INTRODUCTION

Executive Summary

Monroe County Community College embarked on the process of master planning to provide a foundation for the creation and maintenance of an ideal campus environment. This master plan is a living document, which will continue to evolve as it provides a framework for addressing the challenges of growth, academic change and aging facilities.

The Master Planning Committee and other contributors, as part of working through the process:

- Identified the existing and potential future physical and programmatic challenges.
- Created guidelines and requirements to which the proposed solutions should adhere.
- Proposed and tested multiple solutions to each challenge, presenting the best conclusions in this document.

As stated, this plan is a living document. It is the nineteenth year that such a plan has been submitted to the State Budget Office and each year it has undergone review, resulting in revisions and changes to reflect current information, projections, and needs. Seventeen years ago the College contracted with SHW Group (formerly Duce Simmons Associates), Troy, Michigan, to assist in the planning process and the production of the final document. SHW Group also conducted a comprehensive facilities assessment. The assessment included in this plan was updated in 2011. The Five-Year Master Plan has incorporated many of the architect's findings, drawings, and recommendations, and the College continues to thank SHW Group for its prior work and contributions.

The challenges identified and discussed in the following pages include:

- **Facilities Condition** – Outdated classrooms, labs, and HVAC systems.
- **Barrier Free Accessibility** – Elevators and location of Learning Assistance Lab.
- **Programs** – Location of, and limited space for, certain specialized programs.
- **Student Support Services** – Location and coordination of services.
- **Landscaping/Site** – Maintain and improve views and vistas; improve building interconnection and relationships; address pedestrian and vehicular circulation.
- **Growth** - Develop placeholders for future project sites.
- **Student Retention** – Maintain student population through completions of goals and incorporating the Master Plan into enrollment management decisions.

The guiding principles for the solution development process were identified as follows:

- Physically support the College Mission Documents and Strategic Plan.
- Improve student retention and assist in marketing the College to prospective students.
- Address technological changes and the need for technological flexibility.
- Provide classroom flexibility for different uses and teaching methods.
- Simplify student and visitor interaction with the College.

Solutions developed to address the challenges identified include (but are not limited to):

- Development of technologically appropriate classroom space to meet changing educational needs, including the construction of the Career Technology Center and the renovation and new addition to the East and West Technology Buildings.
- Updating of existing classrooms and instructional laboratories to provide a model space for traditional learning, distance learning and conferencing, in a computer intensive environment.
- A plan to address deferred maintenance issues throughout all campus facilities, continuing College efforts to properly maintain building systems in order to reverse or avoid deterioration.
- Reconfiguration of existing buildings to accommodate growth and simplify student interaction with College departments.

The following chapters present the overall Master Plan and explain the process and effort made by all participants in producing this vision for Monroe County Community College.

Planning Process

Before embarking on the Master Plan document, a brief overview of the master planning process is in order. The Master Plan process is comprised of five phases: strategic review, functional analysis, physical analysis, solutions development, and final documentation.

The first phase, strategic review, includes a review of the existing Master Plan and other information including the mission statement and strategic goals of the College.

The next two phases, functional and physical analysis, include the collection of data required to develop solutions for the Master Plan. The functional analysis includes development and issuance of surveys to individual departments within the College, interactive workshops, and interviews with key members of the College. The physical analysis includes the collection of

existing documentation, confirmation of physical conditions and an overall review of the adequacy of existing facilities in supporting the Master Plan.

The above phases create the framework for solution development. Solution development includes developing planning options based on the functional and physical analysis, cost estimating and the development of schedule and phasing options. The options are refined and presented at a series of interactive workshops for analysis and feedback from College and community representatives. These options are then further refined and finalized into a plan for future facility development, culminating in the creation of the final Master Plan Report.

Most importantly, the Master Plan is a living document. It is not a final plan for the College, but the present vision for the potential growth of Monroe County Community College. This document should not be considered “set in stone”, but should be reviewed and updated as dictated by changes in education, information and College and community goals. And while many of the components of the various phases require completion every year, others do not. Although this is a “5-Year” Master Plan, it is the College’s intention to update the Plan annually, have a facilities assessment done every three to four years, and perform all phases every seven to eight years. Unfortunately, due to budget constraints, the comprehensive Campus Master Plan has not been updated in sixteen years. Currently, through the College’s Strategic Planning process, this update is being forwarded as a necessary tactic to meet the Physical Resources objective of “effectively utilize and maintain current facilities while continuously assessing future need.”

History

Monroe County Community College is a public two-year institution supported by property tax monies from Monroe County, educational funds from the State of Michigan and student tuition. The Community College District of Monroe County, Michigan was formed on June 29, 1964 by the electors of Monroe County. On July 3, 1964, the district was given statutory authority under the provisions of Michigan Act 188 of the Public Acts of 1955 to function as a community college.

The original four academic buildings on the 210 acre Main Campus, located on South Raisinville Road, opened for students in 1968. The College has grown from these beginnings to a plant now totaling over 451,858 square feet, including eight academic buildings, four physical plant buildings and four maintenance/storage buildings at the main campus. Total square footage on main campus increased 8,583 square feet with the completion of the Life Sciences Building Student Collaboration Space in May of 2018. Also part of this total is the 17,650 square foot Whitman Center and garage (540 square feet), opened in 1991 and located on 25 acres in Bedford Township near the Michigan-Ohio border.

Monroe County Community College is accredited by the Higher Learning Commission and has received 10-year accreditation, the highest HLC rating possible, during the most recent evaluation in 2009.

Mission Documents

As part of the College's Strategic Planning process, the College's Mission and Vision were reviewed and updated. This comprehensive review, involving all College stakeholders, concluded in the Board of Trustees' approval of the revisions on September 24, 2018:

Mission

Monroe County Community College enriches lives in our community by providing opportunity through student-focused, affordable, quality higher education and other learning experiences.

MCCC accomplishes its mission through:

- Post-secondary pathways for students who plan to pursue further education
- Occupational programs and certificates for students preparing for immediate employment upon completion
- Curriculum that prepares students to effectively communicate, think critically, and be socially and culturally aware
- Comprehensive student support services
- A wealth of opportunities for intellectual, cultural, personal and career enhancement
- Training and retraining to meet the needs of an evolving economy
- Key partnerships to enhance educational services and opportunities

Vision

Monroe County Community College will be recognized for our student-focused service, academic excellence, affordability, innovation, community responsiveness and student success.

Core Values

These core values form our attitudes and guide our behavior:

- **Student-focus:** Execute student-centered decision making
- **Excellence:** Offer high-quality educational opportunities, programs and services
- **Accessibility:** Offer ease of access to educational opportunities, programs and services
- **Affordability:** Provide affordable educational opportunities, programs and services
- **Diversity and Inclusion:** Celebrate the individuality and diversity of our students, community, nation and world
- **Respect:** Practice equity and mutual respect
- **Stewardship:** Manage our resources with efficiency and integrity to ensure the long-term health of the college and infuse responsible, sustainable and transparent practices throughout all operations and programs
- **Outreach and Engagement:** Advance a culture of engagement and collaboration
- **Relevance:** Offer relevant educational programs through innovation and responsiveness

Educational Objectives

MCCC provides higher educational opportunities to the community through

- Offering freshman and sophomore college-level programs in the liberal arts, sciences, and pre-professional fields for students who plan to transfer to four-year colleges and universities;
- Offering one- and two-year occupational and/or career programs for students preparing for employment in technical, business, or health-related fields;
- Providing general education courses and experiences integrated throughout the curriculum which will enable students to write and communicate effectively, utilize mathematics, and employ appropriate methods of critical thinking and problem solving;
- Providing intellectual, cultural, and personal development for adults in a wide range of lifelong learning opportunities;
- Working with governmental agencies and employers to develop training and retraining programs to meet the needs of an evolving economy;
- Providing a strong complement of comprehensive support services to assist students in pursuit of their educational goals;
- Collaborating with school systems, civic groups, educational institutions, individuals, employers, and other constituencies to offer educational services and opportunities.

Strategic Plan

The Strategic Planning Process at Monroe County Community College is the culmination of the combined efforts of the shared governance structure coordinated by the Strategic Planning Committee. It stands in support of the College's Mission Documents and provides the roadmap for future direction.

As the plan is developed, it passes through the shared governance structure, including the Board of Trustees, president, vice presidents, and councils, as well as the various divisions and departments. This process maximizes the opportunity for faculty and staff participation.

The priorities (strategies) and objectives are developed in support of the College's Mission Documents and are the result of environmental scans, research, and input from faculty, staff and students.

Strategic Initiatives represent the highest level of what the college wants to achieve over the next three years. Objectives, through their specific tactics, delineate how the strategic initiatives will be accomplished, as the tactics serve as the work plan to accomplish the objectives. The strategic initiatives and objectives are developed with input from a number of internal and external stakeholders. The tactics developed by the work groups supported by individual divisions, departments support the objectives.

Although the document is developed every three years, addenda may be included whenever appropriate, as this document is a work in progress. The annual assessment of the plan and progress being made in support of the priorities and strategies may serve as the catalyst for additions or changes to the plan. The 2014-2017 Strategic Plan addresses the need to provide educational excellence through high-quality teaching and learning, create and support an

evidence-based culture, strengthen financial resources, embrace shared governance, and increase collaborative partnerships. The plan was thoroughly vetted through a comprehensive and inclusive review process and was adopted by the Board of Trustees on April 27, 2015. The Board extended the plan to June 30, 2018 on November 27, 2017, and to June 30, 2019 on September 24, 2018.

Following is the 2014-2017 Strategic Plan (as extended to June 30, 2019):

Strategic Initiative #1: Educational Excellence – The core of MCCC’s Mission is to provide educational excellence by facilitating high-quality teaching and learning. To this purpose, the following strategies have been identified:

Instructional Excellence – Develop and facilitate effective pedagogical practices.

Student Success – Provide wraparound services to support student success and assist students with challenges they encounter while pursuing their goals.

Higher Educational Opportunities – Support and develop a wide variety of educational opportunities.

Campus Environment – Continue to develop and maintain a safe, accessible, welcoming, and student-focused learning environment.

Diversity – Expose learners to diversity.

Technology – Provide and promote the use of technology.

Strategic Initiative #2: Evidenced-Based Culture – In support of MCCC’s Mission, create an evidence-based culture by committing to data-driven planning, evaluation, and decision-making. To this purpose, the following strategies have been identified.

Planning – Gather data as evidence to establish institutional strategic planning priorities.

Assessment – Establish processes that will provide reliable evidence of student learning.

Evaluation – Implement valid and reliable methods for evaluating performance across all areas, departments, and divisions.

Strategic Initiative #3: Resource Management – Sound resource management will play a critical role in supporting MCCC’s Mission. To this purpose, the following strategies have been identified.

Integrity – Support transparency, disclosure, stewardship, and understanding of resource management.

Physical Resources – Effectively utilize and maintain current facilities while continuously assessing future need.

Accessibility – Maintain an affordable tuition rate, and promote, create, and expand scholarship opportunities and financial aid programs.

Human Resources – Attract, support, and retain a highly qualified and diverse workforce.

Financial Resources – Effectively manage college financial resources and pursue alternative funding.

Strategic Initiative #4: Governance – The governance practices of MCCC are essential to fulfilling its Mission. To this purpose, the following strategies have been identified.

Shared Governance – Evaluate the college governance system to ensure two-way communication and accountability in decision-making.

Communication – Disseminate information through an inclusive communication model.

Transparency – Embrace a decision-making model that fosters transparency, trust, and accountability.

Engagement – Increase participation by all stakeholders in the governance process.

Strategic Initiative #5: Partnerships – In support of MCCC’s Mission, the college will seek opportunities to increase collaborative partnerships with the community. To this purpose, the following strategies have been identified.

Community Engagement – Establish pathways to increase collaboration.

Service Learning – Provide learning opportunities that promote volunteerism and community service.

Accountability – Demonstrate ways the college responds to the community’s learning needs.

ANALYSIS OF EXISTING CONDITIONS

Summary

The following analysis and synthesis of information is driven by the above principles, values and goals set out by Monroe County Community College. When coupled with faculty and staff surveys, site and facility assessments and participant workshops, the groundwork is laid for development of the final Master Plan.

In preparation for the preliminary planning and development of the Master Plan for Monroe County Community College, the existing conditions of the campus and facilities were studied to identify both the opportunities and constraints that will affect future development. This, along with an understanding of program offerings and enrollment and staffing, will allow challenges to be analyzed and addressed, enhancing and preserving areas of value.

Site Analysis

Main Campus

The main campus comprises 210 acres located on Raisinville Road, which forms the western edge of the township. The general land use pattern surrounding campus is agricultural, with the following exceptions:

Property to the north of the campus is occupied by the Monroe County Intermediate School District and the Monroe County Fairgrounds (at the corner of Raisinville Road and M-50). A residential community and golf course adjoins the campus property to the east. Across Raisinville Road to the west are single-family homes fronting large tracts of agricultural property. The south portion of campus includes a wooded area followed by additional farmland.

Some campus property, specifically to the north and east of the Welch Health Education Building, is currently being used for agricultural purposes.

There is also a potter's field cemetery, identifiable only by a State of Michigan Historical Marker, located on campus between parking Lot 2 and Raisinville Road.

The entire site, most of which is former farm fields, has in the past had flooding and standing water issues due to poor soil porosity and very flat terrain. The result has been erosion, landscape damage and paving deterioration.

As a result of a Landscape Master Plan prepared in 1991, the College performed re-grading and drainage work, including creation of a retention pond. This, coupled with replacement of damaged landscaping and paving, has considerably reduced the standing water problems throughout campus. The only area still visibly exhibiting this flooding is behind the Welch Health Education Building.

The balance of the landscaping throughout campus is newer focusing on low maintenance planting such as trees, with some smaller scale plantings used as accents.

