request is for full funding of 50 percent of the project cost.

BUDGET LETTER -- CAPITAL OUTLAY

TO: University and Community College Presidents

Fiscal Year 2017 Capital Outlay Budget Information
Due Date: October 30, 2015

Michigan universities and community colleges are requested to participate in the capital outlay budget development process in preparation for the Fiscal Year 2017 Executive Budget Recommendation. There are two submissions related to this process, one statutorily-required and the other voluntary. The Management and Budget Act, Public Act 431 of 1984, as amended, requires universities and community colleges to present a Five-Year Capital Outlay Plan no later than November 1 of each year. Universities and community colleges may also elect to submit a capital outlay project request for state cost participation. However, no capital outlay project request will be given consideration for planning without its inclusion in the corresponding Five-Year Capital Outlay Plan. The details of these submissions are further outlined below.

Five-Year Capital Outlay Plan

The Five-Year Capital Outlay Plan is intended to provide state policymakers with the most current information available on institutional priorities and needs. The Five-Year Capital Outlay Plan should be revised as appropriate, and approved annually by the institution's governing body. It is to evaluate all capital priorities in light of current programming efforts, anticipated programming changes, and the current capital base. At a minimum, the Five-Year Capital Outlay Plan should cover fiscal year 2017 through fiscal year 2021. It is to include both self-funded projects, and those in which future state cost participation may be requested. The Department of Technology, Management and Budget, has developed a set of minimum criteria the comprehensive planning documents are to incorporate. These criteria are listed in Attachment A and remain unchanged from fiscal year 2016. Institutions may amend their Five-Year Capital Outlay Plan during the fiscal year by providing notification of the revision to the State Budget Office and other recipients.

The Five-Year Capital Outlay Plans are to be submitted in electronic format to the members of the Joint Capital Outlay Subcommittee, fiscal agencies and State Budget Office. Electronic posting of the plan on the institution's Internet site will fulfill this requirement provided e-mail notification is provided no later than the date

specified to the aforementioned recipients. Please refer to the subsection entitled "Submission to the State Budget Office" for specific instructions related to this submittal.

Fiscal Year 2017 Capital Project Request

Requests for capital outlay projects are to be a logical extension of information contained in the comprehensive Five-Year Capital Outlay Plan. Capital project requests should focus on addressing specific academic or research needs of the institution. To facilitate state cost participation, all capital project requests must comply with the State Building Authority Act, Public Act 183 of 1964, as amended, regarding the use of State Building Authority bond revenues. Projects should be narrowly focused on a specific facility or programmatic need. Projects requested to renovate and/or construct multiple, independent facilities will not be considered, nor will projects related to self-liquidating facilities, such a dormitories, performance halls, parking garages or athletic facilities.

A university or community college request for a capital project will be carefully reviewed and evaluated, and balanced against other competing capital outlay and statewide budget priorities for inclusion in the Executive Budget Recommendation. A scoring panel convened by the State Budget Office will review and evaluate the top priority capital project request from each institution relative to a set of minimum statutory criteria (MCL 18.1242), which includes the following:

a. Investment in existing facilities and infrastructure.
b. Life and safety deficiencies.
c. Occupancy and utilization of existing facilities.
d. Integration of sustainable design to enhance the efficiency and operations of the facility.
e. Estimated cost.
f. Institutional support.
g. Estimated operating costs.
h. Impact on tuition, if any.
i. Impact on job creation in this state.
j. History of prior appropriations received by the institution through the capital outlay process.

Note: The State Budget Office may also consider additional criteria that it believes will enhance the objective evaluation of projects.

If new capital outlay projects are included in the Fiscal Year 2017 Executive Budget Recommendation, only planning authorization will be recommended. If planning is authorized by the Legislature in a subsequent appropriations act, the

university or community college shall prepare professional preliminary design documents to secure support for construction. Once professional planning documents have been reviewed and approved for authorized projects, state funding will provide a maximum of 75% for universities and 50% for community colleges, of the total cost of each project. As in prior years, the state share of financing for recommended large-scale projects may be capped at an amount less than the aforementioned levels.

A planning authorization approval does not guarantee support for a future construction authorization. A full assessment of the State Building Authority bond cap vis-à-vis available state budget resources will be completed before advancing projects beyond the planning stage. Projects whose final planning costs significantly exceed original estimates will be carefully scrutinized, and may require additional program and scope refinement. Institutions with a current planning authorization should continue to identify the project as their top priority request pending the enactment of a construction authorization.

Due to continued budgetary pressures, universities and community colleges may submit only their top priority capital outlay request. Attachment B contains the sample format for submitting a Fiscal Year 2017 capital outlay budget request, which has not been revised from the year prior. If you desire a copy of the revised electronic template in Microsoft Word, please e-mail Kris Kokx at kokxk@michigan.gov with your request. Please refer to the subsection entitled "Submission to the State Budget Office" for specific instructions related to this submittal.

