INTRODUCTION

Executive Summary

Monroe County Community College embarked on the process of master planning to provide a foundation for the creation and maintenance of an ideal campus environment. This master plan is a living document, which will continue to evolve as it provides a framework for addressing the challenges of growth, academic change and aging facilities.

The Master Planning Committee and other contributors, as part of working through the process:

- Identified the existing and potential future physical and programmatic challenges.
- Created guidelines and requirements to which the proposed solutions should adhere.
- Proposed and tested multiple solutions to each challenge, presenting the best conclusions in this document.

As stated, this plan is a living document. It is the twenty-ninth year that such a plan has been submitted to the State Budget Office and each year it has undergone review, resulting in revisions and changes to reflect current information, projections, and needs. Twenty-two years ago, the College contracted with SHW Group (formerly Duce Simmons Associates), Troy, Michigan, to assist in the planning process and the production of the final document. SHW Group also conducted a comprehensive facilities assessment. The assessment included in this plan was updated in 2011 and remains our most recent assessment as updated. The Five-Year Master Plan has incorporated many of the architect's findings, drawings, and recommendations, and the College continues to thank SHW Group for its prior work and contributions.

The challenges identified and discussed in the following pages include:

- **Facilities Condition** Outdated classrooms and labs.
- Barrier Free Accessibility Elevators and location of support spaces.
- **Programs** Location of, and limited space for, certain specialized programs.
- Student Support Services Location and coordination of services.
- Landscaping/Site Maintain and improve views and vistas; improve building interconnection and relationships; address pedestrian and vehicular circulation.
- Growth Develop placeholders for future project sites.
- **Student Retention** Maintain student population through completion of goals and incorporating the Master Plan into enrollment management decisions.

The guiding principles for the solution development process were identified as follows:

- Physically support the College Mission Documents and Strategic Plan.
- Improve student retention and assist in marketing the College to prospective students.
- Address technological changes and the need for technological flexibility.
- Provide classroom flexibility for different uses and teaching methods.
- Simplify student and visitor interaction with the College.

Solutions developed to address the challenges identified include (but are not limited to):

- Development of technologically appropriate classroom space to meet changing educational needs, including the construction of the Career Technology Center, the renovation and addition to the East and West Technology Buildings (renamed Founders Hall), renovation and addition to the Life Sciences Building, renovation and expansion to the Campbell Academic Center, renovation and expansion of the Welch Health Education Building, and renovation to the Whitman Center.
- Updating of existing classrooms and instructional laboratories to provide a model space for traditional learning, distance learning and conferencing, in a computer intensive environment.
- A plan to address deferred maintenance issues throughout all campus facilities, continuing College efforts to properly maintain building systems in order to reverse or avoid deterioration and updating the Facilities Complex and its support buildings.
- Reconfiguration of existing buildings to accommodate growth and simplify student interaction with college departments including renovation and expansion of the Warrick Student Center.

The following chapters present the overall Master Plan and explain the process and effort made by all participants in producing this vision for Monroe County Community College.

Planning Process

Before embarking on the Master Plan document, a brief overview of the master planning process is in order. The Master Plan process is comprised of five phases: strategic review, functional analysis, physical analysis, solutions development, and final documentation.

The first phase, strategic review, includes a review of the existing Master Plan and other information including the mission statement and strategic goals of the College.

The next two phases, functional and physical analysis, include the collection of data required to develop solutions for the Master Plan. The functional analysis includes development and issuance of surveys to individual departments within the College, interactive workshops, and interviews with key members of the College. The physical analysis includes the collection of existing documentation, confirmation of physical conditions and an overall review of the adequacy of existing facilities in supporting the Master Plan.

The above phases create the framework for solution development. Solution development includes developing planning options based on the functional and physical analysis, cost estimating and the development of schedule and phasing options. The options are refined and presented at a series of interactive workshops for analysis and feedback from College and community representatives. These options are then further refined and finalized into a plan for future facility development, culminating in the creation of the final Master Plan Report.

Most importantly, the Master Plan is a living document. It is not a final plan for the College, but the present vision for the potential growth of Monroe County Community College. This document should not be considered "set in stone", but should be reviewed and updated as dictated by changes in education, information and College and community goals. And, while many of the components of the various phases require completion every year, others do not. Although this is a "5-Year" Master Plan, it is the College's intention to update the Plan annually, have a facilities assessment done every three to four years, and perform all phases every seven to eight years. Unfortunately, due to budget constraints, the comprehensive Campus Master Plan has not been updated in twenty years. Currently, through the College's Strategic Planning process, this update will prove to be a necessary tactic to meet the Create a Student-focused Environment objective of "adapt the physical environment." The College is currently developing a request for proposals to update the facilities assessment and deferred maintenance report as this will serve as a base document as the College embarks on its next Campus Master Planning process.

History

Monroe County Community College is a public two-year institution supported by property tax monies from Monroe County, educational funds from the State of Michigan and student tuition. The Community College District of Monroe County, Michigan was formed on June 29, 1964 by the electors of Monroe County. On July 3, 1964, the district was given statutory authority under the provisions of Michigan Act 188 of the Public Acts of 1955 to function as a community college.

The original four academic buildings on the 209-acre Main Campus, located on South Raisinville Road, opened for students in 1968. The College has grown from these beginnings to a plant now totaling over 457,871 square feet, including seven academic buildings, four physical plant buildings and two maintenance/storage buildings at the main campus. Also, part of this total is the 17,650 square foot Whitman Center and garage (540 square feet), opened in 1991 and located on 28 acres in Bedford Township near the Michigan-Ohio border. The College also owns 115.1 acres on Dixon Road received as a gift from the Estate of Amy Heuple in 1981.

Monroe County Community College is accredited by the Higher Learning Commission and has received 10-year accreditation, the highest HLC rating possible, during the most recent evaluation in 2019. The College will undergo its next Reaffirmation of Accreditation in 2029-30.

Mission Documents

As part of the College's Strategic Planning process, the College's Mission and Vision were reviewed and updated. This comprehensive review, involving all College stakeholders, concluded in the Board of Trustees' approval of the revisions on September 24, 2018:

Mission

Monroe County Community College enriches lives in our community by providing opportunity through student-focused, affordable, quality higher education and other learning experiences.

MCCC accomplishes its mission through:

- Post-secondary pathways for students who plan to pursue further education
- Occupational programs and certificates for students preparing for immediate employment upon completion
- Curriculum that prepares students to effectively communicate, think critically, and be socially and culturally aware
- Comprehensive student support services
- A wealth of opportunities for intellectual, cultural, personal and career enhancement
- Training and retraining to meet the needs of an evolving economy
- Key partnerships to enhance educational services and opportunities

Vision

Monroe County Community College will be recognized for our student-focused service, academic excellence, affordability, innovation, community responsiveness and student success.

Core Values

These core values form our attitudes and guide our behavior:

- Student-focus: Execute student-centered decision making
- Excellence: Offer high-quality educational opportunities, programs and services
- Accessibility: Offer ease of access to educational opportunities, programs and services
- Affordability: Provide affordable educational opportunities, programs and services
- **Diversity and Inclusion:** Celebrate the individuality and diversity of our students, community, nation and world
- **Respect:** Practice equity and mutual respect
- **Stewardship:** Manage our resources with efficiency and integrity to ensure the long-term health of the college and infuse responsible, sustainable and transparent practices throughout all operations and programs
- Outreach and Engagement: Advance a culture of engagement and collaboration
- Relevance: Offer relevant educational programs through innovation and responsiveness

In support of its Mission, MCCC provides higher educational opportunities to the community through

- Offering freshman and sophomore college-level programs in the liberal arts, sciences, and pre-professional fields for students who plan to transfer to four-year colleges and universities:
- Offering one- and two-year occupational and/or career programs for students preparing for employment in technical, business, or health-related fields;
- Providing general education courses and experiences integrated throughout the curriculum which will enable students to write and communicate effectively, utilize mathematics, and employ appropriate methods of critical thinking and problem solving;
- Providing intellectual, cultural, and personal development for adults in a wide range of lifelong learning opportunities;
- Working with governmental agencies and employers to develop training and retraining programs to meet the needs of an evolving economy;
- Providing a strong complement of comprehensive support services to assist students in pursuit of their educational goals;
- Collaborating with school systems, civic groups, educational institutions, individuals, employers, and other constituencies to offer educational services and opportunities.

2020 – 2025 Strategic Plan

The Strategic Planning Process at Monroe County Community College is the culmination of the combined efforts of the shared governance structure coordinated by the Strategic Planning Committee. It stands in support of the College's Mission Documents and provides the roadmap for future direction.

As the plan is developed, it passes through the shared governance structure, including the Board of Trustees, president, vice presidents, and councils, as well as the various divisions and departments. This process maximizes the opportunity for faculty and staff participation.

The goals and objectives are developed in support of the College's Mission Documents and are the result of environmental scans, research, and input from faculty, staff and students.

Goals represent the highest level of what the college wants to achieve over the next five years. Objectives, through their specific tactics, delineate how the goals will be accomplished, as the tactics serve as the work plan to accomplish the objectives. The goals and objectives are developed with input from a number of internal and external stakeholders. The tactics are developed by the work groups and supported by individual divisions and departments that support the objectives.

Although the document is developed every five years, addenda may be included whenever appropriate, as this document is a work in progress. The annual assessment of the plan and progress being made in support of the priorities and strategies may serve as the catalyst for additions or changes to the plan. The 2020-2025 Strategic Plan addresses student access and success, relevant and innovative education, and creating a student-focused environment. The

plan was thoroughly vetted through a comprehensive and inclusive review process and was formally adopted by the Board of Trustees on February 24, 2020, including three adopted updates on November 23, 2020, January 28, 2021, and May 24, 2021.

Following is the 2020-2025 Strategic Plan:

GOAL 1: STUDENT ACCESS AND SUCCESS

Implement targeted and systemic student support initiatives to empower student goal achievement.

Objective 1.1 – Improve Academic Advising

- Implement a 30-hour degree audit communication system for current students.
- Create a task force to analyze the current advising process and make recommendations for improvement.

Objective 1.2 – Student Driven Scheduling

- Conduct class schedule efficiency reporting to determine the best class scheduling times by division, program, etc.
- Expand class delivery options by promoting the blended class modality to current faculty.
- Develop a new class option entitled "student choice" where students can choose to complete a course completely online or choose to attend scheduled on-campus meetings with the instructor for more personalized instruction.
- Create a task force to explore offering more "late start" courses which start after the normal add period of the semester.
- Develop structured online program pathways.

Objective 1.3 – Improve Academic and Non-academic Support Services

- Explore offering mental health crisis counseling services.
- Streamline and expand academic boot camp offerings including the development of a reading and writing boot camp.
- Make Brightspace shells available for all MCCC courses instead of the current requestonly process and strongly encourage the use of Brightspace for all courses.

GOAL 2: RELEVANT AND INNOVATIVE EDUCATION

Ensure that educational opportunities are attentive to the needs of those we serve.

Objective 2.1 – Relevant Programming

- Conduct a comprehensive needs assessment of current and potential programming to establish employer, industry, and student preferences useful in planning future strategic instructional endeavors.
- Put forward a data-supported recommendation for programming that reflects industry and student preferences/needs.

Objective 2.2 – Experiential Learning

- Formalize an "experiential learning coordinator" position aimed at creating, organizing, and managing experiential learning opportunities.
- Increase the number of experiential learning opportunities for students that meet employer, industry, and student needs and expectations.

Objective 2.3 – Collaboration and Civility

- Develop a Campus Collaboration Committee charged with organizing a regular calendar of events/activities aimed at promoting employee collaboration and cohesiveness.
- Explore the use of a consultant to conduct a civility/incivility assessment and provide recommendations based on findings.
- Complete a comprehensive review and revision of applicable college policies that guide employee interaction and behavior.
- Engage the campus in civility and team-building training.

Objective 2.4 – Shared Governance

- Delineate targeted strategies for improvement of the shared governance model based on the governance model survey results.
- Implement targeted strategies for improvement of the shared governance model based on the governance model survey results.
- Increase employee satisfaction with the college's shared governance.

Objective 2.5 – Portability of Courses

- Conduct an inventory of courses, programs, and opportunities for articulation and transfer, followed by a gap analysis to identify areas of opportunity.
- Increase opportunities for students to transfer courses and programs to university partners.

Objective 2.6 – Coordinated Partnerships

- Formalize a coordinator position to oversee articulations, direct college, and dual enrollment opportunities.
- Strengthen collaborative relationships with regional educational partners.
- Conduct a comprehensive assessment of current courses and curricula that support coordinated partnerships, looking for opportunities to expand programming and create new opportunities.

GOAL 3: CREATE A STUDENT-FOCUSED ENVIRONMENT

Create a culture of collaboration and respect that is committed to improving processes that support the MCCC Mission and Vision.

Objective 3.1 – Comprehensively assess the campus from a student-focused perspective

- Comprehensively assess the campus for a student-focused perspective.
- Process map the student experience to identify key services, processes and physical environments to ensure that they are student-focused.

• Collect data and devise an intervention plan that supports a more student-focused environment. Part of the plan will include redesigning spaces to optimize human resource capital and processes to better support student needs and preferences.

Objective 3.2 – Align Organizational Structure

- Analyze existing employee skills.
- Determine organizational needs.
- Build a plan to align human resources with the college's strategic direction.
- Transition people to meet the current and future needs of MCCC students.

Objective 3.3 – Develop New Training and Professional Development Practices

- Incorporate individual development plans into the formal campus-wide employee evaluation process that supports the realignment of skills.
- Support skills development based on recommendations from the individual development plans.
- Build an inclusive culture with regular, mandatory and engaging training opportunities for all employees.

Objective 3.4 – Adapt the Physical Environment

- Alter the physical environment to support student-focused learning.
- Provide dedicated spaces throughout campus that foster inclusion, equity and celebrate cultural diversity.

Objective 3.5 – Diversity, Equity, and Inclusion – Create a culture of Diversity, Equity, and Inclusion to assure that everyone (students, employees, visitors) who comes on campus feels a sense of belonging.

- Review past efforts and take inventory of diversity initiatives and numbers to see trending and to establish a baseline.
- Hire a consultant to develop a comprehensive Diversity, Equity, and Inclusion (DEI) Plan.
- Utilize the Internal Diversity Committee and the County-Wide Committee to further develop plans that embrace diversity, equity, and inclusion.
- Tie in DEI efforts with the DEI space.
- Engage the community to support MCCC diversity, equity, and inclusion initiatives and adopt community-wide.

ANALYSIS OF EXISTING CONDITIONS

Summary

The following analysis and synthesis of information is driven by the above principles, values and goals set out by Monroe County Community College. When coupled with faculty and staff surveys, site and facility assessments and participant workshops, the groundwork is laid for development of the final Master Plan.

In preparation for the preliminary planning and development of the Master Plan for Monroe County Community College, the existing conditions of the campus and facilities were studied to identify both the opportunities and constraints that will affect future development. This, along with an understanding of program offerings and enrollment and staffing, will allow challenges to be analyzed and addressed, enhancing and preserving areas of value.

Site Analysis

Main Campus

The main campus comprises 209 acres located on Raisinville Road, which forms the western edge of the township. The general land use pattern surrounding campus is agricultural, with the following exceptions:

Property to the north of the campus is occupied by the Monroe County Intermediate School District and the Monroe County Fairgrounds (at the corner of Raisinville Road and M-50). A residential community and golf course adjoin the campus property to the east. Across Raisinville Road to the west are single-family homes fronting large tracts of agricultural property. The south portion of campus includes a wooded area followed by additional farmland.

Some campus property, specifically to the north and east of the Welch Health Education Building, is currently being used for agricultural purposes.

There is also a potter's field cemetery, identifiable only by a State of Michigan Historical Marker, located on campus between parking Lot 2 and Raisinville Road.

The entire site, most of which is former farm fields, has in the past had flooding and standing water issues due to poor soil porosity and very flat terrain. The result has been erosion, landscape damage and paving deterioration.

As a result of a Landscape Master Plan prepared in 1991, the College performed re-grading and drainage work, including creation of a retention pond. This, coupled with replacement of damaged landscaping and paving, has considerably reduced the standing water problems throughout campus. The only area still visibly exhibiting this flooding is behind the Welch Health Education Building.

The balance of the landscaping throughout campus is newer focusing on low maintenance planting such as trees, with some smaller scale plantings used as accents.

Various species of trees are interspersed across the site, which is mostly planted with turf grass. There are some mature trees lining Raisinville Road near the main entrance, causing the balance of plantings to appear immature. The area surrounding the Plum Creek is the exception to this rule. This portion of the site is more heavily treed, with a mix of vegetation typical of a creekside ecosystem.

Numerous ash trees were used in the campus landscaping. All of these were in very visible locations, lining drives, walkways, and parking lots. There were 210 ash trees on the Main Campus and another 15 at the Whitman Center. All fell victim to the borer. In the spring of 2006, all of the ash trees were removed and replaced with a variety of species.

Continued efforts to annually add to the landscaping will be required throughout campus to create more pedestrian-friendly pathways, reduce the apparent distance between buildings and create more inviting outdoor gathering areas. Future site development should continue to address potential safety issues, including appropriately scaled and located plantings and increased pedestrian-scale lighting.

Previously, the Main Campus could be divided into a North Zone and South Zone, split by the main entry drive from Raisinville Road. The Welch Health Education Building being the only building in the North Zone with the balance of the academic buildings surrounding the campus quad, creating the only semi-enclosed exterior space on campus. However, with the construction of the Career Technology Center, a more cohesive campus footprint has been created thus eliminating the "zones" on campus. By placing the Career Technology Center between the Life Sciences Building and the Welch Health Education Building, rerouting the main road, and using existing parking and circulation, as was identified in the Master Plan as a goal for future facilities, all main campus facilities are connected and campus has an interconnected feel.

Whitman Center

The Whitman Center campus, opened to students in 1991, is located on 28 acres in Bedford Township. This facility chiefly serves the southern portion of Monroe County, northern Lucas County, and Lenawee County, although marketing efforts focus primarily toward Monroe County residents.

Access to the property is on Lewis Avenue. The predominant land use type surrounding the property is mixed between single family residential and some commercial.

This facility consists of a classroom/administration building, a small storage garage and a single parking lot split by an entry drive. The Whitman Center Building and the surrounding site were planned to accommodate expansion at both ends of the building. A purchase of 14.5 adjacent acres in 1999 and 3.36 acres in 2022 will allow for potential building expansion and additional parking in the future, as well as providing for buffer zones from surrounding development. Building and program expansion would be impossible without this additional land and parking.

The landscaping between the building and the parking is attractive. The area immediately west of the building is a much more mature wooded area providing shade and a pleasant view from the classrooms. Future site development should not only minimize disruption of this area, but also promote expansion of it. The presence of ash trees is a major concern at the Whitman campus. Although all infested ash trees have been removed from landscaped areas, they remain in this wooded section.

Access and Circulation Analysis

Main Campus

Vehicular access to the Main Campus is from Raisinville Road to the west. There are currently three entries to the site, with the center entry being emphasized by signage and plantings as the main entry.

The northernmost entry serves primarily the Welch Health Education Building, although the parking lot connects through to the main access road.

The southernmost entry road runs between the southern end of the developed campus and woods to the further south. It continues behind the Warrick Student Center and completes the ring road that connects the entire site. The layout of this ring purposely confines vehicular access to the edges of campus, minimizing the opportunities for pedestrian/vehicle conflicts.

Parking Lot Capacities

Lot	Total	Student/ Public	ADA Compliant	Staff	Safety Services	Other
Lot 1	148	123	8	17		
Lot 2	528	496	12	20		
Lot 3	159	135	8	16		
Lot 4	203	195	8	0		
Lot 5	66	62	4	0		
Lot 6	64	58	3	0		3
Student Success Center (Lot 6)	6	0	0	0		6
Lot 7	136	130	6	0		
Board/Visitor	15	6	2	6	1	
Physical Plant	11	0	0	11		
CTC Auto Lab	7	0	0	0		7
Whitman Center	252	244	8	0		
Total Main Campus	1,595	1,449	59	70	1	16

One way to calculate parking needs is to compare the number of staff and students with the number of spaces available.