Various species of trees are interspersed across the site, which is mostly planted with turf grass. There are some mature trees lining Raisinville Road near the main entrance, causing the balance of plantings to appear immature. The area surrounding the Plum Creek is the exception to this rule. This portion of the site is more heavily treed, with a mix of vegetation typical of a creekside ecosystem.

Numerous ash trees were used in the campus landscaping. All of these were in very visible locations, lining drives, walkways, and parking lots. There were 210 ash trees on the Main Campus and another 15 at the Whitman Center. All fell victim to the borer. In the spring of 2006, all of the ash trees were removed and replaced with a variety of species.

Continued efforts to annually add to the landscaping will be required throughout campus to create more pedestrian-friendly pathways, reduce the apparent distance between buildings and create more inviting outdoor gathering areas. Future site development should continue to address potential safety issues, including appropriately scaled and located plantings and increased pedestrian-scale lighting.

Previously, the Main Campus could be divided into a North Zone and South Zone, split by the main entry drive from Raisinville Road. The Welch Health Education Building being the only building in the North Zone with the balance of the academic buildings surrounding the campus quad, creating the only semi-enclosed exterior space on campus. However, with the construction of the Career Technology Center, a more cohesive campus footprint has been created thus eliminating the “zones” on campus. By placing the Career Technology Center between the Life Sciences Building and the Welch Health Education Building, rerouting the main road, and using existing parking and circulation, as was identified in the Master Plan as a goal for future facilities, all main campus facilities are connected and campus has an interconnected feel.

Whitman Center

The Whitman Center campus, opened to students in 1991, is located on 25 acres in Bedford Township. This facility chiefly serves the southern portion of Monroe County, northern Lucas County, and Lenawee County, although marketing efforts focus primarily toward Monroe County residents.

Access to the property is on Lewis Road. The predominant land use type surrounding the property is mixed between single family residential and some commercial.

This facility consists of a classroom/administration building, a small storage garage and a single parking lot split by an entry drive. The Whitman Center Building and the surrounding site were planned to accommodate expansion at both ends of the building. A purchase of 14.5 adjacent acres will allow for additional parking in the future, as well as providing for buffer zones from surrounding development. Building and program expansion would be impossible without this additional land and parking.

The landscaping between the building and the parking is attractive. The area immediately west of the building is a much more mature wooded area providing shade and a pleasant view from the classrooms. Future site development should not only minimize disruption of this area, but also

promote expansion of it. The presence of ash trees is a major concern at the Whitman campus. Although all infested ash trees have been removed from landscaped areas, they remain in this wooded section.

Hurd Road Property

In October 2010, the College received a donation of a property located on Hurd Road in Frenchtown Township. The property consisted of an 18,910 square foot building situated on 4.9 acres. The College renovated 6,770 square feet of the facility in 2011 to house the Welding Center of Expertise.

On April 25, 2016, the Board of Trustees authorized the sale of the Hurd Road property. On July 22, 2016, the sale of the property was finalized and the College now leases the renovated 6,770 square feet from the owner to teach welding courses.

Access and Circulation Analysis

Main Campus

Vehicular access to the Main Campus is from Raisinville Road to the west. There are currently three entries to the site, with the center entry being emphasized by signage and plantings as the main entry.

The northernmost entry serves primarily the Welch Health Education Building, although the parking lot connects through to the main access road.

The southernmost entry road runs between the southern end of the developed campus and woods to the further south. It continues behind the Student Services/Administration Building and completes the ring road that connects the entire site. The layout of this ring purposely confines vehicular access to the edges of campus, minimizing the opportunities for pedestrian/vehicle conflicts.

Parking Lot Capacities

Lot	Total	Student / Public	Handicap	Staff	Police	Other
Lot 1	150	125	9	16		
Lot 2	519	487	11	20	1	
Lot 3	163	139	8	16		
Lot 4	204	197	7	0		
Lot 5	69	0	4	65		
Lot 6	39	36	3	0		
Lot 7	144	139	5	0		
Learning Assistance Lab	6	0	6	0		
Board/Visitor	15	6	2	6	1	
Physical Plant	11	0	0	11		
CTC Auto Lab	7	0	0	0		7

Lot	Total	Student / Public	Handicap	Staff	Police	Other
Total Main Campus	1,327	1,129	55	134	2	7
Whitman Center	252	244	8	0		
Hurd Road (lease)	28	26	2	0		
Grand Total	1,607	1,399	65	134	2	7

One way to calculate parking needs is to compare the number of staff and students with the number of spaces available.

Number of staff	364
Less number of designated staff spaces	<u>134</u>
Number of staff needing to park in “student/public” areas.....	230
Number of students (2,943 credit hour + 1,200 non-credit)	4,143
Add the number of staff needing to park in “student/public” areas.....	<u>230</u>
	4,373
Less number of “student/public” spaces	<u>1,399</u>
Need number of spaces	2,974

There are several basic inaccuracies when using the preceding method. One is that not all staff and all students will be on campus at the same time. Another is that it does not address the fact that at anytime during the day or evening there may be members of the public (non-staff and non-students) on campus for an event or conference. Although this may happen when the majority of staff and students are not on campus, this is not always the case. And, at times, the numbers of public on campus can be significant.

A third inaccuracy is that the total number of spaces includes parking lots at three different locations: the main campus, Whitman Center, and Hurd Road. When in reality, parking needs at each location could be entirely different.

Manipulation and estimations could be used with this method, but the accuracy of the results may be highly questionable.

Perhaps a more accurate method is one that is sometimes used by architects and planners, which uses specific ratios to calculate parking needs. For students, the ratio of 1 to 0.2 is used. For full-time equivalent staff (FTE) the ratio of 1 to 0.9 is used.

This method results in the estimated needs as shown in the following table:

	<u>Headcount</u>	<u>Ratio</u>	<u>Needed Spaces</u>
Credit hour students (fall 2018 headcount)	2,943	x 0.2 =	589
Non-credit hour students	1,200	x 0.2 =	240
FTE staff *	223	x 0.9 =	<u>201</u>
			1,030
*164 Full-time staff		÷ 1 =	164.00
29 Part-time support staff		÷ 2 =	14.5
<u>177</u> Adjunct faculty		÷ 4 =	<u>44.25</u>
370			222.75

Prior to the construction of the Career Technology Center, the College was faced with two specific parking concerns. One was growing enrollment (which reached its peak in the fall of 2010). The other was the fact that two-thirds of the parking is in lots located on the northern end of campus, while the majority of buildings were located at the southern end. In addition, projected usage of the La-Z-Boy Center created a need for additional parking.

To address these problems, in the summer of 2005 the College constructed a new parking lot: Lot #7. This lot contains 144 parking spaces and is located between the West Technology Building and Raisinville Road. This lot addressed all parking capacity concerns for the Main Campus at that time. With the opening of the Career Technology Center for fall 2013 classes, parking needs for students have shifted toward the largest lots on main campus.

Pedestrian circulation consists of typical campus walkways connecting building and parking lots in a fairly direct manner. Circulation through the main quad at the south end of campus focuses around a central paved plaza surrounding a raised planted area. A number of these walkways have been replaced or redesigned in recent years to replace deteriorated walks and to create more pleasing circulation paths.

Site and directional signage for vehicular and pedestrian traffic is under constant review. When all exterior signage was replaced several years ago, large building letter signs were added to each building to assist visitors and students with building identification. Also, at that time, two kiosks identifying the location of all campus building were added. A third directional kiosk was added with the construction of Lot 7. Campus way finding continues to be a concern, however, and signage remains a topic of review and improvement.

Whitman Center

Access to the Whitman Center is from a single divided entry off of Lewis Road. This access road leads to the front of the building and divides the two parking lots. Pedestrian circulation consists of a main walk leading from the parking lot to a central entrance and two secondary entrances, one at each end of the L-shaped building.

Parking is provided for approximately 250 vehicles. The purchase of an additional 14.5 acres was made partly to address the need for additional parking if the building is ever expanded.

Facility Analysis

MCCC opened its campus doors to students in 1968 and is currently comprised of sixteen facilities on the main Raisinville Road Campus and two on the 25-acre Whitman Center property in Bedford Township.

The facilities at Monroe County Community College are routinely reviewed, including an annual insurance appraisal and an assessment of deferred maintenance conditions throughout campus. The results of these investigations are included in this document to present a clearer picture of the condition of the campus.

In FY2014-15, the Board of Trustees authorized a \$16 million HVAC replacement project on main campus that included a geothermal heating and cooling system for the majority of the main campus buildings. The College borrowed funds to meet this financial obligation in December 2015 and construction began in January 2016. On August 20, 2017, the College formally recognized the switchover to this energy-efficient and earth-friendly geothermal system. The geothermal-based system will result in significant energy cost savings for MCCC, has a 50-year lifespan on its well field that is double that of a conventional system and will greatly reduce the college's carbon footprint. Five Main Campus buildings – the Audrey M. Warrick Student Services/Administration Building, Life Sciences Building, Campbell Learning Resources Center, and East and West Technology Buildings, which were all built in the late 1960s or early 1970s, are now being served by the new geothermal-based system.

With funding made available via the passage of the Maintenance and Improvement Millage in November 2016, the college began work on its first two projects in May 2017. The projects included masonry repairs and sunshade replacement to the exterior of the Life Sciences Building and an approximate 2,500 square foot addition to the Life Sciences Building to add student collaboration space to the building. These projects were completed in May 2018.

Previous construction and renovation projects that received matching State funding required the sale of bonds by the State to finance their portion of the funding resulting in College buildings and property being pledged as collateral. The West Technology Building, Campbell Learning Resources Center, La-Z-Boy Center, and the Career Technology Center are obligated to the State Building Authority as part of this construction and renovation work. Once the bonds are paid, all property will revert to full ownership by the College.

A majority of the buildings on the main campus are earth-toned brick buildings with muted trim, all of which are structurally sound. These buildings are indicated in the following table:

Facility	Area (sq. ft.)	Year Built
Main Campus		
Campbell Learning Resource Center	52,369	1968
Warrick Student Services/Administration	72,219	1968
Life Sciences	63,488	1972
East Technology	28,523	1968
West Technology	32,180	1968
Welch Health Education	50,700	1997
La-Z-Boy Center	53,329	2004
Career Technology Center	60,377	2013
Power Plant	9,394	1968
Boiler House	2,184	1978
Boiler House 200	2,184	1978
Boiler House 300	1,924	1978
Maintenance Butler Building	1,500	1980
Technology Butler Building	1,830	1983
SAE/Construction Building	1,067	2005
Salt Storage	400	1999
Subtotal	433,668	
Whitman Center Campus		
Whitman Center	17,650	1991
Garage	540	1991
Subtotal	18,190	
TOTAL	451,858	

INSTRUCTIONAL PROGRAMMING

Much of the information regarding instructional programming is available in the College Annual Report. The 2016-2017 Annual Report is included in this planning document.

Service Areas

Monroe County Community College's tax base is located in Monroe County, and this is the primary focus for its service area.

Program Offerings

In keeping with the programmatic goals set forth in the mission documents, Monroe County Community College offers the following programs:

Transfer/University Parallel/Pre-Professional Programs

The university parallel and pre-professional programs are designed for the students who will eventually finish their education at a four-year college or university. Credits earned in the parallel or pre-professional programs are generally transferable to four-year colleges or universities if the credits meet the following criteria:

1. Satisfactory grades. Grades of "C" or better are necessary for a student to transfer the course to most colleges or universities.
2. Proper selection of courses. A student must select courses designed for college transfer that are consistent with the requirements of the school to which the student plans to transfer. Since no two schools have identical requirements, students should consult with their faculty adviser or counselor to discuss any questions regarding specific programs.

Students following a transfer guide provided by a particular four-year college can complete the first two years of a baccalaureate program at MCCC. In addition, students fulfilling appropriate graduation requirements of Monroe County Community College will be eligible to receive an associate degree.

Career/Occupational Certificate and Degree Programs

Individuals completing a prescribed course of study in one of the career program areas will receive an Associate of Applied Science or Associate of Commerce Degree.

Individuals who wish to upgrade their knowledge and skills or prepare for new areas of employment may choose from a wide variety of source offerings. Special sequences of courses may be designed to meet these objectives.

The following is a list of career/occupational degree and certificate programs available:

<u>Program</u>	<u>Degree</u>	<u>Certificate</u>
Accounting	•	•
Administrative Office Assistant		•
Administrative Office Specialist		•
Office Administration Software Specialist		•

Administrative Professional	•	
Agriculture	•	
Automotive Engineering Technology	•	•
Automotive Service Technology	•	•
Business Management		•
Entrepreneurship		•
Computer Information Systems:		
Accounting/CIS	•	
App Development	•	•
Computer Science	•	
Cybersecurity and Information Assurance	•	•
PC Support Technician	•	•
System Administration Specialist	•	•
Construction Management Technology	•	
Residential and Light Commercial		
Construction		•
Heavy and Industrial Construction		•
Criminal Justice/Law Enforcement	•	•
Culinary Skills and Management	•	•
Early Childhood Development	•	•
Electrical Engineering Technology	•	
Fine Arts	•	
General Technology	•	
Graphic Design		
Computer Graphics-Basic		•
Digital Media-Basic		•
Digital Media	•	•
Illustration-Basic		•
Illustration	•	•
Web Design-Basic		•
Web Design	•	•
Mechanical Design Technology	•	•
Mechanical Engineering Technology	•	
Metrology and Quality Technology	•	
Metrology Technology		•
Quality Technology		•
Non-Destructive Testing		
Basic		•
Advanced		•
Nuclear Engineering Technology	•	
Nursing, Practical		•
Nursing, Registered	•	
PN to RN Program Option	•	
Phlebotomy Technician		•
Product and Process Technology	•	
CNC Technician		•
CAD/CAM Technician		•
Renewable Energy		

Solar Energy	•
Wind Energy	•
Respiratory Therapy	•
Teacher Paraprofessional	•
Welding Technology	•
Basic Welding	•
Advanced Welding	•

Certificate Programs

A certificate of completion will be granted upon completion of certain specialized certificate programs. Certificate programs are listed in the career program listing.

