

Q1 Please select which of the following course modalities/formats you have taken at MCCC. Select all that apply.

Answered: 370 Skipped: 0

ANSWER CHOICES	RESPONSES
Face-to-face synchronous: students are required to come to campus for all scheduled class times.	45.41% 168
Online (L)- asynchronous: no on-campus requirement, no specific meeting time.	86.22% 319
Blended (B)- synchronous and asynchronous: some online/virtual component; students may be required to meet at some or all scheduled class times, face-to-face on campus or remotely such as in a virtual classroom.	50.81% 188
Total Respondents: 370	

Q2 Please rank your preferred course modality/format at MCCC. A rank of 1 is most preferred and a rank of 4 is least preferred.

Answered: 367 Skipped: 3

	1	2	3	TOTAL	SCORE
Face-to-face synchronous: students are required to come to campus for all scheduled class times.	29.46% 104	24.08% 85	46.46% 164	353	1.83
Online (L)- asynchronous: no on-campus requirement, no specific meeting time.	52.20% 190	18.68% 68	29.12% 106	364	2.23
Blended (B)- synchronous and asynchronous: some online/virtual component; students may be required to meet at some or all scheduled class times, face-to-face on campus or remotely such as in a virtual classroom.	19.78% 71	56.27% 202	23.96% 86	359	1.96

Q3 Please briefly describe why your rankings in question 2. For example, why did you select your most and least preferred modality/format?

Answered: 329 Skipped: 41

#	RESPONSES	DATE
1	I work part time and live 30 minutes from MCCC so taking online courses work the best for me.	3/28/2022 7:41 PM
2	There are positives and negatives about all options. I love face-to-face because I feel as if teachers are more helpful in a classroom. Of course, life is busy and not everyone has time for in person classes. Online helps because I can work and have a social life along with getting my schooling done. However, straight online classes are quite hard for me to learn in because you mostly teach yourself. Blended is most likely the best way to go about classes. You get the benefits of both while not reaping the negatives of either too harshly.	3/28/2022 7:11 PM
3	Because I work full time, have 2 kids, and the usual meeting times do not fit my schedule.	3/28/2022 4:01 PM
4	Because of a hectic work schedule (working two jobs with one being on California time), I am unable to attend traditional classes. Being able to complete my degree online has been helpful. Had they been on campus, I would not have even attended as it would have been impossible.	3/27/2022 7:39 PM
5	I am a dual enrollment student, so I don't have the means to travel up to campus.	3/27/2022 5:59 PM
6	It depends what is going on in life at the time and scheduling with work affects my preference.	3/27/2022 2:26 PM
7	I put Online in one because I think the student has more freedom with heir time also they have the topics and what they learned in class in the platform if they want to review it, I put in second place the face to face because I think is more interactive with the students and they feel more in touch with their classmates and with their teachers and blended in third because I think that students need to organize more their time and adapt their days to their schedule of their classes.	3/27/2022 1:41 PM
8	Face to face is much easier to learn and obtain information. Online is much more difficult for me to do especially with the drafting class I was taking.	3/26/2022 3:35 PM
9	online is best because i do not have to go anywhere to complete the class. Blended is the worst because when you actually have to go into class it seems unregular and long	3/25/2022 6:19 PM
10	Online is just easier for me with my job because I can't drive yet. It would be difficult with the other two options to get there.	3/25/2022 12:16 PM
11	I prefer the blended option because it allows me to interact with classmates in a more normal setting while still being able to work around my disability online.	3/24/2022 11:31 PM
12	Work Schedule	3/24/2022 11:17 PM
13	I learn better in-person, and I feel like it allows for better discussion. However, I don't like the back and forth between in -person and online, and as a dual-enrollment student, it's difficult to schedule classes that are blended as they generally tend to interfere with my high school schedule.	3/24/2022 8:02 PM
14	I work full-time in the mornings. Online allows me the ability to still attend classes. I'm still panicked about one class in particular that never offers online and is only available in the mornings. How am I going to be able to take that required course???	3/24/2022 4:14 PM
15	It is so challenging to learn online. It is basically having an instructor give you work and telling you to teach yourself. That is no way to learn and advance your knowledge. Students need to be taught in full. Online is just way too hard and makes you feel alone in struggling to understand what we are supposed to be learning.	3/24/2022 9:58 AM
16	My work schedule makes it impossible to do otherwise	3/23/2022 3:02 PM
17	As an older student with a family and a job, I like the flexibility of the option of being in class. I	3/23/2022 9:29 AM

Winter 2022 Student Course Modality Preferences Survey

do learn better face to face, but sometimes life happens. So as long as I get caught up on the work.

18	My school hours tend to fall either in the very early morning hours or in the afternoon. As a busy mom, I need a versatile schedule and the flexibility of online school is so helpful. I doubt I would be able to manage my classes without the online option.	3/23/2022 8:21 AM
19	online is easier for me because of my work schedule	3/23/2022 7:26 AM
20	I really enjoy doing my school work on my own time, not having to drive to campus.	3/22/2022 11:17 PM
21	I have a full time job. I have a family to support and bills to pay and I don't have the luxury to only attend school.	3/22/2022 11:33 AM
22	Face to face is easier for me to grasp concepts and understanding material	3/22/2022 11:25 AM
23	My most preferred was because I am able to work more and not be as stressed. My least is because I still work and it's a lot	3/22/2022 11:20 AM
24	I feel that generally face-to-face is the easiest way to learn. You get more teacher-student and student-student interaction. I prefer online the least to all of the types because it is generally harder to learn for me this way. I think that with the course that I am taking, [REDACTED] there isn't really a need to go into a classroom very much, but with other classes, being inside of a classroom and having more student-teacher and student-student interaction helps to have greater success in a college course.	3/22/2022 10:41 AM
25	With working full time it gives the ability to work when you can.	3/22/2022 10:36 AM
26	I learn best with face to face and I learn the worst when it is completely online. Being face to face gives me more motivation and helps me stay on track.	3/22/2022 9:34 AM
27	I am a manager and typically work 50-60 hours. I don't get home until 7 or 8 at night most nights so a traditional in class education is not an option for me anymore.	3/21/2022 6:45 PM
28	As a Michigan Reconnect student with full time employment, online classes are the only way that I am able to attend.	3/21/2022 4:37 PM
29	Online is most convenient with my home life. I am able to complete assignments at the time of day that works best with my schedule.	3/21/2022 3:44 PM
30	You are able to engage more with a professor face to face rather than online or blended.	3/21/2022 2:52 PM
31	I need to be able to do online classes with my children and their activities to be able to complete my degree. I also have a hard time focusing in a classroom and with online courses I can take breaks as needed to be successful.	3/21/2022 1:45 PM
32	I learn better in person.	3/21/2022 1:29 PM
33	i enjoy online learning the most because with schedules these days it is hard to make it to the building, i struggled with this years ago when i attended. it can be frustrating for some, and was for me at first, but the best option for a full schedule.	3/21/2022 1:00 PM
34	I live thirty minutes away from campus, so taking all online or blended limits the amount of time that I need to drive each week. This has helped quite a bit with classes that fit the online format, such as English and history, so I have been fine with that format in the past. My future classes may benefit from being blended for certain activities or meetings to discuss difficult topics. Face to face requires more scheduling, and if classes are offered 4 hours apart on the same day, I have to remain on campus, change my work schedule, and find an efficient use for that down time.	3/21/2022 12:02 PM
35	Based on the history of the last two years, and current events overseas, it appears "Covid" will be back in the Fall as all viruses are. Also, as current news of the reappearance of Dr. Flip Flop Fauchi and his "threats" that we may be back in masks soon, I personally would just rather stay blended. I can't suffocate in a mask all day and try to see though my fogged glasses. Why start something in person again, only to end up right where we are now? At least with blended classes, I can be in the comfort of my home to learn and breathe, BUT have the option to come to campus should I require additional assistance. I am studying Computer Science, there really is no reason for me to be in a classroom setting. Gas prices are no joke either.	3/21/2022 10:58 AM