Submission to the State Budget Office

Electronic submission guidelines for the Five-Year Capital Outlay Plan and Fiscal Year 2017 Capital Outlay Project Request are as follows:

1. **Five-Year Capital Outlay Plan**: To comply with the statutory requirement, institutions are to post their Five-Year Capital Outlay Plans in a searchable electronic format (preferably PDF) on a publically viewable location on the institution's internet site. The documents are to be archived on the internet site for a period of no less than three years. Please submit the specific internet site address of the posting via e-mail to the individuals on the ***Distribution List*** *(below)* no later than ***Friday, October 30, 2015***.

2. **Fiscal Year 2017 Capital Project Request:** Electronic versions of Attachment B representing the Fiscal Year 2017 Capital Project Request (preferably PDF) may be submitted ***concurrently*** with the Five-Year Plan internet site address via an e-mail attachment to the individuals on the ***Distribution List*** *(below)* no later than ***Friday, October 30, 2015***.

In order to confirm successful transmission of the electronic submittal, the State Budget Office will reply via e-mail indicating receipt of the documents. If you do not receive a reply within a reasonable timeframe, please contact Lisa Shoemaker, Capital Outlay Coordinator, at (517) 335-7192 or shoemakerl@michigan.gov.

Distribution List

Joint Capital Outlay Subcommittee:

Rep. Nancy Jenkins (Chair)	NancyJenkins@house.mi.gov
Rep. Al Pscholka	AlPscholka@house.mi.gov
Rep. Jon Bumstead	JonBumstead@house.mi.gov
Rep. Phil Potvin	PhilPotvin@house.mi.gov
Rep. Aaron Miller	AaronMiller@house.mi.gov
Rep. Adam Zemke	AdamZemke@house.mi.gov
Sen. Darwin Booher (Vice-Chair)	sendbooher@senate.michigan.gov
Sen. Mike Nofs	senmnofs@senate.michigan.gov
Sen. Tonya Schuitmaker	sentschuitmaker@senate.michigan.gov
Sen. Geoff Hansen	senghansen@senate.michigan.gov
Sen. Peter MacGregor	senpmacgregor@senate.michigan.gov
Sen. Vincent Gregory	senvgregory@senate.michigan.gov
Sen. Curtis Hertel, Jr.	senchertel@senate.michigan.gov

Fiscal Agencies:

Bill Bowerman	bbowerman@senate.michigan.gov
Ben Gielczyk	bgielczyk@house.mi.gov

State Budget Office:

Lisa Shoemaker	shoemakerl@michigan.gov

Thank you in advance for your submission. We look forward to working with you in developing the Fiscal Year 2017 Executive Budget Recommendation. If you have questions regarding your submission, please contact Lisa Shoemaker, Capital Outlay Coordinator, at (517) 335-7192 or shoemakerl@michigan.gov.

Sincerely,

John S. Roberts
State Budget Director

Recommended Five-Year Master Plan Components
Michigan Universities and Community Colleges

I. Mission Statement

Summary description of the overall mission of the institution.

II. Instructional Programming

As part of the Five-Year Capital Outlay Plan, each college and university shall provide an overview of current academic programs and major academic initiatives. This "instructional programming" component should:

a. Describe existing academic programs and projected programming changes during the next five years, in so far as academic programs are affected by specific structural considerations (i.e., laboratories, classrooms, current and future distance learning initiatives, etc.);
b. Identify the unique characteristics of each institution's academic mission:
   For Universities:
   Major research institution, technical/vocational center, geographic service delivery area(s), community presence activities, etc.
   For Community Colleges:
   Two-year degree and certificated technical/vocational training, workforce development activities, adult education focus, continuing or lifelong educational programming, partnerships with intermediate school district(s), community activities; geographic service delivery area(s), articulation agreements or partnerships with four-year institutions, etc.
c. Identify other initiatives which may impact facilities usage;
d. Demonstrate economic development impact of current/future programs (i.e., technical training centers, life science corridor initiatives, etc.).

III. Staffing and Enrollment

Colleges and universities must include staffing and enrollment trends in the annual Five-Year Capital Outlay Plan. This component should:

a. Describe current full and part-time student enrollment levels by academic program and define how the programs are accessed by the student (i.e.. main or satellite campus instruction, collaboration efforts with other institutions, Internet or distance learning, etc.);
b. Project enrollment patterns over the next five years (including distance learning initiatives);
c. Evaluate enrollment patterns over the last five years;
d. Provide instructional staff/student and administrative staff/student ratios for major academic programs or colleges;

e. Project future staffing needs based on five-year enrollment estimates and future programming changes;
f. Identify current average class size and projected average class size based on institution's mission and planned programming changes.