MACRAO Agreement

Students who started prior to fall 2014 may complete the MACRAO Agreement until the end of the summer 2019. Following is the agreement:

The MACRAO agreement is an agreement between Monroe County Community College and many Michigan four-year institutions. Depending upon the institution and the program, satisfying the requirements of this agreement could allow a student greater flexibility in meeting general education requirements at the four-year institution.

- 6 semester hours of English composition
- 8 semester hours of Humanities (courses must be taken in more than one discipline and must not include English Composition)
- 8 semester hours of Social Science (courses must be taken in more than one discipline)
- 8 semester hours of Natural Science: 1) At least one science must have a lab, 2) One of the sciences may be Math (151 or above), 3) Science courses must be from more than discipline

Fifteen of the 30 credits must be completed at Monroe County Community College.

Courses, which are not transferable, (i.e., technical, vocational, or developmental) are not part of the agreement.

New Michigan Transfer Agreement (Beginning Fall 2014)

In 2012, the Michigan legislature included language in the community college appropriations bill calling for improvement in the transferability of college courses between Michigan colleges and universities by revising the MACRAO Agreement. The Michigan Transfer Agreement has been created in an effort to increase the transferability of lower level general education courses across all Michigan's public institutions. To fulfill the Michigan Transfer Agreement, student must successfully complete at least 30 credits, with at least a 2.0 GPA in each course. These credits should be met according to the following distribution:

- 1 course in English Composition
- A second course in English Composition or 1 course in Communications

- 1 course in one of the following Mathematics pathways: College Algebra or Statistics or Quantitative Reasoning or an upper level course in one of these subject areas
- 2 courses in Social Science (from two disciplines)
- 2 courses in Humanities and Fine Arts (from two disciplines and excluding studio and performance classes)
- 2 courses in Natural Sciences including one with laboratory experience (from two disciplines)

If these courses do not add up to 30 credit hours then the student must take an additional course from one of these groups. One of the above courses must be completed at Monroe County Community College.

Bachelor's Degree Completion Programs

2 + 2 and 3 + 1 Agreements

Monroe County Community College has developed articulation agreements with a number of four-year colleges and universities. These agreements (sometimes called bachelor's degree completion agreements) provide students who are pursuing one of Monroe County Community College's specific two-year associate's degree programs an opportunity to continue their studies and complete the requirements for a baccalaureate degree. The 2 + 2 agreements provide that the student will be able to transfer a minimum of 60 semester credit hours from one of Monroe County Community College's associate degree programs toward selected bachelor's degree programs at the four-year institution. The 3 + 1 agreements are similar but give students the opportunity to transfer more than 60 credits of MCCC coursework for specified degree programs at four-year institutions.

Siena Heights University and Spring Arbor University teach classes at MCCC. SHU has an office on the College's main campus and uses college classrooms and labs to offer classes at the junior and senior level for bachelor's degree programs. SAU has offices at the Whitman Center and uses college classrooms and labs at the Whitman Center to offer classes.

Joint Programs

MCCC has cooperative agreements allowing students to complete components of certain programs at the college and the remainder of these programs at participating community colleges.

Dual Enrollment Programs

State sponsored dual enrollment programs are offered to local high school students as an opportunity to begin their college studies while still attending high school.

Monroe County Middle College

The Monroe County Middle College is a partnership between the Monroe County Intermediate School District (MCISD), Monroe County Community College, and Promedica Monroe

Regional Hospital and is designed to provide students with early entry into a health careers program.

Students enter the Monroe County Middle College in the 9th grade with a comprehensive curriculum that will culminate with award of a high school diploma upon graduation. Students in the program also have the opportunity to earn up to 60 transferable college credit hours or an associate's degree and/or a certificate in the field of health science.

Distance Learning Initiatives

MCCC also offers a number of courses through electronic means, including a web-based curriculum. The College utilizes Brightspace Course Management Software for web-based courses. The College is a member of the Michigan Community College Virtual Learning Collaborative. Through this and other systems used by the College, students at MCCC have access to courses offered by other colleges, while students not attending MCCC have access to numerous programs at the College.

Online courses are available in both credit and lifelong learning programs.

Corporate and Community Services Programs

The basic mission of the Corporate and Community Services Division is to provide a variety of educational opportunities to adults within the College service area. Courses and programs are designed in response to expressed community needs, interest of individuals and groups, needs of business and industry, as well as demands for enrichment and recreational activities. The CCS Division serves about 4,000 non-credit students annually.

The CCS Division provides work force training programs, offering education to area business and industry, often at the business site. CCS personnel are regularly involved in integrated programs with the Chamber of Commerce, Monroe County Business Development Cooperation, and a variety of local and state agencies and organizations dedicated to economic development activities.

Community service programs and activities are an on-going part of the Division. Community services programs include a wide-range of programming that reflects the diverse interests of the community.

The Lifelong Learning Office provides educational opportunities for adults in a wide range of non-degree programs. It renders services to individuals and groups having needs that can be more adequately satisfied by short informal educational projects and activities rather than by traditional courses.

STAFFING AND ENROLLMENT

Student Body Composition

Based on demographic data collected by the College for the fall 2018 semester, the typical Monroe County Community College student has a mean age of 22.9, resides in Monroe County (87%), attends as a part-time student (72%), and is enrolled in a transfer program (59.2%).

Detailed demographic data on the student body composition is contained later in this document in the Student Profile section.

Enrollment Trends and Projections

Enrollment for the fall 2018 semester produced a 5.7 percent decrease in headcount (2,943) over the previous fall (3,122), and a 5.8 percent decrease in credit hours (23,942 as compared to 25,404). Fall student enrollment has declined for the eighth time in 10 years. The enrollment decline is not unique to MCCC as the Michigan Association of Collegiate Registrars and Admissions Officers' report on community college enrollment shows 25 community colleges with negative headcounts. Lower fall enrollments are also the case with the neighboring Ohio institutions.

Barring a few exceptions, class size is usually limited to 30 students per class. Currently, the College is able to handle its existing population, but scheduling demands can sometimes make this difficult on certain days and at certain times. Some scheduling changes can be made to increase the number of students per section, but limiting the number of available sections in an attempt to improve efficiency will likely prove counterproductive as many class times are scheduled to meet scheduling needs of students. If classes are not offered at certain times, students are sometimes unable to take the class at a different time.

Staffing Levels and Projections

Monroe County Community College currently employs 164 full-time staff: 62 faculty, 46 support staff, 24 administrative, 12 professional, and 20 maintenance. In addition, there are approximately 150 adjunct faculty, 32 part-time support staff, and 100 student assistants.

Full-time faculty teach approximately 54 percent of all sections. The full instructional load for full-time faculty is approximately 16 contact hours per semester, or 480 student contact hours (30 students max/class x 16 contact hours).

SPACE DEMANDS AND PROJECTIONS

Instructional Space

Monroe County Community College has available at the main campus a total of 86 classrooms comprised of:

- 37 general-purpose classrooms (some also double as conference rooms)
- 15 conference rooms (some also double as classrooms)
- 2 lecture halls
- 10 science labs
- 11 computer labs
- 12 technology labs
- 3 health sciences labs
- 2 art classrooms
- a culinary arts kitchen, a small performance theatre/lecture hall, a distance learning classroom, a fitness center, a childcare lab, an aerobics/dance studio, a gymnasium, a band rehearsal room, and a 500 seat theater/auditorium.

The Whitman Center has available nine general-purpose classrooms and a multi-purpose lab.

Long term recommendations (beyond five years) are that the College plan for future growth by creating “placeholders”, or specific locations for future development. This will ensure that space remains available when it is needed because of added programs or increased enrollment.

In conjunction with creation of additional classroom space, the College has determined that existing classroom space should also undergo the updates necessary to improve teaching effectiveness. Technology needs at the College for student learning continue to grow at exponential rates. Such needs can be found not only in every classroom and lab, but have permeated outside the walls of the classroom into hallways, the cafeteria, and lobbies, as the demand for individual and group study areas that offer and support technology need to be addressed.

In doing so, three apparent areas of need have surfaced. The first is systems need. This is the various technology systems that are needed at this point in time, at this campus, to provide the most effective and efficient support and delivery for student learning. The second is the infrastructure needed to support these systems, including items such as lighting, electrical power, acoustics, and flexibility. The third factor is the human resources that will be needed for systems training and support.

To address these critical needs of space, new curriculums, and changing technology the College constructed a Career Technology Center and will perform major renovations to current buildings in the future.

Support Spaces

Campbell Learning Resources Center

The main floor of the library was totally renovated in 2000 to upgrade facilities and technology, creating a modern learning resources facility. The Learning Assistance Lab on the second floor was renovated in the summer of 2005. In 2009, technology upgrades were made to classrooms in the Campbell Learning Resources Center.

Warrick Student Services/Administration Building

The Warrick Student/Services Administration Building currently houses most of the student services in a traditional, departmental fashion. In order to provide a simpler interaction between students and College services, a reorganization of departments into a One-Stop Shop model is something the College might explore for the future. This model would allow students to deal with fewer locations throughout the entire Admissions / Registration / Financial Aid / Cashier process.

To improve operational efficiency, to better identify the services offered, and to make the areas more welcoming, renovations did take place in 2009 in the Admissions/Counseling/Registration area.

The building did have an added wing in 1988 to provide office, classroom, and conference room spaces.

The building also houses a kitchen for culinary instruction (built in 1988), a bookstore (renovated in 1990), a student activity area (renovated in 2000), and a cafeteria (kitchen and serving areas renovated in 2002). In 2005, a variety of other offices also underwent renovations, including payroll and accounting, mailroom, accounts payable, human resources, and campus security. In 2009, work was completed on renovations to the Admissions/Registrar offices as well as the adjacent entryway and hallway. In 2014 due to water remediation issues, renovation was done to a student activity area in the basement.

Welch Health Education Building

The Welch Health Education Building, completed in 1997, provides state-of-the-art space for Nursing, Respiratory Therapy and Physical Education Program classrooms and laboratories, a multi-purpose room, a dance/aerobics studio, and a fitness center.

The facility is located at the north end of the site. The site to the east of the building is not currently landscaped and, with proper drainage systems installed, would be a prime candidate as a placeholder for any outdoor athletic fields and additional parking.

La-Z-Boy Center

A 53,700 square foot, \$12 million, multi-use Instructional Center for Business Training and Performing Arts (La-Z-Boy Center and Meyer Theater) was completed in 2004. This facility houses a 500 seat auditorium with full support facilities, a pre-function assembly space, a multi-

purpose lecture hall, dividable classrooms and rehearsal spaces, a computer classroom, offices for the Corporate and Community Services Department, choir and band rehearsal rooms, a scene shop and dressing rooms.

Training for existing and new industries has become a priority, and appropriate facilities are required to effectively meet the expressed need. Cultural development has been a long-standing component of the College Mission, and construction of the facility completes the original campus plan, which called for a facility to house many of these functions. This building, while designed as a conference center, enables the College to contribute to the cultural arts – a true example of a liberal arts approach to economic development.

The building is located at the northwest corner of the Quad with the main entrance facing the existing parking lot #2 and a student entrance facing the Quad. This location was chosen to help complete the enclosure of the Quad, create a highly visible presence from Raisinville Road and to take advantage of the available 519 parking spaces in lot #2.

The College received funding from the State for 50 percent of building costs. Two million dollars of the College's \$6 million match was gifted by the La-Z-Boy Foundation. Hence, the building was officially named the La-Z-Boy Center.

Career Technology Center

A 60,425 square foot, \$17 million, Career Technology Center was completed in 2013. This facility houses the classrooms and labs in support of the Applied Science and Engineering Technology Division.

The Career Technology Center was designed to support the delivery of instruction necessary for developing the skill set required by today's high-demand, high-skill jobs. The facility will allow for expansion of existing programs in the areas of nuclear engineering, welding, construction, computer-aided drafting and manufacturing, electronics, quality assurance and automotive engineering and service with an emphasis on hybrid and battery technology. In addition, it provides the infrastructure and equipment required to develop technology programs in the emerging areas of advanced manufacturing, renewable energies (wind, solar, fuel cell technology) and sustainable green technologies.

The building is located between the Life Sciences Building and the Welch Health Education Building facing parking lot #2. This location was chosen to create a more cohesive campus footprint thus eliminating what many felt was a large separation on main campus between the majority of buildings on main campus and the Welch Health Education Building.

The College received funding from the State for 50 percent of building costs. A capital campaign in support of the project raised \$2.4 million in support of the facility.

Whitman Center

The Whitman Center provides general purpose instructional space and a multi-purpose lab in a building that was planned for expansion from the end of each wing. Current enrollment does not justify expansion of the facility. This will, however, be a topic of continued review and

monitoring, possibly resulting in a recommendation of building expansion and additional parking in the future should enrollment growth dictate a need for such expansion.

Life Sciences Building

In winter 2018, the College officially opened new student collaboration space added to the Life Sciences Building. This 2,570 square foot addition was designed to foster student collaboration and provide students with much needed space for interaction, study, and relaxation. Exterior structural repairs were also made to the building including the installation of a modern exterior façade system.

East and West Technology Buildings

Currently in the design and development stage, a major renovation and addition project is underway for the East and West Technology Buildings. The twin buildings will be combined into one to house numerous services geared toward student success, state-of-the-art classrooms and computer labs, an abundance of adaptable student collaboration spaces, and several college departments. This \$9 million project is funded in part by State of Michigan Capital Outlay funding (\$3.75 million). A fall 2018 groundbreaking is planned.

Survey Summary

The input of faculty and staff was enlisted through past surveys to assist in the planning process in uncovering trends, needs, successes and deficiencies that the Master Plan would need to address. The responses were useful in confirming that the priorities the College was pursuing for future growth were in line with needs of the users.