Number of staff	337
Less number of designated staff spaces	<u>70</u>
Number of staff needing to park in "student/public" areas	
Number of students (2,471 credit hour + 1,000 non-credit)	3,471
Add the number of staff needing to park in "student/public" areas	267
	3,738
Less number of "student/public" spaces	
Need number of spaces.	

There are several basic inaccuracies when using the preceding method. One is that not all staff and all students will be on campus at the same time. Another is that it does not address the fact that at anytime during the day or evening there may be members of the public (non-staff and non-students) on campus for an event or conference. Although this may happen when the majority of staff and students are not on campus, this is not always the case. Moreover, at times, the numbers of public on campus can be significant.

A third inaccuracy is that the total number of spaces includes parking lots at two different locations: the main campus and Whitman Center. When in reality, parking needs at either location could be entirely different.

Manipulation and estimations could be used with this method, but the accuracy of the results may be highly questionable.

Perhaps a more accurate method is one that is sometimes used by architects and planners, which uses specific ratios to calculate parking needs. For students, the ratio of 1 to 0.2 is used. For full-time equivalent staff (FTE) the ratio of 1 to 0.9 is used.

This method results in the estimated needs as shown in the following table:

			Needed
			Headcount Ratio Spaces
Credit	t hour students (fall	2020 headcount)	2,471 x 0.2 = 495
Non-credit hour students			1,000 x 0.2 = 200
FTE s	taff *		$218 \times 0.9 = 196$
			891
*155	Full-time staff	$\div 1 = 155.00$	
69	Part-time staff	$\div 2 = 34.50$	
113	Adjunct faculty	$\div 4 = 28.25$	
337		217.75	

Prior to the construction of the Career Technology Center, the College was faced with two specific parking concerns. One was growing enrollment (which reached its peak in the fall of 2010). The other was the fact that two-thirds of the parking is in lots located on the northern end of campus, while the majority of buildings were located at the southern end. In addition, projected usage of the La-Z-Boy Center created a need for additional parking.

To address these problems, in the summer of 2005 the College constructed a new parking lot: Lot #7. This lot contains 136 parking spaces and is located between Founders Hall and Raisinville Road. This lot addressed all parking capacity concerns for the Main Campus at that time. With the opening of the Career Technology Center for fall 2013 classes, parking needs for students have shifted toward the largest lots on main campus.

Parking lots 1 and 2 were renovated in summer 2019. The project included resurfacing of both lots and adding additional drain tile in Parking Lot 1 near its east end along with some existing concrete curbing being replaced as well as extracting and repairing a few existing storm water structures in Parking Lot 2 and adding additional structures to help solve some legacy drainage issues. The number of parking spaces in both lots remained the same.

In the spring and summer of 2020, Lot 4 was renovated. The project included milling, compacting, repaying, curb replacement, and restriping.

During the summer and fall of 2020 in support of the opening of Founders Hall (formerly East and West Technology Buildings), parking lots 5 and 6 were completely renovated. The new design incorporates a divided boulevard style entrance off the south roadway that leads to the front of the building and divides the two parking lots. Lot 6 was expanded with the demolition of the old SAE garage and butler building increasing available parking in these to lots by 22 spaces. Both of these lots have received a LED lighting upgrade.

In the summer of 2021, parking lots 3 and 7 were completely renovated and received LED lighting upgrades.

Pedestrian circulation consists of typical campus walkways connecting buildings and parking lots in a fairly direct manner. Circulation through the main quad at the south end of campus focuses around a central paved plaza surrounding a raised planted area. A number of these

walkways have been replaced or redesigned in recent years to replace deteriorated walks and to create more pleasing circulation paths. Each summer the College undertakes sidewalk repair and upgrade as a part of its annual campus maintenance projects.

Site and directional signage for vehicular and pedestrian traffic is under constant review. When all exterior signage was replaced several years ago, large building letter signs were added to each building to assist visitors and students with building identification. Also, at that time, two kiosks identifying the location of all campus building were added. A third directional kiosk was added with the construction of Lot 7. In the Spring of 2022, a task force selected a vendor to help redesign the wayfinding signage on Main Campus. Following numerous meetings, a new signage system has been approved and is currently being fabricated. The new external wayfinding system includes directional loop road signs, monument signs, kiosks/maps, and pedestrian signs. The new system was installed in the fall of 2022.

Whitman Center

Access to the Whitman Center is from a single divided entry off Lewis Avenue. This access road leads to the front of the building and divides the two parking lots. Pedestrian circulation consists of a main walk leading from the parking lot to a central entrance and two secondary entrances, one at each end of the L-shaped building.

Parking is provided for 252 vehicles. The purchase of an additional 17.85 acres was made partly to address the need for additional parking if the building is ever expanded.

Facility Analysis

MCCC opened its campus doors to students in 1968 and is currently comprised of thirteen facilities on the main Raisinville Road Campus and two on the 28-acre Whitman Center property in Bedford Township.

The facilities at Monroe County Community College are routinely reviewed, including an annual insurance appraisal and an assessment of deferred maintenance conditions throughout campus. The results of these investigations are included in this document to present a clearer picture of the condition of the campus.

In FY2014-15, the Board of Trustees authorized a \$16 million HVAC replacement project on main campus that included a geothermal heating and cooling system for the majority of the main campus buildings. The College borrowed funds to meet this financial obligation in December 2015 and construction began in January 2016. On August 20, 2017, the College formally recognized the switchover to this energy-efficient and earth-friendly geothermal system. The geothermal-based system will result in significant energy cost savings for MCCC, has a 50-year lifespan on its well field that is double that of a conventional system and will greatly reduce the college's carbon footprint. Four Main Campus buildings – the Warrick Student Center, Life Sciences Building, Campbell Academic Center, and Founders Hall, which were all built in the late 1960s or early 1970s, are now being served by the new geothermal-based system.

With funding made available via the passage of the Maintenance and Improvement Millage in November 2016 and renewal in November 2020, the college has the following projects either underway or completed:

Life Sciences Building Façade and Student Collaboration Space
Life Sciences Classrooms & Lecture Halls
Life Sciences Domestic Water Pipe Lining
Campus Phone System
Campus Security and Access Control System

Facilities Building Renovation (Plans Completed)
La-Z-Boy Center Masonry Project
Parking Lots 1 & 2
Parking Lots 4, 5 & 6
Parking Lots 3 & 7
Founders Hall Renovation and New Construction
Founders Hall Domestic Water Pipe Lining

Planned millage-funded projects include the addition of private rooms and single-use restrooms in the La-Z-Boy Center and Career Technology Building and site lighting upgrades (sidewalks and parking lots) on both Main Campus and at the Whitman Center.

Previous construction and renovation projects that received matching State funding required the sale of bonds by the State to finance their portion of the funding resulting in College buildings and property being pledged as collateral. The Campbell Academic Center, La-Z-Boy Center, Career Technology Center, and Founders Hall are obligated to the State Building Authority as part of this construction and renovation work. Once the bonds are paid, all property will revert to full ownership by the College.

A majority of the buildings on the main campus are earth-toned brick buildings with muted trim, all of which are structurally sound. These buildings are indicated in the following table:

FACILITY	Area (Sq. Ft.)	Year Built	Replacement Value	
Main Campus				
Campbell Academic Center	53,358	1968	\$	16,149,100
Warrick Student Center	74,143	1968	\$	23,547,400
Life Sciences Building	63,488	1972	\$	21,830,200
Founders Hall (formerly East/West Technology)	66,700	1968	\$	16,938,600
Welch Health Education Building	50,700	1997	\$	14,509,300
La-Z-Boy Center	53,329	2004	\$	21,099,800
Career Technology Center	60,377	2012	\$	17,883,000
Power Plant	9,394	1968	\$	1,967,500
Boiler House 100	2,184	1978	\$	3,494,000
Boiler House 200	2,184	1978	\$	2,375,900
Boiler House 300	1,924	1978	Included in SS/A Bldg.	
Maintenance Butler Building	1,500	1980	\$	70,600
Salt Storage	400	1999	\$	21,500
Subtotal	439,681		\$	139,886,900
Whitman Center				
Whitman Center	17,650	1991	\$	5,000,400
Garage	540	1991	\$	32,100
Subtotal	18,190		\$	5,032,500
GRAND TOTAL	457,871		\$	144,919,400

Major Capital Projects

As outlined in the College's Fiscal Year 2025 Capital Outlay Project Request, MCCC's top priority project is the Renovation and Addition to the Welch Health Education Building. The project includes renovation to the existing 16,822 square feet and two additions of 23,350 square feet and 22,150 square feet in support of the College's nursing/respiratory therapy and criminal justice programming. The total estimated cost of the project is \$21,864,000. In addition to classroom and laboratory renovation and new construction, this project includes parking and site improvements as well as window and door replacements and the installation of a rain screen system to address building envelope issues.

Following is a table of the College's Major Capital Projects remaining to be completed:

Facility	Project Scope
Welch Health Education Building	Renovation and Addition
Whitman Center	Renovation and Addition
Warrick Student Center	Renovation and Addition
Main Campus Loop Road	Rehabilitation
Physical Plant Building	Renovation
Maintenance Building/Salt Barn	New Construction
Whitman Center Parking Lot	Rehabilitation
Life Sciences Building – Phase III	Renovation to entries, hallways, and office suites

INSTRUCTIONAL PROGRAMMING

Much of the information regarding instructional programming is available in the College Annual Report. The 2021-2022 Annual Report is included in this planning document.

Service Areas

Monroe County Community College's tax base is located in Monroe County, and this is the primary focus for its service area.

Program Offerings

In keeping with the programmatic goals set forth in the mission documents, Monroe County Community College offers the following programs:

Transfer/University Parallel/Pre-Professional Programs

The university parallel and pre-professional programs are designed for the students who will eventually finish their education at a four-year college or university. Credits earned in the parallel or pre-professional programs are generally transferable to four-year colleges or universities if the credits meet the following criteria:

- 1. Satisfactory grades. Grades of "C" or better are necessary for a student to transfer the course to most colleges or universities.
- 2. Proper selection of courses. A student must select courses designed for college transfer that are consistent with the requirements of the school to which the student plans to transfer. Since no two schools have identical requirements, students should consult with their faculty adviser or counselor to discuss any questions regarding specific programs.

Students following a transfer guide provided by a particular four-year college can complete the first two years of a baccalaureate program at MCCC. In addition, students fulfilling appropriate graduation requirements of Monroe County Community College will be eligible to receive an associate degree.

Career/Occupational Certificate and Degree Programs

Individuals completing a prescribed course of study in one of the career program areas will receive an Associate of Applied Science or Associate of Commerce Degree.

Individuals who wish to upgrade their knowledge and skills or prepare for new areas of employment may choose from a wide variety of source offerings. Special sequences of courses may be designed to meet these objectives.

The following is a list of career/occupational degree and certificate programs available:

Associate of Applied Science

- Accounting, A.A.S.
- Agriculture: Agribusiness Pathway, A.A.S.
- Agriculture: Agricultural Operations Pathway, A.A.S.
- Associate of Applied Science, A.A.S.
- Automotive Service Technology, A.A.S.
- Business Management, A.A.S.

- Computer Information Systems: Accounting/CIS, A.A.S.
- Computer Information Systems: App Development, A.A.S.
- Computer Information Systems: Computer Science, A.A.S.
- Computer Information Systems: Cybersecurity and Information Assurance, A.A.S.
- Computer Information Systems: Office Professional, A.A.S.
- Computer Information Systems: PC Support Technician, A.A.S.
- Computer Information Systems: System Administration Specialist, A.A.S.
- Construction Management Technology, A.A.S.
- Criminal Justice MI Transfer Pathway
- Criminal Justice, A.A.S.
- Criminal Justice: Corrections, A.A.S.
- Criminal Justice: Law Enforcement, A.A.S.
- Early Childhood Education, A.A.S.
- Electrical Engineering Technology, A.A.S.
- Elementary Education, A.A.S.
- Game Design and Development, A.A.S.
- General Technology, A.A.S.
- Graphic Design: Digital Media, A.A.S.
- Graphic Design: Illustration, A.A.S.
- Manufacturing Technology, A.A.S.
- Mechanical Design Technology, A.A.S.
- Mechanical Engineering Technology, A.A.S.
- Metrology and Quality Technology, A.A.S.
- Nuclear Engineering Technology, A.A.S.
- Nursing: Registered, A.A.S.
- PN to RN Program Option, A.A.S.
- Respiratory Therapy, A.A.S.
- Welding Technology, A.A.S.

Associate of Science

- Associate of Science, A.S.
- Biological Sciences Transfer Pathway
- Biology MI Transfer Pathway
- Business MI Transfer Pathway
- Chemistry Transfer Pathway
- Communication MI Transfer Pathway
- Elementary Education Transfer Pathway
- Environmental Science Transfer Pathway
- General Engineering Transfer Pathway
- Geoscience/Earth Science Transfer Pathway
- History Transfer Pathway
- Journalism/Communications Transfer Pathway
- Mathematics Transfer Pathway
- Mechanical Engineering MI Transfer Pathway
- Physics Transfer Pathway
- Psychology MI Transfer Pathway
- Psychology Transfer Pathway
- Secondary Education History/Geography Transfer Pathway
- Social Work MI Transfer Pathway

Associate of Arts

• Associate of Arts, A.A.

Associate of Fine Arts

- Art MI Transfer Pathway
- Associate of Fine Arts, A.F.A.
- Fine Arts, A.F.A.

Certificates

- · Accounting, Certificate
- Automotive Service Technology, Certificate
- CDA Credential, Certificate
- Certified Nurse Aide, Certificate
- Computer Information Systems: App Development, Certificate
- Computer Information Systems: Cybersecurity and Information Assurance, Certificate
- Computer Information Systems: Office Software Specialist (Microsoft Office Certification Prep), Certificate
- Computer Information Systems: Office Specialist, Certificate
- Computer Information Systems: PC Support Technician, Certificate
- Computer Information Systems: System Administration Specialist, Certificate
- Construction Management Technology: Heavy and Industrial Construction, Certificate
- Construction Management Technology: Residential and Light Commercial Construction, Certificate
- Criminal Justice: Corrections, Certificate
- Criminal Justice: Security, Certificate
- Early Childhood Education, Certificate
- Entrepreneurship, Certificate
- Graphic Design: Computer Graphics, Basic Certificate
- Graphic Design: Digital Media, Basic Certificate
- Graphic Design: Digital Media, Certificate
- Graphic Design: Illustration, Basic Certificate
- Graphic Design: Illustration, Certificate
- Graphic Design: Interaction Design, Basic Certificate
- Graphic Design: Interaction Design, Certificate
- Manufacturing Technology: CAD/CAM Technician Certificate
- Manufacturing Technology: CNC Technician Certificate
- Mechanical Design Technology, Certificate
- Metrology and Quality Technology: Metrology Technology, Certificate
- Metrology and Quality Technology: Quality Technology, Certificate
- Non-Destructive Testing Technician: Advanced, Certificate
- Non-Destructive Testing Technician: Basic, Certificate
- Nursing: Practical, Certificate
- Phlebotomy Technician, Certificate
- Renewable Energy: Solar Energy, Certificate
- Renewable Energy: Wind Energy, Certificate
- Welding Technology: Advanced Welding, Certificate
- Welding Technology: American Welding Society, Certificate
- Welding Technology: Basic Welding, Certificate

Certificate Programs

A certificate of completion will be granted upon completion of certain specialized certificate programs. Certificate programs are listed in the career program listing.

Michigan Transfer Agreement

In 2012, the Michigan legislature included language in the community college appropriations bill calling for improvement in the transferability of college courses between Michigan colleges and universities by revising the MACRAO Agreement. The Michigan Transfer Agreement was created in an effort to increase the transferability of lower level general education courses across all Michigan's public institutions. To fulfill the Michigan Transfer Agreement, student must successfully complete at least 30 credits, with at least a 2.0 GPA in each course. These credits should be met according to the following distribution:

- 1 course in English composition
- A second course in English composition or 1 course in communications
- 1 course in one of the following Mathematics pathways: College algebra or statistics or quantitative reasoning or an upper level course in one of these subject areas
- 2 courses in social science (from two disciplines)
- 2 courses in humanities and fine arts (from two disciplines and excluding studio and performance classes)
- 2 courses in natural sciences including one with laboratory experience (from two disciplines)

If these courses do not add up to 30 credit hours then the student must take an additional course from one of these groups. One of the above courses must be completed at Monroe County Community College.

Bachelor's Degree Completion Programs

2+2 and 3+1 Agreements

Monroe County Community College has developed articulation agreements with a number of four-year colleges and universities. These agreements (sometimes called bachelor's degree completion agreements) provide students who are pursuing one of Monroe County Community College's specific two-year associate's degree programs an opportunity to continue their studies

and complete the requirements for a baccalaureate degree. The 2+2 agreements provide that the student will be able to transfer a minimum of 60 semester credit hours from one of Monroe County Community College's associate degree programs toward selected bachelor's degree programs at the four-year institution. The 3+1 agreements are similar but give students the opportunity to transfer more than 60 credits of MCCC coursework for specified degree programs at four-year institutions.

Siena Heights University and Spring Arbor University teach classes at MCCC. SHU has an office on the College's main campus and uses college classrooms and labs to offer classes at the junior and senior level for bachelor's degree programs. SAU has offices at the Whitman Center and uses college classrooms and labs at the Whitman Center to offer classes.

Joint Programs

MCCC has cooperative agreements allowing students to complete components of certain programs at the college and the remainder of these programs at participating community colleges. Such agreements exist in the following areas:

- Criminal Justice: Law Enforcement Option
 Qualified students may enroll in a state-approved police academy through Schoolcraft
 College or other accredited colleges, while earning an associate of applied science degree
 in criminal justice from MCCC.
- Agribusiness and Agricultural Operations Options
 Michigan State University and MCCC have partnered together to offer students an opportunity to earn a certificate and an associate of applied science in agriculture or a certificate and an associate degree of applied science in agribusiness. The certificates, awarded by MSU, will include 34 credits of agriculture-oriented courses through the Institute of Agricultural Technology. Combining those credits with a minimum of 26 additional credits from MCCC to total 60 credits (for agricultural operations) or 28-29 additional credits to total 62-63 credits (for agribusiness) will result in an associate of applied science degree. Students wishing to work toward a bachelor's degree may receive preferred transfer status at Michigan State University after earning the associate degree at MCCC.

Dual Enrollment Programs

State sponsored dual enrollment programs are offered to local high school students as an opportunity to begin their college studies while still attending high school.

Monroe County Middle College

The Monroe County Middle College is a partnership between the Monroe County Intermediate School District (MCISD), Monroe County Community College, and Promedica Monroe Regional Hospital and is designed to provide students with early entry into a health careers program.

Students enter the Monroe County Middle College in the 9th grade with a comprehensive curriculum that will culminate with award of a high school diploma upon graduation. Students in the program also have the opportunity to earn up to 60 transferable college credit hours or an associate's degree and/or a certificate in the field of health science.

Distance Learning Initiatives

MCCC also offers a number of courses through electronic means, including a web-based curriculum. The College utilizes Brightspace Course Management Software for web-based courses. The College is a member of the Michigan Community College Virtual Learning Collaborative. Through this and other systems used by the College, students at MCCC have access to courses offered by other colleges, while students not attending MCCC have access to numerous programs at the College.

Online courses are available in both credit and lifelong learning programs.

Corporate and Community Services Programs

The basic mission of the Corporate and Community Services Division is to provide a variety of educational opportunities to adults within the College service area. Courses and programs are designed in response to expressed community needs, interest of individuals and groups, needs of business and industry, as well as demands for enrichment and recreational activities. The CCS Division serves about 4,000 non-credit students annually.

The CCS Division provides work force training programs, offering education to area business and industry, often at the business site. CCS personnel are regularly involved in integrated programs with the Chamber of Commerce, Monroe County Business Development Cooperation, and a variety of local and state agencies and organizations dedicated to economic development activities.

Community service programs and activities are an on-going part of the Division. Community services programs include a wide-range of programming that reflects the diverse interests of the community.

The Lifelong Learning Office provides educational opportunities for adults in a wide range of nondegree programs. It renders services to individuals and groups having needs that can be more adequately satisfied by short informal educational projects and activities rather than by traditional courses.

