Monroe County Community College

MCCC Mission Statement

Monroe County Community College enriches lives in our community by providing opportunity through student-focused, affordable, quality higher education and other learning experiences.

MCCC accomplishes its mission through:

- Post-secondary pathways for students who plan to pursue further education
- Occupational programs and certificates for students preparing for immediate employment upon completion
- Curriculum that prepares students to effectively communicate, think critically, and be socially and culturally aware
- Comprehensive student support services
- A wealth of opportunities for intellectual, cultural, personal and career enhancement
- Training and retraining to meet the needs of an evolving economy
- Key partnerships to enhance educational services and opportunities

MCCC Vision Statement

Monroe County Community College will be recognized for our student-focused service, academic excellence, affordability, innovation, community responsiveness and student success.

MCCC Core Values

These core values form our attitudes and guide our behavior:

- **Student-focus:** Execute student-centered decision making
- Excellence: Offer high-quality educational opportunities, programs and services
- Accessibility: Offer ease of access to educational opportunities, programs and services
- Affordability: Provide affordable educational opportunities, programs and services
- **Diversity and Inclusion:** Celebrate the individuality and diversity of our students, community, nation and world
- **Respect:** Practice equity and mutual respect
- **Stewardship:** Manage our resources with efficiency and integrity to ensure the long-term health of the college and infuse responsible, sustainable and transparent practices throughout all operations and programs
- Outreach and Engagement: Advance a culture of engagement and collaboration
- Relevance: Offer relevant educational programs through innovation and responsiveness

Early Childhood Education Program Mission

The mission of the Early Childhood Education Program is to prepare students for employment in the early childhood education field and for articulation to advanced degree programs in early childhood education. This is accomplished through the provision of classroom learning and practical application in field experiences. These experiences will be provided in multiple settings across varied age ranges and diversity of children and families.

Early Childhood Education Student Learning Outcomes

At the completion of the program of study, graduates will be able to:

- 1. Utilize knowledge of child development to support and nurture children in their development and learning environments.
- 2. Demonstrate respectful and reciprocal interactions and relationships with diverse children, families, staff, and communities to support child development and learning.
- 3. Apply systematic observation and varied documentation and assessment strategies to support child development and learning.
- 4. Develop curriculum for young children based on knowledge of academic subject areas to support child development and learning.
- 5. Utilize developmentally appropriate approaches and strategies to enhance child development and learning.
- 6. Demonstrate professionalism through adherence to the ethical and professional standards of the early childhood education profession.

These outcomes are aligned with the National Association for the Education of Young Children (NAEYC) Standards for Early Childhood Professional Preparation.

The Early Childhood Education Program has been awarded Early Childhood Associate Degree Accreditation from the National Association for the Education of Young Children (NAEYC).

Early Childhood Education Program Pathways

Monroe County Community College offers several program pathways in early childhood education. Each pathway focuses on the components of developmentally based early childhood education and care in various settings across all age levels. These program pathways include a certificate program (32 credits) and an associate degree of applied science (60 credits). The student may also use program courses to pursue the Child Development Associate (CDA) as awarded by the National Council for Professional Recognition. Additionally, students may use the program courses to articulate with higher education institutions to pursue a degree in Early Childhood Education or teacher certification. Transfer students should follow transfer guides provided in the College Catalog.

2010 Standards for Initial Early Childhood Professional Preparation

STANDARD 1. PROMOTING CHILD DEVELOPMENT AND LEARNING

Candidates prepared in early childhood degree programs are grounded in a child development knowledge base. They use their understanding of a) young children's characteristics and needs, and b) multiple interacting influences on children's development and learning, to c) create environments that are healthy, respectful, supportive, and challenging for each child.

STANDARD 2. BUILDING FAMILY AND COMMUNITY RELATIONSHIPS

Candidates prepared in early childhood degree programs understand that successful early childhood education depends upon partnerships with children's families and communities. They a) know about, understand, and value the importance and complex characteristics of children's families and communities. They use this understanding to b) create respectful, reciprocal relationships that support and empower families, and c) to involve all families in their children's development and learning.

STANDARD 3. OBSERVING, DOCUMENTING, AND ASSESSING TO SUPPORT YOUNG CHILDREN AND FAMILIES

Candidates prepared in early childhood degree programs understand that child observation, documentation, and other forms of assessment are central to the practice of all early childhood professionals. They a) know about and understand the goals, benefits, and uses of assessment. They b) know about and use systematic observations, documentation, and other effective assessment strategies c) in a responsible way, d) in partnership with families and other professionals, to positively influence the development of every child.