Winter 2022 Student Course Modality Preferences Survey

36	My most preferred format is online, as the Brightspace platform is one that is used at my high school (Michigan Virtual Charter Academy) and the one I am most comfortable using.	3/21/2022 10:43 AM
37	I feel that it is the easiest to learn and ask questions during face to face learning while online learning is easier to fit into my busy schedule and blended I have not tried before in any form of schooling.	3/20/2022 1:34 PM
38	convenience. being able to do my course work at my pace and on my schedule is very important to me	3/20/2022 11:17 AM
39	I love face to face classes because I am the type of person who likes to stay organized and with a schedule. Also I felt like it was much easier to learn face to face instead of online, it was easier to communicate with the teachers and a little easier to connect with the teachers. Blended was my second choice because we at least met one day during the week, this allowed for me to ask the questions I have came up with during the rest of the week. Online made me feel like I didn't have a schedule to follow and I felt so disorganized. Also I found it harder to learn this way.	3/20/2022 9:18 AM
40	I work full time and it is easier to have online with no on-campus requirement and or specific meeting time.	3/20/2022 12:02 AM
41	Sometimes driving and transportation can be problematic, I like blended/online courses to avoid this problem. I really like online, the only reason I rank blended first is because communication and questions with the professor becomes slightly easier to comprehend.	3/19/2022 9:39 PM
42	Im not a social person tbh	3/19/2022 5:14 PM
43	I have bad anxiety so face to face learning is a big no to me. I know in the future I will have to take face to face classes, but if I can avoid it, I am all for it.	3/18/2022 11:18 PM
44	online is my most preferred because I have to go to work and it's more convenient, but face-to-face classes also help me understand the material better than online.	3/18/2022 6:21 PM
45	I learn the best in face to face, however during the pandemic I would look for blended as they offered similar, yet reduced, benefit.	3/18/2022 12:56 PM
46	I don't have a car available at all times, so being online with no in-person requirement is best for me. It also has just the right combination of structure and freedom for me to be able to work efficiently, without stressing myself.	3/18/2022 12:22 PM
47	I've been accustomed to online classes for a bit over a year by now, so I'm most comfortable with it. I haven't done blended courses yet, so that's why they're on the bottom	3/18/2022 12:13 PM
48	I chose Blended as my first choice because I am able to receive some in-class instruction, while still maintaining a fairly open schedule for parenting and working. My second choice is to be completely online and that is again because of the ability to keep an open schedule. Having to be in-class for every class would make going to school full time as a single working mother extremely hard for me. Almost impossible actually.	3/18/2022 9:58 AM
49	Personally, I like the all asynchronous, not only is it helping with my schedule outside of school but it is easier for me to focus on my own work and scheduled work. I like the trainings that it gives us as well.	3/18/2022 8:58 AM
50	I prefer to learn certain subjects in person, hands on learning is easier for me. But I also work full time and have two children so the convenience of having the online option has made it possible for me to go back to school.	3/17/2022 10:09 PM
51	I made online my first choice because I prefer having more freedom. I like getting my work done on my own time and not having to show up at a certain time. I made blended my second choice because while it does require showing up to class, it isn't required every week.	3/17/2022 9:21 PM
52	It is easier to do online because I work a full-time schedule and am not able to change my work schedule to go to school.	3/17/2022 8:55 PM
53	Work schedule	3/17/2022 6:43 PM
54	For me online classes work the best because it is more convenient to keep a steady job while still attending college. I've been able to work amazing hours and get the money I need to sustain the expenses of my bills.	3/17/2022 6:14 PM

Winter 2022 Student Course Modality Preferences Survey

55	I selected number 1 better because it helps me to concentrate in school, not at home. Also, it's easier to give the teacher a assignment, and going to school is being more active not staying at home.	3/17/2022 4:16 PM
56	So, for face to face is a good choice because I can see people front of me talking not staying home doing online work.	3/17/2022 4:10 PM
57	I do not learn well online. It is very hard for me to focus as well as actually get my work done. Hybrid is nice because it provides the teaching part, but if the assignments are online, it works out great since I commute. I did this last semester and it was really nice. In person is my first choice just because I am more of a hands-on learner, but hybrid is okay too. Just not online.	3/17/2022 2:39 PM
58	I rather do face to face because of running into problems with the math. I don't like the online classes because I can't get the help that I need	3/17/2022 11:36 AM
59	I selected it being the most preferred because I have a full time job and my son full time. So me being able to do online schooling is the best option for me.	3/17/2022 10:06 AM
60	I prefer online classes. Will take as many as possible. It allows me more class available during times that work for me. I also prefer to have control over when to do class work instead of designated class times. I do not do well with in person classes. I on average get 1 to 2 grades higher for the semester in classes I take online vs in person.	3/17/2022 9:49 AM
61	Most homework is online anyway so I would rather just have like one class a week for a lecture and question, and then we do our homework at home. I chose face to face second because this is the best way oof learning the material for real and taking it in with a deep understanding. Online I put third because it is really hard to understand some content without the help of a teacher even if you can email or message them.	3/16/2022 10:00 PM
62	I work 40 hours a week full time and going to school full time. It's the only way im able to graduate when im able to.	3/16/2022 9:21 PM
63	I chose face to face as my least favorite because my schedule is very busy and to try and do classes face to face or even with specific meeting times is very hard for me, online schooling is so much easier simply because I can make everything according to my schedule and everything can be fit in.	3/16/2022 6:31 PM
64	In person is of course in first, but I still, for some reason prefer Online (asynchronous) to Blended (like Zoom meetings).	3/16/2022 5:24 PM
65	I picked online as my preferred format due to that I'm employed full time and a family of 5. This gives me time to fit in my school in the necessary time slot available in my life. It would be a lot harder for me to attend if I wasn't able to do online.	3/16/2022 3:00 PM
66	I am a dual enrollment student and it is easier for me to do work online but I also have never had face to face schooling at the college.	3/16/2022 2:40 PM
67	Blended works best for me personally because most work is done at home but having a class or two helps in the case of needing extra help.	3/16/2022 1:44 PM
68	I don't like being all-online because I don't get to meet my professor	3/16/2022 1:18 PM
69	I personally like all the forms of classes. I prefer online because having a child, it makes it a lot easier to be able to attend school and go to work. However, I truly believe that it is easier to learn in a physical classroom with a professor versus by myself at home.	3/16/2022 12:26 PM
70	I think I speak for most, especially when dealing with higher credited hour classes, that face to face is the best way of learning and understanding. It also creates a better sense of discipline from student to professor and eliminates a lot of need to self-teach topics.	3/16/2022 11:22 AM
71	i picked online for most preferred because it works best for me. i picked blended for my second choice because it can work best for everyone. everyone has the option to go to class or stay home.	3/16/2022 10:54 AM
72	With mine and my husband's work schedule and the children, online works best for our family.	3/16/2022 10:40 AM
73	I do best with a face to face class knowing I am able to understand better and hear people ask questions that I might have too, but I am doing better than I thought I would in an all asynchronous class with understanding the material and having access to a discussion thread for questions and concerns.	3/16/2022 10:12 AM

Winter 2022 Student Course Modality Preferences Survey

74	I learn best with a face to face instructor to answer my questions. The online- class that I have taken was not the greatest experience for me. My instructor did not send us lectures. We were instructed to read the text book, do assignments, and take exams. It was a struggle for me to do this. In-person classes offer actual lectures that teaches me the material and allows me to actually learn. I feel like I have to be my own teacher online.	3/16/2022 9:27 AM
75	The blended allows for pre recorded lecture helps if you have to work. Face-to-face is fine. Completely online is a third choice for me. I felt the syllabus was incomplete without the instructor leaving an intro video for expectations not listed on the syllabus. I think an intro video to a class online only with no scheduled time should have a mandatory introduction video.	3/16/2022 9:10 AM
76	they make the format very easy to understand and work with you while having a busy work/family life.	3/16/2022 6:45 AM
77	because I will not make time for a online or virtual class.	3/16/2022 5:17 AM
78	I selected these because as a busy college student, it is easier for me to complete blended classes as opposed to fully on campus. I'm able to understand material and still be able to work full time. Having blended classes has helped me immensely.	3/15/2022 11:56 PM
79	I live 30 minutes away and feel as though some content isn't necessary to drive to class for. if we could take exams from home during covid, why must we transition back to in person only? for exam reviews, the content is useful and appreciated but could be done online or zoom. for classes that rely heavily on powerpoint lectures, just transition to online or zoom classes. having blended classes was very beneficial for me with less cost and having more time to work on assignments/studying at home instead of having an hour round trip on top of class time. the content was fresh in my mind and I could immediately begin reviewing and organizing my own notes.	3/15/2022 10:48 PM
80	I am a stay at home mom and being able to access my education online is almost a necessity for me. I have loved my in person classes but it has been a real struggle being able to be a good mom and make it to my classes. An online option for my classes would have really helped me be more focused and less worried about where my kids were or what i would do if they got sick or the sitter cancelled.	3/15/2022 9:06 PM
81	My rankings were done the way they were because my preferred class modality has always been in person, but due to COVID-19 I feel more comfortable with online classes for the time being. Mixed classes just seem messy to me though I have never actually had one so ranking it would be difficult to do.	3/15/2022 9:05 PM
82	I have a full time job. Some of the face to face classes I need are not offered in the evenings. If able to do online, I am able to work at my pace.	3/15/2022 8:57 PM
83	I would prefer to do online classes because I feel like they are better for me. I could do blended classes but I would prefer online. I would not like Face-to-Face because I do not do well around people I do not know and I get very anxious and do not focus as much. I also like online because I have lots of copies of notes and I can print them out and reveiw them as much as needed.	3/15/2022 8:30 PM
84	As a student with a chronic illness and disability, the ability to meet remotely is appreciated greatly. I enjoy face-to-face learning more than online, but the choice to be in person when I am healthy, and online when I'm sick is perfect for my everchanging life.	3/15/2022 7:56 PM
85	I chose online as my preferred format because it allows me to work at my own pace, and on my own time. Blended would be second best with the hopes that mandatory meeting would not be frequent. If it weren't for the opportunity to earn my degree completely online, I would not have been able to attend MCCC.	3/15/2022 7:55 PM
86	Face-to-face is the best in forms of communication and actual learning, plus having resources in seeing and asking direct questions to the professor along with interacting with classmates. Blended is next because it is nice to not have to go to campus all the time and some aspects are at the students own pace depending on the class plus being able to see and communicate with classmates and professors. Online is least for me because it is not the best for actual learning and understanding of things, there is a kind of "cut off" from the rest of everything and everyone, it is not so easy to ask and get answers to questions. It is convenient for busy lives, but not the best for the actual learning aspects of a class.	3/15/2022 4:59 PM