STAFFING AND ENROLLMENT

Student Body Composition

Based on demographic data collected by the College for the fall 2024 semester, the typical Monroe County Community College student has a mean age of 23.0, resides in Monroe County (86.5%) and attends as a part-time student (74.1%).

The College's dual enrollment students comprise 29.6% of total fall 2024 enrollment.

Detailed demographic data on the student body composition is contained later in this document in the Student Profile section.

Enrollment Trends and Projections

Enrollment for the fall 2024 semester produced a 0.6 percent decrease in headcount (2,464) over the previous fall (2,478), and a 1.0 percent increase in credit hours (20,149 as compared to 19,945). Detailed information on enrollment is included in the Student Profile Report included in this document. Billable contact hours increased 1.5 percent (23,275 as compared to 22,932).

The following chart illustrates enrollment projections for fall 2022 through fall 2027

Semester	Enrollment Forecast (4.30.22)	Actual Stabilized (9.1.22)
FL2022	2477	2471
WI2023	2401	2342
FL2023	2429	2478
WI2024	2394	2394
FL2024	2397	2464
WI2025	2377	N/A
FL2025	2371	N/A
WI2026	2357	N/A
FL2026	2347	N/A
WI2027	2335	N/A
FL2027	2324	N/A

Barring a few exceptions, class size is usually limited to 30 students per class. Currently, the College is able to handle its existing population, but scheduling demands can sometimes make this difficult on certain days and at certain times. Some scheduling changes can be made to increase the number of students per section, but limiting the number of available sections in an attempt to improve efficiency will likely prove counterproductive as many class times are scheduled to meet scheduling needs of students. If classes are not offered at certain times, students are sometimes unable to take the class at a different time.

Staffing Levels and Projections

Monroe County Community College maintains staffing data as presented below:

TABLE 1 Monroe County Community College Staffing, 2020-2024

TABLE I WOMFOE Coun	2020-21	2021-22	2022-23	2023-24	2024-25
Full-time Faculty*	61	61	57	61	57
Part-time Faculty	158	182	164	150	96

HSS	14.5
SM	16.9
Overall	16.1

SPACE DEMANDS AND PROJECTIONS

Instructional Space

Monroe County Community College has available at the main campus a total of 86 classrooms comprised of:

- 37 general-purpose classrooms (some also double as conference rooms)
- 15 conference rooms (some also double as classrooms)
- 2 lecture halls
- 10 science labs
- 12 computer labs
- 12 technology labs
- 3 health sciences labs
- 2 art classrooms
- a culinary arts kitchen, a small performance theatre/lecture hall, a distance learning classroom, a fitness center, a childcare lab, an aerobics/dance studio, a gymnasium, a band rehearsal room, and a 500-seat theater/auditorium.

The Whitman Center has available nine general-purpose classrooms and a multi-purpose lab.

Long term recommendations (beyond five years) are that the College plan for future growth by creating "placeholders", or specific locations for future development. This will ensure that space remains available when it is needed because of added programs or increased enrollment.

In conjunction with creation of additional classroom space, the College has determined that existing classroom space should also undergo the updates necessary to improve teaching effectiveness. Technology needs at the College for student learning continue to grow at exponential rates. Such needs can be found not only in every classroom and lab, but have permeated outside the walls of the classroom into hallways, the cafeteria, and lobbies, as the demand for individual and group study areas that offer and support technology need to be addressed.

In doing so, three apparent areas of need have surfaced. The first is systems need. This is the various technology systems that are needed at this point in time, at this campus, to provide the most effective and efficient support and delivery for student learning. The second is the infrastructure needed to support these systems, including items such as lighting, electrical power, acoustics, and flexibility. The third factor is the human resources that will be needed for systems training and support.

To address these critical needs of space, new curriculums, and changing technology the College constructed a Career Technology Center, renovated the East and West Technology Buildings (renamed Founders Hall), renovated the classrooms and lecture halls in the Life Sciences building and is renovating the Campbell Academic Center. In addition, the College is performing major renovations to current buildings and infrastructure using funding acquired through the

Millage Maintenance and Improvement Fund (a 5-year .85 mil levy). Detailed information is included in the Millage Maintenance and Replacement Fund attachment.

Support Spaces

Campbell Academic Center

The main floor of the library was totally renovated in 2000 to upgrade facilities and technology, creating a modern learning resources facility. The Learning Assistance Lab on the second floor was renovated in the summer of 2005 and was moved to Founders Hall in 2020. In 2009, technology upgrades were made to classrooms in the Campbell Academic Center. In 2019, the Holladay Theater (formerly the Little Theater) was completely renovated adding state-of-the-art lighting and sound systems. In June of 2021, the building was taken completely off-line to perform major renovations and upgrades to the facility. The project was completed in summer 2022 and reopened for fall 2022 classes.

Warrick Student Center

The Warrick Student Center currently houses most of the student services in a traditional, departmental fashion. In order to provide a simpler interaction between students and College services, a reorganization of departments into a One-Stop Shop model was accomplished in 2020. This model allows students to deal with fewer locations throughout the entire Admissions / Registration / Financial Aid / Cashier process.

To improve operational efficiency, to better identify the services offered, and to make the areas more welcoming, renovations did take place in 2009 in the Admissions/Counseling/Registration area.

The building did have an added wing in 1988 to provide office, classroom, and conference room spaces.

The building also houses a kitchen for culinary instruction (built in 1988), a bookstore (renovated in 1990), a student activity area (renovated in 2000), and a cafeteria (kitchen and serving areas renovated in 2002). In 2005, a variety of other offices also underwent renovations, including payroll and accounting, mailroom, accounts payable, human resources, and campus security. In 2009, work was completed on renovations to the Admissions/Registrar offices as well as the adjacent entryway and hallway. In 2014 due to water remediation issues, renovation was done to a student activity area in the basement. During the 2020-2021 academic year, the Safety Services Office and the Human Resources Offices were renovated. Renovations completed during the 2021-2022 academic year include the addition of a Diversity, Equity and Inclusion Room, a new Student Government Room, a single-use restroom, and a mediation room in the south end of the building.

Welch Health Education Building

The Welch Health Education Building, completed in 1997, provides instructional space for Nursing, Respiratory Therapy and Physical Education Program classrooms and laboratories, a

multi-purpose room, a dance/aerobics studio, and a fitness center. Renovation and new construction to this building is the top capital outlay project for the College.

The facility is located at the north end of the site. The site to the east of the building is not currently landscaped and, with proper drainage systems installed, would be a prime candidate as a placeholder for any outdoor athletic fields and additional parking.

La-Z-Boy Center

A 53,700 square foot, \$12 million, multi-use Instructional Center for Business Training and Performing Arts (La-Z-Boy Center and Meyer Theater) was completed in 2004. This facility houses a 500-seat auditorium with full support facilities, a pre-function assembly space, a multi-purpose lecture hall, dividable classrooms and rehearsal spaces, a computer classroom, offices for the Corporate and Community Services Department, choir and band rehearsal rooms, a scene shop and dressing rooms.

Training for existing and new industries has become a priority, and appropriate facilities are required to effectively meet the expressed need. Cultural development has been a long-standing component of the College Mission, and construction of the facility completes the original campus plan, which called for a facility to house many of these functions. This building, while designed as a conference center, enables the College to contribute to the cultural arts – a true example of a liberal arts approach to economic development.

The building is located at the northwest corner of the Quad with the main entrance facing the existing parking lot #2 and a student entrance facing the Quad. This location was chosen to help complete the enclosure of the Quad, create a highly visible presence from Raisinville Road and to take advantage of the available 528 parking spaces in lot #2.

The College received funding from the State for 50 percent of building costs. Two million dollars of the College's \$6 million match was gifted by the La-Z-Boy Foundation. Hence, the building was officially named the La-Z-Boy Center.

Career Technology Center

A 60,425 square foot, \$17 million, Career Technology Center was completed in 2013. This facility houses the classrooms and labs in support of the Applied Science and Engineering Technology Division.

The Career Technology Center was designed to support the delivery of instruction necessary for developing the skill set required by today's high-demand, high-skill jobs. The facility will allow for expansion of existing programs in the areas of nuclear engineering, welding, construction, computer-aided drafting and manufacturing, electronics, quality assurance and automotive engineering and service with an emphasis on hybrid and battery technology. In addition, it provides the infrastructure and equipment required to develop technology programs in the emerging areas of advanced manufacturing, renewable energies (wind, solar, fuel cell technology) and sustainable green technologies.

The building is located between the Life Sciences Building and the Welch Health Education Building facing parking lot #2. This location was chosen to create a more cohesive campus footprint thus eliminating what many felt was a large separation on main campus between the majority of buildings on main campus and the Welch Health Education Building.

The College received funding from the State for 50 percent of building costs. A capital campaign in support of the project raised \$2.4 million in support of the facility.

Whitman Center

The Whitman Center provides general-purpose instructional space and a multi-purpose lab in a building that was planned for expansion from the end of each wing. Current enrollment does not justify expansion of the facility. This will, however, be a topic of continued review and monitoring, possibly resulting in a recommendation of building expansion and additional parking in the future should enrollment growth dictate a need for such expansion.

Life Sciences Building

In winter 2018, the College officially opened new student collaboration space added to the Life Sciences Building. This 2,570 square foot addition was designed to foster student collaboration and provide students with much needed space for interaction, study, and relaxation. Exterior structural repairs were also made to the building including the installation of a modern exterior façade system.

In spring of 2020, the College began a major renovation to the classrooms and lecture halls in the Life Sciences Building. These renovations were completed during the winter 2021 semester and opened for fall 2021 classes.

Founders Hall (formerly East and West Technology Buildings)

A major renovation and addition project to the East and West Technology Buildings, renamed Founders Hall, is in its final stages of completion. The twin buildings were combined into one building that now houses numerous services geared toward student success, state-of-the-art classrooms and computer labs, an abundance of adaptable student collaboration spaces, and several college departments. This \$9 million project is funded in part by State of Michigan Capital Outlay funding (\$3.75 million). The building opened for classes and services beginning with the fall 2020 semester.

Survey Summary

The input of faculty and staff was enlisted through past surveys to assist in the planning process in uncovering trends, needs, successes and deficiencies that the Master Plan would need to address. The responses were useful in confirming that the priorities the College was pursuing for future growth were in line with needs of the users.

In general, respondents felt that the College was above par in its programs and in producing a pleasant, relaxed and open place. Recent surveys of staff and students indicate a high level of satisfaction that the campus is well maintained, safe, and secure.

Need for updates to existing classrooms and laboratories were voiced as a common concern. This included updates to classroom environment, such as improved HVAC, lighting and acoustics to provide better conditions for learning. There was also repeated mention of a need for flexible classroom design that would be adaptable to a myriad of teaching techniques. In a staff survey (July 2007 Budget Updates Survey), 81 percent of respondents indicated that they believed the campus facilities and grounds needs were being adequately addressed.

Summary - Challenges

Based on the research, analysis and synthesis outlined in the previous pages, the following challenges were developed. These challenges are vital in creating the "problem" to be solved, acting as catalysts to the thinking process that takes place throughout the entire master planning process. Often these challenges drive discussions among the members of the Master Planning team, bringing undiscovered challenges to light and producing a more cohesive final product.

The main challenges faced by Monroe County Community College as part of the development of a Master Plan are as follows:

• Facilities Condition

Building exteriors and physical structures are an ongoing challenge as they age

Aged and outdated HVAC and other operational systems

At end of life, malfunctioning

Unable to meet demands, especially from computer heat loads

Electrical capacities

Outdated classrooms

Technology, furniture, finishes, equipment, acoustics, lighting, accessibility

Programs

Need for modern facilities for technology programs (addressed through

construction of Career Technology Center)

Need for additional lab and classroom space for health programs (to be addressed through renovation and new construction to building)

Limited space for Culinary Arts program (credit program closed beginning fall 2022)

Barrier Free Accessibility

Learning Assistance Lab on second floor, difficult to access (moved to Founders Hall)

Student Support Services

Located in several areas, some not easily accessible

Growth

Update placeholders

Future project sites Building additions

Whitman Center

• Site

No athletic fields

Many of these future facility needs, as well as their projected costs, can be found in the Maintenance and Replacement Fund section.

Solution Criteria

Before master plan solutions are developed to address the above list of challenges, certain criteria are agreed upon to act as litmus tests for each solution to successfully pass.

Similar to architectural guidelines that provide a framework for future facilities that ensures a common theme among buildings; these planning guidelines ensure that any proposed solutions all adhere to a common theme, helping to avoid planning conflicts.

Following is a list of the solution criteria that was used to measure each proposed solution:

- Should physically support the College Mission Documents and Strategic Plan.
- Should improve student retention and assist in marketing the College to prospective students.
- Should address technological changes and the need for technology flexibility.
- Should provide classroom flexibility for different users and teaching methods.
- Should simplify student and visitor interaction with the College.

MASTER PLAN

At this stage of the master planning process, the vision for the College and the needs dictated by the programs are translated into physical projects based on the opportunities available within the attributes and constraints of the facilities and site. This is the point where the needs, desires and abstractions of the program take on structure and purpose, creating a blue print for the future development of the College.

When potential and expanded facilities are organized on the site, the Master Plan provides placeholders for future projects – an overall scheme ensuring that any new building will be well integrated into the whole campus, with forethought to the infrastructure needed to support that facility.

Phase 1 2009-2011

Deferred Maintenance

The College has made a priority over the last several years to address issues of deferred maintenance throughout the campus. This included completion of re-roofing all campus buildings, replacement of all parking lots, replacement of emergency alarm systems, retrofitting all interior lighting, replacement of its energy management system, and maintenance work on several HVAC systems.

Three years ago, the College completed its second college-wide facilities assessment, resulting in a prioritized list of building systems requiring attention. As part of the assessment, an easily updateable database was created, allowing the College to monitor and record systems condition and complete repairs. This assessment and database, with detailed facilities conditions and associated repair and/or replacement cost was performed by SHW Group and is included in this document. Examples of items requiring repair and/or replacement include:

- Isolated HVAC problems throughout campus, including air leakage, condensation and systems unable to meet increased cooling loads.
- Non-functional site lighting, due to deterioration of underground conduit.
- Deterioration of building entries.
- Electrical systems operating at maximum capacity.
- Original galvanized piping deteriorated to the point of replacement.

(A more comprehensive list of such projects can be found in Appendix 6, *Maintenance and Replacement Fund.*)

The College intends to continue its efforts toward improving the condition of the facilities throughout the campus, repairing and replacing systems as necessary to avoid the potential complications and exponential costs associated with deferring needed maintenance.

Renovations and Updates

A separate component of facilities upgrades, renovations and updates fall under the category of capital improvements. These recommendations were placed in this first phase, as they are essential in providing the flexibility and technology required by current and future teaching needs.

Capital improvements of this type are also essential in marketing the College to students, business and industry in a highly competitive environment. This is an essential, but often overlooked part of attracting and retaining students and business partners.

Observation of classrooms, labs and equipment, and information collected from surveys indicate that the College needs to continue its efforts to improve the physical learning environment in all departments.

Many existing general classrooms need technology and environmental upgrades to meet the needs of current technology and teaching methods. In the majority of College buildings, these improvements include:

- Upgraded HVAC systems to improve acoustics and allow for better control of temperature in each classroom.
- Improved technology support, including lighting and window shading designed for intensive multimedia equipment use.
- Upgraded finishes (carpeting, ceilings, whiteboards) and furniture.
- Integration of new teaching delivery technology into classrooms. These upgrades would include installation of wireless networks, low cost multimedia projectors and other classroom learning equipment.

Landscape and Site

In the summer of 2003, landscaping around the Welch Health Education Building was accomplished. Landscaping was one of the components removed from the plans when this building was constructed in 1997 to help in reducing costs. (A parking lot was the other major component.)

Also, in 2002 was the construction of a 26' x 40' building that served as a garage and storage area for the College's SAE car and equipment, and a lab area for "dirty work" for construction classes. This is a heated, block building with two garage doors and is located to the south of the West Technology Building. With the construction of the Career Technology Building, this facility is now being used by the Maintenance Department for landscape equipment.

Much of the landscaping was also removed from the La-Z-Boy Center project to reduce construction costs. This work was completed in the summer of 2005 and 2006.

In 2006 a total of 184 ash trees were replaced on the Main and Whitman Center campuses.

In the summer of 2005, a plan to replace much of the campus sidewalks was initiated and implemented over the course of the next five years.

Career Technology Center

Technology has changed in leaps and bounds over the last forty years when the College was first built. Unfortunately, the College's facilities housing technology instruction have not been able to keep pace with these changes due to physical limitations, and building constraints, and the requirements of newer technology systems.

To address this need the College constructed a Career Technology Center. The new facility offers classrooms and labs in support of the Applied Science and Engineering Technology Division course offerings as well as business training contracted through the College's Corporate and Community Services Division.

With the opening of the Career Technology Center, vacated areas were reviewed as possible spaces to address other facility concerns and a successful capital proposal was developed and presented to the State with funding approved in 2016 for renovation and new construction to these buildings. The project is currently underway with the opening of the new facility schedule for summer 2020. The renovated buildings will allow for update and expansion of existing academic programs and student support services. Providing full ADA accessibility, the design includes an active learning classroom; renovation of four existing business/CIS computer labs and support spaces; a new art classroom/lab and associated support spaces as well as infrastructure improvements to existing art spaces: an innovation lab with support spaces and a computer lab; a testing center; relocation and expansion of the Learning Assistance Lab; a technology assistance/open computer lab; a new academic commons; and office space for the Business Division, Information Systems Department, and adjunct faculty.

Phase 2 2011-2014

Whitman Center

In October 1999, the College purchased an additional 14.5 acres of property immediately to the west of the existing Whitman Center site and in 2022 the college purchased an additional 3.36 acres to southeast of the existing property. As the Whitman Center itself was designed for expansion on the existing site, the proposed use for the new property is to provide an additional buffer from surrounding properties and, most importantly, to provide additional parking, if needed.

If enrollment at the Center were to increase, MCCC, as part of Phase 2, would investigate the need for building expansion and additional parking at the Whitman Center.

Warrick Student Center Addition and Reconfiguration

In prior surveys and Master Plan Committee meetings, a desire was voiced to consolidate all student services in one location on campus. This consolidation would be in a One-Stop Shop format, leading students through the process of admissions, registration, financial aid and

payment in fewer steps, rather than the current model of moving between offices and dealing with numerous personnel. The recommended changes would include:

- Potential relocation of the Learning Assistance Lab (LAL) to the East Technology Building, creating an assistance office that would be able to aid the student from entrance to job placement in the same location as other student services. An alternate would be to locate the LAL to other available ground floor space on campus.
- Construction of an addition to the building in order to meet the logistical needs of a Student Services One-Stop Shop format is desirable. Such an addition should also take into consideration the consolidation of Business and Administration offices in order to more effectively address operation, and student and constituent access.
- Potential relocation and enlargement of the Bookstore.
- Potential relocation of Financial Aid and Cashiers Office to adjoining suites.

Phase 3 2014-2018

Athletic Fields

There has been considerable debate over the merits of outdoor athletic fields at Monroe County Community College. Concerns range from the need and projected use of athletic fields, to the ability of the soil to support athletic fields over the long-term without installation of sub-surface drainage system.

One point that cannot be disputed is the question of land availability. The Main Campus currently has enough property available in the immediate vicinity of the Welch Health Education Building to support numerous different athletic fields.

As part of Phase 3, it is recommended that the College undertake a study to determine the need of athletic fields and if the study warrants, proceed with planning, design and initial construction of athletic fields for sports determined as viable. This construction will include the additional parking necessary to support both the field and proposed future development (Phase 3 and beyond).

This recommendation is an example of what was described earlier as a "placeholder", or a setting aside of land for a specific use to ensure that future development does not proceed without taking this use into account. Construction of these fields may or may not occur, but planning for this potential is prudent.

Construction would commence as needed, with the project phased in as funds became available. An alternative to funding solely by the College would be to share funding and use between the College and the community.

As the exact mix of potential athletic fields has yet to be determined, the level of planning at this point only indicates the most likely location for this project.