STANDARD 4. USING DEVELOPMENTALLY EFFECTIVE APPROACHES

Candidates prepared in early childhood degree programs understand that teaching and learning with young children is a complex enterprise, and its details vary depending on children's ages, characteristics, and the settings within which teaching and learning occur. They a) understand and use positive relationships and supportive interactions as the foundation for their work with young children and families. Candidates b, c) know, understand, and use a wide array of developmentally appropriate approaches, instructional strategies, and tools to connect with children and families and d) positively influence each child's development and learning.

STANDARD 5. USING CONTENT KNOWLEDGE TO BUILD MEANINGFUL CURRICULUM

Candidates prepared in early childhood degree programs a) use their knowledge of academic disciplines to design, implement, and evaluate experiences that promote positive development and learning for each and every young child. Candidates understand the importance of developmental domains and academic (or content) disciplines in early childhood curriculum. They b) know the essential concepts, inquiry tools, and structure of content areas, including academic subjects, and can identify resources to deepen their understanding. Candidates c) use their own knowledge and other resources to design, implement, and evaluate meaningful, challenging curriculum that promotes comprehensive developmental and learning outcomes for every young child.

STANDARD 6. BECOMING A PROFESSIONAL

Candidates prepared in early childhood degree programs a) identify and conduct themselves as members of the early childhood profession. They b) know and use ethical guidelines and other professional standards related to early childhood practice. They c) are continuous, collaborative learners who demonstrate knowledgeable, reflective and critical perspectives on their work, making informed decisions that d) integrate knowledge from a variety of sources. They are e) informed advocates for sound educational practices and policies.

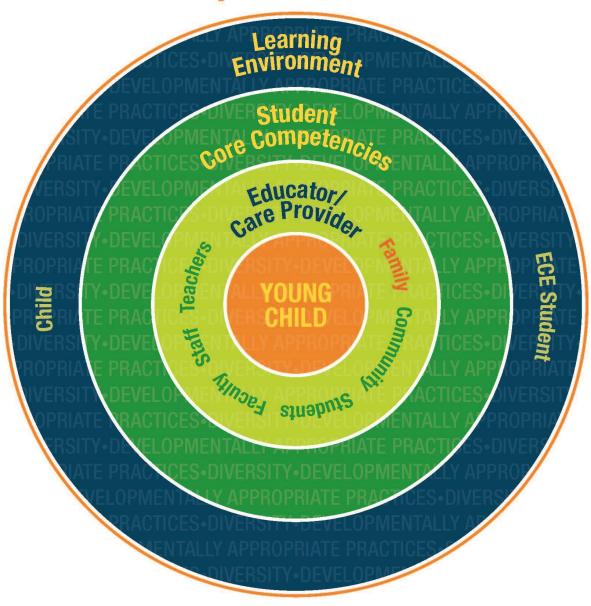

STANDARD 7. EARLY CHILDHOOD FIELD EXPERIENCES

Candidates have field experiences and clinical practice in a) at least two of the three early childhood age groups (birth – age 3, 3 through 5, 5 through 8 years) and in b) the variety of settings that offer early education (early school grades, child care centers and homes, Head Start programs).

Early Childhood Education Program Conceptual Framework

Technical Standards

The purpose of the technical standards is to inform students choosing to enter in the ECE field of the basic minimal technical standard requirements that must be met in order to complete all coursework objectives and student learning outcomes. The listed standards encompass what is minimally required to perform necessary tasks associated with the ECE professional role. This list is not exhaustive, and can be modified as the College deems necessary at any time. Students enrolled in the ECE program at MCCC must provide care for young children that is safe and effective. The student must be able to demonstrate sufficient cognitive, professional, motor, sensory, and other abilities, with or without accommodation, to meet program technical standards.

- Critical Thinking and Cognitive Competencies: Sufficient critical thinking and cognitive abilities in classroom and field placement settings.
- **Professionalism:** Interpersonal skills sufficient for professional interaction with a diverse population of children, families, faculty, and staff.
- **Communication:** Communication sufficient for professional interactions.
- **Mobility:** Physical abilities sufficient for movement, lifting, and providing care within the field placement setting.
- **Motor Skills:** Gross and fine motor abilities which are sufficiently effective and safe for providing care for young children.
- **Sensory:** Auditory and visual ability sufficient for observing, monitoring, and assessing care needs.
- **Observation:** Ability to sufficiently make observations in the field placement setting consistent with program outcomes.
- **Tactile Sense:** Tactile ability for caregiving routines and positioning oneself when interacting with children and objects.