Winter 2022 Student Course Modality Preferences Survey

87	I like having blended classes because they work best with my busy schedule, but I need that face to face interaction with the teacher and students. its a perfect balance of class time and d=time do do things on my own	3/15/2022 4:47 PM
88	Online classes are easier with my schedule. I work 8-5pm Monday-Friday so I would not be able to go to school if it is face-to-face	3/15/2022 4:46 PM
89	I really like online because it allows be to do my classes on my own time but always getting them done by the due dates. I also like it because it is not as stressful as being in an in person class	3/15/2022 4:36 PM
90	Even though I haven't taken any face-to-face classes, I will always prefer them because I learn more in class. I also preferred online classes better than my blended because since we did everything online, the zooms were not beneficial in any way.	3/15/2022 4:33 PM
91	Online is so much more convenient! Face-to-face can take a lot of juggling to schedule around work. Then, sometimes, you have to beg the manager to get your schedule rearranged for classes!	3/15/2022 4:17 PM
92	I have really enjoyed my face-to-face courses in my early childhood classes, however, I loved having the option to be online. It is so much easier to have the option to be online, especially with core classes such as math or science credits.	3/15/2022 4:02 PM
93	Online -no specific meeting time makes it easier to fit classes into my busy schedule.	3/15/2022 4:00 PM
94	I prefer online only but some classes do require more guidance from a teacher so its safer to say blended just in case there is a need for more teaching support. Also provides a little more flexibility needed for work and home life.	3/15/2022 3:44 PM
95	Face to face synchronous and online are tied but I like face to face because it's more Hands-On. But I also like online because I can do it in the comfort of my own home and I can do it whenever I want as long as it's before the deadline.	3/15/2022 3:37 PM
96	For most preferred I chose blended because you can go to the classes, see the online aspect of school, and if you are sick or something you can join a zoom. For least preferred I chose totally virtual. It's still good but face to face really engages the listener to comprehend the work better.	3/15/2022 2:51 PM
97	I am not a big fan of face to face classes because I get very distracted easily. I like online classes because I do not get distracted as easily and I am able to get all my work done before anyone in my family gets home from work and school. I like blended classrooms because I like that I am able to zoom with my professor and not have to deal with other students around me.	3/15/2022 2:08 PM
98	I feel more comfortable in my own home when Im working around my own schedule, I can do homework and then quickly go play basketball or watch a movie.	3/15/2022 2:05 PM
99	LOCATION OF HOME TO SCHOOL AND WORK SCHEDULE. ONLINE MAKES IT EASIEST FOR TRAVEL AND SCHEDULE.	3/15/2022 1:42 PM
100	I prefer face-to-face synchronous because I feel more involved with my studies and can actually have more of a sense back to traditional ways. The format that I like the least is just all online. I feel like it's not the right fit for me in a sense that I can't enjoy the human interaction of actually going to class by just going through the motions of an all online class.	3/15/2022 1:15 PM
101	I like the idea of having more in person classes because I am able to understand the material better. If I do not know how to do something, I am able to talk to the professor right then, instead of waiting for them to respond to an email.	3/15/2022 1:12 PM
102	I love lectures at home, I find it easier to retain the info and follow the discussion	3/15/2022 1:10 PM
103	Taking online classes has been crucial for me. I'm able to work the hours needed for me to have the amount of money I need to stay on my feet while getting my degree. In person classes fall in the time frame of my work schedule and if it weren't for online classes I wouldn't have the money I need to be stable.	3/15/2022 1:03 PM
104	I would have to say Blended (B) would be the modality that I would prefer the most in comparison to the other two options. Myself along with many of my classmates personally believe we learn better on campus, and will have fun doing so as we have been at home for too long. This would be also be a great way to get students back on campus and hopefully boost	3/15/2022 12:52 PM

Winter 2022 Student Course Modality Preferences Survey

different events attendances. Additionally, of course a lot of students have jobs, many other classes, kids, etc. With that being said, blended would be a great option as it gives the student flexibility with their own schedule while also allowing the student to succeed in his/her/their class.

105	I don't have to drive and I learn better on my own. In person stresses me out more and I don't learn as easily	3/15/2022 12:41 PM
106	I chose blended first I do like the face to face and do the work online	3/15/2022 11:53 AM
107	I'm a reconnect student, mother, and full time employee... having more online, blended options is best for my schedule. Evening classes would be nice too.	3/15/2022 11:50 AM
108	I really like having the opportunity to have 1 on 1 time with professors. Sometimes, when classes are all online, it is hard to ask questions or get clarification on projects.	3/15/2022 11:49 AM
109	I work a full time job in Ann Arbor, am a single mom and also an older student. Online works best for me especially since a lot of the classes I need for my degree are normally day time classes.	3/15/2022 11:30 AM
110	Online alone is difficult to stay focused in after long periods, whereas if a class is blended, transport and fare is reduced, and as such, more can be done in a day. Having an option to come in to class is nice. but the option to avoid COVID is always good	3/15/2022 11:11 AM
111	The flexibility online offers is what makes it my number 1. Face to face is second because it was nice to get to know my teacher. Blended third because I have not taken any.	3/15/2022 11:09 AM
112	I love the flexibility of online learning. I also like the blend of Zoom classes and online learning. I prefer not having to be in class in person.	3/15/2022 10:05 AM
113	I feel like I learn better online, and I feel like blended is a little too convoluted.	3/15/2022 9:59 AM
114	I perform much better in person and learn much better as well	3/15/2022 9:57 AM
115	I travel quite a bit, so I like to not have to worry about when I have classes or lectures when I have to be somewhere else. When taking online courses, it is easier for me to be where I need to be and still be able to get some course work done.	3/15/2022 9:02 AM
116	I can only take online classes. Coming to campus is not an option for me.	3/15/2022 8:36 AM
117	Personally, I prefer online and face to face equally. They both have positives that I appreciate. I think in my current situation, however, online is preferable because I live around a half hour from the campus. I would rack up gas prices with that distance.	3/15/2022 8:11 AM
118	work fulltime, like being able to do homework at my pace	3/15/2022 8:04 AM
119	The more remote options for me the better as I work full time hospital day shift which makes attending in-person classes difficult.	3/14/2022 11:34 PM
120	Personally, I work best inside of classroom, face to face classroom working. Working online tends to work best with my schedule but is harder to learn criteria.	3/14/2022 10:56 PM
121	My preferred choice of instruction is a blended format. I like the flexibility of being able to do some work from home, but also having guidance from the instructor. My least preferred method is completely online. This is especially true for math. The lack of in-person instruction for this type of class at times makes it difficult to fully understand the concepts being taught in the on-line instruction.	3/14/2022 9:38 PM
122	I like the flexibility of online and blended classes for my own schedule.	3/14/2022 8:56 PM
123	Blended was a better learning experience because I would watch the online lectures and then during lecture time instead of listening to the professor lecture again we applied the information which helped me understand it better.	3/14/2022 7:57 PM
124	I prefer online courses as they are more or less self-paced (from my experience), and I don't have to go through the hassle of doing presentations. I then prefer face-to-face learning as my 2nd option. IF it were a really difficult course face-to-face would probably be my number one choice as it's easier to retain and understand, but I have high functioning social anxiety and so classroom settings can be quite overwhelming and uncomfortable for me. I put blended classes for my least liked one. I very much dislike blended. Blended classes are almost chaotic, and zooms can be hard to keep up on. If it was a classroom type blended I wouldn't	3/14/2022 7:51 PM

Winter 2022 Student Course Modality Preferences Survey

like it since it would take longer for me to get used to seeing these people in a classroom (due to less meetings).