Warrick Student Center Addition and Reconfiguration

The second part of the proposed changes to the Warrick Student Center assumes the completion of the first group of recommended changes to this building and a demonstrated need for additional space. These recommendations are long term and will need review in future revisions of this Master Plan to determine their continued viability. These changes focus on three areas of the building:

Culinary Arts

The Culinary Arts kitchen is able to meet current space needs, but will be unable to accommodate program growth without either additional space or additional sections (a difficult proposition to market to working students). Note: The credit program was discontinued beginning fall 2022.

Student Lounge and Basement Storage

One issue that arose during the facilities walkthroughs is the difficulty physically handicapped students face in accessing the basement student lounge known as the "Cellar". Recently renovated, this space is an attractive, multipurpose lounge with television, vending, a pool table and informal seating. Unfortunately, the only access for the mobility impaired is through the freight elevator located off the loading dock.

An immediate, but temporary solution is to convert the elevator and lobby to a more passengeroriented and less freight-oriented space or, even better, to construct an exterior entrance.

Life Sciences Building Expansion/University Center

Although available space at the College is thought to be capable of accommodating projected program and enrollment growth for the next two to three years, it is prudent to plan locations where potential facility growth could occur.

The existing Life Sciences Building is the logical location to construct new classroom facilities for several reasons:

- Originally designed for expansion, the building is able to accommodate an addition in several locations.
- This building and the site immediately to the north are located closer to the majority of existing parking than any other potential sites on campus.
- Expansion of the building to the north would address one of the challenges laid out in this Master Plan to draw the campus buildings closer together through improved building interconnection. The proposed addition would considerably

reduce the outdoor travel distance between the Quad and the Welch Health Education Building.

The proposed addition to the Life Sciences Building consists of two parts, the first being development of a University Center. This facility type was considered in previous Master Plans as a way of addressing the conferencing needs of business and industry as well as programs needs of four-year institutions wishing closer affiliation with the College.

Many of the business and industry and conferencing needs will be met in the La-Z-Boy Center. Offices and classroom for university partners, however, are still unaddressed in the currently available facilities.

The proposed University Center would, in its program, include the following:

- Technology intensive, distance learning enabled general classroom space available to both College and university programs.
- Office space for university partner administration and faculty.
- A new, much more open entrance and lobby facing Raisinville Road serving both the University Center and the Life Sciences Building.

The second part of this addition is an unprogrammed space to the north of the University Center. Potential uses for this space include:

- Additional general classroom space for University Center or College programs, if warranted by growth in this area.
- A permanent, state-of-the-art space for IT Department and computer classrooms. This would allow the IT Department to relocate from the basement of the Campbell Academic Center into a space designed specifically for this use, eliminating power and HVAC problems that often arise when large computer systems are housed in older buildings. If a new technology building was to be constructed, it may be possible to relocate the IT offices to the vacated technology buildings, assuming those facilities would be renovated.

Long Range Priorities 2024

As part of the Master Planning process, ideas are considered and developed that, due to priorities and circumstances do not fit well into the scope of a five to ten-year plan. The following projects are examples of ideas that should be recorded for future planning efforts.

Warrick Student Center Renovations and Addition

The proposed plan is the renovate and add on to the building so all the student-focused activities are housed in the south end of the building which will become the main entrance into the building. With all the student-centered activities being housed in the south end adjacent to the Student Success Center in Founders Hall, the two buildings will have some synergy and better

provide for our students. Then, all administrative offices (back of house operations) will move to the north end.

Life Sciences Building Renovations, Phase III

The last phase of the renovations to this building includes the installation of the building-wide fire sprinkler system, renovations to the corridors and stairwells, and finally renovations to the staff offices on both the first and second floors creating secure office suites.

Whitman Center Renovations

The current plan is to finally correct a looming structural issue, and then renovate the building to become a business training/entrepreneurship center. This project may include a small addition or additions. Finally, the building's HVAC system will be converted to a geothermal style system similar to what we have on Main Campus.

Physical Plant Building Renovations

The scope of this project will include the construction of a newer and larger Physical Plant Grounds building. Then the existing Physical Plant will become the true center of the Facilities Department when the general maintenance team moves over so that the entire department will work out of one building. The planned renovations include new restrooms, office suite, additional storage, a new custodial crib, and a larger maintenance crib/work area.

Future Campus Expansion Zone

This is another placeholder, indicating the most likely location for as of yet unplanned campus facilities. Part of any development planning in this area should include additional parking, possibly in the format indicated on the site plan. Any detailed planning in this area should consider the potential for reorienting the main entry to campus, possibly locating it further north along Raisinville Road.

ARCHITECTURAL GUIDELINES

Architectural guidelines are an important part of a master plan, providing a design framework for future development. The goal is not to stifle creativity or the use of new materials or techniques, but to foster a harmony between existing and future facilities, thus avoiding a disjointed appearance that can easily occur on a campus built up over several decades.

Suggested architectural guidelines are as follows:

- New facilities should embrace sustainable design with the goal of meeting LEED certification.
- New buildings should complement the scale of existing buildings, maintaining a story limit of fewer than five stories.
- Building materials, although not needing to exactly match, should not look out of place with the dominant facing material of earthtoned brick.
- Designs should add character to the campus, but not create architecture that is disparate to the whole campus image. In other words, a "signature building" should be read as the signature of Monroe County Community College.
- Building should not have a readily apparent backside, but address on all facades the adjacent use and context, and be oriented to complement existing buildings and the surrounding landscape. This does not preclude well-defined building entries, which should use pedestrian-scaled detail and landscape to ensure easy identification.
- Interior finishes should be durable and low maintenance, but not overly hard and uninviting and strive for using renewable materials. Acoustics and lighting should be considered important in every space.
- Landscape materials should be a continuation of current plantings and should be as low maintenance as practical, emphasizing "broad brush strokes" of similar planting instead of numerous installations of mixed vegetation. Examples of groupings include trees evenly spaced along walks to emphasize pathways, trees planted as windbreaks, and selected vegetation planted to act as backdrops and to identify gathering spaces.
- Flowering annuals and other high-maintenance plants should be used minimally and only as accents to reduce maintenance requirements. Planting should emphasize indigenous vegetation over exotic species.
- Site lighting should be appropriately scaled for its use, emphasizing pedestrian- scaled fixtures wherever possible.
- Vehicular access roads should not cross pedestrian paths. These

walkways should be easily identifiable from a moving vehicle, possibly through a change in material, to help improve pedestrian safety.

MISSION: Monroe County Community College enriches lives in our community by providing opportunity through student-focused, affordable, quality higher education and other learning experiences. MCCC accomplishes its mission through: • Post-secondary pathways for students who plan to pursue further education • Occupational programs and certificates for students preparing for immediate employment upon completion • Curriculum that prepares students to effectively communicate, think critically, and be socially and culturally aware • Comprehensive student support services • A wealth of opportunities for intellectual, cultural, personal and career enhancement • Training and retraining to meet the needs of an evolving economy • Key partnerships to enhance educational services and opportunities VISION: Monroe County Community College will be recognized for our student-focused service, academic excellence, affordability, innovation, community responsiveness and student success.

2020 - 2025 Strategic Plan

GOALS, OBJECTIVES, CTICS AND TIMELINES

nroeccc.edu/strategic-plan

College faculty and staff made significant 0-25 Strategic Plan. The tactics completed ng the college's overall strategic goals of providing relevant and innovative education, ment.

Ategic planning activity include:

Jegree audit communication system, the offering oved course scheduling via regular efficiency .he blended class modality.

intal health services for students.

.cademic boot camp offerings, including the development

ential learning coordinator position to create, organize and ning opportunities.

experience process mapping, which resulted in the development Inship management system, a new pathway-specific framework ; study, a return-on-investment analysis of the college's programming, III., ovement of the student onboarding processes for initial college

scheduling/registration, a reimagining of academic advising processes and installation of campus-wide external wayfinding signage. • Improvement of the employee performance evaluation and professional development and training processes.

Regular updates on MCCC's progress on its Strategic Plan can be found at monroeccc.edu/strategic-plan.

PROVIDING SERVICES
TO ASSIST
STUDENTS WITH MENTAL HEALTH

In fall 2022, MCCC and Monroe Community Mental Health Authority officials announced a partnership to provide mental health screenings and referrals to students on MCCC's Main Campus.

- Coordination of mental health screening, referrals, crisis prevention and
- Linking to resources including counseling and therapy, health services, financial assistance, housing, social services, and other services

The services are provided by MCHMA and include:

161 = 734.242.7300 48182 = 734.847.0559

The partnership began as a pilot program providing services on campus two days a week. That was expanded to four days a week via funding from the American Rescue Plan Act's Higher Education Emergency Relief Fund. After-hours, on-call staff is available to respond to crises.

"Student access and success is a major goal in MCCC's 2020-25 Strategic Plan, and one of the main objectives we have been focusing on is improving academic and non-academic support services," said Dr. Kojo A. Quartey,

MCCC president.

STUDENT SUCCESS CENT

"A task force was formed to support and assist with college-wide and community assessment of mental health services and its implementation with on-going input. This was really the impetus for this innovative partnership to provide mental health services on campus for our students, and we are so grateful to MCMHA and the MCCC faculty and staff who made this happen."

HIGHLY REGARDED NURSING PROGRAM EARNS CONTINUING ACCREDITATION

MCCC's Associate of Applied Science in Nursing program, representing the Registered Nursing and Practical Nursing to Registered Nursing options, was granted continuing accreditation in 2022 for another eight years by the Accreditation Commission for Education in Nursing Board of Commissioners.

Dr. Kim Lindquist, dean of the Health Sciences Division and director of the nursing programs at MCCC, said that no areas needed development, and this speaks to the commitment of the nursing faculty and staff who put forward a curriculum that meets the highest of standards and who continue to work collaboratively to provide high-quality instruction to nursing students at MCCC, benefiting not only our students, but the entire county and beyond.

The Associate of Applied Science in Nursing program continues to be one of the most highly regarded programs in the region, based on NCLEX-RN first-time pass rates. It prepares graduates to function as beginning registered nurse clinicians and members of a health care team in the care of acutely and chronically ill individuals. Registered nurses are qualified for employment in structured practice settings, including acute care hospitals, extended care facilities, nursing homes, clinics and physicians' offices.

WalletHub

WALLETHUB RATES MCCC IN NATION'S **TOP 5 PERCENT**

WalletHub, a personal finance website, ranked MCCC in the top 5 percent of community colleges throughout the U.S. and No.1 in Michigan for 2022.

The college ranked 37 out of 667 community colleges nationwide.

To determine the best community colleges in the U.S. and in each state, WalletHub selected schools from a list of member institutions in the American Association of Community Colleges. The community colleges were rated according to cost and financing, education outcomes and career outcomes.

WalletHub revealed the ones that are doing it best in its annual list by comparing community colleges across 19 different benchmarks, such as cost of attendance, overall quality of programs, faculty strength, and graduation and retention rates.

Data used to create this ranking were collected from the National Center for Education Statistics, Campaign for Free College Tuition, U.S. Department of Education and Council for Community and Economic Research.

The full rankings for the Top 10 community colleges in Michigan in 2022 are below:

1. Monroe County Community College

2. Gogesic Community College

4. West Shore Community College 5. Kalamazoo Valley Community College

6. Kellogy Community College 7. Washtenaw Community College 3. Lansing Community College

St. Clair County Community 10. Montcalm Community Colle

MACHINING PROGRAM

In April, MCCC partnered with the Monroe County Intermediate School District to launch a dual-credit, two-semester Precision Machining Technology Program through which high school students can earn both high school career technology education credit and 12 college credits.

The program covers precision instruments and measurement, equipment setups and operations of machining processes. Lab projects and activities provide students the opportunity to apply and build upon many skills learned.

High school counselors registered the students through MCISD for this linked CTE program delivered entirely at MCCC and taught by a college instructor.

"Students who complete the program will be able to enter the workforce directly or continue to more advanced work at the college," said Denise Teague, director of career and technical education at MCISD.

The program offers students the opportunity to use computers to design parts; program and operate high-tech, computer-controlled manufacturing equipment; discover how all kinds of things are made (from design to production); explore careers in advanced manufacturing; learn engineering principles, and design software.

They can also obtain FANUC America's CNC Basic Operation, Programming and Setup industry credentials. FANUC America Corporation is the leading supplier of robots, Computer Numerical Control systems and factory automation.

MCCC SECURES \$4.7 MILLION IN GRANTS TO INCREASE STUDENT SUCCESS In 2022, MCCC was awarded \$4.7 million in grant funding IN 2022, NICCO was awarded \$4.7 million in grant funding for programming designed to enhance student success.

The funding comes from two grants:

• Title III: Strengthening Institutions Program: \$1,734,490. Title III is a federal grant that supports student engagement through improved, proactive student support services designed to increase retention and academic goal attainment. The MCCC Title III grant – dubbed the "Strengthening Institutions Program" – of \$1,734,490 is being allocated to improve student retention, success and the overall educational experience. MCCC has several programs in place – and some new programs that just started – using the funds from this grant. Most notably, these funds will assist with implementation of the aforementioned First Year Experience program, as well as focus on educational programs that increase English proficiency and student academic achievement in core academic subjects. It will also allow for the development of programs focused on improving instruction and assessment efforts, enhancement of the understanding and implementation of curricula, and the broadening of instruc-

MCCC CUTS RIBBON ON NEW VETERANS CENTER

Monroe County Community College officials cut the ceremonial ribbon in fall 2022 on a new Veterans Center. The new center is a place where veterans can come to study, relax and find fellowship with other veterans. It is located in Room 141 in the recently renovated Founders Hall, right off the Vajcner Academic Commons. The college worked with the Monroe Veterans of Foreign Wars to make the Veterans Center a reality. La-Z-Boy Inc.

Members from the Monroe VFW are on the MCCC campus regularly to meet with veterans to answer questions, offer help, refer them to resources for benefits, assist them with obtaining military documents and records, and more.

"Monroe County Community College is dedicated to supporting our military veterans, and we welcome all of our veterans to utilize this inviting new space and access the services of our partners at the Monroe VFW,"

MCCC was designated a Silver-level Michigan Veteran-Friendly school by the Michigan Veterans Affairs Agency for 2022-23. This program recognizes academic institutions committed to supporting the needs of veterans and military-connected students. This designation was based on the following criteria met by MCCC:

Academic performance tracking

- Identification of military/veteran status
- Application fee waiver On-campus veterans coordinator
- Veteran-specific website
- Veterans lounge

- Peer support/mentoring program Veteran-specific scholarships/grants
- Veteran graduation recognition
- Evaluation of military service for academic credit

The program, Bridges to College – Husky Hype-Up, was open to recent high school graduates who were new or current MCCC students who placed into developmental courses for Summer or Fall semester. It was made possible with financial assistance via a grant from the Michigan Community College Association.

Bridges to College - Husky Hype-Up was focused on student learning through supporting reading, writing and math skills; a hybrid model of instruction that included online and in-person learning, and activities to get students ready to become an MCCC Husky and help them build a sense of belonging at

In addition to improving their academic skills in core areas, students worked with college educational advocates to prepare for their higher education experience in the fall. They met with advisors, learned about financial aid opportunities and gained

career readiness skills.

MCCC provided all of the learning materials and supplies, participation, breakfast and lunch each in a ctivities, resource in the fall. MONROE COUNTY COMMUNITY COLLEGE

MCCC INDUCTS 25 STUDENTS INTO PHI THETA KAPPA **HONOR SOCIETY**

Dr. Scott Behrens

Emily Klyder

McCarty, II

MCCC held a ceremony in GRAM May to induct 25 students into the college's chapter of Phi Theta Kappa, the national honor society for community colleges. Founded in 1918, PTK is a scholarly fellowship that embraces the best students of community colleges in the state of Michigan, the nation and the world. Since it began PTK has nearly 3 million members.

MCCC's PTK chapter was chartered on January 14, 1969, with four members. Since that time, over 2000 MCCC students have become members of PTK. Students must have completed at least 12 hours of coursework toward an associate or bachelor's degree or at least 6 hours of coursework toward a certificate credential and have a cumulative 3.5 grade point average or higher.

РНІ ТНЕТА КАРРА – Tau Omicron Chapter

The inducted students included: Nadia Angel - Monroe Alexander Apetroaei - Monroe

Brooke Benitez - Monroe Kennedy Bowling - Carleton Alysse Cosens - Petersburg

Alyssa Cousino - Carleton Madison Cregar - Monroe

Jason Czewski - Monroe Brooke Giedlin - Newport

Jhalex Hernandez-Rodriguez - Monroe Ethan Hunt - Petersburg Jonathan Jablonski - Lambertville

FOR IMMEDIATE RELEASE

PREPARING FOR THE FUTURE OF THE NUCLEAR INDUSTRY

The Applied Sciences and Engineering Technology Division hosted an open house for its Nuclear Engineering Technology program in May that featured a keynote presentation by DTE Energy's senior vice president and chief nuclear officer, Peter Dietrich, who spoke about the future of the

Dietrich oversees nuclear operations at the DTE Energy's Fermi 2 nuclear power plant. As the chief nuclear energy industry. nuclear officer, Dietrich is responsible for overall operations at Fermi 2, with a strong commitment

At the open house, prospective students and visitors learned about MCCC's Nuclear Engineering Technology program, careers in the field and nuclear energy's role – now and in the future – in electricity production in the U.S. and the region. MCCC and DTE Energy partnered to create the program 12 years ago. The program was established in response to increasing demand for highly skilled professionals in the nuclear power industry in the region, including at Fermi 2.

"We use a learning approach that emphasizes both theory and hands-on skills to work in the technical environment of the nuclear industry," said Martin Dubois, associate professor of mechanical engineering technology at MCCC and instructional lead for the NUET program. "DTE employees were instrumental in creating the curriculum for the program and several instructors from DTE provide most of the direct instruction."

Graduates of the program are prepared for entry-level employment as electrical technicians, instrumentation and control technicians and mechanical technicians in the nuclear power industry.

MCCC, STATE POLICE HOST LAW ENFORCEMENT CAREER ACADEMY

The Criminal Justice program at MCCC and the Michigan State Police teamed up to host a Monroe County Law Enforcement Career Academy in June for individuals aged 17-21.

The academy provided participants with the opportunity to experience the criminal justice system from the perspective of a police recruit and explore if a career as a police officer, deputy sheriff or state trooper is for them.

Participants were mentored by Michigan State Police troopers and officers from other local agencies.

They learned what it is like to be a law enforcement officer by getting hands-on experience through activities like moderate physical fitness, patrol activities, first aid and CPR training, defensive tactics and crime scene investigation.

MCCC's Criminal Justice and Law pathway options prepare students for challenging careers in law enforcement, corrections, security and other criminal justice or law fields. Students in the pathway examine the history and philosophy of criminal justice; the organization, management and operation of modern criminal justice agencies; the laws impacting criminal justice function, and more.

As we reflect on another year, we want to express our heartfelt gratitude for the generous support As we relied on another year, we want to express our neartien grantude for the generous support of our donors. We know that the meaning of "normal" has changed for many of us. While some of our old routines have resumed, many students still face significant challenges that affect their academic success and well-being. Your donations made a tremendous difference in their lives and in our community. While much is different, one constant remains: we are unwaveringly student-focused in everything we do, always. In this annual report, we share some of the

Our students confront many barriers and difficulties in pursuing their education, such as homelessness, hunger, utility shutoffs, transportation issues, and more. Through Project Persist, highlights and achievements from the past year. funded by our Building Bridges of Hope campaign, we have helped our students recover and overcome these obstacles so they can focus on their studies. We have reset our campus to provide more collaborative spaces and classrooms infused with technology to meet the learning needs of today's students. We have fostered a culture of inclusivity where all students feel welcomed and valued at MCCC. Moreover, we have offered new programs, such as free financial literacy courses, to help our students become more resilient and prepared for the future.