The early childhood education associate of applied science degree program prepares students to provide high-quality care and education of young children from birth through age 8. The mission of the Early Childhood Education Program at Monroe County Community College is to prepare students for employment in the early childhood education field and for articulation to advanced degree programs in early childhood education. This is accomplished through the provision of classroom learning and practical application in field experiences. These experiences will be provided in multiple settings across varied age ranges and diversity of children and families.

Career Opportunities

The program prepares individuals for staff placement in:

- · Child care centers
- · Family child care
- Head Start programs
- · Great Start Readiness Program preschools
- Preschools
- · Public school latchkey programs
- Other programs involved in the care and guidance of children and their families

Certificate Program: Early Childhood Education

The early childhood education certificate program is designed for students who will work with and teach young children. Students may use this curriculum to meet state licensing requirements to provide child care in homes, centers and other facilities or for positions as assistant teachers in child care programs. A minimum of 32 credit hours is required for the early childhood education certificate. Courses for the certificate can be applied toward the associate degree.

CDA Credential

The Child Development Associate (CDA) is a national credential earned by individuals working with young children from birth to five years o fage in child care settings. The CDA credential is based on a core set of competency standards, which guide early care professionals as they work to becoming qualified teachers of young children. The candidate must document 120 clock-hours of formal training through course work, 480 clock-hours of current experience working with young children, and complete documentation as required by the Council for Professional Recognition. MCCC courses provide the training required for the CDA and may be applied toward the associate degree or certificate programs. Please note that MCCC does not award the CDA credential. See the Council for Professional Recognition website for more information (www.cdacouncil.org).

Admissions: 734-384-4104

Prerequisites are requirements that the student must meet before taking a course. Prerequisites ensure that the student has the necessary skills and knowledge to successfully complete the coursework.

ECE 100, 102, and 104 are considered the foundational courses that must be completed to proceed with additional program courses. These courses are offered both fall and winter semesters.

Catalog Course Descriptions

ECE 100 Foundations of Early Childhood Education

3 Credit Hours 3 Billable Contact Hours

Prerequisite: RDG 090 and ENGL 090 or qualifying score on accepted placement tests

F, W

This course provides an introduction to the field of Early Childhood Education for students interested in pursuing a career in the profession. An overview of the foundational content of Early Childhood Education is presented with the focus on the young child, the teacher, the family, and the learning environment. It presents a respectful, culturally sensitive, and child-family centered approach to the care, development, and learning of the young child.

ECE 102 Child Growth and Development

3 Credit Hours 3 Billable Contact Hours

Prerequisite: ENGL 090 and RDG 090 or qualifying score on accepted placement tests

F. W

This course presents the theory and stages of child development from the prenatal period through the young child of eight years. The student will gain an understanding of child development in the areas of perceptual, motor and physical development, emotional and social development, and cognitive, language and literacy development. The related topics of health, nutrition, safety, and children with special needs are also discussed. The focus of the course is to prepare the student with knowledge of growth and development to enhance their ability to provide educational experiences and interactions that support children's development and learning.

ECE 104 Nutrition, Health & Safety for Early Childhood Education

3 Credit Hours 3 Billable Contact Hours

Prerequisite: RDG 090 and ENGL 090 or qualifying score on accepted placement tests

Corequisite: ECE 102

F, W

This course presents a holistic approach to the wellness of children in relation to their safety, nutrition, and health in various environments and early childhood education settings. It discusses the provision of quality early childhood education environments that ensure the physical and emotional well-being of children. Knowledge of child development is reviewed to address the safety, nutritional and health needs of children throughout the developmental stages. Students will develop an instructional unit on one of these areas related to the wellness of children.

ECE 106 Observation and Assessment of Childhood Development

3 Credit Hours 3 Billable Contact Hours

Prerequisite: ECE 100 and ECE 102 and ECE 104

W

This course assists the student to develop the skills and experience essential to the observation, recording, and assessment of the development and behavior of young children. Child and family communication and guidance techniques consistent with knowledge of child development and professional standards are emphasized. Students will participate 45 hours in an approved early childhood setting to perform various observation assignments and to develop a case study on a select child. Students will also compile a portfolio documenting the observation and assessment of the child's development and behavior. The portfolio assessment is discussed in relation to curriculum and program development.

ECE 108 The Care and Learning of Infants & Toddlers

4 Credit Hours 4 Billable Contact Hours

Prerequisite: ECE 100 and ECE 102 and ECE 104

W

This course focuses on the provision of developmentally appropriate practice in the care and learning of infants and toddlers from birth to age three. It presents the design of curriculum, activities, and experiences to support the child's physical, sensorymotor, cognitive, language, and social-emotional development. Child, family, and caregiver interactions and guidance techniques consistent with knowledge of child development and professional standards are emphasized. The creation of active learning environments and child and program assessment is addressed. Students will participate 45 hours in an approved early childhood setting to perform observation assignments and develop a unit of instruction for the infant and toddler.

