Course Outcome Summary

Standard Program Course

CRJ 260 Criminalistics

Course Information

Division: Humanities and Social Sciences
Course Number: CRJ
Contact Hours: 60
Total Credits: 3

Prerequisites
RDG 090 and ENG 090 or qualifying scores on accepted placement tests

Course Description
This non-science-based course serves as an introduction to criminal forensics and forensic evidence. A clear introduction to the technology of the modern crime laboratory for non-scientists. Only the most relevant scientific and technological concepts are presented. The nature of physical evidence is defined, and the limitations that technology and current knowledge impose on its individualization and characterization are examined. A major portion of the class centers on discussions of the common items of physical evidence encountered at crime scenes. Particular attention is paid to the meaning and role of probability in interpreting the evidential significance of scientifically evaluated evidence. This course will require lab work outside of the normal course time throughout the semester.

Program Outcomes Addressed by this Course:
Upon successful completion of this course, students should be able to meet the program outcomes listed below

A. Develop knowledge and understanding of the functions and processes of the Criminal Justice System