In general, respondents felt that the College was above par in its programs and in producing a pleasant, relaxed and open place. Recent surveys of staff and students indicate a high level of satisfaction that the campus is well maintained, safe, and secure.

Need for updates to existing classrooms and laboratories were voiced as a common concern. This included updates to classroom environment, such as improved HVAC, lighting and acoustics to provide better conditions for learning. There was also repeated mention of a need for flexible classroom design that would be adaptable to a myriad of teaching techniques. In a staff survey (July 2007 Budget Updates Survey), 81 percent of respondents indicated that they believed the campus facilities and grounds needs were being adequately addressed.

Summary - Challenges

Based on the research, analysis and synthesis outlined in the previous pages, the following challenges were developed. These challenges are vital in creating the “problem” to be solved, acting as catalysts to the thinking process that takes place throughout the entire master planning process. Often these challenges drive discussions among the members of the Master Planning team, bringing undiscovered challenges to light and producing a more cohesive final product.

The main challenges faced by Monroe County Community College as part of the development of a Master Plan are as follows:

- **Facilities Condition**
 - Building exteriors and physical structures are an ongoing challenge as they age
 - Aged and outdated HVAC and other operational systems
 - At end of life, malfunctioning
 - Unable to meet demands, especially from computer heat loads
 - Electrical capacities
 - Outdated classrooms
 - Technology, furniture, finishes, equipment, acoustics, lighting, accessibility
- **Programs**
 - Need for modern facilities for technology programs (addressed through construction of Career Technology Center)
 - Need for additional lab and classroom space for health programs
 - Limited space for Culinary Arts program
- **Barrier Free Accessibility**
 - Learning Assistance Lab on second floor, difficult to access
- **Student Support Services**
 - Located in several areas, some not easily accessible
- **Growth**
 - Update placeholders
 - Future project sites
 - Building additions
 - Whitman Center
- **Site**
 - No athletic fields

Many of these future facility needs, as well as their projected costs, can be found in the Maintenance and Replacement Fund section.

Solution Criteria

Before master plan solutions are developed to address the above list of challenges, certain criteria are agreed upon to act as litmus tests for each solution to successfully pass.

Similar to architectural guidelines that provide a framework for future facilities that ensures a common theme among buildings; these planning guidelines ensure that any proposed solutions all adhere to a common theme, helping to avoid planning conflicts.

Following is a list of the solution criteria that was used to measure each proposed solution:

- Should physically support the College Mission Documents and Strategic Plan.
- Should improve student retention and assist in marketing the College to prospective students.
- Should address technological changes and the need for technology flexibility.
- Should provide classroom flexibility for different users and teaching methods.
- Should simplify student and visitor interaction with the College.

MASTER PLAN

At this stage of the master planning process, the vision for the College and the needs dictated by the programs are translated into physical projects based on the opportunities available within the attributes and constraints of the facilities and site. This is the point where the needs, desires and abstractions of the program take on structure and purpose, creating a blue print for the future development of the College.

When potential and expanded facilities are organized on the site, the Master Plan provides placeholders for future projects – an overall scheme ensuring that any new building will be well integrated into the whole campus, with forethought to the infrastructure needed to support that facility.

Phase 1 2009-2011

Deferred Maintenance

The College has made a priority over the last several years to address issues of deferred maintenance throughout the campus. This included completion of re-roofing all campus buildings, replacement of all parking lots, replacement of emergency alarm systems, retrofitting all interior lighting, replacement of its energy management system, and maintenance work on several HVAC systems.

Three years ago, the College completed its second college-wide facilities assessment, resulting in a prioritized list of building systems requiring attention. As part of the assessment, an easily updateable database was created, allowing the College to monitor and record systems condition and complete repairs. This assessment and database, with detailed facilities conditions and associated repair and/or replacement cost was performed by SHW Group and is included in this document. Examples of items requiring repair and/or replacement include:

- Isolated HVAC problems throughout campus, including air leakage, condensation and systems unable to meet increased cooling loads.
- Non-functional site lighting, due to deterioration of underground conduit.
- Deterioration of building entries.
- Electrical systems operating at maximum capacity.
- Original galvanized piping deteriorated to the point of replacement.

(A more comprehensive list of such projects can be found in Appendix 6, *Maintenance and Replacement Fund*.)

The College intends to continue its efforts toward improving the condition of the facilities throughout the campus, repairing and replacing systems as necessary to avoid the potential complications and exponential costs associated with deferring needed maintenance.

Renovations and Updates

A separate component of facilities upgrades, renovations and updates fall under the category of capital improvements. These recommendations were placed in this first phase, as they are essential in providing the flexibility and technology required by current and future teaching needs.

Capital improvements of this type are also essential in marketing the College to students, business and industry in a highly competitive environment. This is an essential, but often overlooked part of attracting and retaining students and business partners.

Observation of classrooms, labs and equipment, and information collected from surveys indicate that the College needs to continue its efforts to improve the physical learning environment in all departments.

Many existing general classrooms are in need of technology and environmental upgrades to meet the needs of current technology and teaching methods. In the majority of College buildings, these improvements include:

- Upgraded HVAC systems to improve acoustics and allow for better control of temperature in each classroom.
- Improved technology support, including lighting and window shading designed for intensive multimedia equipment use.
- Upgraded finishes (carpeting, ceilings, whiteboards) and furniture.
- Integration of new teaching delivery technology into classrooms. These upgrades would include installation of wireless networks, low cost multimedia projectors and other classroom learning equipment.

Landscape and Site

In the summer of 2003, landscaping around the Welch Health Education Building was accomplished. Landscaping was one of the components removed from the plans when this building was constructed in 1997 to help in reducing costs. (A parking lot was the other major component.)

Also in 2002 was the construction of a 26' x 40' building that served as a garage and storage area for the College's SAE car and equipment, and a lab area for "dirty work" for construction classes. This is a heated, block building with two garage doors and is located to the south of the West Technology Building. With the construction of the Career Technology Building, this facility is now being used by the Maintenance Department for landscape equipment.

Much of the landscaping was also removed from the La-Z-Boy Center project to reduce construction costs. This work was completed in the summer of 2005 and 2006.

In 2006 a total of 184 ash trees were replaced on the Main and Whitman Center campuses.

In the summer of 2005, a plan to replace much of the campus sidewalks was initiated and implemented over the course of the next five years.

Career Technology Center

Technology has changed in leaps and bounds over the last forty years when the College was first built. Unfortunately, the College's facilities housing technology instruction have not been able to keep pace with these changes due to physical limitations, and building constraints, and the requirements of newer technology systems.

To address this need the College constructed a Career Technology Center. The new facility offers classrooms and labs in support of the Applied Science and Engineering Technology Division course offerings as well as business training contracted through the College's Corporate and Community Services Division.

With the opening of the Career Technology Center, vacated areas have been reviewed as possible spaces to address other facility concerns such as adequate classrooms and labs for the College's Information Assurance and Security Program, the Culinary Skills and Management Program, office and classroom space for the Monroe County Middle College, the consolidation of areas used for art instruction, and the relocation of the Learning Assistance Lab to ground level.

Phase 2 2011-2014

Whitman Center

In October 1999, the College purchased an additional 14.5 acres of property immediately to the west of the existing Whitman Center site. As the Whitman Center itself was designed for expansion on the existing site, the proposed use for the new property is to provide an additional buffer from surrounding properties and, most importantly, to provide additional parking, if needed.

If enrollment at the Center were to increase, MCCC, as part of Phase 2, would investigate the need for building expansion and additional parking at the Whitman Center.

Warrick Student Services/Administration Building Addition and Reconfiguration

In prior surveys and Master Plan Committee meetings, a desire was voiced to consolidate all student services in one location on campus. This consolidation would be in a One-Stop Shop format, leading students through the process of admissions, registration, financial aid and payment in fewer steps, rather than the current model of moving between offices and dealing with numerous personnel. The recommended changes would include:

- Potential relocation of the Learning Assistance Lab (LAL) to the East Technology Building, creating an assistance office that would be able to aid the student from entrance to job placement in the same location as other student services. An

alternate would be to locate the LAL to other available ground floor space on campus.

- Construction of an addition to the building in order to meet the logistical needs of a Student Services One-Stop Shop format is desirable. Such an addition should also take into consideration the consolidation of Business and Administration offices in order to more effectively address operation, and student and constituent access.
- Potential relocation and enlargement of the Bookstore.
- Potential relocation of Financial Aid and Cashiers Office to adjoining suites.

Phase 3 2014-2018

Athletic Fields

There has been considerable debate over the merits of outdoor athletic fields at Monroe County Community College. Concerns range from the need and projected use of athletic fields, to the ability of the soil to support athletic fields over the long-term without installation of sub-surface drainage system.

One point that cannot be disputed is the question of land availability. The Main Campus currently has enough property available in the immediate vicinity of the Welch Health Education Building to support numerous different athletic fields.

As part of Phase 3, it is recommended that the College undertake a study to determine the need of athletic fields and if the study warrants, proceed with planning, design and initial construction of athletic fields for sports determined as viable. This construction will include the additional parking necessary to support both the field and proposed future development (Phase 3 and beyond).

This recommendation is an example of what was described earlier as a “placeholder”, or a setting aside of land for a specific use to ensure that future development does not proceed without taking this use into account. Construction of these fields may or may not occur, but planning for this potential is prudent.

Construction would commence as needed, with the project phased in as funds became available. An alternative to funding solely by the College would be to share funding and use between the College and the community.

As the exact mix of potential athletic fields has yet to be determined, the level of planning at this point only indicates the most likely location for this project.

Warrick Student Services/Administration Building Addition and Reconfiguration

The second part of the proposed changes to the WSSA Building assumes the completion of the first group of recommended changes to this building and a demonstrated need for additional space. These recommendations are long term and will need review in future revisions of this Master Plan to determine their continued viability. These changes focus on three areas of the building:

Culinary Arts

The recently renovated Culinary Arts kitchen is able to meet current space needs, but will be unable to accommodate program growth without either additional space or additional sections (a difficult proposition to market to working students).

Student Lounge and Basement Storage

One issue that arose during the facilities walkthroughs is the difficulty physically handicapped students face in accessing the basement student lounge known as the “Cellar”. Recently renovated, this space is an attractive, multipurpose lounge with television, vending, a pool table and informal seating. Unfortunately, the only access for the mobility impaired is through the freight elevator located off the loading dock.

An immediate, but temporary solution is to convert the elevator and lobby to a more passenger-oriented and less freight-oriented space or, even better, to construct an exterior entrance.

Life Sciences Building Expansion/University Center

Although available space at the College is thought to be capable of accommodating projected program and enrollment growth for the next two to three years, it is prudent to plan locations where potential facility growth could occur.

The existing Life Sciences Building is the logical location to construct new classroom facilities for several reasons:

- Originally designed for expansion, the building is able to accommodate an addition in several locations.
- This building and the site immediately to the north are located closer to the majority of existing parking than any other potential sites on campus.
- Expansion of the building to the north would address one of the challenges laid out in this Master Plan – to draw the campus buildings closer together through improved building interconnection. The proposed addition would considerably reduce the outdoor travel distance between the Quad and the Welch Health Education Building.

The proposed addition to the Life Sciences Building consists of two parts, the first being development of a University Center. This facility type was considered in previous Master Plans

as a way of addressing the conferencing needs of business and industry as well as programs needs of four-year institutions wishing closer affiliation with the College.

Many of the business and industry and conferencing needs will be met in the La-Z-Boy Center. Offices and classroom for university partners, however, are still unaddressed in the currently available facilities.

The proposed University Center would, in its program, include the following:

- Technology intensive, distance learning enabled general classroom space available to both College and university programs.
- Office space for university partner administration and faculty.
- A new, much more open entrance and lobby facing Raisinville Road serving both the University Center and the Life Sciences Building.

The second part of this addition is an unprogrammed space to the north of the University Center. Potential uses for this space include:

- Additional general classroom space for University Center or College programs, if warranted by growth in this area.
- A permanent, state-of-the-art space for IT Department and computer classrooms. This would allow the IT Department to relocate from the basement of the Campbell Learning Resources Center into a space designed specifically for this use, eliminating power and HVAC problems that often arise when large computer systems are housed in older buildings. If a new technology building was to be constructed, it may be possible to relocate the IT offices to the vacated technology buildings, assuming those facilities would be renovated.

Long Range Priorities 2019

As part of the Master Planning process, ideas are considered and developed that, due to priorities and circumstances do not fit well into the scope of a five to ten year plan. The following projects are examples of ideas that should be recorded for future planning efforts.

Campbell Learning Resources Center Library Expansion

There is an understanding that the existing Campbell Learning Resources Center, specifically the library, may not always be able to adequately house the collection required by a modern institution. Unfortunately, between the design of this building and proximity of neighboring buildings, the CLRC becomes somewhat landlocked.

Several directions for expansion were considered for this building, with the final conclusion being that the best direction may be none at all. One solution to this potential problem would be

to relocate programs housed on the second floor and basement of the CLRC to other buildings, possibly including the proposed University Center or East and West Technology buildings that has been be vacated with construction of the Career Technology Center.

This would make available up to the entire second floor of the building to house a growing collection and new, as of yet undeveloped multimedia information delivery systems.

Welch Health Education Building Expansion

In order to pull the disparate parts of the campus closer together, any proposed expansion of the Welch Health Education Building would best be toward the south, in the direction of the main part of campus. Potential uses for the additional space, if warranted, may be as follows:

- Additional health education classrooms and labs.
- Racquetball courts.
- Indoor tennis courts.
- Early childhood education classrooms and child development learning labs.

Future Campus Expansion Zone

This is another placeholder, indicating the most likely location for as of yet unplanned campus facilities. Part of any development planning in this area should include additional parking, possibly in the format indicated on the site plan. Any detailed planning in this area should consider the potential for reorienting the main entry to campus, possibly locating it further north along Raisinville Road.