ECE 110 Diverse Populations in Early Childhood Education

3 Credit Hours 3 Billable Contact Hours

Prerequisite: ECE 100 and ECE 102 and ECE 104

This course focuses on the care, development, and learning needs of diverse children. It discusses children with special needs related to cognitive, speech and language, motor and sensory impairments. Children with acute and chronic health problems and emotional disorders are also discussed. Significant social issues including poverty, homelessness, and family violence are explored. Strategies for communicating and working with diverse children and families and use of school and community resources are presented.

ECE 200 The Care and Learning of Preschool Children

4 Credit Hours 4 Billable Contact Hours

Prerequisite: ECE 100 and ECE 102 and ECE 104

This course focuses on the provision of developmentally appropriate practice in the care and learning of preschool children ages three through five. It presents the design of curriculum, activities, and experiences to support the child's physical, language and literacy, creative arts, and cognitive development. Child and family communication and guidance techniques consistent with knowledge of child development and professional standards are emphasized. Students will participate 45 hours in an approved early childhood setting to perform child observation assignments and develop a unit of instruction for the preschool child.

ECE 202 The Care and Learning of School-Age Children

4 Credit Hours **4 Billable Contact Hours**

Prerequisite: ECE 100 and ECE 102 and ECE 104

This course focuses on the provision of developmentally appropriate practice in the care and learning of school-age children. It presents the design of curriculum, activities, and experiences to support the child's physical, cognitive, psychological, moral, and social development. Child, family, and caregiver interactions and guidance techniques consistent with knowledge of child development and professional standards are emphasized. The planning of curriculum, including programs, learning environments, and activities for school-age children is discussed. Students will participate 45 hours in an approved early childhood setting to perform quality program assessments and develop a unit of instruction with activities and experiences for school-age children.

ECE 204 Administration of a Child Care Program

3 Credit Hours 3 Billable Contact Hours

Prerequisite: ECE 100 and ECE 102 and ECE 104

This course focuses on the competencies and requirements central to the development and administration of early childhood education programs. It discusses the role of the director/administrator and details the administrative responsibilities in the management of these programs. Professional standards designated by the National Association for the Education of Young Children (NAEYC) are emphasized. Background knowledge of growth and development, assessment, and the needs of children are reviewed. The creation of the developmentally appropriate curriculum, communications with children, families and community, and child, staff, and program evaluations are discussed.

ECE 206 Early Childhood Education Practicum

5 Credit Hours 5 Billable Contact Hours

Prerequisite: ECE 106 and ECE 108 and ECE 200 and ECE 202

Corequisite: ECE 110

This capstone course prepares the student teacher for future employment through a weekly practical experience in the care and teaching of children under the supervision of qualified staff in a child care facility. Classroom instruction addresses the fundamentals of the teaching-learning process and competent mastery of the role of beginning early childhood teacher. The application of acquired knowledge to support the care, development, and learning of the young child is emphasized. Students will demonstrate their performance in the care and teaching role during a 150 hour placement under the supervision of staff and faculty in a licensed child care facility. Students will compile a portfolio as a representative collection of their student teacher accomplishments.

NEW MICHIGAN TRANSFER AGREEMENT (MTA)

Beginning Fall 2014

In 2012 the Michigan legislature included language in the community college appropriations bill calling for improvement in the transferability of college courses between Michigan colleges and universities by revising the MACRAO Agreement. The Michigan Transfer Agreement has been created in an effort to increase the transferability of lower level general education courses across all Michigan's public institutions.

To fulfill the Michigan Transfer Agreement, students must successfully complete at least 30 credits, with at least a 2.0 in each course. These credits should be met according to the following distribution:

- 1 course in English Composition
- A second course in English Composition or 1 course in Communications
- 1 course in one of the following Mathematics Pathways: College Algebra, Statistics or Quantitative Reasoning or an upper level course in one of these subject areas
- 2 courses in Social Sciences (from two disciplines)
- 2 courses in Humanities and Fine Arts (from two disciplines and excluding studio and performance classes)
- 2 courses in Natural Sciences including one with laboratory experience (from two disciplines)

If these courses do not add up to 30 credit hours then the student must take an additional course from one of these groups. **One** of the above courses must be completed at Monroe County Community College.

Visit <u>www.monroeccc.edu</u> for a current list of courses that will meet the MTA requirements.

