

Building Report | Annual Sidewalk Maintenance

9.8.20

The following are pictures from the weeks of 7.3.20 - 8.7.20 in regards to 2020 version of the annual sidewalk renovations project. This will be the one and only report on this project as all the work needed was accomplished in a very short amount of time thanks to some very favorable weather. This year we addressed 21 areas on Main Campus and 2 areas at the Whitman Center that were in need of attention including segments of walk that were either badly deteriorated, sunken, and/or lifted. Sidewalk repairs are a yearly item that we address with an audit each spring as we are building the budget for the next fiscal year, and so this is a continuing effort we put forth to help ensure the health and safety of our students and staff as we strive to be good stewards our of wonderful campus and facilities.

The top-left photo shows work being conducted in the central portion of the mall on Main Campus (for reference #12 on the map below). This particular portion of walk is one of the main areas that allows pedestrian traffic to move north/south through the mall area and connects to the La-Z-Boy Center, Life Sciences Building, Career Tech Center, and the Health Ed Building.

The top-right shows a portion of newly renovated walk area. As per our new typical method we not replace the walk but pin them together to try avoid uneven sidewalks due to frost heave due to the sometimes harsh winter conditions we experience on campus.