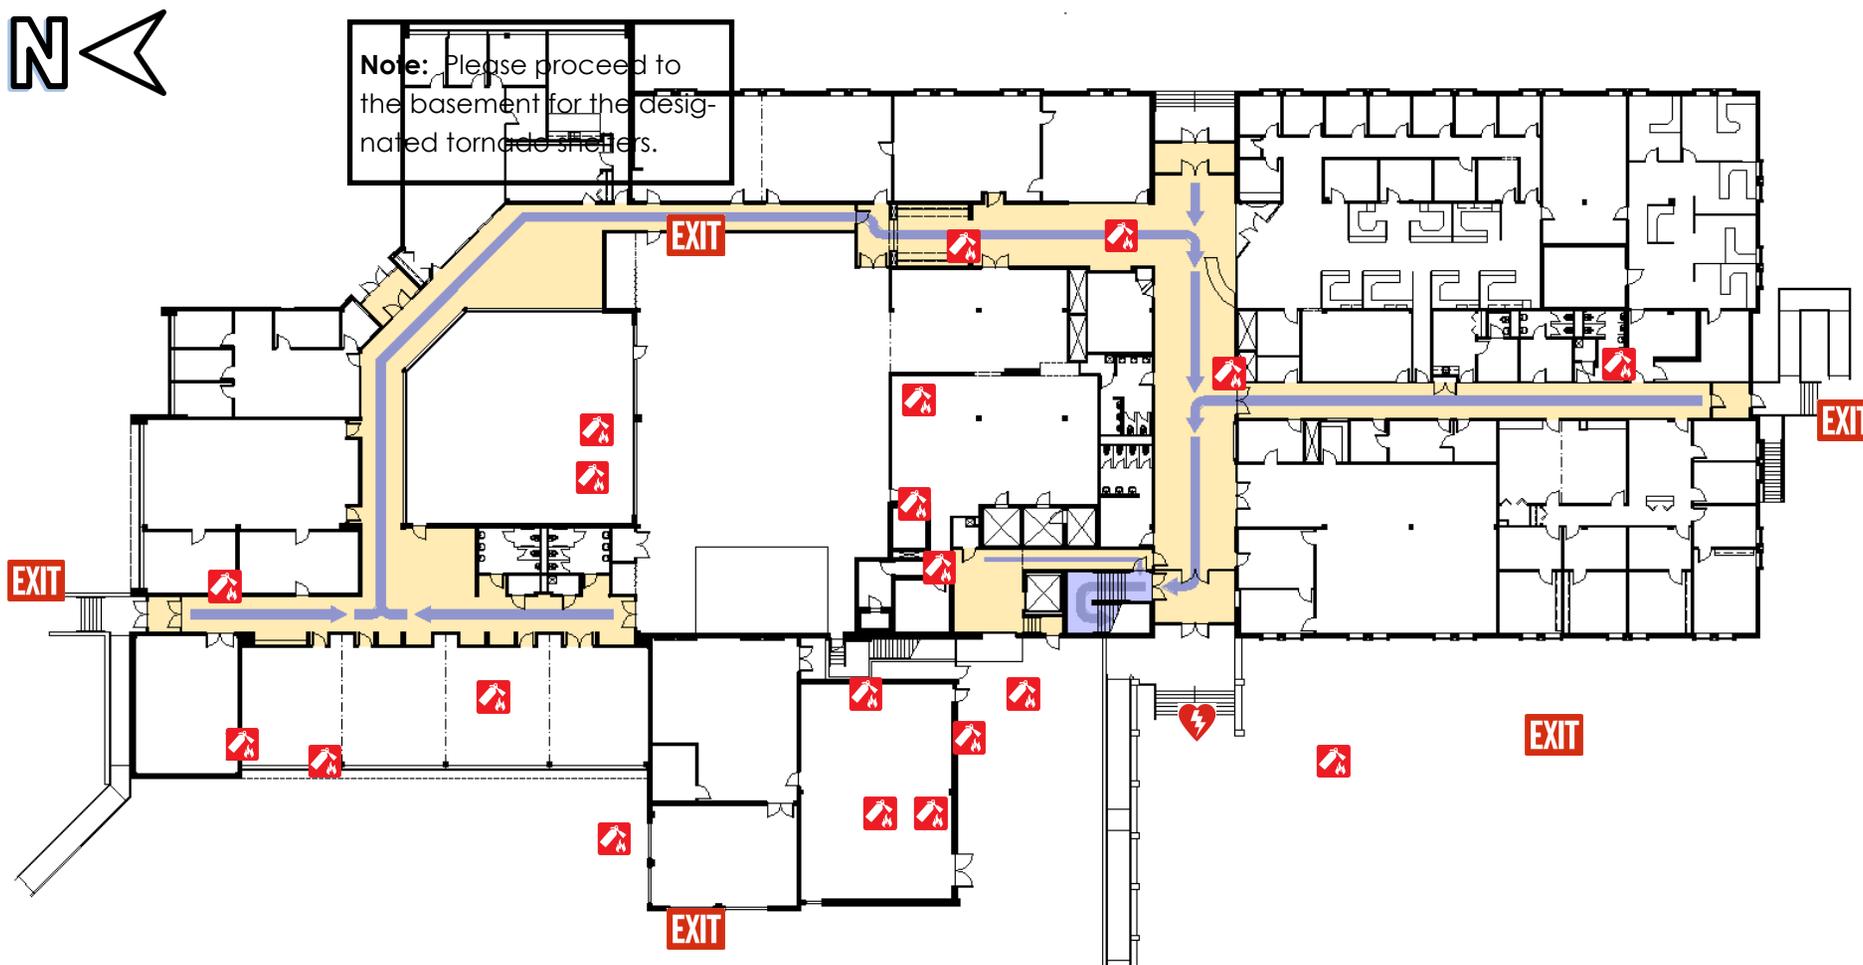

ARCHITECTURAL GUIDELINES

Architectural guidelines are an important part of a master plan, providing a design framework for future development. The goal is not to stifle creativity or the use of new materials or techniques, but to foster a harmony between existing and future facilities, thus avoiding a disjointed appearance that can easily occur on a campus built up over several decades.

Suggested architectural guidelines are as follows:

- New facilities should embrace sustainable design with the goal of meeting LEED certification.
- New buildings should compliment the scale of existing buildings, maintaining a story limit of fewer than five stories.
- Building materials, although not needing to exactly match, should not look out of place with the dominant facing material of earth-toned brick.
- Designs should add character to the campus, but not create architecture that is disparate to the whole campus image. In other words, a “signature building” should be read as the signature of Monroe County Community College.
- Building should not have a readily apparent backside, but address on all facades the adjacent use and context, and be oriented to compliment existing buildings and the surrounding landscape. This does not preclude well-defined building entries, which should use pedestrian-scaled detail and landscape to ensure easy identification.
- Interior finishes should be durable and low maintenance, but not overly hard and uninviting and strive for using renewable materials. Acoustics and lighting should be considered important in every space.
- Landscape materials should be a continuation of current plantings and should be as low maintenance as practical, emphasizing “broad brush strokes” of similar planting instead of numerous installations of mixed vegetation. Examples of groupings include trees evenly spaced along walks to emphasize pathways, trees planted as windbreaks, and selected vegetation planted to act as backdrops and to identify gathering spaces.
- Flowering annuals and other high-maintenance plants should be used minimally and only as accents to reduce maintenance requirements. Planting should emphasize indigenous vegetation over exotic species.
- Site lighting should be appropriately scaled for its use, emphasizing pedestrian-scaled fixtures wherever possible.
- Vehicular access roads should not cross pedestrian paths. These walkways should be easily identifiable from a moving vehicle, possibly through a change in material, to help improve pedestrian safety.

Monroe County Community College

▶ Annual Report
to the
Community

B u i l d i n g t h e F u t u r e

Building the Future

Work began in 2017 on major structural repairs and an addition to the Life Sciences Building.

RIGHT: Rendering of the renovated exterior.

ON THE COVER: Rendering of the interior of the new addition.

► **Building the Future.** These three words so perfectly capture the story of 2016-17 at Monroe County Community College. Last year, MCCC began to build not just its own future, but also the future of the community it serves.

The voters of our county approved a 5-year, .85-mill property tax levy for the college in November 2016 for maintenance and improvement needs, and MCCC immediately began work on five years of major renovations to ensure the quality of campus-wide facilities for decades to come.

In response to a need expressed by those in the community's farming industry, MCCC partnered with Michigan State University's Institute of Agricultural Technology to begin an agriculture program at the college in August. MCCC also responded to local industry needs by officially starting a new automotive service program that same month.

MCCC continued to improve local access to higher education by freezing tuition rates for county residents. The college also partnered with Spring Arbor University to improve access to higher education in the southern part of Monroe County; SAU began offering bachelor's and master's degree coursework at MCCC's Whitman Center in Temperance in fall 2016.

Also in 2016-17, MCCC made the transition from an outdated, conventional heating, ventilation and air conditioning system to a much more energy-efficient and earth-friendly geothermal-based system with a 50-year lifespan on its well field.

These are just a few examples of how MCCC – through the unwavering support of our community and dedication of our faculty and staff – is truly building the future here in Monroe County.

I invite you to turn the page to learn more about MCCC's accomplishments in 2016-17.

Kojo A. Quartey, Ph.D.
President

Building the Future

From beginning five years of major campus maintenance and improvement projects to starting new academic programs needed in Monroe County to forging partnerships to improve local access to higher education, MCCC is building the future for both the college and the community.

5-Year Maintenance and Improvement Millage Passes; Several Major Projects Begin

In November 2016, Monroe County voters approved an additional .85 mill property tax levy for maintenance and improvement projects at Monroe County Community College for a period of five years. Included are projects to enhance and improve safety and security, bring facilities up to standards for people with disabilities, update technology network infrastructure, renovate specific areas to maintain and improve the academic environment, and ensure and maintain the overall quality of campus-wide facilities.

Work began in the spring on major exterior structural repairs to the Life Sciences Building to prevent the eventual collapse of connecting masonry ribs. Fifty masonry panels were removed, each weighing approximately 8,000 pounds. The panels were designed to provide shade from the sun; they are being replaced with a modern exterior facade system that will more effectively serve this purpose.

Many campus buildings lack adequate, modern space outside the classroom for students to work both collaboratively and independently, and this issue will be addressed across campus through a number of millage projects. The first of these is an addition to the west side of the Life Sciences Building, which will include permanent seating areas and team workrooms where students can gather. It also will feature flexible furniture, ample technology, acoustics and lighting designed with collaboration in mind, a vending area and more. Construction began this summer.

Beginning in August, architects held open meetings with college employees and representative task forces to redesign and repurpose the outdated East and West Technology buildings, which will be combined to include a host of student services and instructional activities, as well as academic collaboration spaces and more.

5-Year Maintenance and Improvement Projects

Campus Wide

- Installation of a keycard door security system in all buildings
- Replacement of entire phone system
- Overhaul of security camera system
- Repairing of sidewalks
- Replacement of/upgrades to campus sound systems
- Repairing of parking lots
- Cell phone repeater system
- Performance of fiber optic loop redundancy work

Audrey M. Warrick Student Services/ Administration Building

- Installation of elevator that is accessible to students with physical disabilities
- Replacement of exterior ramps and steps at all entrances
- Installation of restrooms accessible to those with disabilities
- Replacement of flooring
- Painting
- Replacement of the roof
- Renovation of Bookstore and Administrative Suite for safety and security reasons
- Renovation of Admissions, Copy Center and Business Office areas for improved accessibility

- Renovation to the culinary program classrooms, kitchen and student-run restaurant
- Renovations to conference rooms to improve the learning environment
- Replacement of exterior sealants (joints and penetrations)
- Retrofitting of door hardware to meet Americans with Disabilities Act standards
- Installation of a fire sprinkler system
- Coating of interior of existing galvanized domestic hot and cold water piping
- Installation of an emergency lighting generator
- Replacement of/upgrades to network electronics
- Replacement of/upgrades to classroom technology

Campbell Learning Resources Center

- Improvement of accessibility from first-floor elevator to other floors
- Renovation of the Little Theater
- Adding of student study rooms
- Renovation of the second floor to improve the learning environment
- Renovation of the basement
- Waterproofing the basement
- Replacement of exterior sealants (joints and penetrations)

- Retrofitting of door hardware to meet ADA standards
- Installation of a fire sprinkler system
- Coating of interior of existing galvanized domestic hot and cold water piping
- Installation of an emergency lighting generator
- Replacement of/upgrades to network electronics
- Replacement of/upgrades to classroom technology
- Replacement of/upgrades to wireless network

East and West Technology Buildings

- Combining of twin buildings into one to accommodate a wide range of student services, instructional activities, student collaboration spaces and more
- Renovation of classrooms previously used for skilled trades programs for general use
- Installation of restrooms accessible to those with disabilities
- Replacement of the roof on the East Technology Building
- Replacement of exterior sealants (joints and penetrations)
- Retrofitting of door hardware to meet ADA standards
- Installation of a fire sprinkler system
- Coating of interior of existing galvanized domestic hot and cold water piping
- Installation of an emergency lighting generator
- Replacement of/upgrades to network electronics

- Replacement of/upgrades to classroom technology
- Installation of permanent student lounge seating area

Health Education Building

- Replacement of exterior metal cladding system
- Replacement of exterior door/window framing system
- Addition of space and renovation of current space for possible program expansion
- Renovation of atrium for improved student interaction and learning

Life Sciences Building

- Performance of major exterior structural repairs to prevent eventual collapse of connecting masonry ribs
- Installation of restrooms accessible to those with disabilities
- Renovation of first and second floors to improve accessibility
- Addition of space to improve the learning environment
- Addition of student collaboration areas
- Retrofitting of door hardware to meet ADA standards
- Installation of a fire sprinkler system

- Coating of interior of existing galvanized domestic cold water piping
- Installation of an emergency lighting generator
- Replacement of/upgrades to network electronics
- Replacement of/upgrades to classroom technology

Physical Plant

- Renovation of storage facilities for grounds/maintenance purposes

La-Z-Boy Center

- Cleaning and sealing of exterior masonry
- Replacement of exterior sealants (joints and penetrations)

Whitman Center (Temperance)

- Performance of structural remediation work due to sinking support columns
- Renovation of current spaces to improve the learning environment, as well as safety and security
- Addition of a science laboratory
- Replacement of flooring
- Painting of entrance canopy
- Installation of an emergency lighting generator
- Installation of a keycard door security system (part of campus-wide project)
- Repairing of parking lot (part of campus-wide repairs)
- Cleaning and sealing of exterior masonry
- Replacement of exterior sealants (joints and penetrations)
- Replacement of window sills and sealants

CAMPUS FACILITIES NOW HEATED AND COOLED BY ENERGY-EFFICIENT, EARTH-FRIENDLY GEOTHERMAL SYSTEM

MCCC officials formally recognized the college's switchover from an outdated, conventional heating, ventilation and air conditioning system to a much more energy-efficient and earth-friendly geothermal-based system during a ribbon-cutting ceremony in August. The ribbon cutting was the culmination of a 2-year, \$16.1 million project financed by the college over 20 years that has completely transformed the way it heats and cools most of its buildings on its Main Campus, while providing major cost and environmental benefits. The geothermal-based system will result in significant energy cost savings for MCCC, has a 50-year lifespan on its well field that is double that of a conventional system and will greatly reduce the college's carbon footprint. Ameresco, Inc., a leading energy efficiency and renewable energy services provider, was the engineer and general contractor for the project.