MCCC Courses that Fulfill the Michigan Transfer Agreement (MTA) Requirements

Scholarships

- The statewide T.E.A.C.H. Early Childhood® MICHIGAN scholarship program is
 designed to help those students currently employed in early childhood education and are
 working towards an associate degree, CDA, or are taking foundational courses. Students
 may contact T.E.A.C.H. Early Childhood® MICHIGAN at (866) 648-3224 or at
 http://www.miaeyc.org for more information.
- Additional scholarships and grants may be available for ECE students. Please access the Scholarships tab on MCCC webpage for more information. https://www.monroeccc.edu/scholarships

Articulation Agreements

Articulation Agreements have been established between MCCC and various colleges and universities to assist with the transfer of courses for the pursuit of a bachelor's degree. These agreements provide a smooth curriculum transition to minimize the loss of credit and duplication of coursework.

Present agreements are in place with the following colleges/universities:

- Eastern Michigan University
- Rochester College
- University of Michigan Dearborn
- University of Toledo

Please check the MCCC website under Transfer Information for updated Articulation Agreements.

Student Policies and Procedures

Classroom Policies

1. Attendance

On-time class attendance and participation are an **essential** part of the course. Attendance is expected and will be monitored. You must notify the course instructor of absences by email or phone. Point deductions will occur for all absences. When absences are deemed as excessive, defined as more than two absences in a fifteen week course, your final grade will automatically drop 5 points for each subsequent absence. Early departures or late arrivals (more than 10 minutes) will decrease the number of attendance points received for that class. In addition, documentation of illness may be requested.

2. Class Preparation

You are expected to read all assigned materials **before** coming to class. You should be able to **USE** the assigned readings for activities and reference points. Occasionally you will be given "homework." These assignments will be brief and/or necessary for in-class activities.

3. Course Assignments, Exams, Grading

- All assignments must be handed in by the due date for full credit. Any requests
 for extensions due to personal or medical problems must be made prior to the due
 date and discussed with the instructor ahead of time. Ten percent will be deducted
 for every week and assignment is late. Late assignments will not be accepted two
 weeks after the assignment due date.
- Exams **must be taken** on specified dates. Make-up exams will only be given with **prior approval** from the instructor for extenuating circumstances. Documentation must be provided for the absence (authorized medical excuse, etc.). You will be expected to take the exam by the next scheduled class session. Make-up exams will include different content than the original exam.
- Extra credit will not be offered to improve classroom grades.
- Students must achieve a C or higher in ECE courses to proceed in the program.

4. Professionalism

- Professional conduct, courtesy, and respect for one another are expected of students at all times. Confidentiality relating to classroom discussions is expected and required.
- Students shall maintain confidentiality in terms of their work with classmates, and with children, families, and staff of field placement sites. This includes refraining from identifying members by name or specific characteristics verbally, by photograph, or in writing outside of the classroom and field placement settings.

- This also includes the use of social networking sites (Facebook, Twitter, Instagram, Snapchat, etc.).
- The college expects students to be honest in all academic work and maintain their own integrity as well as the academic integrity and reputation of their institution. Any act of academic dishonesty will result in disciplinary action by the college.
- Cell phones cannot be used for communication purposes in class. For emergency situations only, they may be on under a silent or vibration mode. Cell phones should **NOT** be used for texting, email, web surfing, etc.
- Laptops may *only* be used for note taking or in-class research. Please check with the course instructor if you plan to do so. **NO** other laptop usage is permitted during class (that includes emails, web surfing, etc.).

Any act of dishonesty, breach of confidentiality, behavior that threatens the public's health, welfare, and/or safety, or any other ethical or legal concerns or violations will result in course failure with no opportunity to repeat the course and consequently dismissal from the program.

5. Class Cancellations

If a class is cancelled due to an instructor absence, every effort will be made to contact students prior to class time. Please check your college email prior to class. Cancellation due to inclement weather will be announced on the MCCC website and on local radio stations. Students may also register for the Emergency Notification System on the college web page. https://www.monroeccc.edu/notify/index.htm

6. MCCC Learning Policies

- The instructor supports Monroe County Community College's emphasis on Writing Across the Curriculum. Employers and graduate schools will expect college graduates to think and write clearly. Therefore, you should make every effort to express yourself in standard edited American English on all graded assignments. You are encouraged to take notes during lectures and rewrite new and complex concepts into your own words. Spelling, grammar, and punctuation errors will adversely affect your grade on all written assignments, quizzes, and tests. Students who have difficulty with writing are encouraged to seek help in the Learning Assistance Lab/Writing Center. https://www.monroeccc.edu/lal/lal.htm
- Statement from Learning Assistance Lab (Disability & Accommodations)
 The Americans with Disabilities Act with Amendments (2008) affords students an equal opportunity to participate in educational courses/programs/services.
 Students with a disability for which accommodations may be appropriate, should contact Disability Services at 734-384-4167, located in the Learning Assistance Lab, C-218. See the MCCC Catalog for a list of services.
 https://www.monroeccc.edu/catalog/index.htm