125	I ranked asynchronous classes as my third choice because it's hard to complete this type of course with a professor who lacks communication skills, especially when help is needed. In person classes are my favorite because it is easier to absorb information when presented in person.	3/14/2022 7:40 PM
126	I selected online as my most preferred because of the flexibility it allows me to have in my schedule. I selected blended as my second favorite because it gives me the experience of seeing an instructor to ask questions while having some time to do the class online as well. I selected in person as my least favorite because of the lack of flexibility in schedule it causes.	3/14/2022 7:35 PM
127	I prefer online because it works better with my work schedule and the least is because I am not able to always go to class.	3/14/2022 7:17 PM
128	Face to face is the least for having to wear a mask. Online and blended are nice because you cant miss or be late to class if something comes up, the course schedule is there and you can get a head if you want.	3/14/2022 7:15 PM
129	It is harder to stay focused with less interactive learning.	3/14/2022 5:58 PM
130	I have four children and no one to watch them while I am in class therefore, I wouldn't be able to finish my degree.	3/14/2022 5:52 PM
131	The wide availability of online classes has allowed me to pursue a degree while still being employed full time.	3/14/2022 5:50 PM
132	Without online options I would not be able to attend classes at MCCC. It would be impossible with my work schedule and disabilities, and I would need to consider other schools that can offer that option.	3/14/2022 5:48 PM
133	Blended is good for harder classes, online is good for classes already taught online	3/14/2022 5:41 PM
134	I learn best in person. Switching from face to face to some online is a lot for me to get use too.	3/14/2022 5:28 PM
135	being online allows for my work schedule to be open and still allow for me to be successful at college.	3/14/2022 4:57 PM
136	Online is nice for people who have strict work schedule, but in person can also be fun, and sociable	3/14/2022 4:09 PM
137	I selected Face-to-Face as my first place winner because I personally prefer being able to have a set time to focus on the class, and it makes it easier to become more educated on the topic. I selected Online as a second place winner because if the option isn't available to be face to face than I can do my classes at my own leisure, granted the work for the week is posted. Finally I selected blended as my last place winner because I feel as if there is a lack of organization and trying to decide what work to do in class and what work to do in person on the teachers behalf that makes it slightly more difficult to learn the content.	3/14/2022 3:21 PM
138	I prefer face to face instruction because that is where my learning abilities flourish most. I am able to focus more and take in the information I need to retain. As a hands on and experiential learner I find class time very important.	3/14/2022 3:12 PM
139	I prefer Blended because it gives me the flexibility of an Online class, but also gives me face-to-face interaction with the instructor and other students. Online is nice, but sometimes I just feel like I'm teaching myself with no instructor involvement.	3/14/2022 3:07 PM
140	Online is easiest to fit in to my schedule while working full time.	3/14/2022 2:35 PM
141	I have 6 kids under 12 at home and a full time career at La-Z-Boy. There's no way I'd be able to manage in person full time. Even a weekly/monthly in person requirement would be incredibly difficult to pull off and would take away time I could spend with my family.	3/14/2022 10:15 AM
142	I feel that online lets you go at your own pace. However, face-to-face would help keeping up with work. Personally I think that blended is sometimes complicated.	3/14/2022 8:26 AM
143	Online classes, especially for my program are extremely difficult to do from home. Although I can reach out to my teacher, it's extremely easy to get distracted with other things outside of	3/13/2022 5:34 PM

Winter 2022 Student Course Modality Preferences Survey

class room time. With dedicated time in a classroom with a teacher, the program would be much easier to work through and focus primarily on without outside distractions.

144	I like some form of classroom contact with a professor more than none, but sometimes driving to campus for everything is too much	3/12/2022 5:34 PM
145	I love the convenience of working at my own pace. It is very beneficial as being a single stay at home mother of three kids - life isn't so planned. So it helps tremendously.	3/12/2022 12:01 AM
146	I learn best when face to face, it also helps with my procrastination habit when at home	3/11/2022 11:16 PM
147	Due to my Autism ability, online-asynchronous is my preferred learning format. (Sometimes classrooms are sensory overload.) Plus, I like the flexibility of completing tasks at nights and on weekends in the comfort of my home.	3/11/2022 5:56 PM
148	I prefer face to face because I get better grades and a better learning experience I greatly dislike online and I don't really learn very well that way. Blended is okay I don't mind the way my professor does zooms but the way some do I would not like.	3/11/2022 9:39 AM
149	As an older adult student, the online option is my preferred modality. With having a full time job and young children, the flexibility of online is incredible. I chose blended last because I just think that it would cause confusion keeping the schedule straight of when you have to be on campus.	3/10/2022 6:14 PM
150	I am a working mother with two young children. It has been a struggle to find people that can help me watch my children while I attend in person classes. My husband is working midnight and he also is attending school.	3/10/2022 1:29 PM
151	Even though I have not had face-to-face classes, they are what make me thrive in the classroom. Fully online classes have not worked for me before, and admittedly still aren't. Blended courses are almost the same as fully online for me, as we only meet for ~1 hour per week between 2 days of Zoom. Face-to-face keeps the student engaged and accountable for their work, whereas I feel there is nothing comparable like that in regards to online or blended courses.	3/10/2022 11:22 AM
152	I would honestly love to attend in person, but transportation has been difficult. I go online part time but see a tutor once a week.	3/10/2022 11:18 AM
153	I like the flexibility that comes with blended classes, but fully online classes often lack to much structure and is difficult to find effective help in areas of struggle	3/10/2022 10:46 AM
154	As someone with a full-time job, making time to attend classes in person is much more difficult. If the class is during the day it requires a change in my work schedule which is not always possible. On-line classes are much easier for me to make the time to work on. I can get assignments done before and after work as well as on my lunch hour. A blended class with limited required in person time is a happy medium in my opinion.	3/9/2022 10:06 PM
155	Online courses are much easier for a parent that works full time. It is too difficult to match a work schedule with in-person learning schedules. It is easier to review a lecture pre-recorded than it is to take notes.	3/9/2022 8:36 PM
156	Due to my work schedule and how it changes, online courses work best for me. I choose in person as my second choice due to the fact that i like something that is stable and routine. The blended is course that can cause me to miss and confuse things with my work schedule.	3/9/2022 4:56 PM
157	Online is the best for my schedule but face to face is better for my actual education. I can focus better and pay more attention in class.	3/9/2022 3:17 PM
158	With a full time work schedule face to face seems almost impossible	3/9/2022 3:10 PM
159	I like the balance of the blended class best. My most preferred format is where the professor has an in-person lecture once every week and an occasional Zoom in the same week if the material is particularly difficult. The blended class preserves the classroom environment and allows for more flexibility, unlike the other course types.	3/9/2022 2:50 PM
160	i like to be in person to interact with others and the face to face helps me focus and interact the best.	3/9/2022 2:03 PM
161	Personally, as a middle college student, I am very busy with high school along with college. Having a fully virtual class has worked in my favor, though I miss face-to-face. Blended seems	3/9/2022 1:12 PM

Winter 2022 Student Course Modality Preferences Survey

like it would get very confusing and personally is not my favorite. Overall, I really enjoy the scheduling freedom that comes with online classes but I do miss having a proper instructor.