Geothermal-based HVAC brings MCCC's buildings into harmony with the earth beneath by taking advantage of subterranean temperatures to provide heating in colder-weather months and cooling in warmer-weather months.

The college is guaranteed to reduce its previous yearly energy consumption by about 160,000 kilowatt hours annually and save about \$5.55 million in electricity, gas and water costs over the next 20 years. However, the system will likely save far more. According to Ameresco, MCCC will reduce its carbon emissions by 1,068 metric

tons per year. Based on the Environmental Protection Agency's Greenhouse Gas Equivalencies Calculator, the annual green benefit from this reduction each year is equal to 2.6 million road miles driven by an average passenger vehicle, 120,176 gallons of gasoline consumed or 1.14 million pounds of coal burned.

NEW AUTOMOTIVE SERVICE PROGRAM INTRODUCED

In April, MCCC officially introduced a new automotive service program and began recruiting students for Fall Semester. According to the Bureau of Labor Statistics, the automotive service technology employment outlook in Michigan will grow by about 11 percent by the early 2020s. MCCC expects to enroll between 20-35 students in the program annually.

The automotive service program is housed in the Career Technology Center, a \$17 million, 60,000-square-foot facility that opened in 2013 to deliver instruction and skills necessary to secure high-growth, high-demand and high-paying jobs. An automotive lab was built as part of the CTC to accommodate the planned new program, and nearly \$200,000 worth of equipment, such as tire service equipment, an alignment machine and hoists, was installed.

MCCC, MSU PARTNER TO MAKE AGRICULTURE PROGRAM AVAILABLE IN MONROE

In the spring, MCCC partnered with Michigan State University to launch an agriculture program that provides students with a solid background in plant and soil science, precision agriculture, agriculture management,

entomology, plant pathology and additional fundamentals of agriculture. Students can earn a certificate in agricultural operations and/or an associate of applied science in agriculture/ag operations.

The certificate, awarded by MSU, includes 34 credits of agriculture-oriented courses through the Institute of Agricultural Technology, combined with a minimum of 21 additional credits from MCCC to total 55 credits. The associate of applied science, awarded by MCCC, includes 34 credits offered by the MSU Institute of Agricultural Technology plus 19-20 general education credits and up to seven elective credits from MCCC to equal 60 total credits.

Graduates typically will find employment opportunities in:

- Equipment retail sales and service
- Farm operations
- Crop production management
- Production and agriculture service companies
- Crop and farm product processing facilities
- Agribusiness opportunities such as farm insurance, commodity marketing and farm supply businesses

MCCC, SPRING ARBOR WORK SIDE BY SIDE TO BETTER SERVE BEDFORD

Spring Arbor University relocated its Metro-Toledo site to Monroe County Community College's Whitman Center in Temperance and began offering classes there in the fall of 2016. The move provides the Bedford community with convenient and affordable access to associate, bachelor's and master's degree programs — all in one location.

Affordable, Personalized Instruction and Practical Application

At Monroe County Community College, the focus is on affordable, personalized instruction and practical application. MCCC students finish their studies at the college with little to no debt and are fully prepared to excel in the workforce and in further higher educational endeavors.

TUITION RATE FROZEN FOR COUNTY RESIDENTS

In 2017, MCCC froze the Fall Semester tuition rate at \$107 per billable contact hour for students who are Monroe County residents. "The Monroe County Community College Board of Trustees is committed to affordable, quality higher education in Monroe County, and attracting and retaining students is a top priority," said Board Chair Lynette Dowler. "With that, we unanimously voted for a 'zero increase' in resident tuition for Fall Semester 2017. We want MCCC to be the college of choice for county residents."

NEW AUTOMATIC SCHOLARSHIPS BASED ON COUNTY RESIDENCY AND ACT/SAT SCORES

MCCC introduced the Trustee Merit Scholarship Program in February 2016, and the first students to receive these automatic scholarships enrolled for Fall Semester 2017. The program provides automatic scholarships based on ACT or SAT scores for students who are enrolling full-time at MCCC for the first time or are recent high school graduates who have dual enrolled at MCCC. Students must be Monroe County, Michigan residents, and their

ACT or SAT scores can be no more than five years old. The scholarships are renewable for a second year based on satisfactory academic progress. Trustee Merit Scholarship award winners received awards that equaled between approximately one-third and one-half of tuition.

STUDENTS ATTEND INTERNATIONAL MANUFACTURING TECHNOLOGY SHOW

In fall 2016, MCCC students in the Applied Science and Engineering Technology Division attended the International Manufacturing Technology Show at McCormick Place in Chicago. The trip was made possible with funding from The Foundation at MCCC's Enhancement Grant Program, and allowed the students to learn first-hand from machine tool, welding, robotic, automation and instrumentation suppliers from around the world.

STUDENTS, COMMUNITY MEMBERS STUDY IN ITALY AND GREECE

In the spring, students and community members, led by MCCC faculty members, studied abroad in Italy and Greece, making stops in Venice, Florence, Assisi, Rome and Sorrento, Italy; the ancient Roman town-city of Pompeii; Patras and Athens, Greece, and the ancient Greek sanctuary of Delphi. The trip ended with a Greek

islands cruise. In conjunction with the trip, the following classes were offered: Global Business Marketplace in Mediterranean Europe, Poetry and Drama, and Comparative Politics. This was MCCC's sixth Study Abroad trip. Previous trips took students to Spain, Western Europe, Southeast Asia, Central Europe, Austria, Hungary, Poland and the Czech Republic.

GAINING EXPERIENCE WHILE TREATING THE COMMUNITY TO FINE DINING

The second-year culinary skills and management program students treated hundreds of community members to fine dining at MCCC's Cuisine 1300 restaurant in the fall and during a host of gourmet buffets in the spring under the direction of Chef Kevin Thomas and Chef Vicki LaValle.

Cuisine 1300, located in the Audrey M. Warrick Administration Building, is a fine dining experience open to the public by reservation only and includes fine cuisine at affordable prices. The buffets are ticketed events. Among the buffets offered in the spring were "Latin and South American," "Tropical Paradise" and "Foods of the Great Lakes State." Students design and prepare the menus for both the restaurant and the buffets.

INNOVATIVE PROJECTS THAT ENHANCE THE EDUCATIONAL EXPERIENCE

In April, The Foundation at Monroe County Community College announced the recipients of the 2017 Enhancement Grants Program awards. These awards assist faculty, staff and students by providing funding for the development and implementation of innovative projects that support the MCCC mission and enrich or improve the quality of education for students. A total of \$26,350 was awarded to 12 projects.

- **MCCC Prelude Children's Choir**, applicant Catherine Brodie, Agora Chorale and Prelude Children's Choir director
- **Michigan Nurses March**, applicant Denise Robinson, assistant professor of nursing
- **The Agora**, College Media Association National Convention, applicant Dan Shaw, assistant professor of journalism
- **One Book, One Community – Guest Speaker and Author**, applicant Cheryl Johnston, coordinator, One Book, One Community of Monroe County
- **Heart and Lung Dissection Presentations to Monroe County Elementary and Middle School Children**, applicant Bonnie Boggs, retired director of respiratory therapy
- **VEX Robotics Event**, applicant Michael Mohn, adjunct instructor and club advisor
- **Pride Prom**, applicants MCCC Gay/Straight Alliance and Dr. Melissa Grey, professor of psychology and club advisor
- **Constitution Day Show**, applicant Deminique Heiks, instructor of criminal justice
- **Global Studies Outreach**, applicant Dr. Joanna Sabo, professor of political science
- **FABTECH 2017**, applicant Stephen Hasselbach, instructor of welding
- **MiAEYC Early Childhood Conference**, applicant Felice Moorman, assistant professor of early childhood education
- **National Student Day**, applicant Amy Salliotte, administrative assistant to the director of purchasing and auxiliary services

POLITICAL SCIENCE STUDENTS ORGANIZE POLITICAL INFORMATION FORUM

Political science students at MCCC organized a political information forum for the 2016 election that provided an opportunity for students and community members to become familiar with candidates and issues on the ballot in Monroe County. A voter registration table was also available and staffed by student volunteers.

RESPIRATORY THERAPY CLUB ORGANIZES COMMUNITY FLU SHOT CLINIC AT MCCC

The 2nd-Year Respiratory Therapy Club organized and sponsored a community flu shot clinic in fall 2016 at MCCC. The clinic took place in the Gerald Welch Health Education Building, and anyone age 8 and older wishing to get a flu shot received one, including those without insurance. The flu shots were administered by a certified CVS pharmacist.

MCCC NOW A FANUC-AMERICA CERTIFIED CNC EDUCATION TRAINING FACILITY

Last year, MCCC became a FANUC-America Certified Education CNC (computer numerical control) training facility offering students industry-recognized credentials. Upon graduation, students are qualified to work in manufacturing with FANUC CNC equipment. FANUC America, headquartered in Rochester Hills, is a subsidiary of FANUC Corporation in Japan and provides industry-leading robotics, CNC systems and factory automation.

"FANUC America's Certified Education CNC Training program addresses the industry need for skilled workers," said Dean Steadman, education program manager at FANUC America. "Schools that offer a FANUC Certified Education CNC program provide qualified students the best possible training for high-tech careers as operators and programmers."

MCCC ACCOUNTING PROGRAM PARTNERS WITH IRS TO PROVIDE FREE INCOME TAX ASSISTANCE

In March and early April, Monroe County Community College's accounting program partnered with the Internal Revenue Service to provide Volunteer Income Tax Assistance (VITA) for low- to moderate-income taxpayers who needed assistance preparing their own tax returns. IRS-certified volunteers provided free, basic income tax return preparation with electronic filing to qualified individuals. The program was coordinated by faculty member Parnella Baul and MCCC accounting students. It was available one day a week in the Career Technology Center on MCCC's Main Campus.

Cultural Enrichment, Current Affairs and Diversity

Through course offerings, campus and community events, student and group activities and other initiatives, MCCC is committed to being a community hub for cultural enrichment, current affairs and diversity.

CULTURE AND CURRENT AFFAIRS SPEAKERS SERIES ADDRESSES VARIETY OF KEY TOPICS

MCCC'S Culture and Current Affairs Speakers Series, which features MCCC faculty, staff, students, alumni and community members with expertise on a variety of cultural, political or social topics of importance and interest, covered a wide variety of prevalent news items in 2016-17. Among the events were:

- "Protecting our Communities," a forum featuring Dave Uhl, a veteran law enforcement officer and Dundee village manager, and First Lt. Tony Cuevas of the Michigan State Police, Monroe Branch.
- "Protests During the National Anthem, Right or Wrong," a panel discussion that included Cathy Brodie, MCCC adjunct instructor and Agora Chorale director; Tinola Mayfield-Guerrero, adjunct instructor of sociology at MCCC and women and gender studies at the University of Toledo; Catina Polk, adjunct instructor of social sciences at MCCC; Dave Uhl, veteran law enforcement officer and Dundee village manager; former State Representative Bill LaVoy, and Robin West Smith, adjunct instructor of sociology at MCCC.
- A panel discussion on post-election healing in America that featured Pastor Heather Boone of Oaks of Righteousness Christian Ministries; Dr. James DeVries, MCCC board member and retired sociology and history professor at MCCC; Joel Fiedler, adjunct instructor of sociology at MCCC; Javed Peracha,

MCCC Student Government officer, and Robin West Smith, adjunct instructor of sociology at MCCC.

MCCC HOSTS MONROE COUNTY SHERIFF CANDIDATE FORUM

In November 2016, MCCC hosted a Monroe County Sheriff Candidate Forum featuring the two candidates for sheriff, Republican David W. Uhl and Democrat Dale Malone. It was moderated by Michelle Paled of Monroe County Radio.

CELEBRATING BLACK HISTORY MONTH

In honor of February as Black History Month, MCCC sponsored numerous free events. They included:

- "Women in Jazz and Notes at Noon," a presentation and musical performance by Galen Abdur Razzaq of Flute Juice Productions.
- African American Poetry Night, sponsored by the MCCC Writing Center.
- Notes at Noon - Bubba Wilson & Band.
- "The Role of the NAACP in Civil Rights," a presentation by NAACP representatives.
- "Black Progress in America," a panel discussion moderated by Dr. Kojo A. Quartey, MCCC president.
- "Demystifying Africa," a presentation by Quartey.