Field Placement Description and Policies

Description and Responsibilities

The field placement experiences are designed to provide students with the practical application of early childhood education theory and best practices. Students are assigned to a Cooperating Teacher who provides the student with the opportunity to observe them in the classroom setting and implement teaching and classroom management strategies under their supervision. The Cooperating Teacher is an experienced teacher who assists the student in the application of acquired knowledge and skill to function effectively in the role of a beginning teacher.

*Classes that include field placement include:

ECE 106 Observation and Assessment of Child Development (45 hours)

ECE 108 The Care and Learning of Infants and Toddlers (45 hours)

ECE 200 The Care and Learning of Preschool Children (45 hours)

ECE 202 The Care and Learning of School-Age Children (45 hours)

ECE 206 Early Childhood Education Practicum (150 hours)

*Field placement hours must be completed on a weekly basis throughout the semester. Field placement hours will be monitored by the Cooperating Teacher and ECE Faculty.

**In response to the Covid-19 pandemic, field placement settings may vary.

***Intermediate School District (ISD) employees will take ECE 206 during the summer semester with approval from the Dean of Science/Mathematics. Please see an ECE faculty member to arrange this placement.

Cooperating Teacher Responsibilities:

- 1. Supervises and mentors the student on the implementation of developmentally appropriate teaching and classroom management strategies.
- 2. Reviews student's course and field placement objectives and guides his/her learning through increasing periods of classroom and teaching responsibilities.
- 3. Provides the student with consistent weekly feedback on their performance and confirms field placement hours on the record of attendance.
- 4. Consults with ECE faculty regarding student performance, problem resolution, and progress.
- 5. Provides feedback regarding performance to the student, in collaboration with ECE faculty, through the use of formal Midterm and Final Evaluations.

Student Responsibilities:

- 1. Demonstrates professionalism in all interactions with Cooperating Center children, families, and staff.
- 2. Discusses lesson plans with the Cooperating Teacher to meet course and field placement objectives and submits lesson plans in a timely fashion.
- 3. Successfully implements developmentally appropriate lesson plans and classroom management strategies in small or large groups of children.
- 4. Accepts constructive feedback from Cooperating Teacher and ECE faculty and makes changes to improve field placement performance.
- 5. Achieves the course and field placement outcomes for successful completion of the course. Evaluation of performance will be determined jointly by the Cooperating Teacher and ECE faculty.

ECE Faculty Responsibilities:

- 1. Identifies appropriate field placements and assigns students to Cooperating Centers and teachers.
- 2. Initiates meetings with Cooperating Center staff before the field placement experience for the purpose of information giving and clarification of responsibilities, outcomes, and the evaluation process.
- 3. Collaborates with Cooperating Teacher and students regarding student progress, problem resolution, and plans for student performance improvement.
- 4. Advocates for best practices by Cooperating Center staff and students in the care and learning of children.
- 5. Collaborates with the Cooperating Teacher to evaluate student performance.

Field Placement Policies

1. Field Placement Selection

The ECE Program will provide a list of participating field placement providers from which students may select a field placement site. Selection of field placement sites is done in collaboration with the ECE Advisory Committee which is composed of community early childhood experts. At this time students employed in the field may not use their employment classroom to ensure objectivity and optimal learning experiences. Reliable transportation is necessary as students must be willing and able to travel to field placement settings.

2. Field Placement Entry Requirements

MCCC ECE field placement requirements are in compliance with the Licensing Rules for Child Care Centers in Michigan (R 400.8125 Rule 125 Staff and volunteers.). https://www.michigan.gov/documents/dhs/Child_Care_Center_Rules_419095_7.pdf

- All students will have a criminal history check using the Michigan State Police's
 internet criminal history access tool (ICHAT). MCCC will provide this ICHAT at
 no cost to students. Students must report to ECE faculty an arrest for any felony or
 misdemeanor within 72 hours of the arrest. Failure to do so will result in immediate
 program dismissal.
- Students will also be required to obtain a yearly Central Registry Clearance from the Michigan Department of Health and Human Services.
- Per the Licensing Rules for Child Care Centers in Michigan, a student will not be allowed placement in a field placement setting if he or she has been convicted of any of the following:
 - 1. a listed offense, as defined in section 2 of the sex offenders registration act, 1994 PA 295, MCL 28.722,
 - 2. child abuse or child neglect,
 - 3. a felony involving harm or threatened harm to an individual within the 10 years immediately preceding the date of offering to volunteer at the center.