162	Being able to attend the blended classes has been amazing working around other classes and work schedules. Having the option to come in as needed rather than sitting in a class through lessons you may not be having issues with or classes that are delayed by other students struggling, giving students that ability was great. Face-to-face is still better than not. No more online. Zero consistency between methods of presenting material, resorting to Cengage in other instances and just babysitting their email as the online institution teaches us instead yet we have to pay for both... Instructors reusing old material with outdated information, just... no. Please get people back in the classroom!	3/9/2022 12:28 PM
163	My rank depends on my limited language proficiency, and it is better to me taking time to comprehend the assignments. I selected 1 in online classes because I can take longer to understand and last option that will be face-to-face because I not feel confident enough to be in a classroom.	3/9/2022 11:34 AM
164	I really like all three, but for me personally with my schedule and work. It would be best for more online classes, but I wouldn't mind face to face.	3/9/2022 10:44 AM
165	I find myself performing best in my blended business class that meets on campus once a week, as there is enough time to finish my work during the week but there is also time to have the curriculum explained to me and have any questions I have be able to be answered.	3/9/2022 10:39 AM
166	Works best for me and my work schedule.	3/9/2022 10:34 AM
167	The blended synchronous is my most preferred choice because I can get to do things on my own time, but also learn from an in-person point of view, which is the best way I learn. It is a win-win. Face-to-face synchronous is my second preferred choice because like I noted previously, I learn my best from in-person instruction, and I also like in class participation and the activities I will most likely be able to do with this option. Only problem is that the scheduled times may or may not go with my schedule. Lastly, I chose Online for my third choice because it would make me lose motivation (I know from experience since I was mainly online all last year), and it would be harder to access help from a teacher.	3/9/2022 10:16 AM
168	because it is easiest for me to learn in that environment	3/9/2022 10:09 AM
169	As a full-time working adult, it is difficult come to campus. It is also difficult to find classes I want to take available after 6pm. I enjoy being able to go my own pace, ensuring I complete assignments on time without needing to come to a physical classroom. It is easier, more convenient, and I am more successful with online classes. I do not feel the need to compete with classmates, and remain motivated with taking online classes. I will try taking as many online classes as I can.	3/9/2022 9:36 AM
170	I like blended the most because it allows the hybrid of flexibility while maintaining some of the teacher-student connection Online has useful flexibility and can help those who need to travel or can't always be available to a classroom, but is less student friendly otherwise Face to face can be great with a good teacher, but otherwise can be a little rough. and mandatory classes are rough on some people, but I feel that some people learn better in a class environment.	3/9/2022 5:21 AM
171	I work as I'm doing school. Blended and online works better for me than scheduled times. I still want blended option because some class are just better with interaction between everyone.	3/9/2022 4:55 AM
172	Online classes are the best option for me. If I could be in a classroom at this time in my life, I would. Blended classes may get confusing or be difficult for me.	3/8/2022 11:18 PM
173	I feel that learning in an in-person environment is the most beneficial form of learning for a student. Blended offers some benefits that in-person learning does, but makes it seem so impersonal at times. Online is most beneficial for a class you are capable of handling on your own and on your own time. I prefer a blend of different types of classes. However, I prefer in-person learning.	3/8/2022 11:01 PM
174	Online is much easier for me because I have a small child and full time job.	3/8/2022 7:00 PM
175	I like being in my own safe environment. It's easier for me as well with having a job and balancing high school.	3/8/2022 5:54 PM
176	Online is the only format in which I'd be able to get my degree. As a working American with a disability, I need flexibility in my learning schedule. I will often be reading coursework or	3/8/2022 5:40 PM

Winter 2022 Student Course Modality Preferences Survey

completing assignments at odd hours of the day or night. This works for me, and without that opportunity, I wouldn't be able to go to college at all.

177	I feel face-to-face is just another event to plan your life around. In Online Classes, you can make your own hours of study.	3/8/2022 5:35 PM
178	Work full time and have a toddler	3/8/2022 4:07 PM
179	face to face is most effective. i can talk to teacher and other students. blendid is the worst.	3/8/2022 3:33 PM
180	Because of my work schedule, it is hard to get to the campus.	3/8/2022 3:01 PM
181	As for my most preferred format, I work full-time and only have specific availability for school. I work on most of my classes starting at 5:00 am and finish what I was unable to get done after work. If classes were all in person I may not be able to continue my education.	3/8/2022 1:31 PM
182	I like the online learning platforms more because one its nice to not commute to school everyday. I also like being able to do stuff on my own time and find I'm very good eat managing time with online classes .	3/8/2022 1:00 PM
183	I prefer online because the campus is about 30 min of a drive. I still enjoy being in class, just don't like the long drive.	3/8/2022 12:32 PM
184	im okay at online but i do prefer face to face or a mix of the too.	3/8/2022 12:21 PM
185	I prefer face-to-face learning because it is harder to focus at home.	3/8/2022 11:29 AM
186	Personally, traditional face-to-face instruction benefits me the most because professors are able to reiterate what they said, working with peers is easier, and questions are able to be answered almost immediately. The blended setting is second because it offers almost the same benefits as face-to-face, but it offers less peer interaction. Online is last because it offers almost none of the benefits of the other two options. Any questions for the professor are emailed, so answers are not always clear and given in a timely manner. There is almost no peer interaction at all, except discussions boards which a large number of professors do not use anyway.	3/8/2022 9:49 AM
187	Online works with my schedule better, gives me more time to study and finish work. Better attention retention for online vs in class.	3/8/2022 8:57 AM
188	I'm a hands-on person. I asked for an in-class face-to-face course.	3/7/2022 10:53 PM
189	Blended classes are not ideal because it is less clear what material the students are responsible for and what material is supposed to be covered in lecture. Online classes are fine for some humanities and social sciences, but hard sciences and mathematics courses need to have the option of in-person learning.	3/7/2022 10:22 PM
190	as an adult student, online courses allow me to create a study schedule that works for me	3/7/2022 9:00 PM
191	Since I have a special needs child that requires hectic unpredictable schedule at times, I chose online courses as the fit best and allow me to do my work at a convenient time for me. Blended was an obvious second choice as it allowed me some flexibility. Face to face is not really an option at this time that is why that was last.	3/7/2022 5:41 PM
192	So I can take more classes at one time. I can't be away from home 4 nights a week, but I know I can handle the class load. It's taking me a whole extra year to get my degree.	3/7/2022 5:16 PM
193	The online curriculum allows me to work on my class items around my fluctuating work schedule.	3/7/2022 4:13 PM
194	Personally with work and everyday life online make this so much easier for me, I would say it does take some time to get used to, learning how to manage your time with the assignments is very important, second I choose in school I think this way is the best way if you have the time to do so but unfortunately most of us don't. Lastly I did the blended classes i personally have not taken one but I feel like I would rather have one or the other I wouldn't want to do both	3/7/2022 3:29 PM
195	I personally need the face to face to ask questions etc, Blended for the second cuz I am doing pretty good in that class I would rather be at home doing the work. third online cuz online just sucks	3/7/2022 1:56 PM
196	Too hard face to face when a single mom working full time. Need online	3/7/2022 1:33 PM

Winter 2022 Student Course Modality Preferences Survey

197	I have found that I prefer all online courses or all in person courses. Blended courses make it harder for me since I work full time in retail and my hours vary. I also can not get the covid vaccine so I prefer online at this time.	3/7/2022 1:12 PM
198	I love online classes. I'm more of a homebody and my life gets pretty busy sometimes, so being able to take online classes is a lifesaver. I have only taken three face-to-face classes, and I liked two of them. Even though I liked them, I don't think I would come back to face-to-face classes. It's much more convenient online.	3/7/2022 12:40 PM
199	I don't mind any of them but having classes blended just is much more convenient and makes my time schedule more flexible.	3/7/2022 12:17 PM
200	I prefer having someone teaching me that I can watch as they work and go to immediately with any problems. It is harder to get help quickly online waiting for email responses.	3/7/2022 12:17 PM
201	I really like to have class online so I can still learn all of the material that I need to do and still have some face to face with the professors.	3/7/2022 12:16 PM
202	I like working on my own time and not having to make trips to the college, but I also like my schedule to be steady and not switch from online to in person depending on the day	3/7/2022 11:47 AM
203	I mostly prefer face to face and coming on campus for classes or blended being on zoom or in the classroom because I find it much easier personally for myself to learn better when communicating face to face whether it be on zoom or in person and I understand things better and I can ask questions at any time if needed. I least prefer just on online and no on campus requirement because I learn better doing things face to face and have a set schedule for things, and yes, I do like being able to do things at my own pace sometimes, but I learn and understand better when it's face to face.	3/7/2022 8:40 AM
204	I prefer online as everything is one spot and all online, meaning that I can work at near my own pace until the due date. Face to Face again means everything is in "one spot", so it's much easier than blended, though I do have things going on so reporting to class at night or in the morning (not high school classes) would kinda be in the way of high school classes. I already said why for blended.	3/7/2022 7:40 AM
205	I have 4 kids and work full time, working online when I am able to is the only way I can be successful.	3/7/2022 7:36 AM
206	Most ranking offers convenience, comfort, saves time and gas. Least ranking in my opinion seems to be confusing switching back and forth. Trying to keep up with the schedule would be added stress. (I never did this method before)	3/7/2022 6:16 AM
207	Because it's more peaceful and understanding.	3/7/2022 4:09 AM
208	Blended gives us a chance to meet f2f and seek help if needed	3/6/2022 9:44 PM
209	Face to face is more beneficial for a lecture in case there is a question about the material. The question can be asked right then and there and not have to wait for an email back. I chose blended as number two because some things can easily be done online and other things can be done in person.	3/6/2022 9:37 PM
210	I love being online with my classes because of the flexibility of my schedule. I can do work ahead of time and get it finished.	3/6/2022 9:23 PM
211	I prefer the online courses because I get to pick the times I apply and study instead of a set time and days	3/6/2022 9:13 PM
212	I have learned in previous semesters that i do not learn as well online as i do in person. In person classes are easier for comprehension, time management, and question clarity	3/6/2022 9:09 PM
213	I like working at my own pace and if I need help from a professor I will contact them on my own for a more one on one conversation.	3/6/2022 8:07 PM
214	I put Online as option 1 due the fact, covid is still a thing. It's also much easier to balance our lives and the times we face through a computer screen. The worlds problem don't just go away and I believe it would be safer if it all were online.	3/6/2022 7:24 PM
215	i hate that i have to wait for my teacher to decide when i need to show up	3/6/2022 7:11 PM
216	I ranked in-person classes at the top of this list because I prefer to have hands on learning, not	3/6/2022 7:07 PM

Winter 2022 Student Course Modality Preferences Survey

reading a textbook and performing online assignments at home. Although online learning is useful sometimes regarding schedules, hands on learning helps establish a connection between topics and real-life experiences which is great and extremely helpful when applying the topics learned to daily actions.

217	Online classes are more flexible for me.	3/6/2022 6:54 PM
218	I prefer online because I like to work a full time job. This does not leave much time for specific meeting times.	3/6/2022 6:37 PM
219	I prefer online so I can manage my time instead of a class that I have to go to once or twice a week.	3/6/2022 5:28 PM
220	I am back to work full time and it would be very difficult to go to face to face classes.	3/6/2022 5:00 PM
221	My choice for the class modalities is because a good balance of delivery of material helps enhance learning. In the world we live now it is important to use technology, but as humans we need real-time interactions for our survival, which I see us have best experience learning new subject areas. Right now do not like completely online classes because have been remote a lot the past two years and am figuring out it is not easy and convenient to teach something effectively over a light up screen.	3/6/2022 2:46 PM
222	1. Allows me the flexibility to accommodate family and employment schedules. Saves on travel expenses and time. 2. Blended was still nice as I was able to save travel time and expenses. and still allowed flexibility. 3. Difficult to schedule around employment schedule and travel times and expenses costly.	3/6/2022 2:15 PM
223	I learn much better in person than online, although I do like the convenience of online learning it is more difficult to learn that way in my opinion.	3/6/2022 12:47 PM
224	I learn better being in a classroom environment, so it is ideal to have in person or blended classes. I have participated in online classes in the past and struggled to learn as well as I have in person.	3/6/2022 12:02 PM
225	I work full time and have children. I would not be able to attend school if I had to do any face-to-face type classes. The online classes allow me to fluctuate my schooling around my family and business schedule	3/6/2022 11:39 AM
226	I chose face to face as my #1 because I learn better face to face. I chose blended as #2 because it gives me the face to face to help me learn and it gives me wiggle room in my schedule for the week. #3 I chose online, which is okay but I just feel like I have too many distractions to focus on the class.	3/6/2022 10:09 AM
227	I prefer completely online, but understand that some classes need to be in person for some of the time.	3/6/2022 10:01 AM
228	I put Online as my first because of the ease I have when it comes to doing other activities. For example, my work schedule. I am more flexible, which I love, because I took most of my classes online. However, I then put face-to-face 2nd because I love to see people, and I actually learn when I'm in face-to-face.	3/6/2022 9:48 AM
229	I prefer an online format due to my schedule. I have 5 children and my youngest is autistic. The online schedule gives me the freedom to work at my own pace and complete assignments whenever I can. If there happens to be a glitch in my normal schedule and my kids are home from school, I don't have to worry about finding someone to watch them while I run to class or risk missing a class. The only reason I was able to return to school was due to the flexibility of online classes. I hope they are offered every semester to help working moms achieve their dreams of completing their degree.	3/6/2022 9:01 AM
230	Online allows me to work at my own pace a little more, it's also a lot more flexible, and I get to read and/or watch videos that I can repeat of the professor explaining whatever topic he/she has for the week.	3/6/2022 4:12 AM
231	I chose face-to-face as my least preferred because I'm always working and helping out at home, so it's hard to do a regular class schedule. However, this year I have done both blended and online classes and I preferred it better. Being able to do an online class and doing zoom calls have helped a lot with my work scedual.	3/6/2022 12:55 AM
232	I feel like the need for face to face is not always called for in some of the classes and in	3/6/2022 12:16 AM

Winter 2022 Student Course Modality Preferences Survey

	others online could cause issues for learning.	
233	I choose online as my first because it gives me more flexibility to work and take classes. Number 3 I choose face to face, cause in all honesty, I do miss being in class to learn. And I have never taken a blended class, so it just came last.	3/5/2022 6:16 PM
234	Option to complete work when I have availability.	3/5/2022 5:25 PM
235	Face to Face is really important for me because I like to ask questions. Having the Professor available to see my work and talk it out until I have a good understanding is essential to learning correctly. I am taking ██████ this semester Online format only and since this is a computer based program and my professor is very thorough on explaining our work assignments, the class has run pretty well for me. Not all classes are good for online format. I would have appreciated our drawing weeks to be done in the classroom for ██████ I took ██████ online and would have preferred it to be in person. It seems when certain classes have a lot of different information coming at me so fast, in person would be much better for me. The Blended classes are ok, as long as we get to have zoom times and meet with the professor for labs and such. My ██████ class was supposed to be blended, but we only met a few times during the semester. I would have liked more instructor time with actually instruction. I need visuals and presentations. ██████ is really good at Blended Classrooms. He made everyone feel comfortable both inside the classrooms and on Zoom. He had lots of presentations and great tutorials.	3/5/2022 4:30 PM
236	Best for me	3/5/2022 3:49 PM
237	I learn better with some coursework being done at the college versus in my home.	3/5/2022 2:12 PM
238	My preferences are based on my own personal scheduling and what I feel I have time for. It is easiest for me to have all my classes online only. I prefer blended the least because it seems more complicated.	3/5/2022 12:09 PM
239	I prefer online classes and learning at this point in my life. I am an adult learner who works full time plus and a parent of a minor with extra-curricular activities. Meeting times and actual classroom times would prohibit me from taking the classes that I need to accomplish my goals. As an instructor myself I realize there is definitely value in face-to-face learning but i believe your online programs, have at this point, been able to meet my learning needs. For the most part my professors have run very good programs and been available for clarification in all the classes I have taken since 2020. Thank you for asking for the learners perspective. Mary	3/5/2022 11:41 AM
240	I work full time, I'm a mother, and a wife. on line courses fit my lifestyle	3/5/2022 11:16 AM
241	I prefer the blended classes over the strictly face to face classes because it accommodates my schedule and give me the opportunity to get assistance from the professor. Some things are better taught and shown in person versus online. Lab classes should NOT be conducted on line, but in person.	3/5/2022 11:10 AM
242	Online fits best around work and kids	3/5/2022 11:03 AM
243	Blended provides the best of both worlds for me as a student who is working full time. Although as a student coming from high school, face to face interaction with the instructor and other students was best for me. Blended also works with limited independent transportation as a student with a disability.	3/5/2022 7:32 AM
244	i prefer the face to face for classes, if unavailable to do so full time, then at least for half of the classes. if not possible at all for face to face then online.	3/5/2022 1:34 AM
245	I am a full time mother and teacher and I need the flexibility of online. I would however the teachers to be more understanding- especially with medical emergencies. I was asked by a professor to let her know the next time I am "planning a trip to the ER;" that's not something you plan...	3/4/2022 8:42 PM
246	I like the flexibility of having an online only class. Face-to-Face is nice for the environment and being able to assist and/or ask questions easier. Blended is okay, but i'd prefer it to be purely online or purely in class.	3/4/2022 8:39 PM
247	The online works better with my daily schedule as I work full time as well. I also learn better online	3/4/2022 8:26 PM
248	I prefer both blended and completely online classes the most because it works out a lot better	3/4/2022 7:14 PM

Winter 2022 Student Course Modality Preferences Survey

with my schedule. I think it is the most convenient and allows me to get ahead in my classes when I would like.