HONORING DR. MARTIN LUTHER KING JR.

Monroe County Community College celebrated the life of Dr. Martin Luther King Jr. and his contributions to racial justice and equality with a number of Diversity Week events in January. These included a presentation by MCCC President Dr. Kojo Quartey titled "Immigration Pros/Cons – A Discussion," a "We Shall Overcome" March Simulation, an "Increasing Diversity in Law Enforcement" presentation, a "Challenges of Poverty in the Black Community" presentation by retired MCCC faculty member Bob Leski, and a Diversity and Service Fair. As part of the Diversity and Service Fair, international dishes prepared by MCCC employees were available in the Admissions and Guidance Office corridor of the

Audrey M. Warrick Student Services/Administration Building. In addition, the Grade A Café, located in the same building, offered an "International Trio of Entrées."

STUDENTS BRING AWARENESS TO THE TENETS OF DIFFERENT FAITHS

In recognition of the International Day for Tolerance in November 2016, the students in MCCC's International Studies Club hosted a panel discussion on religion. Dr. Joanna Sabo, professor of political science, served as the moderator and opened the program with a discussion of the First Amendment. The goal of the panel discussion was to bring awareness about the tenets of different faiths. Panel participants represented faiths such as Catholic, Presbyterian, Lutheran, Greek

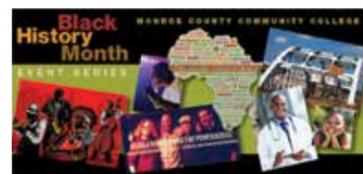

Orthodox, Islam, Hindu and Siddah Yoga. The MCCC International Studies Club promotes the study and awareness of other countries and cultural issues. Members participate in fundraisers, social events, campus awareness activities and field trips.

MUSIC, COMEDY AND MORE

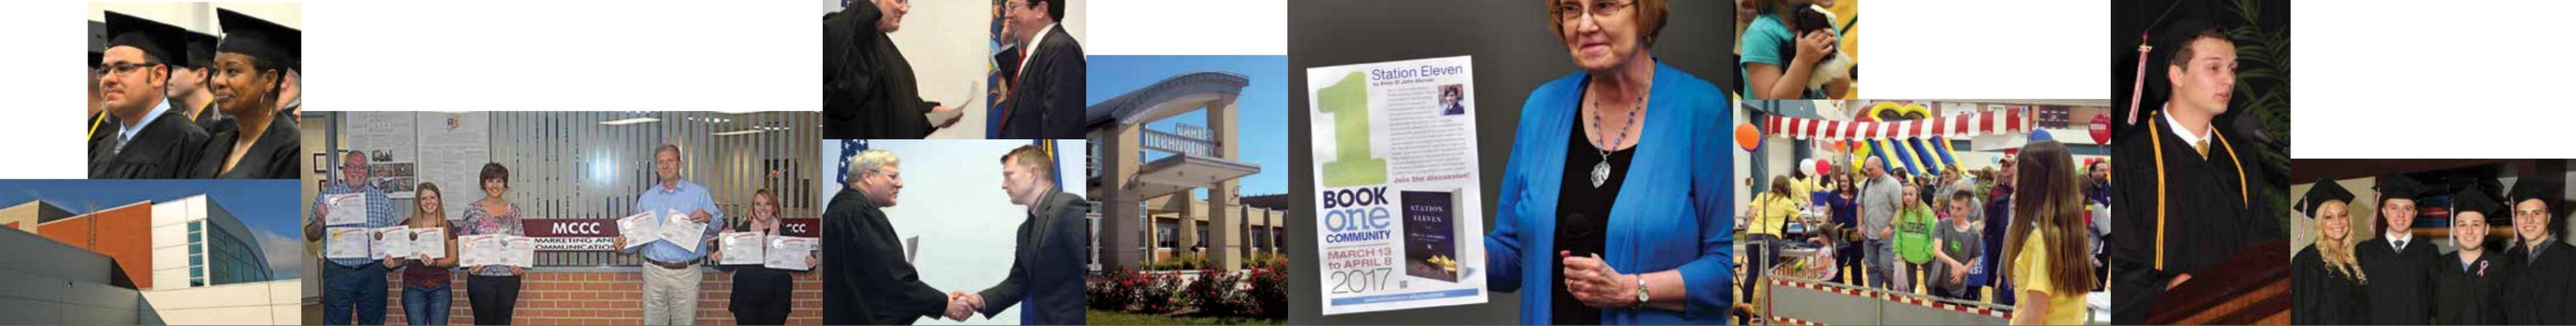

In 2016-17, MCCC hosted a diverse group of comedic, musical and special event performances, as well as other cultural and community events. Among them were acts such as Shenandoah, Bee Gees Gold, comedian Brad Wenzel, Classic Albums Live/The Beatles' "Abbey Road," the Dodworth Saxhorn Band, "Say Goodnight Gracie," and children's shows "Junie B. Jones" and "Miss Nelson is Missing."

VISITING ARTISTS SPEAK, DISPLAY WORK

MCCC hosted lectures and public displays by two visiting artists in spring 2017: Beatrix Reinhardt, a photographer whose work can be found in a number of corporate, museum, private and university collections across the U.S. and abroad, and Sharon Bladholm, who synthesizes art, science, nature and conservation in her work and has expertise in a variety of disciplines, including cast glass, bronze and ceramic in the sculptural realm, as well as stained glass, printmaking and works on paper.

Milestones, Partnerships and Events

As a community-focused institution, MCCC strives to make life and work more meaningful and rewarding for everyone we serve. However, this effort is never the product of a singular act; rather, it's the result of many people working together to support the events and partnerships that extend our "campus" far beyond our walls.

LEADING THE STATE IN COMMUNITY COLLEGE MARKETING AWARDS

MCCC won 10 District 3 Medallion Awards for community college communications at the District 3 Conference of the National Council for Marketing and Public Relations in Ann Arbor in the fall of 2016 – more than any other community college in Michigan and the third-most among colleges in the five states and one province that

comprise the district. NCMPR is the only organization of its kind that connects marketing and public relations professionals at community and technical colleges, and its Medallion Awards recognize outstanding achievement in communication, honoring excellence exclusively at two-year colleges. District 3 includes Michigan, Ohio, Indiana, Illinois, Wisconsin and the Canadian province of Ontario. Below is the list of the awards won by MCCC.

- Gold: Lifelong Learning Schedule
- Gold: Current Affairs and Diversity Flier Series
- Silver: TV Ad: "I AM MCCC - Chef Ad"
- Silver: Annual Report to the Community
- Silver: "Education Matters" with Dr. Kojo Quartey (TV Program)
- Silver: "WE ARE MCCC" Online Advertising
- Silver: Antiques in April Poster
- Bronze: "Quick Guide for Adult College Students" Brochure
- Bronze: Campus/Community Events Season Poster Series
- Bronze: TV Ad Series: "General Ad," "Nurse," "Financial Planner"

TWO NEW MCCC TRUSTEES SWORN IN; BOARD OFFICERS ELECTED

In January, William T. Bruck and Steven Hill were sworn in as MCCC trustees by Judge Michael Weipert of Monroe County's 38th Circuit Court. Each is serving for a six-year term. The Board of Trustees also elected new officers. Lynette Dowler was elected chair, Mary Kay Thayer was elected vice chair and Aaron Mason was elected secretary. Each officer is serving for a two-year term.

PROMOTING OCCUPATIONAL SAFETY

MCCC hosted a Business and Industry Safety Expo and Michigan Occupational Safety and Health Administration Update in March. The event included vendor booths showcasing the latest in industrial safety equipment and services, as well as a keynote by Nella Davis-Ray, program director for the Michigan Occupational Safety and Health Administration's Consultation Education and Training Division.

A COMMUNITY "READ"

One Book, One Community of Monroe County 2017 featured more than a month of events in the spring that were planned around themes in "Station Eleven," a novel by Emily St. John Mandel. Set in a post-apocalyptic North America, "Station Eleven" was published in 2014 and is the story of the Traveling Symphony, a troupe of Shakespearean actors and musicians who follow the shoreline of the Great Lakes. Readers are transported into a world dramatically altered by a flu pandemic that destroys 99 percent of the population.

One Book, One Community of Monroe County, modeled after a program developed by the American Library Association, promotes the value of reading by recommending a compelling book that links community members in a common conversation through readings, group discussions, programs and other events. Founding partners are Monroe County Community College, The Foundation at MCCC, Monroe County Library System and Monroe News.

STUDENTS ORGANIZE NIGHT OF FUN FOR FAMILIES

MCCC Student Government members organized and hosted Family Fun Night in April in the Gerald Welch Health Education Building, drawing more than 700 children and adults. This event, designed to be an inexpensive night out for families, featured various carnival-type games, prizes, refreshments, face painting, family photos, magicians, giant inflatables, fire trucks and more. MCCC and Siena Heights University were contributing sponsors.

MCCC CELEBRATES 50TH COMMENCEMENT CEREMONY

Monroe County Community College celebrated its 50th Annual Commencement Ceremony in late April in the Gerald Welch Health Education Building. Student addresses were made by graduates Clayton W. Blackwell and Jennifer E. Cline. Cheryl A. Johnston was awarded the position of honorary grand marshal for the ceremony. In May, Johnston retired from her position of assistant professor of reading and English after 34 years. Also at the ceremony, the 2017 Alumnus of the Year Award was presented to local business owner and 1971 graduate William J. Bacarella, who served as an elected trustee of

MCCC – including multiple terms as chair – from 1978-2015, making him the longest-serving trustee in the history of the college.

BUILDING WORKFORCES WITH REGISTERED APPRENTICESHIPS

In April, MCCC held a free session in the La-Z-Boy Center for employers, educators, workforce development officials, elected officials and veterans agency representatives about the U.S. Department of Labor's Registered Apprenticeship System. The session, titled "Build Your Workforce with Registered Apprenticeships," outlined the steps involved in developing and taking advantage of apprenticeships, which can be accomplished at the local level in partnership with MCCC.

The Registered Apprenticeship System has been utilized to meet the needs of America's skilled workforce for more than 75 years. It is a unique, flexible training system that combines job-related, technical instruction with structured, on-the-job learning experiences. The system is highly active in traditional manufacturing trades, but it is also instrumental in the training and development of other emerging industries.

Giving to The Foundation

isted here are the individuals, corporations and organizations who have given annual gifts to The Foundation at Monroe County Community College between July 1, 2016 and June 30, 2017.

All gifts are recognized for this specific financial year in the appropriate giving level. Cumulative gifts – a total of all gifts given over time – are recognized separately according to giving level, beginning with the Trustee’s Society.

We are pleased to recognize the support of each of our donors. We have made a great effort to ensure the accuracy of this list; therefore, we regret any omissions or errors. Please notify us in writing of any concerns.

Revenues and Expenditures

MCCC REVENUES AND EXPENDITURES

Fiscal Year Ended June 30, 2017

The Foundation at MCCC

Fiscal Year Ended June 30, 2017

DURING THE FISCAL YEAR ENDED JUNE 30, 2017

We received contributions totaling	\$658,476
Investment gains of	\$484,841
Special event revenues of	\$34,255
We received in-kind contributions for administrative services from MCCC and other in-kind support of	\$217,508
Other	\$17,494

Which resulted in total revenues of \$1,412,574

We distributed to MCCC for scholarships and program funds	(\$393,701)
And had administrative and fund raising expenses of	(\$217,508)
And had other expenses of	(\$7,128)
Which resulted in total expenditures of	(\$618,337)
Resulting in a total net asset increase of	\$794,237

When combined with our net assets at June 30, 2016 of \$5,282,789

Resulted in new net assets at June 30, 2017 \$6,077,026

The June 30, 2017 net assets are represented by

Cash of	\$942,368
Investments of	\$4,839,652
Accounts and pledges receivable of	\$315,562
Our total assets as of June 30, 2017 were	\$6,097,582
Our total liabilities as of June 30, 2017 were	(\$20,556)

Our net assets, therefore, as of June 30, 2017 were \$6,077,026

Make a Difference with a Gift to MCCC

Our work would not be possible without donors like you. From scholarships to cultural arts, 100 percent of your gift directly supports students and programming at Monroe County Community College.

Share your love of education with a tax-deductible gift that will strengthen and enhance MCCC's ability to serve our students and the greater community.

Donations can be made using the envelope at the center of this annual report or by donating online at www.monroeccc.edu/foundation.

10 Year Enrollment Comparison: Total, Non-DUAL and DUAL	14

Summary

For the past two years MCCC enrollment is best described as stable. The Fall 2017 enrollment total of 3,122 is only 22 students fewer when compared to Fall 2106.

The high school student population enrolled at MCCC under the Dual Enrollment program continues to rise. With a total of 711 on campus this fall, this extremely popular program now represents 23% of total headcount. The demographic profile of the institution is impacted by the increased number of enrolled high school aged students. Their younger age pushes the average age lower. The vast majority attend MCCC part-time pushing the part-time numbers higher.

There are a fair number of positives in the 2017 profile summarized in the following statistics of note:

Dual Enrollment +134

Part-time Student Enrollment +80

Under 21 Age Group Enrollment +57

Continuously Enrolled (Retained) Students +40

Female Student Enrollment +29

41-50 Age Group Enrollment +11

*FTIAC Enrollment +10

LIVONIA, MICHIGAN 48152

TO WHOM IT MAY CONCERN:

WE SUBMIT HERewith OUR CERTIFIED APPRAISAL OF ASSETS BELONGING TO MONROE COUNTY COMMUNITY COLLEGE, 1555 SOUTH RAISINVILLE ROAD, MONROE, MICHIGAN. THIS APPRAISAL INCLUDES BUILDINGS ONLY.

