Contact Hours 12
Total Credits 6

Lecture Hours45 hoursLab Hours66 hoursClinical Hours72 hours

Prerequisites EMS 151, Emergency Medical Technician I

Corequisite: None

### **Course Description**

This is the second course in a series of two courses that will constitute a certificate as an Emergency Medical Technician (EMT), making the student eligible for National Registry of Emergency Medical Technician's EMT testing and eventual state licensure. In this class, students will be presented with the trauma scenarios, patients with special challenges, and EMS operations skills commonly encountered in the pre-hospital setting. Students will field diagnose and treat injuries related to trauma and special populations. Students must complete lecture and laboratory tasks in both courses and complete the clinical rotations in the second class to be eligible for the national examination.

#### **Program Outcomes Addressed by this Course:**

- A. Accurately assess and adequately treat an emergency medical patient.
- B. Accurately assess and properly treat an emergency trauma patient.
- C. Develop problem-solving and critical thinking skills used in emergency situations.
- D. Demonstrate effective oral and written communication skills.
- E. Demonstrate professionalism in a variety of emergency and non-emergency situations.