We are proud of the remarkable achievements and successes that we have witnessed thanks to your steadfast support and commitment. Below are some noteworthy highlights of the past your steadiest support and commitment, below are some noteworthy highlights of the past year that illustrate how our donors have empowered us to fulfill our mission of enhancing the educational and cultural experience of our students and community:

- Launched the Building a Bridge of Hope campaign, raising over \$100,000 to support instructional programs, scholarships and emergency support services for MCCC's most vulnerable students. • Made available over \$350,000 in scholarships, helping 121 deserving students pursue their
- Partnered with local businesses and community organizations to address the critical needs

2023 ANNUAL FUND

Strategic Innovation Fund -Creating a Safer Campus Environment

The Foundation's Strategic Innovation Fund formally aligns with the College's strategic goals to provide grants that improve mission connectivity and spur innovative thinking and acting on campus. The \$16,000 inaugural grant from the Strategic Innovation Fund allowed for the creation of a Violence Prevention and Threat Management Training Video in response to growing concerns about the incidents of targeted violence that have occurred at schools and colleges around the state and the nation. The video is a valuable training resource available 🚥 😕 YouTube 🛟

to all faculty, students, contractors, support staff and stakeholders who want to understand MCCC prevention resources and safety procedures.

selected by the MCCC Board of Trustees as the 2022 Supporter of the Year. Victor and his wife Bonnie have been donors to The Foundation every year since its inception in

1999. The Bellestri family has supported capital campaigns with major gifts recognized by the naming of the La-Z-Boy Center Main Entry Vestibule, Career Technology Center Internet Café and most recently the endowment of a scholarship dedicated to assist students facing a financial emergency. Victor distinguished himself by more than financial generosity alone. He joined The Foundation Board of Directors as both an inaugural director and the board's first elected treasurer, and rose to lead The Foundation as chair in 2017, becoming only the second person to lead the board of directors. His tenure as chair included some of the most challenging moments in the college's history, and yet in the face of adversity he represents everything a chair should be: supportive, visionary, flexible and capable, and through his empowering leadership The Foundation thrived and grew.

The Excellence and Innovation Award was established to recognize an MCCC faculty or staff member each year who excelled in service to students by creating or adapting an innovative program on campus. In addition to an award, the recipient receives \$2,500 to support their program. The campus community was invited to nominate an individual to support their program. The campus committee selected Dr. Quri Wygonik as the for this award, and the Grants Program Committee selected Dr. Quri Wygonik as the

inaugural recipient. According to the nomination:

\$350,000

important work she can do at MCCC by providing and sharing her expertise as support to help students turn their ideas into fruition. Using her expertise to help students develop a project which addresses a student need not being addressed within the community propels MCCC jorward by demonstrating ere community resources are not able to fulfill."

Scholarships - 2015-2024

\$97,650 \$99,927 \$107,018 \$107,452 \$117,815 \$153,750 \$179,100 \$219,250 \$227,300 \$218,800 \$93,900 \$116,930 \$125,527 \$111,063 \$108,513

Four new endowed scholarships were established in 2022-2023. This year the Board of Directors voted to amend Policy 3.02 to increase the minimum required to establish an endowment from \$20,000 to \$25,000. Once endowed, the funds are pooled and invested according to The Foundation's investment policies. The Foundation now has 77 endowed scholarships. The new endowed scholarships are:

- Hector and Pauline (Elsie) LeBrun Family Scholarship ■ Donna Brett Memorial Scholarship
- Dannielle Lambert Memorial Scholarship
- Mieden Farms Endowed Agriculture Scholarship

CULTURAL AND COMMUNITY OUTREACH Whispers on the 41st Latitude

Generously funded with a grant from The Foundation's Cultural Enrichment Endowment, "Whispers on the 41st Latitude" was a collaborative community art project launched in the fall of 2022. International visiting artist Beatrix Reinhardt led a month-long pop-up artist workshop, which also featured an auditory accompaniment composed by Dr. Gordon Marsh. Whispers introduced participants to the early photographic method of cyanotype, a photographic printing process invented by the astronomer and scientist Sir John Herschel in 1842 using sunlight. Individual pieces were scanned and returned to community members, and the collective art installation was dedicated during a community event and now resides in the soaring West Stairwell and Student Commons Area of the Campbell Academic Center.

Providing Holistic, Intrusive and Proactive Support **ELIMINATING BARRIERS**-

This past year, The Foundation received the single largest request for emergency support for students in our history, ultimately awarding over \$33,000 in emergency support. The Project Persist initiative has provided a holistic, intrusive and proactive approach that has helped students address food insecurity, avoid evictions and utility shutoffs, afford car repairs, and persevere through homelessness. In partnership with financial aid and the MCCC Student Success Center, numerous students crossed the stage during the 2023 commencement ceremony because The Foundation eliminated barriers that otherwise would have forced them to drop and

Giving to The Foundation

Listed here are the individuals, corporations and organizations who have given annual gifts to The Foundation at Monroe County Community College between July 1, 2022 and June 30, 2023.

All gifts are recognized for this specific financial year in the appropriate giving level. Cumulative gifts – a total of all gifts given over time - are recognized separately according to giving level, beginning with the Trustee's Society.

We are pleased to recognize the support of each of our donors. We have made a great effort to ensure the accuracy of this list; therefore, we regret any omissions or errors. Please notify us in writing of any concerns.

Revenues and Expenditures* Fiscal Year Ended June 30, 2023

The Foundation at MCCC*

Fiscal Year Ended June 30, 202

DURING THE FISCAL YEAR ENDED JUNE 30, 2023

We received in-kind contributions for administrative services from MCCC and other in-kind support of	\$336,400
Special event revenues of	\$24,074
Investment gains of	\$778,868
We received contributions totaling	\$360,960

Resulted in new net assets at June 30, 2023	\$10 252 827
When combined with our net assets at June 30, 2022 of	\$9,646,078
Resulting in a total net asset increase of	\$606,749
Which resulted in total expenditures of	(\$893,553)
And had other expenses of	(\$3,966)
And had administrative and fund raising expenses of	(\$336,400)
We distributed to MCCC for scholarships and program funds	(\$553,187)

Our net assets, therefore, as of June 30, 2023 were	\$10.252.827
Our total liabilities as of June 30, 2023 were	(\$49,387)
Our total assets as of June 30, 2023 were	\$10,302,214
Accounts and pledges receivable of	\$645,965
Investments of	\$8,601,935
Cash of	\$1,054,314
The June 30, 2023 net assets are represented by	

Monroe County Community College is accredited by the Higher Learning Commission. For more information, visit www.hlcommission.org or call 800-621-7440.

Monroe County Community College is an equal opportunity institution and adheres to a policy that no qualified person shall be discriminated against because of race, color, religion, national origin or ancestry, age, gender, marital status, disability, genetic information, sexual orientation, gender identity/expression, height, weight or veteran's status in any program or activity for which it is responsible.

The college's Equal Opportunity Officer and Title IX and Section 504/ADA Coordinator and Compliance Officer for discrimination and sexual harassment is the Director of Human Resources, Monroe County Community College, 1555 S. Raisinville Road, Monroe, MI 48161, phone 734-384-4245.

In Memoriam

Dr. David Nixon

1939-2023

The MCCC community was deeply saddened by the passing of President Emeritus Dr. David E. Nixon on January 18, 2023.

Nixon, who served as MCCC's president from 2003-2013, was a visionary leader who dramatically expanded the level of support and awareness of the college's mission and educational opportunities for students and citizens.

While president, Nixon often shared the talents he gleaned as a professional broadcaster and communicator – his chosen career field prior to higher education. He served as official master of ceremonies at dozens of significant community milestones in Monroe County, such as the dedication of River Raisin National Battlefield Park and the

River Raisin Heritage Trail. But, more than a polished public communicator, he served in a critical leadership capacity on all of those major community projects.

Upon his retirement in 2013, Nixon expressed his gratitude for the contributions of MCCC's employees and appreciation for the opportunity given to him

by the Board to serve as MCCC's fourth president.

"MCCC's faculty and staff persisted in academic excellence, developing new jobs and career programs [and] expanding community partnerships that reach beyond geographic boundaries," he said, adding that he was profoundly appreciative for "the opportunity to lead, learn and grow in a community of hard working people and generous donors who helped build campus landmarks like the La-Z-Boy Center/Meyer Theater and the new state-of-the-art Career Technology Center for the job seekers of the 21st Century."

Nixon left a legacy of leadership that propelled MCCC to reach new levels of service to the community by embracing many new partnerships that expanded educational opportunities for MCCC students, all during extremely difficult economic times. He was energetic, passionate, entrepreneurial, thoughtful and so very student-focused. MCCC is forever grateful for his dedication to the community and the college and the indelible impression he left on all of us.

ASSOCIATED RISK MANAGEMENT, INC. 39111 W. SIX MILE ROAD LIVONIA, MICHIGAN 48152

TO WHOM IT MAY CONCERN:

WE SUBMIT HEREWITH OUR CERTIFIED APPRAISAL OF ASSETS BELONGING TO MONROE COUNTY COMMUNITY COLLEGE, 1555 SOUTH RAISINVILLE ROAD, MONROE, MICHIGAN. THIS APPRAISAL INCLUDES BUILDINGS ONLY.

THIS APPRAISAL IS ARRANGED UNDER SEVERAL PROPERTY CLASSIFICATIONS AND FURNISHES AN UNBIASED STATEMENT OF VALUES.

THE "REPLACEMENT VALUE NEW" THE COST THAT WOULD BE INCURRED IN ACQUIRING AN EQUALLY DESIRABLE SUBSTITUTE FOR PROPERTY, WHICH IS DETERMINED IN ACCORDANCE WITH MARKET PRICES PREVAILING AT THE DATE OF THIS APPRAISAL AND REPRESENTS THE COST TO REPLACE NEW, THE PROPERTY IN LIKE KIND.

THE "SOUND OR INSURABLE VALUE" INDICATING PRESENT PHYSICAL SOUND VALUES OF THE PROPERTY OF AN OPERATING ENTERPRISE BASED UPON THE COST OF REPRODUCTION NEW, LESS AN ALLOWANCE FOR ACCRUED DEPRECIATION RESULTING FROM ITS AGE, CONDITION AND DEGREE OF OBSOLESCENCE.

A SUMMARY IMMEDIATELY FOLLOWING THIS LETTER SHOWS THE REPLACEMENT VALUE NEW AND SOUND INSURABLE VALUES SEGREGATED ACCORDING TO ACCOUNTS ESTABLISHED BY OUR COMPANY.

IN ORDER THAT YOU MAY FULLY UNDERSTAND THE SERVICES WE HAVE RENDERED, WE PRESENT THE IMPORTANT POINTS AS FOLLOWS:

FIRST: ALL PHYSICAL CHANGES OF THEIR PROPERTY (ADDITIONS, REMOVALS, REPLACEMENTS, ALTERATIONS AND CHANGES IN LOCATION) AS FURNISHED BY THEIR MANAGERIAL STAFF AND/OR RECORDS HAVE BEEN INCORPORATED IN THE APPRAISAL.

SECOND: WE HAVE CHECKED AND VERIFIED BY <u>PERSONAL INVESTIGATION</u> ALL CHANGES SUBMITTED BY THEIR STAFF.

THIRD: WITH THE INFORMATION OBTAINED FROM THEIR RECORDS, WE HAVE DEDUCTED IN DOLLARS ALL RETIREMENTS AND ABANDONMENTS THAT HAVE TRANSPIRED SINCE THE DATE OF THEIR LAST APPRAISAL.

ECONOMIC CONDITIONS AFFECTING THE CONSTRUCTION, EQUIPMENT AND LABOR MARKETS, VALUES SHOWN ARE SUBJECT TO ADJUSTMENT, AS REQUIRED, AFTER THE DATE SPECIFIED IN CERTIFICATES.

WE HAVE NOT EXAMINED THE LEGAL TITLES OF PROPERTY; THEREFORE WE DO NOT ASSUME RESPONSIBILITY REGARDING THE OWNERSHIP OF PROPERTY IN THIS APPRAISAL.

REAL ESTATE - BUILDING - MONROE COUNTY COMMUNITY COLLEGE

NAME OF BUILDING: WARRICK CENTER

QUALITY OF CONSTRUCTION: GOOD

TYPE OF BUILDING: CLASS C

NO. OF STORIES: ONE WITH BASEMENT

DIMENSIONS: BASEMENT - 24,186 SQUARE FEET 1ST FLOOR- 49,957 SQUARE FEET

TOTAL SQUARE FEET = 74,143

BASEMENT:

FRAME - REINFORCED CONCRETE

FLOORS - CONCRETE

FLOOR COVERINGS - VINYL TILE, CARPET

EXTERIOR WALLS - REINFORCED CONCRETE

CEILINGS - SUSPENDED ACOUSTICAL TILE

INTERIOR WALLS - MASONRY PARTITIONS

FOUNDATION: CONCRETE

SUPERSTRUCTURE:

FRAME - STEEL

FLOORS - CONCRETE ON GROUND; PRECAST CONCRETE DECK

FLOOR COVERINGS - VINYL TILE; CARPET; CERAMIC TILE; TERRAZZO; QUARRY TILE

CEILINGS - SUSPENDED ACOUSTICAL TILE; ACOUSTICAL TILE; GYPSUM BOARD PAINTED

ROOF STRUCTURE - STEEL JOISTS, METAL DECK

- STEEL JOISTS, GYPSUM ON FORM BOARD
- WALKWAY COVER, 1/4" LIGHT GRAY ACRYLIC SHEETS, ALUMINUM FRAME

ROOF COVER - STANDING SEAM METAL ROOF WITH INSULATION; MODIFIED BITUMEN, SINGLE PLY, WITH INSULATION

INTERIOR CONSTRUCTION - MASONRY PARTITIONS

- METAL FRAME PARTITIONS
- DRYWALL PARTITIONS IN ADDITION AND RENOVATED OFFICES

REAL ESTATE - BUILDING - MONROE COUNTY COMMUNITY COLLEGE

REAL ESTATE - BUILDING - MONROE COUNTY COMMUNITY COLLEGE

NAME OF BUILDING: CAREER TECHNOLOGY CENTER

TYPE OF BUILDING: CLASS C

NO. OF STORIES: ONE

TOTAL SQUARE FEET - 60,377

FOUNDATION: CONCRETE

SUPERSTRUCTURE:

FRAME - STEEL

FLOORS - CONCRETE ON GROUND 4"-6" OVER 2X4' PERIMETER INSULATION, VAPOR BARRIER

- 3" CONCRETE TOPPING ON PRECAST HOLLOW CORE PLANKS

FLOOR COVERINGS - SEALED CONCRETE, CARPORT, WOOD TRIM

CEILINGS - SUSPENDED ACOUSTICAL TILE, GYPSUM BOARD, ACOUSTIC CLOUDS

ROOF STRUCTURE - STEEL JOISTS, METAL DECK

ROOF COVER - SINGLE PLYMEMBRANE ROOF SYSTEM OVER INSULATION

- STANDING SEAM METAL WITH SNOW GUARDS OVER SELF PEDHERING UNDERLAYMENT OVERINSULATION, METAL DECK OVER CURVED STEEL BEAM

INTERIOR CONSTRUCTION - MASONRY AND FRAME PARTITIONS

BUILT-IN FIXTURES -

LOBBY - 3 - DISPLAY CASES, 10' WIDE X 6' 10" HEIGHT

ROOM 115 - 1 - BASE CABINET, LAMINATE WITH SINK, 9'

1 - BASE CABINET, LAMINATE, 4.5'

1 - BASE CABINET, LAMINATE, 4.5'

1 - WALL CABINET, LAMINATE, 18'

ROOM 116 - 1 - INSTRUCTORS BENCH, WOOD, 9'

1 - BENCH, WOOD, 2.5'

1 - WALL CABINET, WOOD, 6'

1 - MOTOR BENCH, 3.5'

4 - TALL CABINETS, WOOD, 3' WIDE

1 - TALL CABINET, WOOD, 4' WIDE

6 - STUDENT WORK STATIONS, WOOD, EPOXY RESIN TOP, 9'

Purpose of the Study

This Facilities Assessment and Deferred Maintenance Capital Planning Study, developed through a combination of personnel interviews, facility walk-throughs and building system analysis, was performed to accomplish the following objectives:

- Provide an inventory of the College's facilities in a database format to be easily updated and maintained by Monroe County Community College personnel and allow for quick access to facilities information.
- Determine the general condition of the facilities owned by Monroe County Community College and provide the data in a concise format, allowing quick determination of the current replacement value and condition of each facility.
- Determine a Facilities Condition Index (FCI) for each assessed building and an aggregate FCI for all facilities at Monroe County Community College. The FCI is a benchmark index that rates the condition of existing College buildings and used by facilities managers nationwide to quantify and prioritize deferred maintenance projects for capital planning purposes.
- Assist Monroe County Community College in meeting its Mission Statement, Strategic Goals, and Institutional Vision through timely maintenance of the physical backbone of the College – the buildings of MCCC.

Glossary

Vital Statistics

Basic building information—building use types (classroom, library, and administration), year built, building area in square feet, and number of floors.

Observation Highlights

This is a focused list of field observations, highlighting major repair/replacement items and recently completed work. For a more complete list of field observations, see the individual building data sheets in the appendix.

Current Replacement Value (CRV)

The CRV is the cost to construct a typical replacement building in today's dollars. The figure is based on the square footage of the current structure and the estimated current construction cost for that type of structure. Since some buildings are conglomerations of different uses (i.e.: classroom, library, administration) the CRV is based on estimated proportions of use types in each building. By the nature of the calculations and square foot construction costs, the current replacement value has a ±20% margin of error and will increase annually due to inflation.

Priority Issues/One Year Deferred Maintenance Backlog (1YR DMB)

The 1YR DMB is the value of projects that is deferred and requiring completion in order to maintain facilities and related infrastructure for safe use. The 1YR DMB amounts shown are for items requiring immediate attention to fix critical problems. A long-term investment strategy should also include items that require repair or replacement within 5 years, thus avoiding the increased repair costs resulting from deferred repairs (i.e. leaky roof damaging interior finishes).

Facilities Condition Index (FCI)

Simply put, the FCI is the current DMB divided by the CRV. The resulting number is compared against nationally accepted standards and used to determine the condition of the building, campus or college.

The Association of Higher Education Officers Facilities (APPA) recommends that the FCI for any given building should not exceed 5% for the building to be considered in "Good" condition. The rating of "Fair" indicates that the building requires some attention to bring it up to standard, with some problems areas potentially requiring immediate The rating of "Poor" attention. indicates that the building needs urgent attention to prevent the existing problems from affecting other

building systems and compounding future repair costs.

The APPA FCI Ratings, indicating the general condition of the building, are shown here along with the corresponding "traffic signals" that give a quick visual indication of the FCI rating.

Priority Issues/One Year DMB Excess

This represents the amount the DMB exceeds the APPA benchmark of a building with a 5% FCI – essentially the dollar amount to be spent immediately to reduce the DMB to attain the APPA rating of "Good". In situations where a building is in better than "Good" condition (FCI<5%), the one year DMB excess is shown as zero.

For example, if a building has a CRV of \$1,000,000 and an FCI of 10%, the DMB would be \$100,000. This would leave a DMB excess of \$50,000 – the amount to be spent to reduce the FCI to within the APPA 5% benchmark

Zero-Five Year Cumulative Deferred Maintenance Backlog (5YR DMB)

Similar to the One Year DMB, the Five Year DMB represents the total value of projects that will require attention within the next five years, including those that fall under the One Year DMB. This value is included to help determine the investment required over the next five years to repair and/or replace problem items before they become critical.

The Zero-Five Year DMB is often more telling of a buildings' condition than the One Year DMB, since the first year number focuses primarily on life safety, code compliance and collateral damage. Most maintenance issues are not so critical as to fall into this category but often become so within 5 years.

Looking at the previous example, if the building condition survey indicated an additional \$250,000 in repairs from years 1-5, then the 0-5 Year DMB would total \$350,000 (including \$100,000 from the first year).

Zero-Five Year DMB Excess

Similar to the One Year DMB Excess value, this amount represents the investment to bring the DMB in line with the APPA benchmark of 5% of the Current Replacement Value. In situations where a building is in better than "Good" condition – a bit more difficult over a five year span, the five year DMB excess is shown as zero.

This number is a good starting point for determining budgets – it allows the college to see what to spend to bring buildings into the APPA "Good" range – with the understanding that complete elimination of the Deferred Maintenance Backlog is not a likely scenario.

2

DMB Equilibrium (Annual cost to maintain current DMB)

This is the dollar amount to be invested annually to keep the FCI (and DMB) from deteriorating – regardless of the current condition of the building.

Reusing the previous example, the amount required to maintain the FCI at current levels would be \$20,000 annually (2% of \$1,000,000).