IV. Facility Assessment

A professionally developed comprehensive facilities assessment is required. The assessment must identify and evaluate the overall condition of capital facilities under college or university control. The description must include facility age, use patterns, and an assessment of general physical condition. The assessment must specifically identify:

a. Summary description of each facility (administrative, classroom, biology, hospital, etc.) according to categories outlined in "net-to-gross ratio guidelines for various building types," DTMB-Office of Design and Construction Capital Outlay Design Manual, appendix 7. If facility is of more than one "type", please identify the percentage of each type within a given facility.
b. Building and/or classroom utilization rates (Percentage of rooms used, and percent capacity). Identify building/classroom usage rates for peak (M-F, 10-3), off-peak (M-F, 8-10 am, 3-5 pm), evening, and weekend periods.
c. Mandated facility standards for specific programs, where applicable (i.e. federal/industry standards for laboratory, animal, or agricultural research facilities, hospitals, use of industrial machinery, etc.);
d. Functionality of existing structures and space allocation to program areas served;
e. Replacement value of existing facilities (insured value of structure to the extent available);
f. Utility system condition (i.e., heating, ventilation, and air conditioning (HVAC), water and sewage, electrical, etc.);
g. Facility infrastructure condition (i.e. roads, bridges, parking structures, lots, etc.);
h. Adequacy of existing utilities and infrastructure systems to current and 5-year projected programmatic needs;
i. Does the institution have an enterprise-wide energy plan? What are its goals? Have energy audits been completed on all facilities, if not, what is the plan/timetable for completing such audits?
j. Land owned by the institution, and include a determination of whether capacity exists for future development, additional acquisitions are needed to meet future demands, or surplus land can be conveyed for a different purpose.
k. What portions of existing buildings, if any, are currently obligated to the State Building Authority and when these State Building Authority leases are set to expire.

<u>In the event that comprehensive, current physical facility assessments are not available, the Five-Year Capital Outlay Plan must include data from the most</u>

recent physical facility assessment and describe the schedule by which a new assessment will be completed.

V. Implementation Plan

The Five-Year Capital Outlay Plan should identify the schedule by which the institution proposes to address major capital deficiencies, and:

a. Prioritize major capital projects requested from the State, including a brief project description and estimated cost, in the format provided. (Adjust previously developed or prior years figures utilizing industry standard CPI indexes where appropriate).
b. If applicable, provide an estimate relative to the institution's current deferred maintenance backlog. Define the impact of addressing deferred maintenance and structural repairs, including programmatic impact, immediately versus over the next five years.
c. Include the status of on-going projects financed with State Building Authority resources and explain how completion coincides with the overall Five-Year Capital Outlay Plan.
d. Identify to the extent possible, a rate of return on planned expenditures. This could be expressed as operational "savings" that a planned capital expenditure would yield in future years.
e. Where applicable, consider alternatives to new infrastructure, such as distance learning.
f. Identify a maintenance schedule for major maintenance items in excess of $1,000,000 for fiscal year 2017 through fiscal year 2021.
g. Identify the amount of non-routine maintenance the institution has budgeted for in its current fiscal year and relevant sources of financing.

ATTACHMENT B

FISCAL YEAR 2017
CAPITAL OUTLAY PROJECT REQUEST

Institution Name:

Project Title:

Project Focus: D Academic D Research D Administrative/Support

Type of Project D Renovation D Addition D New Construction

Program Focus of Occupants:

Approximate Square Footage:

Total Estimated Cost

Estimated Start/Completion Dates:

Is the Five-Year Plan posted on the institution's public internet site? D *Yes* D *No*
Is the requested project the top priority in the Five-Year Capital Outlay Plan? D Yes D *No*
Is the requested project focused on a single, stand-a/one facility? 0 Yes D *No*

Describe the project purpose.

Describe the scope of the project.

Please provide detailed, yet appropriately concise responses to the following questions that will enhance our understanding of the requested project:

1. How does the project enhance Michigan's job creation, talent enhancement and economic growth initiatives on a local, regional and/or statewide basis?

2. How does the project enhance the core academic and/or research mission of the institution?

3. How does the project support investment in or adaptive re-purposing of existing facilities and infrastructure?

4. Does the project address or mitigate any current health/safety deficiencies relative to existing facilities? If yes, please explain.

5. How does the institution measure utilization of its existing facilities, and how does it compare relative to established benchmarks for educational facilities? How does the project help to improve the utilization of existing space and infrastructure, or conversely how does current utilization support the need for additional space and infrastructure?

6. How does the institution intend to integrate sustainable design principles to enhance the efficiency and operations of the facility?

7. Are match resources currently available for the project? If yes, what is the source of the match resources? If no, identify the intended source and the estimated timeline for securing said resources?

8. If authorized for construction, the state typically provides a maximum of 75% of the total cost for university projects and 50% of the total cost for community college projects. Does the institution intend to commit additional resources that would reduce the state share from the amounts indicated? If so, by what amount?

9. Will the completed project increase operating costs to the institution? If yes, please provide an estimated cost (annually, and over a five-year period) and indicate whether the institution has identified available funds to support the additional cost.

10. What impact, if any, will the project have on tuition costs?

11. If this project is not authorized, what are the impacts to the institution and its students?

12. What alternatives to this project were considered? Why is the requested project preferable to those alternatives?
