

“Returning Participant”

Check program:

- Nursing (RN) Nursing (PN) Respiratory Therapy Certified Nursing Assistant Phlebotomy

All sections of this health form must be completed in order to be eligible to participate in both clinical and classroom activities.

Please upload completed form to ACEMAPP using directions provided during orientation (**RN, RT, and PN students only**). Students in all other programs to submit documents to their program director.

Student must be able to meet all technical standards as listed below:

Note: Specific examples of Technical Standards can be found on the back of this page.

Critical Thinking:	<input type="checkbox"/> Sufficient critical thinking and cognitive abilities in classroom and clinical settings
Professionalism:	<input type="checkbox"/> Interpersonal skills sufficient for professional interaction with a diverse population of individuals, families and groups
Communication:	<input type="checkbox"/> Communication sufficient for professional interactions
Mobility:	<input type="checkbox"/> Physical abilities sufficient for movement from room to room and in small spaces
Motor Skills:	<input type="checkbox"/> Gross and fine motor abilities which are sufficiently effective and safe for providing allied health care
Sensory:	<input type="checkbox"/> Auditory and visual ability sufficient for observing, monitoring and assessing health needs
Observation:	<input type="checkbox"/> Ability to sufficiently make observations in a health care environment, consistent with program competencies
Tactile Sense:	<input type="checkbox"/> Tactile ability sufficient for physical assessment

Is the individual free of contagious illness? Yes No

If No, please explain: _____

I do hereby give my consent for the individual to fully participate in the classroom and clinical activities including complete patient care.

Additional Comments: _____

Note: All costs associated with this exam are the responsibility of the individual.

	Examples
Critical Thinking	Make safe, immediate, well reasoned clinical judgments. Identify cause/effect relationships in all clinical situations and respond appropriately. Utilize the scientific method and current standards of evidence based medicine/practice (EBM) to plan, prioritize, and implement patient care. Evaluate effectiveness of health related interventions. Accurately follow course syllabi, assignments, directions, academic and facility patient protocols, and any action plan(s) developed by the dean, faculty, administration, or healthcare institution. Measure, calculate, reason, analyze and/or synthesize data as it applies to patient care and medication administration.
Professionalism	Establish effective, professional, relationships with clients, families, staff and colleagues with varied socioeconomic, emotional, cultural, and intellectual backgrounds. Capacity to engage in successful conflict resolution. Capacity to comply with all ethical and legal standards, including those of the healthcare profession and the corresponding policies of the College and Clinical Placements Facilities. Ability to relate to clients, families, staff and colleagues with honesty, integrity, and non-discrimination. Ability to self regulate behavior and maintain composure during stressful or sensitive care of clients in all areas of the healthcare environment. Respond appropriately to constructive criticism. Effectively work independently and cooperatively in team situations. Displays attributes of professionalism such as: integrity, honesty, responsibility, accountability, altruism, compassion, empathy, trust, tolerance, and unbiased attitudes.
Communication	Explanation of treatment, procedure, initiation of health teaching (e.g. teach-back or show-me method). Accurately obtain information from clients, family members/significant others, health team members, and/or faculty. Documentation and interpretation of health related interventions and client responses. Read, write, interpret, comprehend, and legibly document in multiple formats using standard English. To relay accurate and thorough information in oral, written, and electronic forms for continuity of care with all health care team members appropriately. Communicate in a courteous, non-aggressive, non-defensive manner with instructors, peers, staff, patients and health care team members.
Mobility	Functional movement about patient's room, workspaces, and treatment areas. Administer rescue procedures such as cardiopulmonary resuscitation. The physical ability to transition quickly to accommodate patient needs and to maneuver easily in urgent situations for client safety
Motor Skills	Ability to effectively calibrate and use equipment. Strength to carry out patient care procedures, such as assisting in the turning and lifting/transferring of patients. Perform and/or assist with expected procedures, treatments, and medication administration using appropriate sterile or clean technique (for example, medication administration, CPR, insertion of catheters). Physical endurance sufficient to complete all required tasks during the assigned period of clinical practice, including the physical and mental demands of a 12-hour clinical shift. To physically be able to control falls by slowly lowering patient to floor. Lift or move (turn, position) clients or objects, pull or push objects weighing up to 35 pounds to accommodate client care needs.
Sensory	Ability to detect monitoring device alarm and other emergency signals. Ability to discern sounds and cries for help. Ability to observe client's condition and responses to treatments. Ability to collect information through listening, seeing, smelling, and observation and respond appropriately. Ability to detect foul odors, smoke, changes in skin temperature, skin texture, edema, and other anatomical abnormalities
Observation	Accurate interpretation of information obtained from digital, analog, and waveform diagnostic tools such as temperatures, blood pressures, and cardiac rhythms as well as diagnostic tools that monitor or obtain physiological phenomena with client care. Observation and interpretation of the following: client heart and body sounds, body language; color of wounds, drainage, urine, feces, expectoration; sensitivity to heat, cold, pain and pressure; and signs and symptoms of disease, pain, and infection.
Tactile Sense	Ability to palpate in physical examinations and various therapeutic interventions. To detect temperature changes, and feel vibrations (pulses) and palpate veins for cannulation.

Tuberculin Testing Student Tuberculosis (TB) Testing

After initial TB screening upon admission, students must annually provide proof of negative TB status by submitting one of the options below:

1. Approved TB screening blood test (QuantiFERON-TB Gold or T-Spot) ~OR~
2. A single step TB skin test (TST) screening ~OR~
3. If a person has a previously documented positive TB screening test or a documented diagnosis of TB or Latent TB Infection (LTBI) in the past, see option 3 below.

OPTION 1: TB Screening Blood Test

INTERFERON-GAMMA RELEASE ASSAY (IGRA) – QuantiFERON-TB Gold or T-Spot:

Date Test Given (mm/dd/yyyy): _____ Test Given by: _____

Interpretation: Negative Positive

In the event of a positive result: If a tuberculin skin test or the IGRA blood test is positive or a person exhibits signs and symptoms suspicious for tuberculosis, a medical evaluation is required.

OPTION 2: 1-Step TST

One STEP OF THE TB SKIN TEST (TST):

Date Test Given (mm/dd/yyyy): _____ Test Given by: _____
Site: Left Forearm Right Forearm Manufacturer/Lot #: _____

This test must be read within 48-72 hours. Document findings below

Date Test Read (mm/dd/yyyy): _____ Test Read by: _____
Interpretation: Negative Positive Measurement of Induration (in millimeters): mm

OPTION 3: Only for those with a previous positive TB screening test or diagnosis

If a person has a previously documented positive TB screening test or a documented diagnosis of TB or Latent TB Infection (LTBI) in the past, perform an annual risk assessment/symptom check with your healthcare provider instead of the TST or IGRA. Repeat Chest x-ray is only required if symptoms develop.

CHEST X –RAY

Documentation that the Chest X-Ray was performed to rule-out tuberculosis due to a positive TB skin test, IGRA blood test or due to the development of signs or symptoms of tuberculosis must be in the Chest X-Ray report or comments.

Date of Chest X-Ray (mm/dd/yyyy): _____

Interpretation: Normal Abnormal

Symptom Review Statement:
