Course Name	Nutrition, Health, and Safety for Early Childhood Education
Contact Hours	45
Total Credits	3

Prerequisites

ENGL 090 and RDG 090 or qualifying scores on accepted placement tests

Co-requisites

ECE 102

Course Description

This course presents a holistic approach to the wellness of children in relation to their safety, nutrition, and health in various environments and early childhood education settings. It discusses the provision of quality early childhood education environments that ensure the physical and emotional well-being of children. Knowledge of child development is reviewed to address the safety, nutritional and health needs of children throughout the developmental stages. Students will develop an instructional unit on one of these areas related to the wellness of children.

Exit Learning Outcomes

This course is a required core course for students pursuing an AAS in Early Childhood Education.

Program Outcomes Addressed by this Course:

Upon successful completion of this course, students should be able to meet the program outcomes listed below:

- A. Utilize knowledge of child development to support and nurture children in their development and learning environments.
- B. Demonstrate respectful and reciprocal interactions, relationships, and partnerships with diverse children, families, staff, and communities to support child development and learning.
- C. Apply systematic observation and varied documentation and assessment strategies that are ethically grounded and appropriate to support child development and learning.
- D. Develop curriculum for young children based on knowledge of academic subject areas to support child development and learning.
- E. Utilize developmentally appropriate approaches and strategies to enhance child development and learning.
- F. Demonstrate professionalism through adherence to the ethical and professional standards of the early childhood education profession.