The number is based on a nationally accepted rule of 2% of the CRV and assumes that building components have a 50- year renewal cycle and depreciate along a straight line. The assumptions were made to simplify calculations; in reality, building components DO NOT expire according to straight-line depreciation, and most components will require replacement within 30-40 years (excluding structure and foundation).

To restate – this annual investment will only maintain the existing FCI and do little or nothing to reduce any existing backlog.

Generic Example of how the aforementioned data appears in this report

3

Building Use Types

The tables below shows building Use Types and their respective current construction costs per square foot used to develop this database. As some of these use types are not found on all campuses, not all Use Types are used in the database. These costs, based on regionally weighted, preliminary construction cost data provided by contractors, historical cost databases and data from RS Means and Marshall and Swift, are for typical college and university buildings.

Use Type	Cost/SF
Administration	\$175
Athletic	\$190
Auditorium	\$290
Boiler House	\$215
Classroom	\$185
Kitchen/Food Service	205
Lab	\$245
Library	\$190
Storage/Maintenance	\$115
Student Union	175
Vocational Lab	175

Building Components

The table below shows the building components used in the report. These are the basic components having a major influence on the replacement value of a building. The buildings were evaluated during walkthroughs with the facility personnel to determine how much of each component made up the CRV. It was then determined what percentage of each component required repair or replacement within one year, five years, ten years, and beyond. This data is used to determine the investment required to reduce the current and future deferred maintenance backlog.

Category	Component Name
Structure	Structure
Envelope	Roof
	Glazing
	Cladding
Mechanical	HVAC Equipment
	Plumbing
Electrical	Primary/Secondary
	Distribution
	Lighting
	Voice/Data
Finishes	Ceilings
	Walls
	Doors
	Floors
Safety/Code	Building, Fire, ADA
Other	Site Repair, Ext. Light, etc

Deferred Maintenance Backlog

A Brief Background

The problem of deferred maintenance at colleges and universities has been studied and better understood over the last decade. From an article by Dan Hounsell, in the magazine Maintenance Solutions, discussing how universities are addressing the issue of deferred maintenance:

"Maintenance management professionals, who once seemed to be one of the few parties giving serious thought to the issue, now have been joined in the debate by growing numbers of sympathetic voters and far-sighted facility decision makers."

The Association of Higher Education Facilities Officers (APPA) concluded in a 1995 report titled "A Foundation to Uphold: A Preliminary Report" that the national backlog of deferred maintenance at colleges and universities exceeds \$26 billion, up 27 percent from estimates made in a similar report from 1988.

\$5.7 billion of that \$26 billion backlog is classified as "urgent deferred maintenance" – projects that require immediate attention and that will cost far more if they are not completed within a year. Although spending this sum will eliminate current urgent needs, in only a few years there will be a new roster of items to replace them – if future budget planning is not undertaken. According to the APPA report, the current backlog "represents a threat to the capability of higher education facilities to support college and university missions."

Other conclusions from the report include:

- More than 50 percent of all college types reported that deferred maintenance increased or stayed the same since 1988; only 25 percent reported decreases.
- 20 percent of the colleges in the study accounted for nearly 60 percent of the accumulated deferred maintenance.

- Public colleges typically have a greater deferred maintenance backlog than private universities, with 78 percent of the public research universities reporting an increase in deferred maintenance backlogs.
- By assuming that deferred maintenance of the infrastructure site repairs, road and parking lot maintenance, exterior lighting, etc. – was not included in the figures provided by the campuses in the study, the estimated cost to eliminate accumulated deferred maintenance increases to \$32.5 billion – with urgent needs increasing to \$7.1 billion.
- When senior school administrators made deferred maintenance a priority, the institution made progress in reducing its backlog.

The most important point to remember is that even if universities and colleges spend these amounts, this will only eliminate the <u>existing</u> deferred maintenance backlog. There needs to be a coordinated, funded plan put into place at colleges and universities to maintain the condition of the facilities once they have been repaired – or time will again take its toll.

6

Vital Statistics:

This updated assessment for Monroe County Community College (MCCC), focuses on 18 buildings totaling almost 390,000 square feet at the Monroe main campus, Whitman Center campus, and Hurd Road Center campus. The estimated Current Replacement Value for these facilities is approximately \$80.7 million.

The date of completion for the assessed facilities ranges from 1968 to 2004. While almost all mission critical buildings are currently in good condition, the buildings contributing most significantly to overall long-term deferred maintenance and end-of-life issues are the original academic buildings. Factors contributing to the condition of these buildings include the age and condition of plumbing and mechanical systems, typical wear and tear on high-use items such as doors, and building use.

By APPA standards, short-term critical issues (those considered critical to operation, safety-related or having potential for collateral damage) are minimal. This situation is typical for most institutions, but MCCC has done a particularly good job containing these issues. Few items of great cost are likely to fail or significantly impact building viability within the next year. When looking forward five years, however, long-term conditions for several buildings quickly become rated fair to poor. This is also common, as over this longer timeframe, systems in older buildings become critical due to age or failure. The significantly higher five-year Facility Condition Index (FCI) for these buildings is predictive of these failures and based on two assumptions: that everything anticipated to fail will do so, and nothing is invested to correct the problem proactively.

Issues found across campus include:

 Several roofs are near the middle of their service life, with leaks and other issues typical for roofs of this age. A roof condition assessment was performed by Professional Services Inc. prior to this assessment.

- HVAC systems near or past the end of their service life indicate a need to budget for replacement in the next few years. Valves on some systems are also failing.
- Original window systems are showing air infiltration, failed hardware, and deteriorated glazing compound.
- Doors are past the end of their service life on older buildings, especially exterior main entrance doors. Hardware is failing, thresholds are deteriorating, and hinges are wearing out. All require increasing levels of maintenance.
- ADA compliance issues in older buildings include knob-style door hardware, non-compliant dimensions of entrance vestibules, and some toilet rooms limited by available space. To meet current accessibility codes, any significant renovations will trigger modifications to meet current ADA requirements.

Summary:

The jump from the "Priority Issues FCI" of 1.6% to the long-term "0-5 Year FCI" of 7.3% is typical for older campuses and, at a campus the size of MCCC, represents a sizeable capital investment, even to maintain conditions in their current state. These numbers also represent an increase from the 2008 Assessment, primarily driven by long-term issues that are becoming more urgent.

This potential FCI increase, while driven by many buildings, is most attributed to a few older facilities facing equipment end-of-life issues, including significant HVAC equipment in the Physical Plant Building. As an example, the 5-year FCI numbers for the CLRC and the two Technology Buildings contribute almost 50 percent of the total deferred maintenance backlog although they comprise less than 30 percent of the College's square footage.

As stated in the Deferred Maintenance Backlog background, the investment solution has two facets:

- The funds needed for immediate repair projects repairs and/or replacements that will prevent further deterioration of the buildings and infrastructure and help the college stay ahead of life-safety concerns.
- The funds required to maintain and/or improve the condition of the buildings. These funds need to be budgeted in advance to

The following pages of this report break this data down into a building-by-building review to clarify where attention is most needed.

Recommendations:

Short Term Recommendation:

Monroe County Community College should review the items that comprise the One Year Deferred Maintenance Backlog of approximately \$1,258,000 and address those affecting life/safety issues, those having the greatest potential for future damage to other building components, and those that are code compliance issues.

In addition to the first year issues that will carry over into the next five years, the College should also immediately begin budgeting for the projected \$5.89 million in deferred maintenance issues over the next five years and evaluate alternative solutions where the cost of repairs outweighs the benefits.

Long Term Recommendation:

The College should budget as much as possible of the industry recommended "2% of CRV" maintenance fund of \$1.6 million annually for ongoing repairs to maintain the buildings once they are upgraded. While this benchmark is difficult for most institutions to attain, the goal of setting aside as close to this amount annually as possible is to ensure the buildings remain in stable condition and that funds are available in advance when systems reach the end of their lives.

*Note: The DMB Excess value listed on the summary table to the right is the sum of all individual building excess values, not calculated at the campus-wide level. Therefore, a College DMB Excess number is present even though the College-wide FCI number is well below the APPA 5% threshold value.

Monroe County Community College

Campus Condition Photos

Campus Condition Examples

The following images are indicative of some of the deferred maintenance issues present across the campus.

Whitman Center – breach in fire-rated ceiling assembly.

Whitman Center – water infiltration along exterior wall has caused deterioration of the plastic-laminated windowsills.

Whitman Center – settlement/heaving of exterior concrete slab (at main entrance) presents a tripping hazard.

Student Services/Administration - Aluminum entrance doors and hardware at end of life.

La-Z-Boy Center – It appears there is a void within the exterior aluminum, curtain wall assembly allowing the environment to enter the interior.

Health Education Building – Typical sealant joint is at end of life.

Physical Plant – Cooling tower and basins are near end of life.

Health Education Building – Daylighting controls for the Atrium would save energy.

Campbell Learning Resources Center

Use Type(s): Library, Classroom, Lab

Built: 1968

Area: 52,369 SF

Floors: 3

Observation Highlights:

- Moisture problem in basement in Room C-3 requires additional investigation and remediation.
- Professional Services Inc. (PSI) rates the roof condition as "generally fair to good, no current roof leaks were reported." Roof perimeter at the gravel stop edges was repaired in 2010.
- Windows (glazing and frames) on levels 1 and 2 are due for replacement. Some window units are fogged at the first floor.
- Minor amount of brick tuck-pointing required at north elevation.
 Sealant joints at fascia panel joints were replaced in 2010.
- Level 2 ductwork and selective ceiling replacement is scheduled for rework as part of 2009 classroom renovations.
- Chilled water valves are at end of life and due for replacement.
- Reduced voltage starter for 40HP fan motor is at end of life.
- Electrical Room areaway floor drain is either too small or partially plugged. Damage has occurred to ventilation dampers.
- PRV is needed for elevated City Water pressure issue.
- Domestic water piping will need epoxy lining or replacement.
- Wireless equipment is at end of life and requires replacement.
- Investigate and remediate why battery-backup for digital PBX is not connected and in use.
- Minor cracking observed in brick walls at main stairwell. Recommend monitoring condition.

させ Learning Resources **Monroe County Community College** Campbell

1 YEAR

Campbell Learning Resources Center

- Original exterior aluminum doors, frames, and hardware are nearing end of life.
- Stairwell doors are in poor condition and at end of life.
- Rear double doors at Learning Assistance Lab hinges damaged, doors stick, doors swing into corridor.

Student Services / Administration

Use Type(s): Kitchen/Food Service, Classroom, Student

Union, Administration

Built: 1968, additions in 1978, 1988

Area: 72,219 SF

Floors: 1

Observation Highlights:

- PSI rates the roof condition as "generally in fair condition." Minor leaking reported.
- Previous infrared images indicate areas of moisture within the insulation. Leaks at penetrations will require corrective action. Some repairs made in 2010.
- Original anodized aluminum window framing with non-insulated glazing not energy efficient.
- Sealant joints at fascia panel joints were replaced in 2010.
- Reheat control valves, isolation valves, and thermostats are at end of life and are due for replacement.
- Outside air damper for main air handler is not bolted to concrete wall.
- Galvanized piping throughout is near or at end of life. Assume replacement or epoxy lining within 10 years.
- PRV is needed for elevated City Water pressure issue.
- Wireless equipment is at end of life and requires replacement.
- Original exterior aluminum doors, frames, and hardware are nearing end of life.
- East entry concrete steps poorly constructed risers vary in height, treads are too shallow and uneven. Creates tripping hazard.
- Glass covered walkway between this and East Technology Building leaks in multiple locations. Repaired repeatedly, but steel rusting, paint peeling.

Observation Highlights:

- Foundation cracking was present along west end of the building.
 No evidence of further movement noted.
- PSI rates the roof condition as "generally in fair to good condition."
 Minor leaking reported. Minor roof repairs done in 2010.
- Walls in west stairwell in poor condition, interior walls in northeast corner chemistry labs on 2nd floor cracked. Condition stabilized several years ago, will require routine monitoring.
- Window system was replaced in 2010.
- Greenhouse window operators are non-functioning and are due for replacement.
- Sealant joints at fascia panel joints were replaced in 2010.
- Chilled water valves are at end of life and due for replacement.
- Reheat control valves, isolation valves, and thermostats are at end of life and are due for replacement.
- PRV is needed for elevated City Water pressure issue.
- Cold domestic water piping needs epoxy lining or replacement.
- Wireless equipment is at end of life and requires replacement.
- Interior door hardware at end of life and due for replacement. Approximately 50% of door knobs replaced with lever handles.
- Office carpet at end of life and due for replacement.

\$144,166

Health Education

Use Type(s): Athletic, Classroom, Lab

Built: 1997

Area: 50,700 SF

Floors: 1

Observation Highlights:

- Interior expansion joints are not continuous from floor to walls and present potential future problems
- PSI rates the roof condition as "generally in fair condition, several leaks were reported." Minor roof repairs done in 2010.
- Storefront curtain wall and second story windows (Clerestory) were replaced in 2009. Minor leaks still occur in system.
- Masonry veneer was apparently installed with insufficient expansion / movement control joints. As a result the building experienced some masonry failures. The installation of movement joints has addressed the problem. Some building control joints and some gaskets at the metal panels are at the end of their life.
- Noise problems with gymnasium air handling unit, system can't run at high speed when noise is a concern, causing space to be too hot.
- PRV is needed for elevated City Water pressure issue.
- A permanent solution to the Electrical Vault flooding issue is needed to remediate the problem.
- Daylighting control of the Atrium fluorescent fixtures should be considered for energy savings.
- Wireless equipment is at end of life and requires replacement.

Salt Storage

Use Type(s): Storage

Built: 1999

400 SF Area:

Floors: 1

Observation Highlights:

- Salt has pushed the rear wall of the building out of plane. Currently the wall is restrained using a series of wooden braces. Wall should be restored to plumb and level condition once the salt supply is emptied.
- No reported roofing problems. Roof evaluation was not included in PSI's roofing condition report. No visual defects were noted.
- Overhead door tracks and associated door hardware are failing due to the corrosive nature of the salt and are nearing end of useful life.
- No visual inspection of floor surface was possible.

1 YEAR

Monroe County Community College

La-Z-Boy Center

Use Type(s): Auditorium, Classroom, Administration

Built: 2004

Area: 53,329 SF

Floors: 1 with mechanical mezzanine & balcony

Observation Highlights:

- Coping metal at metal panel system does not properly slope back to the roof. A line of sealant was added to keep water from streaking the visible face of the metal panels. Condition should be carefully monitored for evidence of water infiltration into and behind the metal panel system
- PSI rates the roof condition as "generally in fair to good condition."
 Roof to wall transitions may need to be repaired as they are identified.
- Sealant where window frames abut metal panel system is failing and is due for replacement.
- Exterior soffit: Synthetic stucco on cementitious backer panels is cracking at panel joints.
- Exterior masonry joints are beginning to age and will require tuckpointing in the near future. Masonry expansion / control joint sealants are likewise nearing end of life and will require general repair and replacement. Slight efflorescence was returning in selected areas.
- IT Room H143 needs a door grille added to provide proper ventilation.
- PRV is needed for elevated City Water pressure issue.
- Wireless equipment is at end of life and requires replacement.

Whitman Center

Use Type(s): Lab, Classroom

Built: 1991

Area: 17,650 SF

Floors: 1

Observation Highlights:

- PSI rates the flat roof condition as "generally in fair to good condition" and the sloped roof is in "generally good condition." Flat roof over Main Entry is in generally poor condition.
- Plastic laminate windowsills are failing and due for replacement.
 Evidence of moisture infiltration at and around windows.
- Monitor moisture levels within CMU veneer masonry. Topical sealer may aid in limiting moisture infiltration and reduce evidence of moss/mildew on the north side of the building.
- IT closet near the Lobby requires ventilation to remove heat buildup.
- Repair 12" x 12" hole in closet fire-rated ceiling near Lobby.
- Repair small hole in Maintenance Room fire-rated wall near Lobby.
- Wireless equipment is at end of life and requires replacement.
- Corrections to cracking and moisture damage at Lobby were performed, recommend that condition is monitored. Isolation joints were installed to reduce the appearance of future cracking in some locations. This may prove to be a temporary correction.
- College has replaced fire alarm panel.
- Student Lounge Area exterior concrete slab joint material between sections needs replacing.

System	6	KV OT SYSTEM			IE CO DUUGEL TOI' IQUMQUUM C 10 Voore	system/Component Notes
- Cyotom	%	8	Immed. Priority 1	1-5 Years Priority 2	6-10 Years 11+ Yea	G by Stein/ Component Notice
Structure	20	\$1,958,601	0	2	5 9	B Description: Poured concrete basement with slab on grade foundation. Concrete frame with concrete masonry block infill.
						Priority 1: None observed / reported
						Priority 2: Moisture problem in basement (at room C-3) requires additional investigation and remediation
						2011: It was reported that problem in Room C-3 still exists, the problem in Room C-16 appears to have been corrected.
						2008: -Ongoing water / moisture infiltration through the foundation walls. The moisture appears to be the result of underground or hydrostatic sources; minimal leaking is associated with heavy rains. Efflorescence / evidence of moisture was specifically noted in the small theatre and within IT storage area. Problem is on-goingLimited masonry cracking observed at main stairwell. The fractures appear to be stabilized.
						Previous Comments: -Room C-3 leaked from cracks, room C-10 leaked at roof conductor exit. Inhouse team excavated, waterproofed and backfilled in 2001

90 Description:

Priority 1:

Provide City Water PRV for pressure issues.

Cold domestic water piping needs epoxy lining or replacement.

Priority 2:

No reported problems

2011:

PRV for city water pressure issue noted in 2008 is not installed.

Cold domestic water piping needs epoxy lining or replacement. HW is done.

2008:

-MCCC completed a test project in 2007 using Cura-flow process of physically cleaning fouled water lines and then lining the piping with a permanent epoxy lining. Process is considered to be a 30 year solution. If this installation proves successful, other buildings may be completed using the process.

-Public utility is running water to College at 80psi. Historically this has caused problems on campus. College has completed a program to install new pressure reducing backflow preventers to address pressure levels throughout campus.

-Ground water pumps are in constant use and require ongoing maintenance. One of the pump motors and backflow preventers have been recently replaced. MCCC maintains a gas-powered auxiliary pump for use during periods of electrical failure.

MAINTENANCE AND REPLACEMENT FUND

The Maintenance and Replacement Fund is used to account for major repairs and maintenance of College facilities.

At Monroe County Community College, the objective of this fund is to set aside and account for funds that will be necessary to meet the expenses of major plant maintenance and replacements as well as to provide a contingency to help assist in meeting certain physical plant emergencies that may arise. This fund may also be used as a source for inter-fund borrowing, as well as direct funding to other funds such as the Unexpended Plant Fund through Board approved transfers.

Other than some interest earned from its fund balance and a minor endowment distribution, the fund does not generate revenue. Since the establishment of the Maintenance and Replacement Fund in the 1980-1981 fiscal year, its primary source of funding has been transfers from the College's General Fund.

The table below lists the projects planned for FY 2024-2025.

2024-2025 Projects

	Project	2024-25 Budget

MILLAGE MAINTENANCE AND IMPROVEMENT FUND

The Millage Maintenance and Improvement Fund is used to account for maintenance and improvement projects funded through the 5-Year Maintenance and Improvement Millage.

The objectives of this fund are: 1) to account for revenue received from the 5-year .85 mill property tax levy approved by the Monroe County voters on November 8, 2016, and renewed on November 3, 2020; and 2) record the expenses for the maintenance and improvement projects planned.

The projects proposed for FY 2024-2025 are listed below for a total cost of \$6,350,636.

To show FY funds received to be earmarked for Welch HEB, as partial funding.

5-Year Maintenance and Improvement Millage

Protecting Our College

On November 8, 2016, Monroe County voters approved a .85 mill property tax levy for 5 years (2016-2020). On November 3, 2020, the Monroe County voters approved a zero-increase renewal of the Maintenance and Improvement Millage for an additional 5 years (2021-2025). The money is being used for critical maintenance and improvement projects, protecting the community's more than 50-year investment in the College's buildings and infrastructure.

