

Course Outcome Summary

Required Core Program Course

EMS 153 Basic EMT III

Course Information

Division	Humanities and Social Sciences
Course Number	
Contact Hours	60
Total Credits	4

Prerequisites

EMS 152 Basic EMT II

Course Description

This is the third in a series of four courses that will constitute a certificate as an Emergency Medical Technician, making the student eligible for National Registry Testing and eventual state licensure. In this class, students will be presented with the medical scenarios commonly encountered in the pre-hospital setting. Students will field diagnose and treat illnesses related to respiratory problems, cardiac emergencies, and diabetes among others. Students will also begin clinical rotations where they will put their skills into practice in both the hospital and on an ambulance. Students must complete lecture and laboratory tasks in all four courses and complete the clinical rotations in the third and fourth classes to be eligible for the national examination.

Program Outcomes Addressed by this Course:

- A. Accurately assess and adequately treat an emergency medical patient.
- B. Accurately assess and properly treat an emergency trauma patient.
- C. Develop problem-solving and critical thinking skills used in emergency situations.
- D. Demonstrate effective oral and written communication skills.
- E. Demonstrate professionalism in a variety of emergency and non-emergency situations.

Course Outcomes

In order to evidence success in this course, students will be able to:

1. Assess and treat a patient experiencing a possible cerebral vascular accident (Program Outcome A, B, C)
2. Assess and treat a patient with a possible diabetic emergency (Program Outcome A, C)
3. Assess and treat a patient with a possible anaphylactic reaction (Program Outcome A, C)
4. Assess and treat a patient affected by environmental conditions (Program Outcome A, B, C)

MONROE COUNTY
COMMUNITY COLLEGE

Course Outcome Summary