249	I selected online as my most preferred modality format because of my work schedule. I work M-F 8am-5pm. Most college classes that are face-to-face are during these hours. Very little are classes offered during the evening. Online is my only realistic option of obtaining a degree. I also love online classes because I can go at my own pace respectively and prioritize the assignments. It's easier for me to learn on my own this way.	3/4/2022 6:05 PM
250	My work and family responsibilities would likely prevent me from completing my degree if forced to come to campus at a scheduled time. The time flexibility of the online classes is the only reason I am able to attend.	3/4/2022 5:41 PM
251	I honestly just prefer to be able to work at my own pace online, I feel like I am being judged too harshly while in a class with other people there.	3/4/2022 5:35 PM
252	I prefer a combination of online content and in-person content because there is always a means of contacting the teacher, whether it be email or face-to-face interactions. While I do not dislike mandatory class attendance, I just prefer partial online work.	3/4/2022 4:58 PM
253	I prefer F2F learning. I do not learn well with a fully online course.	3/4/2022 4:30 PM
254	I prefer for online classes because I am able to work on my class work whenever and where ever I want to. Gives me more freedom for work and other life events.	3/4/2022 4:20 PM
255	Due to my medical conditions, I require frequent visits with my doctors. Asynchronous online courses allow me to more easily budget my time to complete work while not missing any appointments. Blended courses in my opinion are a hassle in terms of schedules and participation; at least with face-to-face learning, there is more consistency.	3/4/2022 4:15 PM
256	I prefer to do class work in the comfort of my home and online or mostly online courses make it easy for me to do the work and take care of a newborn as well.	3/4/2022 3:28 PM
257	I would prefer to have 100% online and Face-to-Face, instead of half and half. I feel I have a better understanding of my schedule. My [REDACTED] class is 100% online and my [REDACTED] classes are 100% in person and this is what I prefer. I am enjoying my semester.	3/4/2022 2:07 PM
258	I am currently unable to attend in person classes on a weekly basis due to my living situation so I prefer online courses.	3/4/2022 1:33 PM
259	Online instruction is a better fit with my other responsibilities of family and work. It allows me flexibility to learn on a schedule I create.	3/4/2022 1:28 PM
260	I have noticed since I was in high school and the first semester that I worked efficiently with face-to-face class. I'm more productive and always on top of everything and that is the reason why Face-To-face is ranked 1 as my most preferred format. I ranked blended as second since I can also attend the class face-to-face and I can work on my own pace at the same time. I ranked Online-Asynchronous as third because I have noticed from the first three weeks of my online classes --- for second semester --- that I am not as motivated as Fall semester. My performance are not bad, but they are not good either. I have my major class, [REDACTED] online and I am having a hard time learning each material. I really prefer learning on campus.	3/4/2022 1:11 PM
261	It just works better for my schedule. I like the flexibility. I like blended format with the meeting in person one day a week and then the rest being virtual. I feel like that gives me the best of both worlds.	3/4/2022 1:03 PM
262	Going in person gives me a lot of anxiety. I do better online due to not having as much anxiety	3/4/2022 1:03 PM
263	I selected all online for my most preferred because it is better for my working schedule, and I like to be in a familiar home environment when doing work or studying.	3/4/2022 12:58 PM
264	MCCC has fantastic professors, that is why I keep coming back, semester after semester. However, this sadly is not the norm today. Some professors are still teaching, but too many are taking advantage of covid and have quit teaching. Both of my classes are Online (L) this semester, and I HATE it for [REDACTED] I am teaching myself. I could do that for free, as I don't really need the credit. I love to learn. But I am not really learning this way. And it's not just me. What is the teacher doing when there is zero contact, and only a discussion board for questions? Cengage does the grading of everything except 3 reflections. If I were teaching myself I would not even do the reflections. My [REDACTED] is okay as it was always an online	3/4/2022 11:56 AM

Winter 2022 Student Course Modality Preferences Survey

class. Many students agree with my opinion, and I think there will be hard times for the college if they remain allowing too many L classes. I have 2 grandchildren 19 and 20, who want to start college, but cannot, because they can not learn in an online environment. Please go back to traditional! I will wear a mask forever if need be.

265	I have only taken college classes since covid began, so being all online and blended is the only ones I have taken part of. I don't really know what it was like before all of this.	3/4/2022 10:59 AM
266	By seeing the teacher in person I can easily ask questions and for clarification. Live lectures make the subject easier to understand and visualize.	3/4/2022 10:21 AM
267	Face to face for my learning style is best. I feel that I am present and can interact with the class in a more hands on fashion. Blended is not bad, however, online work does feel a bit harder to engage in the material. Online is my least favorite. For me, I feel that I can take advantage of a class and be easily distracted. When online learning is necessary, I feel as though it socially isolates me in some ways.	3/4/2022 9:57 AM
268	I prefer online due to busy work schedule	3/4/2022 9:44 AM
269	I prefer in person learning but since I am dual enrolling the classes online works best for me and my schedule. I like the online courses and having the option!	3/4/2022 9:25 AM
270	I would rather go to college in person, but with my work schedule, I have to go to school online.	3/4/2022 8:39 AM
271	I chose online first because this campus course times are not suited for returning to college older adults. I have one class that is blended and the latest it was offered was 2pm. I had to change my schedule in order to attend a mid afternoon class. Online is easier for me to take because I can do the work/lectures on my time. I'm finding out that this college isn't really made for older adults with daytime jobs. I picked blended as my second choice because if I have to drive to Monroe for a class I would prefer to do it only once a week and have the second class online. This is just easier for me. Face to Face was my last choice. Again this goes back to the lack of classes offered in the late afternoon and evening for working adults. When I spoke to the counselor before registering she assured me that this was a good college for adults going back to school. Unless the classes are offered online then most adults with full time jobs can't take a face-to-face class when its offered at 9-4.	3/4/2022 8:19 AM
272	Some of the courses I took online were more difficult than the ones I took blended due to the fact we had not one single lecture but the online classes I took that we would some lectures definitely helped me way more.	3/4/2022 8:16 AM
273	I work 40+ hours a week and have a family so the complete asynchronous classes allow me to work classes into my busy life. If the online did not exist I would not be able to attend college	3/4/2022 8:03 AM
274	I selected Face-To-Face for my first choice because it is the environment in which I learn best. I put Blended as my second choice because it still included some interaction with a teacher, which still works for me. I put Online last because I find that style of learning harder to manage, but it is not bad just different from Face-To-Face or even Blended.	3/4/2022 8:01 AM
275	I have a busy schedule, and online classes work great for that. On the other hand, doing everything online is SO much harder than face-to-face.	3/4/2022 7:46 AM
276	I chose fully online for my first choice because the courses I chose last semester and current semester have been easier classes that do not really have any extra benefit to being in person.	3/4/2022 7:42 AM
277	I am a mom of 3 and work so online is easiest for me.	3/4/2022 5:50 AM
278	Having taken both online, blended and in person classes I feel that the online classes are not suited for every course. Some courses require questions that should be answered by the professor. Email correspondence works but sometimes the response comes too late.	3/4/2022 5:43 AM
279	I've only taken one blended course so far. My instructor is [REDACTED] and she is a great instructor. She makes the classes fun and interesting although we aren't face to face. I enjoy the online courses because I can do them at my convenience. Sometimes it is hard to organize the material in terms of studying for tests but I'm always able to keep my assignments in order and to submit them on time. Overall I enjoy the online courses because they fit my busy lifestyle with work and children.	3/4/2022 2:39 AM