To address the needs of campus, we fund projects according to priorities below:

- Safety: Enhance and improve safety and security across campus;
- Accessibility: Bring facilities up to standards for people with disabilities, in compliance with Americans Disability Act (ADA)
- **Technology**: Upgrade technology network infrastructure
- Updating the Learning Environment: Renovate specific areas to maintain and improve the academic environment
- **Deferred maintenance**: Ensure and maintain the quality of campus-wide facilities through roof repairs and replacement of doors, windows, roofs, and other outdated items

FISCAL YEAR 2025 CAPITAL OUTLAY PROJECT REQUEST

Institution Name: Monroe County Community College

Project Title: Renovation and Addition to Welch Health Education Building

Project Focus: Academic

Type of Project: Renovation and Addition

Program Focus of Occupants: Health Sciences, Criminal Justice, and Public Safety Services

Approximate Square Footage: 62,322 sf (16,822 renovations; 23,350 nursing/rt addition; 22,150

criminal justice addition)

Total Estimated Cost: \$21,864,400 *PENDING: Construction Authorization*

Estimated Start/Completion Dates: May 2024 – August 2025

Is the Five-Year Plan posted on the institution's public internet site? Yes

Is the requested project the top priority in the Five-Year Capital Outlay Plan? Yes

Is the requested project focused on a single, stand-alone facility? Yes

Project Purpose

The purpose of the renovation and addition to the Welch Health Education Building is to add needed classroom and laboratory spaces in support of Monroe County Community College's (MCCC) Registered Nursing, Practical Nursing, Certified Nursing Assistant (CNA), Respiratory Therapy Programs, as well as, expansion of existing criminal justice programming and execution of planned public safety services programming in a single integrated space in order to leverage training and professional development and career preparation opportunities. The project will add needed classroom and laboratory space to allow for the creation of new programs and forge new partnerships with area healthcare providers and public safety employers. The program focus for students in Health Sciences is currently Registered Nursing, Practical Nursing, Certified Nursing Assistant (CNA), Respiratory Therapy, Phlebotomy Technician, Personal Trainer Certification, and health, physical education and dance. The renovation will enable the College to expand public safety programs in the areas of police and fire safety services, criminal justice, community policing, corrections, juvenile justice, and social work. The College currently lacks the space to expand Health Sciences and Criminal Justice and Public Safety Services programming into high-demand areas identified by our local employers, such as medical assistant, dietary and environmental technology, radiology technologist, physical/occupational therapy assistant, surgical technologist, police, corrections officers, social workers, fire fighters, emergency medical technicians (EMT), and social workers.

Criminal justice includes many opportunities in law enforcement, including local, county, and state police agencies as well as the federal government, and positions in the courts and correctional systems. These positions, as well, can be divided into numerous support, research and technical functions. In

addition, Criminal Justice is expanding into community relations by broadening its scope in other roles like social services, community policing, and community corrections. This ever-expanding role has necessitated a change in our approach to Criminal Justice and Public Safety.

The social climate in the United States has also dictated changes to law enforcement, making education and training even more crucial. In 2015 and 2019, the president convened a task force to study how to improve policing and the criminal justice system. The common conclusion was more education, regular standardized training, and community involvement would make vast improvements to the criminal justice system. For these reasons, MCCC is moving forward with changes to the program by increasing education through updated courses, incorporating training to allow more standardized continuing education, and expanding into the community with locations for police, fire, EMS, and mental health. By doing this, MCCC will be a hub of training to provide a stable site and adequate resources for the entire region to participate in the skill-building they need. This plan will make Monroe County Community College an innovator and center the program around, in more modern terms, Public Service.

One of the resonant lessons from the COVID-19 pandemic is the critical role healthcare and public service heroes play in the overall health and safety of our communities. These industry workers deserve more than gratitude. They need community colleges to ensure that a sufficient supply of capable, compassionate and highly skilled workers who can serve communities in normal times as well as times of crisis are available. Monroe County Community College has long worked hand-in-hand with regional healthcare providers, clinical, and public safety partners to educate the next generation of workers. To meet the growing workforce needs in Michigan, the College proposes a significant expansion to its Health Sciences, criminal justice, and public safety services programs through the construction of additional facilities to train more students through established programs and to allow for the creation of new programs to meet current and future industry demands. The College's sterling reputation for quality and rigor results in a high demand for its graduates. Expanding MCCC's ability to supply more healthcare and public safety graduates would benefit the entire region through safer communities, better care and improved health outcomes for patients.

Scope of the Project

This project is a renovation to existing classrooms and laboratories (16,822 sf) as well as additions of 23,230 sf for health sciences programs, and an addition for public safety programs of approximately 22,150 sf. The project would also include site improvements per the local township regulations. The building will also be connected to the campus-wide geothermal HVAC system, offering both cost savings and greater energy efficiency. Finally, a number of legacy maintenance items would be addressed, such as the installation of new door and window systems, swapping out all the building lighting for more energy efficient LED fixtures, replacing the barrel-vaulted gym roof, ensuring that the building is fully updated with regard to handicap accessibility, the installation of new A/V systems related to instruction, and cladding the existing insulated metal panels so as to better weather-proof the exterior of the building.

The renovated space will include the following:

Health Sciences

- Renovation of the existing Respiratory Therapy Skills Lab and converting the existing Respiratory Therapy classroom into a second skills.
- Renovation of two existing classrooms/labs into technology-rich classrooms with seating for 30 students that will support the Respiratory Therapy Program students.
- Renovation of the existing Nursing classroom and Skills Lab into two technology rich classrooms with seating for 40 students and renovation of the AV Learning Lab into a seminar room that will seat 16.
- Renovation to the staff office suites to add a second entrance/exit in keeping with best practice workplace security plans and adding two faculty offices.

Criminal Justice and Public Safety Services

Retrofit programming into existing gymnasium-sized multipurpose room for all agencies to use
including training and large gatherings and weight room, track and locker room facilities. Once
academies begin, it will also be used for daily physical training and graduation ceremonies.

The addition will include the following:

Health Sciences

- Nursing classrooms with seating for minimally 40 students.
- Nursing Skills Labs equipped with minimally six beds.
- A large Computer Lab.
- A Simulation Lab and control room.
- Technology-rich labs equipped with resources for health program expansion with accompanying workrooms.
- A lecture room with seating for 30 students.
- General classrooms with seating for 40 students.
- Increase faculty offices and a staff lounge to consolidate the entire health education division into a single building.
- Minimally two new unisex ADA restrooms and a lactation/meditation room

Criminal Justice and Public Safety Services (Police and Fire Services)

- Move MILO Simulation System (a virtual training system training systems for critical incident training, de-escalation, decision support training, traditional tactical judgment training, and firearms proficiency training; scenario-based training, and mission-specific interactive judgment training.
- Smart Classrooms: classrooms include smart boards, multiple monitors, multiple screens and technology for remote learning (police, fire, EMS, and college courses to occur simultaneously, as well as with local agencies to teach remote seminars).
- Evidence classroom: CRJ 260 Criminalistics, alterations for classroom and laboratory with crime scene capabilities.

- Fire Simulation: Similar to the aforementioned MILO for police, pump operations and driving simulations would be added along with other outdoor simulations aided by the existing welding, fabrication classes at MCCC allows for flashover and controlled fire training, rarely available to smaller departments. Fire simulation represents the first step in public safety integration.
- Tactics Room: large padded classroom to allow for hands-on tactical training; space for taser and contact pressure point/ defensive tactics, and locked storage room added for equipment.
- EMS Classroom: constructed as two adjacent rooms (classroom and lab). Provides locked storage room for EMS Supplies and equipment; allows for all practical stations and a simulation manikin. The College anticipates state accreditation for medical first responder and EMT classes (Fall 2023), with National Paramedic Accreditation to follow.
- Fire Classroom: constructed as two adjacent rooms (classroom and lab). Provides locked storage room for fire equipment and gear. Enables instructional capacity for training in the areas of forcible entry simulation, search and rescue, firefighter safety, and rapid intervention training, which are required to achieve anticipated state accreditation.
- Driving Pad: skid pad and driving courses for police, fire and ambulance set up for use by local agencies.
- A simunitions (blank or training ammunition, made from wax, paintballs) room adjacent to the
 multipurpose room and range. Simunitions are used to closely simulate live ammunition, but the
 interchangeable configuration for police, can be used for fire and EMS as well.
- Conference room will be added to allow for advisory committee meeting and can be used for meetings by any agency in the region.
- Break room and small cafeteria. Academies run nine hours a day, and the candidates will need a place to eat lunch.
- Indoor firing range for Academy programming and use by local agencies since there are currently
 only three exclusive indoor locations, which may include MILO integration and the ability to bring in
 larger props like a patrol car. Enhanced security and an armory for weapons and ammunition
 involved with this type of training is required.

Program Focus of Occupants

The program focus for students in Health Sciences is currently Registered Nursing, Practical Nursing, Certified Nursing Assistant (CNA), Respiratory Therapy, Phlebotomy Technician, Personal Trainer Certification, and health, physical education, and dance. Monroe County Community College offers an associate degree nursing program that was established in 1974 and is approved by the Michigan Board of Nursing and accredited by the Accreditation Commission for Education in Nursing (ACEN). The Registered Nursing Program's NCLEX-RN pass rate in 2022 was 85.42% percent, exceeding the national average of 77.91 percent. The NCLEX-PN pass rate for 2022 was 100 percent, exceeding the national average of 79.93 percent. The College's Respiratory Therapy Program is accredited by the Commission on Accreditation for Respiratory Care (CoARC). The program's Certified Respiratory Therapy Credential (CRT) pass rate reported for 2022 is 100 percent, which exceeds the national average of 77.3 percent with a set accreditation threshold of 70 percent. The Registered Respiratory Therapist Credential pass rate for 2021 is 86.7 percent, which exceeds the national average of 63.5% percent with a set accreditation threshold of 60 percent.

MCCC Criminal Justice (MCCCCJ) is moving into the 21st century and beyond. Numerous studies, task forces, and other analyses about police and criminal justice over the last five-plus years revealed common threads: improvement is needed in the areas of recruitment, training, and community education. MCCCCJ is looking to the future and taking on a four-phase project to turn the Criminal Justice Program into a Public Service Division to better serve the community's broader needs, including classrooms, simulations, primary education, and regional training. MCCC's criminal justice current pathway options prepare students for challenging careers in law enforcement, corrections, security (new 2023) and other criminal justice fields. Students examine the history and philosophy of criminal justice; the organization, management and operation of modern criminal justice agencies; the laws impacting criminal justice functions, and more. This capital outlay project proposal includes expansion of existing programming required to realize an accredited police academy, with immediate program needs in simulation space and crime lab and defensive tactics room. All others (Driving, firing range, etc.) will be needed in the future as plans for an academy come closer to implementation. The College is also on the cutting edge of virtual simulation training resources for both students and local agency training. Occupants of the building will include faculty and students from these programs and local and regional safety services personnel.

The College currently lacks the space to expand Health Sciences and Criminal Justice programming into high-demand areas identified by our local healthcare and safety service providers, such as medical assistant, dietary and environmental technology, radiology technologist, surgical technologist, police officers, firefighters, emergency medical technicians, paramedics, and other public safety services personnel, corrections officers, and others. In addition to addressing the lack of space, MCCC's proposed plan would allow for greater integration of industry-standard technology including incorporation of simulation technology to ensure students receive the education and training necessary to meet the skill competencies expected of today's healthcare and safety service providers.

Most Recent MCCC, Michigan and National Pass Rate, 2022

Licensure Type	MCCC Pass Rate	MI Pass Rate	National Pass Rate
Registered Nurse	85.42%	78.97%	77.91%
Practical Nurse	100%	80.38%	79.93%
Nursing Assistant/Aide	N/A	N/A	N/A
Phlebotomy Technician	N/A	N/A	N/A
Certified Respiratory Therapist	100%	N/A	77.3%
Registered Respiratory Therapist	86.7%	N/A	63.5%

1. How does the project enhance Michigan's job creation, talent enhancement and economic growth initiatives on a local, regional and/or statewide basis?

As the only higher education entity in Monroe County, MCCC plays a key role in the region's economic development. The college remains committed to providing comprehensive educational opportunities, offering transformational learning through educational excellence, and delivering entrepreneurial and responsive leadership to address community needs. Our community's ability to attract new investment and jobs, as well as retain existing employers, is dependent upon developing new pathways to certificate and degree credentials that align with emerging business and industry needs. This renovation and addition project is necessary to deliver the elemental instruction in the classrooms and labs essential to meet this need. The healthcare and safety service workforce have become one of the cornerstones of Michigan's economy, and it is imperative that community colleges continue to provide a pipeline of new entrants into the healthcare workforce. According to the Michigan Bureau of Labor Market Information and Strategic Initiatives (MBLMISI), "despite low projected growth, we expect over 500,000 job opening on average annually through the projection period: About one in three openings will come from labor forces exits." MBLMISI projects from 2018 to 2028 healthcare support occupations will grow more than triple the statewide rate at 22.7 percent, which is by far the largest projected growth for any major occupational group. The job market for safety service occupations in the areas of criminal justice, law enforcement, and corrections is extremely good. Police and sheriff patrol officer positions show stable growth, with significant increase in demand trend 2022-23.

The returns on investment are significant and immediate. MBLMISI educational attainment plays a critical role in improving the employment outcomes of Michigan residents. The Michigan's HOT 50 jobs listing includes Registered Nurses with an anticipated 8 percent, 10-year (2020-2030) job growth rate. The two most in-demand healthcare profession certifications in Michigan are reported as License Practical Nurses and Certified Nursing Assistant. Wages for registered nurses range from \$28 - \$47 per hour and License Practical Nurses \$21 - \$31 (DTMB, 2021). The wage range for respiratory therapists in Michigan is \$24 - \$37 per hour with projected growth of 24.2 percent. MCCC nursing and respiratory care graduate pass rates on licensing examinations far exceed state and national averages by 4.1 to 60.5% (averaging 82% - 100% percent every semester). High pass rates are one of the reasons healthcare industry employers throughout the State seek MCCC graduates. One-hundred percent of MCCC Registered Nursing, Practical Nursing, Nursing Assistant, and Respiratory Therapy program graduates secure high-demand, high-wage jobs. Many MCCC healthcare program graduates go on to complete four-year degrees in related areas at Michigan universities, resulting in even higher earning potential. The Michigan Bureau of Labor Market Information and Strategic Initiatives cautions that anticipated growth in healthcare employment will not come to fruition unless the workforce is adequately trained (Health Care Cluster Workforce Analysis, 2013).

Employment projections for safety service and related occupations report job growth (8- 10%). Regional compensation for these positions (\$65,790) is higher than the national compensation. Probation officers and correctional treatment specialists' employment opportunities are showing stable growth, with significant increase in demand trend 2022-23. Regional compensation for these positions (\$67,680) is higher than the national compensation. Correctional officers and Jailers project a slight decrease in workforce demand 2022-23 (1/2 of national decrease); however, regional compensation for these positions (\$53,628) is higher than the national compensation rate. Opportunities for fire, EMS, social work/mental health and other public safety service occupations remain strong (Lightcast Occupational Overview Q1 2023 Data Set).

It is essential that Monroe County Community College continue to produce highly qualified nursing and respiratory therapy, law enforcement, corrections, security (new 2023) and other criminal justice professionals, and expand the development and impact of new programming, especially in the areas of public safety services. With support from the State of Michigan, the College will secure the resources necessary to increase the number of exceptional healthcare and safety service professionals unleashed into the Michigan economy annually, and sustain the quality that its programs are known for and on which employers rely.

2. How does the project enhance the core academic, development of critical skill degrees, and/or research mission of the institution?

The renovation project aligns perfectly with the College's mission and is in support of our core values of providing relevant educational offerings, instructional excellence, accessibility, diversity and inclusion, and accountability to students and stakeholders. The United States Department of Health and Human Services has designated Monroe County, Michigan as "having met criteria indicating a significant need for additional primary health care resources." Michigan hospital executives are reporting that pandemic burnout and retirements are creating staffing shortages at hospitals across the state and jeopardizing their ability to meet the growing demand for care. As the need for healthcare professionals increases, MCCC stands ready to provide the critical skill degreed students that will help to fill this gap; however, renovated and expanded classrooms and labs are desperately needed to continue to offer existing the high-quality health sciences and criminal justice degrees and certificates that MCCC is known for and upon which community partners depend and to expand opportunities for education and training in the areas of police, corrections, emergency medical technicians, firefighter and paralegal, and additional opportunities to marry the two programs, health and safety services (for example RN to EMT bridge program), all programming currently in the College's plan for curricular expansion and in one single, multi-use building.

3. Is the requested project focused on a single, stand-alone facility? If no, please explain.

Yes, the request is for renovation and a new addition to the Welch Health Education Building.

4. How does the project support investment in or adaptive re-purposing of existing facilities and infrastructure?

The project requested re-purposes and enhances existing classrooms and laboratories while also adding additional instructional spaces to support student learning in

healthcare occupations. The Capital Outlay Project Request will provide investment in the existing facility while adding enhanced Skills Labs to assist in preparing MCCC

students for employment in these high growth, high demand fields.

The project includes a renovation of interior spaces as well as improving the energy efficiencies of the exterior envelope of the existing building while adding additional space

to meet enrollment demands. The College is committed to the goal of integrating sustainable design principles and systems throughout this project.

5. Does the project address or mitigate any current health/safety deficiencies relative to existing facilities? If yes, please explain.

To date, no life/safety deficiencies/issues have been identified relative to this project.

6. How does the institution measure utilization of its existing facilities, and how does it compare relative to established benchmarks for educational facilities? How does the project help to improve the utilization of existing space and infrastructure, or conversely how does current utilization support the need for additional space and infrastructure?

During academic program development and review, the utilization of existing facilities is a major consideration. The accreditation processes for both the Registered Nursing

Program and the Respiratory Therapy Program includes a thorough review of the teaching facilities as related to the maximum number of students who can be accommodated

to meet learning outcomes. The majority of physical resources for the College's health sciences programs are housed in the Welch Health Education Building. Built in 1997,

the physical facilities have received very limited renovation or improvement since its opening. Feedback from the faculty and students regarding the adequacy of the physical

resources provided indicate that both groups agree that additional classroom and lab space is needed.

The physical resources are sufficient to ensure the achievement of the learning outcomes and meet the needs of faculty and students.

Year Faculty Students

Response Rate Classrooms Skills Lab Computer Labs Response Rate Classrooms Skills Lab Computer Labs

2018-2019 100% 40% 20% 60% 93% 96% 96% 96%

97% 94% 90% 97%

2019-2020 100% 40% 40% 100% 100% 100% 92% 88%

96% 96% 92% 84%

2020-2021 60% 66% 66% 100% 100% 100% 100% 86%

95% 79% 84% 69%

During its visit to MCCC in September 2021, the peer evaluation team from The Accreditation Commission for Education in Nursing (ACEN) was impressed with the quality of

MCCC's program (recommending continuing accreditation without any areas needing improvement). However, the team expressed concern about MCCC's facility/space

needs and stopped short of identifying this as an area needing improvement based upon the College's commitment to securing funding to expand, renovate and improve the

educational facilities used to teach health sciences programs and the efficiency in scheduling and effective oversight of the area currently in use.

While the current classrooms have received technology upgrades, physical space limitations are affecting the College's ability to expand programmatically and meet the Skills

Lab resources needed to help facilitate student learning. To accommodate limited classroom availability in the Welch Health Education Building, the Nursing Department

utilizes classrooms in other buildings on campus.

Room utilization for all classrooms and labs is tracked on a semester basis and the data is used by the instructional area to determine program and course offerings. This

information is used in concert with program enrollment data, economic forecasts and workforce analysis, and community interest as a benchmark by the academic disciplines

to determine additional facility needs. Research has shown that expansion of technology-rich classrooms and laboratories is vital to the continuing success of our students

both in the classroom and in the workforce.

7. How does the institution intend to integrate sustainable design principles to enhance the efficiency and operations of the facility?

The College is committed to incorporating sustainable and eco-friendly design features into all of its renovation and new construction projects as was done in the construction

of the Career Technology Center, the Renovation to the East and West Technology Buildings, and the renovation of the Campbell Academic Center. All designs will include

appropriate sustainable design principles to improve efficiencies including, but not limited to, the following:

- utilization of LED lighting technology and occupancy sensors,
- use of environment-friendly materials such as sustainable products made from reclaimed (recycled) products and/or locally sourced products,
- use of low VOC (volatile organic compounds) paints,
- installation of water efficient fixtures,
- enhanced insulation throughout the building,
- incorporation of indoor air quality (IAQ) solutions,
- replacement of all window and door systems with energy efficient solutions, and
- application of passive solar design concepts and integration of day lighting to utilize solar gain.

8. Are match resources currently available for the project? If yes, what is the source of the match resources? If no, identify the intended source and the estimated timeline for securing said resources.

The College has the matching funds available for the project via a five-year maintenance and improvement millage approved by the Monroe County electorate in November

2016 and renewed in November 2020.

9. If authorization for construction, the state typically provides a maximum of 75% of the total cost for university projects and 50% of the total cost for community college projects. Does the institution intend to commit additional resources that would reduce the state share from the amounts indicated? If so, by what amount?

The College does not intend to add additional funds to reduce the State share. The request is for full funding of 50 percent of the project.

10. Will the completed project increase operating costs to the institution? If yes, please provide an estimated cost (annually, and over a five-year period) and indicate whether the institution has identified available funds to support the additional cost.

It is anticipated that the additional space added to the Welch Health Education Building will increase operating costs for utilities (electric, gas and water) by approximately

\$28,487 in year one (23,350 sf X \$1.22/sf). The five-year projection includes a 3 percent inflation factor in years two through five resulting in increased utility costs for the first

five years of operation of approximately \$151,241. The College does not anticipate that there will be additional staffing costs. General fund revenues will be utilized to support

the additional utility costs to operate the new addition.

It is expected that the overall operating costs will be reduced in the future through College sustainability efforts. Phase 3 includes upgrading the HVAC system to a geothermal

system in keeping with the HVAC system currently operating throughout the majority of the campus.

11. What impact, if any, will the project have on tuition costs?

There should be no impact on student tuition and fees.

12. If this project is not authorized, what are the impacts to the institution and its students?

The educational needs of students in the Health Sciences and Safety Services areas are shifting due to the rapidly changing face of technology in public clinical settings. Health Sciences programs, such as nursing and respiratory therapy, do what they can to purchase and integrate new technology into the existing skills lab settings; however, physical space is a serious challenge. Most health occupation programs utilize and integrate simulation technology into their curricula to ensure students receive the education and training necessary to meet the skill competencies expected of today's healthcare providers. Because of space limitations, MCCC is not currently able to emulate this ongoing trend. MCCC's Health Education Building has one 4-bed nursing skills lab that meets the needs of three

programs (educating approximately 175 students per year): Registered Nursing, Practical Nurse to Registered Nursing, and phlebotomy. MCCC offers both for-credit and not-for-credit Certified Nurse Assistant (CNA) courses taught in the Welch Health Education Building. The non-credit courses have been taught in partnership with ProMedica and Monroe's MichiganWorks! Office to offer completers guaranteed employment upon completion. Given congestion and scheduling issues in the skills lab early in each semester, these courses are typically scheduled as late start courses and set with a typical class cap of 12 students. The Respiratory Therapy program uses a classroom that has a 3-bed station at the back to meet the needs of 60 respiratory therapy students. Due to space issues, the Licensed Practical Nursing program is housed in another building and delivers its entire curriculum in a combined classroom and lab with only three stations (educating 24 students per year). The Practical Nursing program would be relocated into the Health Education Building following the renovation and new construction project. MCCC has done what it can to expand access to the Health Science programs. However, if the expansion/renovation is not funded, the College will not be able to sustain the number of students that are currently enrolled in its allied health programs. The Division will need to reconsider the number of students accepted/enrolled and contemplate converting existing classroom space into lab space. This will be necessary to adequately house the technology required to ensure well-educated graduates suited with the skills and competencies needed to work in today's complex healthcare system. Limiting enrollment will result in the exact opposite of what the College hopes to do with this project, which is to increase the number of healthcare professionals available to work in and contribute to Michigan's growing economy. Without the State's support of this project, the College would have to limit enrollment and turn-away students, lease facilities off-campus, or reduce the scope of the project in keeping with the College's current resources.

Further, should MCCC's proposed capital project for 2025 not be authorized, planned expansion of the current criminal justice program and new curricula and training in safety services, including police, fire, EMS, and etc. will not occur in the near future. Potential job opportunities resulting from training, development, licensing, and certification will go unfilled, and the College will be unable to meet the educational and professional development training needs of local and regional law enforcement, fire and safety, and human and social services. Currently, there are 49 program majors enrolled in Criminal Justice and Law Enforcement programming, and 80 unduplicated students enrolled in Criminal Justice courses. With the addition of technology and new curriculum with potential for new employment opportunities in criminal justice and public safety services, that number will easily double over the next three to five years. It is essential the College have the technology, classrooms, and labs to accommodate the increase in enrollment.

13. What alternative to this project were considered? Why is the requested project preferable to those alternatives?

The project as proposed allows the College to improve and expand the instructional resources for our health courses and programs and will result in an enhanced learning environment for our students. The College has considered scaling down the project and using existing funding to add additional classroom and lab space for the Nursing Program; however, this alternative does not address the growing instructional needs for all of the health courses and programs nor space to launch new programs. Additionally, the College has looked at housing the Criminal Justice and public safety programs in other buildings, however, co-locating these programs with health education programming is the most efficient and responsible use of space and allows for synergy between the two areas. The Health Education

Building already has spaces needed to accommodate the CRJ and public safety programs' needs, such as labs, classrooms, spaces for tactical training, locker room with showers, large gymnasium-type classroom, and external square footage that would easily accommodate outdoor program needs, such as firing range, driving pad, and fire training ground. The option chosen is the best alternative to balance investment with efficient utilization of space and capacity growth for the College's health-related courses and programs.

GRETCHEN WHITMER
GOVERNOR

STATE OF MICHIGAN STATE BUDGET OFFICE LANSING

JENNIFER L. FLOOD DIRECTOR

September 5, 2024

BUDGET LETTER -- CAPITAL OUTLAY

TO: University and Community College Presidents

Fiscal Year 2026 Capital Outlay Budget Information Due Date: Thursday, October 31, 2024

Michigan universities and community colleges are invited to participate in the capital outlay budget development process in preparation for the Fiscal Year 2026 Executive Budget Recommendation. There are two submissions related to this process, one statutorily required and the other voluntary. The Management and Budget Act, Public Act 431 of 1984, as amended, requires universities and community colleges to present a Five-Year Capital Outlay Plan no later than November 1 of each year. Universities and community colleges may also elect to submit a capital outlay project request for state cost participation. No capital outlay project request will be considered for planning without its inclusion in the corresponding Five-Year Capital Outlay Plan. The details of these submissions are further outlined below.

Five-Year Capital Outlay Plan

The Five-Year Capital Outlay Plan is intended to provide state policymakers with the most current information available on institutional priorities and needs. The Five-Year Capital Outlay Plan should be revised as appropriate and approved annually by the institution's governing body. It is to evaluate all capital priorities in light of current programming efforts, anticipated programming changes, and the current capital base. At a minimum, the Five-Year Capital Outlay Plan should cover fiscal year 2026 through fiscal year 2030. It is to include both self-funded projects and those in which future state cost participation may be requested. The Department of Technology, Management and Budget has developed a set of minimum criteria the comprehensive planning documents are to incorporate. These criteria are listed in an attachment and remain unchanged from the prior fiscal year. Institutions may amend their Five-Year Capital Outlay Plan during the fiscal year by providing notification of the revision to the State Budget Office and other recipients.

Fiscal Year 2026 Capital Project Request

Requests for state funding of capital outlay projects are to be a logical extension of information contained in the comprehensive Five-Year Capital Outlay Plan. Capital project requests should focus on addressing specific academic or research needs of the institution. To facilitate state cost participation, all capital project requests must

University and Community College Presidents September 5, 2024 Page 2

comply with the State Building Authority Act, Public Act 183 of 1964, as amended, regarding the use of State Building Authority bond revenues. Projects should be narrowly focused on a specific facility or programmatic need. Project requests to renovate and/or construct multiple, independent facilities will not be considered, nor will projects related to self-liquidating facilities, such as dormitories, performance halls, parking garages, or athletic facilities.

A university or community college request for a capital project will be carefully reviewed and evaluated, and balanced against other competing capital outlay and statewide budget priorities for potential inclusion in the Executive Budget Recommendation. A scoring panel convened by the State Budget Office will review and evaluate the top priority capital project request from each institution relative to a set of minimum statutory criteria (MCL 18.1242), which includes the following:

- a. Investment in existing facilities and infrastructure.
- b. Life and safety deficiencies.
- c. Occupancy and utilization of existing facilities.
- d. Integration of sustainable design to enhance the efficiency and operations of the facility.
- e. Estimated cost.
- f. Institutional support.
- g. Estimated operating costs.
- h. Impact on tuition, if any.
- i. Impact on job creation in this state.
- j. History of prior appropriations received by the institution through the capital outlay process.

Note: The State Budget Office may also consider additional criteria that it believes will enhance the objective evaluation of projects at its discretion. For Fiscal Year 2026, the State Budget Office has added a new question to the evaluation criteria focusing on equity. Please see the attached Capital Outlay Major Project template that highlights the new question.

If new capital outlay projects are included in the Fiscal Year 2026 Executive Budget Recommendation, only planning authorizations will be recommended. If planning is authorized by the Legislature in a subsequent appropriations act, the university or community college shall prepare professional preliminary design documents to secure support for construction. Once professional planning documents have been reviewed and approved for authorized projects, state funding will provide a maximum of 75% for universities and 50% for community colleges of the total cost of each project. As in prior years, the state share of financing for recommended large-scale projects may be capped at a dollar amount less than those levels.

A planning authorization approval does not guarantee support for a future construction authorization. A full assessment of the State Building Authority bond cap and available state budget resources to fund future State Building Authority Rent costs

University and Community College Presidents September 5, 2024 Page 3

will be completed before advancing projects beyond the planning stage. Projects for which final planning costs significantly exceed original estimates will be carefully scrutinized and may require additional program and scope refinement. Universities and community colleges may submit only their top priority capital outlay request. <u>Institutions with a current planning authorization should continue to identify that project as their top priority request pending the enactment of a construction authorization.</u>

Submission to the State Budget Office

Fiscal Year 2026 budget development continues with the use of the Statewide Integrated Governmental Management Applications (SIGMA) system for the collection of the university and community college capital outlay submissions.

To facilitate the submission of Five-Year Plan internet links and capital outlay project requests to the State Budget Office, university and community college end users will use virtual private network (VPN) hard tokens provided by the state to access the SIGMA system. In order to properly identify the appropriate end users at each institution, the SIGMA Security & Workflow team will be contacting, via email, those university and community college users who were identified in the previous year's capital outlay budget development process to ascertain whether or not those individuals will remain as each institution's SIGMA end user. A confirmed end user for each institution is required to be identified prior to mailing out the VPN hard tokens. If a university or community college is aware that their designated SIGMA end user has changed, please contact the SIGMA Security & Workflow team and notify them of this change. Additionally, communications regarding the availability of job aides, access to a training video, VPN access and any other steps required to access and properly complete the capital outlay submissions within SIGMA will occur directly with those identified end users as necessary.

We appreciate your cooperation as we continue to work diligently to make access and use of the SIGMA interface as seamless as possible for all users. Any questions regarding access to, or use of, SIGMA should be directed to the SIGMA Security & Workflow team at SIGMA-Security@michigan.gov.

Submission guidelines for the Five-Year Capital Outlay Plan and Fiscal Year 2026 Capital Outlay Project Request are as follows:

1. Five-Year Capital Outlay Plan: To comply with the statutory requirement, institutions are to post their Five-Year Capital Outlay Plans in a searchable electronic format (preferably PDF) on a publicly viewable location on the institution's internet site. The documents are to be archived on the internet site for a period of no less than three years. Utilizing SIGMA, institutions are to submit the internet hyperlink of the posting from their institutional internet site no later than Thursday, October 31, 2024. The State Budget Office will subsequently report these hyperlinks to the required statutory

University and Community College Presidents September 5, 2024 Page 4

recipients, including Joint Capital Outlay Subcommittee members and the House and Senate Fiscal Agencies.

2. Fiscal Year 2026 Capital Project Request: Utilizing SIGMA, institutions may also submit a capital project request on the designated input form. The SIGMA form mirrors previous State Budget Office budget templates and is closely aligned with the statutory evaluation criteria. In addition, SIGMA allows for the upload of support documents via an attachment function, which institutions may utilize at their discretion. Institutions electing to submit a capital project request are to complete the input form in SIGMA no later than Thursday, October 31, 2024. The State Budget Office will subsequently report these submissions to the same statutory recipients as the Five-Year Plans. A blank SIGMA report that combines all of the elements of the designated SIGMA input form for the major project request is attached.

Thank you in advance for your submission. We look forward to working with you in developing the Fiscal Year 2026 Executive Budget Recommendation. Any questions regarding the capital outlay process should be directed to Ryan Fink, Capital Outlay Coordinator, at finkr@michigan.gov.

Sincerely,

Jennifer L. Flood State Budget Director

Recommended Five-Year Master Plan Components Michigan Universities and Community Colleges

I. Mission Statement

Summary description of the overall mission of the institution.

II. Instructional Programming

As part of the Five-Year Capital Outlay Plan, each college and university shall provide an overview of current academic programs and major academic initiatives. This "instructional programming" component should:

- Describe existing academic programs and projected programming changes during the next five years, in so far as academic programs are affected by specific structural considerations (i.e., laboratories, classrooms, current and future distance learning initiatives, etc.);
- b. Identify the other unique characteristics of each institution's academic mission: *For Universities:*

Major research institution, liberal arts, technical/vocational center, geographic service delivery area(s), community presence activities, demographic profile, etc.

For Community Colleges:

Two-year degree and certificated technical/vocational training, workforce development activities, adult education focus, continuing or lifelong educational programming, partnerships with intermediate school district(s), community activities; geographic service delivery area(s), articulation agreements or partnerships with four-year institutions, etc.

- c. Identify other initiatives which may impact facilities usage;
- d. Demonstrate economic development impact of current/future programs (i.e., technical training centers, life science corridor initiatives, etc.).

III. Staffing and Enrollment

Colleges and universities must include staffing and enrollment trends in the annual Five-Year Capital Outlay Plan. This component should:

- a. Describe current full and part-time student enrollment levels by academic program and define how the programs are accessed by the student (i.e. main or satellite campus instruction, collaboration efforts with other institutions, Internet or distance learning, etc.);
- b. Evaluate enrollment patterns over the last five years;
- c. Project enrollment patterns over the next five years (including distance learning initiatives):
- d. Provide instructional staff/student and administrative staff/student ratios for major academic programs or colleges;

- e. Project future staffing needs based on five-year enrollment estimates and future programming changes;
- f. Identify current average class size and projected average class size based on institution's mission and planned programming changes.

IV. Facility Assessment

A professionally developed comprehensive facilities assessment is required. The assessment must identify and evaluate the overall condition of capital facilities under college or university control. The description must include facility age, use patterns, and an assessment of general physical condition. The assessment must specifically identify:

- a. Summary description of each facility (administrative, classroom, biology, hospital, etc.) according to categories outlined in "net-to-gross ratio guidelines for various building types," DTMB-Office of Design and Construction Capital Outlay Design Manual, appendix 8. If facility is of more than one "type," please identify the percentage of each type within a given facility.
- b. Building and/or classroom utilization rates (percentage of rooms used, and percent capacity). Identify building/classroom usage rates for peak (M-F, 10-3), off-peak (M-F, 8-10 am, 3-5 pm), evening, and weekend periods.
- Mandated facility standards for specific programs, where applicable (i.e. federal/industry standards for laboratory, animal, or agricultural research facilities, hospitals, use of industrial machinery, etc.);
- d. Functionality of existing structures and space allocation to program areas served;
- e. Replacement value of existing facilities (insured value of structure to the extent available);
- f. Utility system condition (i.e., heating, ventilation, and air conditioning (HVAC), water and sewage, electrical, etc.);
- g. Facility infrastructure condition (i.e., roads, bridges, parking structures, lots, etc.);
- h. Adequacy of existing utilities and infrastructure systems to current and 5-year projected programmatic needs;
- i. Does the institution have an enterprise-wide energy plan? What are its goals? Have energy audits been completed on all facilities and, if not, what is the plan/timetable for completing such audits?
- j. Land owned by the institution, including a determination of whether capacity exists for future development, additional acquisitions are needed to meet future demands, or surplus land can be conveyed for a different purpose.
- k. What portions of existing buildings, if any, are currently obligated to the State Building Authority and when these State Building Authority leases are set to expire.

In the event that comprehensive, current physical facility assessments are not available, the Five-Year Capital Outlay Plan must include data from the most recent physical facility assessment and describe the schedule by which a new assessment will be completed.

V. Implementation Plan

The Five-Year Capital Outlay Plan should identify the schedule by which the institution proposes to address major capital deficiencies, and:

- a. Prioritize major capital projects requested from the State, including a brief project description and estimated cost, in the format provided. (Adjust previously developed or prior years' figures utilizing industry standard CPI indexes where appropriate).
- b. If applicable, provide an estimate relative to the institution's current deferred maintenance backlog. Define the impact of addressing deferred maintenance and structural repairs, including programmatic impact, immediately versus over the next five years.
- c. Include the status of on-going projects financed with State Building Authority resources and explain how completion coincides with the overall Five-Year Capital Outlay Plan.
- d. Identify, to the extent possible, a rate of return on planned expenditures. This could be expressed as operational "savings" that a planned capital expenditure would yield in future years.
- e. Where applicable, consider alternatives to new infrastructure, such as distance learning.
- f. Identify a maintenance schedule for major maintenance items in excess of \$1,000,000 for fiscal year 2026 through fiscal year 2030.
- g. Identify the amount of non-routine maintenance the institution has budgeted for in its current fiscal year and relevant sources of financing.

FISCAL YEAR 2026

CAPITAL OUTLAY MAJOR PROJECT REQUEST

Institution Name:			
Capital Outlay Code:			Request Code:
Project Title:			
Project Focus:	Academic	Research	Administrative/Support
Type of Project:	Renovation	Addition	New Construction
Approximate Square Footage:			
Total Estimated Cost:			
Estimated Duration of Project:			
Is the Five-Year Plan posted on the	he department's public Internet site?		
Is the requested project included	in the Five-Year Capital Outlay Plan?		
Project Purpose			
Scope of the Project			
Program Focus of Occupants			
Additional Information:			
How does the project support Mic pasis?	higan's talent enhancement, job creat	ion and economic growth initiative	s on a local, regional and/or statewide
How does the project enhance the	e core academic, development of critic	cal skill degrees, and/or research m	ission of the institution?
NEW FOR FISCAL YEAR 2026] DO	escribe how the project will address, i	ncorporate, or enhance any equity	efforts, policies, or goals for the academic
orograms within the scope of the	project or as a component of your ins	titution and campus at large?	

Is the requested project focused on a single, stand-alone facility? If no, please explain.

How does the project support investment in or adaptive re-purposing of existing facilities and infrastructure?
Does the project address or mitigate any current health/safety deficiencies relative to existing facilities? If yes, please explain.
How does the institution measure utilization of its existing facilities, and how does it compare relative to established benchmarks for educational facilities? How does the project help to improve the utilization of existing space and infrastructure, or conversely how does current utilization support the need for additional space and infrastructure?
How does the institution intend to integrate sustainable design principles to enhance the efficiency and operations of the facility?
Are match resources currently available for the project? If yes, what is the source of the match resources? If no, identify the intended source and the estimated timeline for securing said resources.
If authorized for construction, the state typically provides a maximum of 75% of the total cost for university projects and 50% of the total cost for community college projects. Does the institution intend to commit additional resources that would reduce the state share from the amounts indicated? If so, by what amount?
Will the completed project increase operating costs to the institution? If yes, please provide an estimated cost (annually, and over a five-year period) and indicate whether the institution has identified available funds to support the additional cost.
What impact, if any, will the project have on tuition costs?
If this project is not authorized, what are the impacts to the institution and its students?
What alternatives to this project were considered? Why is the requested project preferable to those alternatives?
