poor foolish ones, they need not lie to us they are perfectly safe for we do not war with women. They have the highest women down here for ever saw that is a majority of them, and it was a sight as they might. Such nonsense about men, women, and children.

I don't take it pleasure in being with them, though there are exceptions. I have found one or two families of enlightened beings who are not so much inconsiderable when I was compelled to buy provisions for the sick before my supply. I came up to them. They are all longest though, but what matters that to me? If they take no part in the war and are not contesting, I expect you have a pretty nice time. If your father is dead, I think we should think of you. I hope you may do well. I intend to come to this land in our trip to eastern valley beyond the rocky mountain. There is so much hard work and hardship in the states of. I am very few of our company will stay long in the states more than a few months or weeks to visit their friends and then away to the glorious west. There will be a lot of hard work and there we will conquer that the more poverty or lay our bones in the broad prairie, which I once thought we must have learned to love, but enough of that. At present is a year or two will be time enough to think of it when we get out of the service. I wish you good morning, sir.