Winter 2022 Student Course Modality Preferences Survey

280	personally learn best through discussion. face to face is preferred but even required zoom is good because we still have that discussion and communication as a class which helps me grasp the topic better.	3/3/2022 11:34 PM
281	I am sure it is possible to learn either way, although sometimes it is necessary to be questioning a professional in the area for good accurate answers.	3/3/2022 11:09 PM
282	I do not like online learning. I would rather be in the classroom with other students and the professor	3/3/2022 10:32 PM
283	I picked online first because it give me time to work on my assignments at my own pace. I do not have a set time to feel rushed to turn in assignments. I picked face to face second because I am a better visual learner in certain classes. I picked blended last because zooms sometimes are hard to get into and stress people out when it doesn't work right. I would prefer the other options instead.	3/3/2022 10:29 PM
284	Blended: It is easy to balance classes this way by breaking up in class time to different days. Face-to-Face: It is easy to get overwhelmed depending on the class. Online: It is very easy to forget about assignments when taking and online class.	3/3/2022 9:55 PM
285	I prefer in person. I do not like the forums I hesitate because I know we are living in a fragile society and opinions causes people to stereotype who they think you should be. In person engage you more with your classmates. I also like that one of my instructors uses a MCCC number for his class. Basically I do not want to be frofiled I have dealt with it for 43 years. thank you [REDACTED]	3/3/2022 9:41 PM
286	Online classes afford me the ability to take classes with my very busy work/life balance. I can better plan my learning with all virtual learning	3/3/2022 9:38 PM
287	I feel like its easier to learn face to face. Online gets confusing especially if you can't communicate with your teacher through email.	3/3/2022 9:10 PM
288	Online allows me to work and attend school as needed without having to rush over from work. It just allows more freedom for individuals who do not have the freedom to attend class in the middle of the day. Face to face is fine but unfortunately in my program only specific meeting times exist for certain classes.	3/3/2022 8:30 PM
289	I can take all four classes that I need to graduate if I can take them online. Otherwise, I can only take two in the fall and two in the winter. I can't be at school 4-5 nights a week because of kids and work. I can handle the workload, but I can't be gone at school 4 nights. I can finish sooner if I can do online.	3/3/2022 7:41 PM
290	I prefer to have face to face over anything because, it is just better to have that communication and contact with your professors and be able to have that more better experience. I do like online classes because you are able to work at your own pace, and blended courses can sometimes become confusing with when to be synchronous and when to not be.	3/3/2022 7:38 PM
291	I chose face-to-face as my favorite because it's easier to learn the material when you have an actual connection between the professor and the other students I chose online as my second favorite because I didn't mind doing work online, even though I prefer face-to-face. I like the blended option the least because I don't like attending the lectures through zoom.	3/3/2022 7:25 PM
292	Online is my most preferred method of taking classes simply because it offers more flexibility with my work and family schedule. I also like that online courses allow me to be able to spend more time working on things that I might be struggling with, and less time focusing on areas of work that I feel that I am excelling at. A strict in person schedule would not work for me due to very little flexibility in my work schedule.	3/3/2022 7:14 PM
293	I selected my least-preferred format because it was the only mode available for that course. I mainly prefer online classes because there is more time available to work on assignments.	3/3/2022 7:08 PM
294	I prefer online because I work full time and am a mother of 2. If I wasn't working full time, I would like the blended. If I had more free time I would enjoy in person.	3/3/2022 5:57 PM
295	I made Blended a one, because its easier for me since I don't have a driver's license. That's also why I made face-to-face a two. Though I enjoy being there in person and it can be better for asking questions.	3/3/2022 5:17 PM

Winter 2022 Student Course Modality Preferences Survey

296	Online is best for me because I also work full time. Face to Face is nearly impossible for those that hold down a full time job. Blended is an option, but only if those classes are offered after normal office hours.	3/3/2022 5:01 PM
297	I work full time and need the flexibility to complete my courses in off ours.	3/3/2022 4:45 PM
298	I prefer to learn face- to-face but I understand that there are circumstances that do not make that possible.	3/3/2022 4:40 PM
299	I am an adult student, I hold a full time job, and I am also married with 3 children. I require a flexible learning option that allows me to complete my coursework in my own schedule.	3/3/2022 4:38 PM
300	I LOVE online school. It allows me to do school around my hectic schedule.	3/3/2022 4:28 PM
301	I do not like using zoom or other virtual learning programs. I would rather be in person or not at all an left to do my assignments without specific meeting times.	3/3/2022 4:14 PM
302	I prefer the face to face most of the time but for this class it was best to do online because of my busy schedule talking my dad to appointments since he is recovering from a stroke he suffered last year.	3/3/2022 3:56 PM
303	Online Courses are nice to have so that you can do some components at your own pace like taking notes, and then the deadlines for assignments are a good length to give adequate time to complete them. I don't have a problem with face-to-face or blended, I just think that the pacing of online courses is a lot easier to manage.	3/3/2022 3:49 PM
304	I selected blended as my most preferred because it works best with my work schedule while still providing me classroom time over zoom. I selected face to face as my least favorite because if I miss a day, due to any reason, I will get behind in the class.	3/3/2022 3:43 PM
305	I need to be in a classroom setting in order to learn and stay focused. Online learning is a struggle struggle me.	3/3/2022 3:38 PM
306	I prefer choosing my own schedule and working at my own pace.	3/3/2022 3:36 PM
307	I'm in high-school as well so it's easier for me to complete collage work online rather than in person.	3/3/2022 3:35 PM
308	1. Face-to-face because I find it easier pay attention in class, professors tend to be more communicative, and assignments/tests are more clear 2. Blended is number 2 because I don't mind the occasional zoom meeting for class. But what I don't like about this option is that professors will use this as an excuse to assign extra work instead of holding meetings which in my opinion, I'm not learning as well with that approach. 3. I have not taken an online only class	3/3/2022 3:34 PM
309	Online learning for me is an easy way for me to get distracted even though I managed to work things out for the better	3/3/2022 3:24 PM
310	With my work and home schedule, online classes are easier. Face to face would be my next preference to get a better understanding of the class.	3/3/2022 3:24 PM
311	I personally struggle with social anxiety, so having the option to complete my courses online helps a lot. However, I ranked the blended format as number one because having that option to ease in to face-to-face learning where I'm comfortable is a format that has proved to be helpful for me in the past.	3/3/2022 3:14 PM
312	Blended allows the most flexibility with my schedule while still allowing meet to meet in person with my professors . Constantly meeting online creates a disconnect between me and my coursework when I cannot meet in person with my instructors.	3/3/2022 3:08 PM
313	When you go to college you would expect someone to teach you the proper way to do this online classes are like watching YouTube videos and trying to fix your furnace not the best method In my opinion the online professors do not teach they just release info and expect you to learn it on your own that might be ok if you wanna buy a degree but i personally would prefer to know what I'm doing so when i get out in the world I am confinate in my ability also it can very discouraging when you cant figure it out on your own you start asking yourself maybe I am not smart enough to go to college which I believe is one of the reasons the graduation rate is so low at mccc	3/3/2022 3:05 PM
314	I work full time and have 3 children, I'm a Michigan Reconnect student and online works best for my schedule.	3/3/2022 2:57 PM

Winter 2022 Student Course Modality Preferences Survey

315	Hands on learning is the easiest for me. I also do like online classes for some classes.	3/3/2022 2:56 PM
316	I love zoom lectures, I can focus much better at home watching and participating in them than I do in the classroom setting. I felt I learned better and absorbed the information more when we did the zoom lectures.	3/3/2022 2:48 PM
317	When I take an online class, it is more convenient to just be online instead of having to commit to doing both.	3/3/2022 2:44 PM
318	In person classes are more engaging than purely online classes.	3/3/2022 2:36 PM
319	I have a job and am 52 yo. I am self driven. I like working at my pace with the option of coming to campus if need be. I appreciate that some classes require on site work, but for those that do not, I prefer the blended option.	3/3/2022 2:35 PM
320	I prefer learning in an in class setting	3/3/2022 2:33 PM
321	I don't really like class on zoom calls	3/3/2022 2:32 PM
322	I feel that with everyone's busy lives, an online option allowing you to complete your work on your own time is a good option. Most times it is hard to go to a designated class time when working students have a shift at work to attend.	3/3/2022 2:32 PM
323	I learn the best face to face in a classroom because i do better watching someone write on a board rather than reading off a pre printed page. I can also take notes better. If more online teachers made videos of them teaching how they would in class rather than just sending out the chapter to read and the homework/test to take i think there would be a higher percentage of people taking more online classes	3/3/2022 2:32 PM
324	I prefer the online format due to having social anxiety and I have learned that I learn better doing things online.	3/3/2022 2:32 PM
325	I work full time 8-5 so online is my most preferred for the demanding job that I have. It lets me get things done in a manner that benefits me.	3/3/2022 2:31 PM
326	The blended format has always been a horrible experience for me. Either go all in person or all online. Face to face is the best way to go and I believe it is time we go back to in person.	3/3/2022 2:31 PM
327	I learn better face to face!	3/3/2022 2:31 PM
328	Works better with my work schedule	3/3/2022 2:30 PM
329	Being online fits my work schedule and let's me work at my own pace most of the time.	3/3/2022 2:30 PM