Acceptance of students with felony or misdemeanor charges outside of the above will be the final decision of the Cooperating Center.

- For field placements that are four hours or greater per week for more than two consecutive weeks, a negative TB skin test is required and may be obtained at your local health department or physician's office. These requirements are in compliance with the Licensing Rules for Child Care Centers in Michigan (R 400.8128 Rule 128 Health of staff and volunteers.). Per Cooperating Center policies, students may have to obtain immunizations or an immunization record.
- In the event of a field placement in Ohio, an Ohio Criminal Background Check may be necessary.

3. Attendance

- Consistent attendance is essential and absence from the field placement experience should be avoided. The cooperating teacher depends on the field placement student for their services as a fellow teacher. Absence should not exceed an average of one per month. If a field placement student is ill, he or she must notify the cooperating teacher and as early as possible. The field placement student must make arrangements to deliver lesson plans and materials for which he or she is responsible. Field placement students must also notify course instructor and field supervisor immediately by college phone or college email. Absence for any reason or failure to notify the cooperating teacher, course instructor, and field placement supervisor could result in an extension or termination of the placement and failure of the course.
- Students should not attend their field placement if they have a communicable disease or illness (fever, flu, measles, pertussis, pink eye, norovirus, etc.). For a full list of communicable diseases and illness please visit http://www.michigan.gov/mdhhs/0,5885,7-339-71550_5104_53072---,00.html A doctor's written clearance may be necessary for reentry into field placement.
- In the event of field placement closure or school delay (snow, fog, power outage, etc.) it is the responsibility of the student to inform the **course instructor** and **field placement supervisor immediately**.
- In some instances the course instructor or field placement supervisor will provide students with their cell phone number to report last minute absences or field placement closures. This number should <u>only</u> be used to report last minute absences or closures. <u>At no time should it be used for texting or</u> <u>communicating information that can be sent by college phone or college</u> email.

4. Professionalism

• Field placement students are expected to behave in a respectful, professional manner in all relationships with children, cooperating teachers, faculty, non-teaching staff, families, and administrators. Field placement student dress should be representative of this professionalism (no visible tattoos or nontraditional piercings, hair of natural color conservative dress, clean hair, nails, and clothing). Jeans and sweatpants are not appropriate for normal teaching situations. Students hold **guest status** in both the facility and the school district at large and are required to exhibit professional demeanor, a positive attitude, and a willingness to listen to and incorporate feedback throughout the practicum experience.

- Cell phones cannot be used for communication purposes in any field placement setting. If brought with students to field placement site, they should be turned off. For emergency situations only, they may be on under a silent or vibration mode.
- The field placement student shall maintain confidentiality in terms of their work with children, families and staff of the field placement site. This includes refraining from identifying members by name or specific characteristics verbally, by photograph, or in writing outside of the classroom and field placement settings. This also includes the use of social network sites (Facebook, Twitter, Instagram, Snapchat, etc.). Concerns about individual children should not be discussed with center staff or faculty when children and families are present.
- ECE faculty may require students to document their field placement work through photographs or video recordings. These photographs or video recordings are only to be used to meet course assignments. The field placement student must follow the photograph and video recording policy of their field placement site.

5. Evaluation

- During the course of the field placement hours the student will be formally
 evaluated by the cooperating teacher twice through a written Midterm and Final
 Evaluations which are based on course outcomes. Students must receive a
 satisfactory evaluation on all course outcomes. Unsatisfactory Midterm
 Evaluations could result in an extension of the field placement.
- The cooperating teachers will also provide students with weekly verbal feedback
 to guide the acquisition and application of knowledge and skills. Field placement
 students should accept constructive feedback and implement changes in their
 performance.
- Failure to complete a satisfactory final evaluation in the field placement experience will result in course failure and loss of all field placement hours, even in the event of a passing grade in classroom work. Students that are dismissed or receive an unsatisfactory final evaluation will not automatically be allowed to repeat the course. Students that intend to repeat the course will be evaluated on a case by case basis by the ECE faculty. Any act of dishonesty, breach of confidentiality, behavior that threatens the public's health, welfare, and/or safety, or any other ethical or legal concerns or violations will result in course failure with no opportunity to repeat the course and consequently dismissal from the program.

• Students who wish to appeal dismissal or denial of readmission from the ECE program should start by talking to the faculty involved and ECE Program Coordinator. The second stage of the appeal is to speak with the Dean of Science/Mathematics, and the final appeal is to the Vice President of Instruction, whose decision is final and binding. The VP of Instruction may require a written statement from the student. The request for appeal must be made by the end of the semester in which the dismissal occurred.

