Outline of Instruction

Division: Industrial Technology
Area: Automotive Engineering Technology
Course Number: AUTO 105
Course Name: Automotive Transmissions
Prerequisite: None
Corequisite: None
Hours Required: Class: 30  Lab: 30  Credits: 3

Course Description/Purpose

This course covers the construction, operation and maintenance of standard and automatic transmissions and overdrive units. Troubleshooting, adjustment and maintenance of the various transmissions is covered in detail.

Major Units

• Gear Ratios and Torque Multiplication
• Differentials
• Manual Transmissions
• Automatic Transmissions

Educational/Course Outcomes

Student learning will be assessed by a variety of methods, including, but not limited to, quizzes and tests, journals, essays, papers, projects, laboratory/clinical exercises and examinations, presentations, simulations, portfolios, homework assignments, and instructor observations.

Cognitive  Each student will be expected to Identify/Recognize . . .

• operation of a differential
• operation of a manual transmission
• operation of an automatic transmission

Performance  Each student will be expected to Demonstrate/Practice . . .

• set up and adjust a differential
• calculate gear ratios and torque multiplication
• disassemble and reassemble a manual transmission
• disassemble and reassemble an automatic transmission

Attitudinal  Each student will be expected to Believe, Feel, Think . . .

• shop safety
