Course Information

Division	Health Science Division
Contact Hours	3
Theory	45
Total Credits	3

Prerequisites ENGL 090 and RDG 090 or qualifying scores on accepted placement tests

Course Description

The purpose of this course is to develop an increased awareness of multiple health-care professions. Students will examine the principles of health care including ethics, patient-centered care, communication, informatics, patient safety, and quality improvement in health care. Students will also learn techniques for obtaining a career in health care. Students will complete a Basic Certificate in Quality & Safety through the Institute for Health Care Improvement.

Course Outcomes

In order to evidence success in this course, students will be able to:

1. **Describe multiple health-care professions and settings.**
2. **Discuss principles of professionalism and ethics in health care.**
3. **Examine how the health-care professional creates a safe, patient-centered environment.**
4. **Examine the importance of communication and informatics in health care.**
5. **Discuss quality improvement and its role in patient safety.**
6. **Implement strategies that increase opportunities to obtain a successful health-care career.**