6. Additional Field Placement Guidelines

- No student will be deemed to be an employee of either the College or the Cooperating Center and neither the College nor the Cooperating Center will be liable for the payment of any wage, salary, or compensation of any kind for service provided by the students.
- Any activity performed by student or faculty at the Cooperating Center, are not as an employee, but in fulfillment of academic requirements and are performed under supervision of the Cooperating Center staff. At no time shall the student replace or substitute for an employee of the Cooperating Center.
- The Cooperating Center and the College have the right to immediately remove a student from the facility when the student's performance is unsatisfactory. This includes any behavior that is disruptive, unsafe, unethical, or detrimental to the Cooperating Center and/or children, and any violation of confidentiality or the Cooperating Center's Standards of Conduct.
- The College has the right to immediately remove a student from the Cooperating Center and field placement if it deems the placement to not be a suitable learning environment for the student.

Drugs, Intoxicants, and Mind Altering Substances

- Success in early childhood education, both as a student and as a teacher, requires sound judgment and positive professional relationships with children, cooperating teachers, faculty, non-teaching staff, families, and administrators. Behavior which threatens these relationships or alters judgment will endanger teaching effectiveness. For this reason students are expected to abstain from the use of any illegal or mind-altering substance before or during any contact with children, faculty, non-teaching staff, families, and administrators. Despite the passage of the Michigan Regulation and Taxation of Marijuana Act in November 2018, the possession of marijuana remains prohibited under United States Federal Law and MCCC policy (Policy 6.21). The College and Science/Mathematics Division prohibits employees, students, and members of the public from possessing or using marijuana (legal or medicinal) on College property or during any College activity. Students who have been prescribed medication that could impair judgment or function should consult with the course instructor or the program coordinator prior to field placement experiences to discuss the matter.
- Early Childhood Education students must consent to random drug screening with negative results for marijuana or any illicit substance. Failure to provide a negative drug screen will prevent participation in the program and/or result in program dismissal. Students who the instructor reasonably suspects might be impaired must give permission for immediate laboratory screening for any substances at a facility of the program's choosing and at the student's expense. Reasonable suspicion may include, but is not limited to, changes in behavior, slurred speech, and pattern absence. Students suspected to be under the influence of any illegal or mind-altering drug will be required to seek transportation to the testing facility from the field placement site. Declining to do so will result in dismissal from the program. There is zero tolerance for breaches of this policy. Documented use of mind-altering and/or illegal drugs or substances will result in immediate dismissal from the program and failure in the ECE course in which the student is enrolled. Students will be ineligible for readmission to the program under these circumstances.

Any act of dishonesty, breach of confidentiality, behavior that threatens the public's health, welfare, and/or safety, or any other ethical or legal concerns or violations will result in course failure with no opportunity to repeat the course and consequently dismissal from the program.

Field Placement Evaluations

Monroe County Community College Early Childhood Education Field Experience Evaluation

On the following pages are the course outcomes followed by specific student behaviors and skills that may provide evidence of the course outcomes being met. The examples provide a guideline and are not all-inclusive. The student will be evaluated as displaying satisfactory or unsatisfactory performance for each course outcome. The definitions of satisfactory and unsatisfactory are as follows.

S- Satisfactory

The student's field experience performance meets all outcomes of the course; the student displays behavior which indicates progress toward course outcomes.

U- Unsatisfactory

The student's field experience performance seldom or inconsistently meets course outcomes.

Students who receive one or more unsatisfactory ratings on the final Field Experience Evaluation will receive a failing grade in the course.

Monroe County Community College Early Childhood Education ECE 206 Early Childhood Education Practicum Field Experience Evaluation

Instructions for Completion:

Part I: Evaluate the student teacher's performance in meeting course outcomes and rate them using the following scale:

1- Excellent

The student displays outstanding performance in consistently meeting the course outcomes.

2- Good

The student displays above average performance in meeting the course outcomes.

3- Satisfactory

The student displays average performance in meeting the course outcomes.

4- Unsatisfactory

The student displays below average performance in meeting the course outcomes.

Part II: Use a check mark to indicate specific behaviors listed under each course outcome that you utilized to attain the rating on each course outcome.

Part III: On the final page provide comments or further explanation as needed and/or describe areas in which the student teacher shows confidence in his/her abilities and areas which need more concentration. Upon completion, review the evaluation with the student teacher. The cooperating teacher and student teacher will then sign and date the evaluation.

Even in the event of a passing grade in classroom work, failure to complete a satisfactory practicum experience will result in course failure.