THIS APPRAISAL IS ARRANGED UNDER SEVERAL PROPERTY CLASSIFICATIONS AND FURNISHES AN UNBIASED STATEMENT OF VALUES.

THE "REPLACEMENT VALUE NEW" THE COST THAT WOULD BE INCURRED IN ACQUIRING AN EQUALLY DESIRABLE SUBSTITUTE FOR PROPERTY, WHICH IS DETERMINED IN ACCORDANCE WITH MARKET PRICES PREVAILING AT THE DATE OF THIS APPRAISAL AND REPRESENTS THE COST TO REPLACE NEW, THE PROPERTY IN LIKE KIND.

THE "SOUND OR INSURABLE VALUE" INDICATING PRESENT PHYSICAL SOUND VALUES OF THE PROPERTY OF AN OPERATING ENTERPRISE BASED UPON THE COST OF REPRODUCTION NEW, LESS AN ALLOWANCE FOR ACCRUED DEPRECIATION RESULTING FROM ITS AGE, CONDITION AND DEGREE OF OBSOLESCENCE.

A SUMMARY IMMEDIATELY FOLLOWING THIS LETTER SHOWS THE REPLACEMENT VALUE NEW AND SOUND INSURABLE VALUES SEGREGATED ACCORDING TO ACCOUNTS ESTABLISHED BY OUR COMPANY.

IN ORDER THAT YOU MAY FULLY UNDERSTAND THE SERVICES WE HAVE RENDERED, WE PRESENT THE IMPORTANT POINTS AS FOLLOWS:

FIRST: ALL PHYSICAL CHANGES OF THEIR PROPERTY (ADDITIONS, REMOVALS, REPLACEMENTS, ALTERATIONS AND CHANGES IN LOCATION) AS FURNISHED BY THEIR MANAGERIAL STAFF AND/OR RECORDS HAVE BEEN INCORPORATED IN THE APPRAISAL.

SECOND: WE HAVE CHECKED AND VERIFIED BY PERSONAL INVESTIGATION ALL CHANGES SUBMITTED BY THEIR STAFF.

A RECOGNIZED AUTHORITY SINCE 1935

THIRD: WITH THE INFORMATION OBTAINED FROM THEIR RECORDS,
WE HAVE DEDUCTED IN DOLLARS ALL RETIREMENTS AND
ABANDONMENTS THAT HAVE TRANSPIRED SINCE THE DATE
OF THEIR LAST APPRAISAL.

ECONOMIC CONDITIONS AFFECTING THE CONSTRUCTION, EQUIPMENT AND LABOR
MARKETS, VALUES SHOWN ARE SUBJECT TO ADJUSTMENT, AS REQUIRED, AFTER
THE DATE SPECIFIED IN CERTIFICATES.

WE HAVE NOT EXAMINED THE LEGAL TITLES OF PROPERTY; THEREFORE WE DO
NOT ASSUME RESPONSIBILITY REGARDING THE OWNERSHIP OF PROPERTY IN
THIS APPRAISAL.

SUPERSTRUCTURE:

FRAME - STRUCTURAL STEEL

FLOORS - CONCRETE SLAB, 5", STEEL JOIST, CORRUGATED DECK AND CONCRETE;
PENTHOUSE

FLOOR COVERINGS - HARDWOOD IN GYM, DANCE STUDIO
CERAMIC TILE IN LOCKER ROOM, SHOWERS
CARPETING IN OFFICES, CHILD CARE
RESILIENT FLOORING IN CLASSROOMS
PORCELAIN TILE IN CORRIDOR
RUBBER FLOOR IN WEIGHT AREA

CEILINGS - SUSPENDED ACOUSTICAL THROUGHOUT EXCEPT GYM

ROOF STRUCTURE - WOODEN DECKING ON GLUED LAMINATE TRUSSES OVER
MULTI-PURPOSE GYM, SKYLIGHT, TRANSLUCENT STEEL
DECK ON I-BEAM JOISTS THROUGHOUT

ROOF COVER - SINGLE PLY MEMBRANE ROOF WITH INSULATION
THERMOPLASTIC POLYOLEFIN (T.P.O.) WITH INSULATION

INTERIOR CONSTRUCTION - CONCRETE MASONRY PARTITIONS
GYPSUM BOARD PARTITIONS IN OFFICES AND
CLASSROOMS

BUILT-IN FIXTURES - CHALKBOARDS, TACKBOARDS, AS REQUIRED.
- METAL TOILET PARTITIONS
6 - BASKETBALL BACKSTOPS - MOTORIZED
2 - TELESCOPING BLEACHERS, HUSSEY - 35' LENGTH
118 - MEDART METAL LOCKERS, SINGLE TIER
2 - STEEL STAIRWAYS TO PENTHOUSE

BUILT-IN FIXTURES - continued

- LAMINATED CLASSROOM CABINETS INCLUDING:
NURSING LAB COUNTER WITH STAINLESS STEEL SINK
CHILD CARE KITCHENETT COUNTER WITH SINK
- CASEWORK IN ROOMS 157 - 159 INCLUDING OXYGEN
LINES, STATIONS
- CASEWORK IN ROOMS 164 AND 165

ELECTRICAL - AN APPROVED SYSTEM OF WIRING ALL IN CONDUIT WITH
NECESSARY WALL PLUGS AND SWITCH BOXES, FLUORESCENT
TUBE FIXTURES, TRANSFORMER
- GEO THERMAL CONTROL

PLUMBING - AN APPROVED SYSTEM OF MODERN SANITARY FIXTURES
CONSISTING OF:
27 - LAVATORIES
26 - WATER CLOSETS
10 - URINALS
6 - STALL SHOWERS
4 - COLUMN SHOWERS
6 - DRINKING FOUNTAINS
1 - JANITORS SINK
4 - HANDICAPPED STALL SHOWERS

HEATING AND AIR CONDITIONING -
1 - MCQUAY MODEL LSL150DH AIR HANDLER, #35M0075304
1 - MCQUAY MODEL LSL141DH AIR HANDLER, #35M0075404
1 - MCQUAY MODEL LSL122DH AIR HANDLER, #35M0122904

Purpose of the Study

This Facilities Assessment and Deferred Maintenance Capital Planning Study, developed through a combination of personnel interviews, facility walk-throughs and building system analysis, was performed to accomplish the following objectives:

- Provide an inventory of the College's facilities in a database format to be easily updated and maintained by Monroe County Community College personnel and allow for quick access to facilities information.
- Determine the general condition of the facilities owned by Monroe County Community College and provide the data in a concise format, allowing quick determination of the current replacement value and condition of each facility.
- Determine a Facilities Condition Index (FCI) for each assessed building and an aggregate FCI for all facilities at Monroe County Community College. The FCI is a benchmark index that rates the condition of existing College buildings and used by facilities managers nationwide to quantify and prioritize deferred maintenance projects for capital planning purposes.
- Assist Monroe County Community College in meeting its Mission Statement, Strategic Goals, and Institutional Vision through timely maintenance of the physical backbone of the College – the buildings of MCCC.

Glossary

Vital Statistics

Basic building information– building use types (classroom, library, and administration), year built, building area in square feet, and number of floors.

Observation Highlights

This is a focused list of field observations, highlighting major repair/replacement items and recently completed work. For a more complete list of field observations, see the individual building data sheets in the appendix.

Current Replacement Value (CRV)

The CRV is the cost to construct a typical replacement building in today's dollars. The figure is based on the square footage of the current structure and the estimated current construction cost for that type of structure. Since some buildings are conglomerations of different uses (i.e.: classroom, library, administration) the CRV is based on estimated proportions of use types in each building. By the nature of the calculations and square foot construction costs, the current replacement value has a $\pm 20\%$ margin of error and will increase annually due to inflation.

Priority Issues/One Year Deferred Maintenance Backlog (1YR DMB)

The 1YR DMB is the value of projects that is deferred and requiring completion in order to maintain facilities and related infrastructure for safe use. The 1YR DMB amounts shown are for items requiring immediate attention to fix critical problems. ***A long-term investment strategy should also include items that require repair or replacement within 5 years, thus avoiding the increased repair costs resulting from deferred repairs (i.e. leaky roof damaging interior finishes).***

Facilities Condition Index (FCI)

Simply put, the FCI is the current DMB divided by the CRV. The resulting number is compared against nationally accepted standards and used to determine the condition of the building, campus or college.

The Association of Higher Education Facilities Officers (APPA) recommends that the FCI for any given building should not exceed 5% for the building to be considered in “Good” condition. The rating of “Fair” indicates that the building requires some attention to bring it up to standard, with some problems areas potentially requiring immediate attention. The rating of “Poor” indicates that the building needs urgent attention to prevent the existing problems from affecting other building systems and compounding future repair costs.

The APPA FCI Ratings, indicating the general condition of the building, are shown here along with the corresponding “traffic signals” that give a quick visual indication of the FCI rating.

Priority Issues/One Year DMB Excess

This represents the amount the DMB exceeds the APPA benchmark of a building with a 5% FCI – essentially the dollar amount to be spent immediately to reduce the DMB to attain the APPA rating of “Good”. In situations where a building is in better than “Good” condition (FCI<5%), the one year DMB excess is shown as zero.

For example, if a building has a CRV of \$1,000,000 and an FCI of 10%, the DMB would be \$100,000. This would leave a DMB excess of \$50,000 – the amount to be spent to reduce the FCI to within the APPA 5% benchmark

Zero-Five Year Cumulative Deferred Maintenance Backlog (5YR DMB)

Similar to the One Year DMB, the Five Year DMB represents the total value of projects that will require attention within the next five years, including those that fall under the One Year DMB. This value is included to help determine the investment required over the next five years to repair and/or replace problem items before they become critical.

The Zero-Five Year DMB is often more telling of a buildings’ condition than the One Year DMB, since the first year number focuses primarily on life safety, code compliance and collateral damage. Most maintenance issues are not so critical as to fall into this category but often become so within 5 years.

Looking at the previous example, if the building condition survey indicated an additional \$250,000 in repairs from years 1-5, then the 0-5 Year DMB would total \$350,000 (including \$100,000 from the first year).

Zero-Five Year DMB Excess

Similar to the One Year DMB Excess value, this amount represents the investment to bring the DMB in line with the APPA benchmark of 5% of the Current Replacement Value. In situations where a building is in better than “Good” condition – a bit more difficult over a five year span, the five year DMB excess is shown as zero.

This number is a good starting point for determining budgets – it allows the college to see what to spend to bring buildings into the APPA “Good” range – with the understanding that complete elimination of the Deferred Maintenance Backlog is not a likely scenario.

DMB Equilibrium (Annual cost to maintain current DMB)

This is the dollar amount to be invested annually to keep the FCI (and DMB) from deteriorating – regardless of the current condition of the building.

Reusing the previous example, the amount required to maintain the FCI at current levels would be \$20,000 annually (2% of \$1,000,000).

The number is based on a nationally accepted rule of 2% of the CRV and assumes that building components have a 50-year renewal cycle and depreciate along a straight line. The assumptions were made to simplify calculations; in reality, building components DO NOT expire according to straight-line depreciation, and most components will require replacement within 30-40 years (excluding structure and foundation).

To restate – this annual investment will only maintain the existing FCI and do little or nothing to reduce any existing backlog.

Generic Example of how the aforementioned data appears in this report

Building Use Types

The tables below shows building Use Types and their respective current construction costs per square foot used to develop this database. As some of these use types are not found on all campuses, not all Use Types are used in the database. These costs, based on regionally weighted, preliminary construction cost data provided by contractors, historical cost databases and data from RS Means and Marshall and Swift, are for typical college and university buildings.

<i>Use Type</i>	<i>Cost/SF</i>
Administration	\$175
Athletic	\$190
Auditorium	\$290
Boiler House	\$215
Classroom	\$185
Kitchen/Food Service	205
Lab	\$245
Library	\$190
Storage/Maintenance	\$115
Student Union	175
Vocational Lab	175

Building Components

The table below shows the building components used in the report. These are the basic components having a major influence on the replacement value of a building. The buildings were evaluated during walkthroughs with the facility personnel to determine how much of each component made up the CRV. It was then determined what percentage of each component required repair or replacement within one year, five years, ten years, and beyond. This data is used to determine the investment required to reduce the current and future deferred maintenance backlog.

<i>Category</i>	<i>Component Name</i>
Structure	Structure
Envelope	Roof
	Glazing
	Cladding
Mechanical	HVAC Equipment
	Plumbing
Electrical	Primary/Secondary
	Distribution
	Lighting
Finishes	Voice/Data
	Ceilings
	Walls
	Doors
	Floors
Safety/Code	Building, Fire, ADA
Other	Site Repair, Ext. Light, etc

Deferred Maintenance Backlog

A Brief Background

The problem of deferred maintenance at colleges and universities has been studied and better understood over the last decade. From an article by Dan Hounsell, in the magazine Maintenance Solutions, discussing how universities are addressing the issue of deferred maintenance:

“Maintenance management professionals, who once seemed to be one of the few parties giving serious thought to the issue, now have been joined in the debate by growing numbers of sympathetic voters and far-sighted facility decision makers.”

The Association of Higher Education Facilities Officers (APPA) concluded in a 1995 report titled “A Foundation to Uphold: A Preliminary Report” that the national backlog of deferred maintenance at colleges and universities exceeds \$26 billion, up 27 percent from estimates made in a similar report from 1988.

\$5.7 billion of that \$26 billion backlog is classified as “urgent deferred maintenance” – projects that require immediate attention and that will cost far more if they are not completed within a year. Although spending this sum will eliminate current urgent needs, in only a few years there will be a new roster of items to replace them – if future budget planning is not undertaken. According to the APPA report, the current backlog “represents a threat to the capability of higher education facilities to support college and university missions.”

Other conclusions from the report include:

- More than 50 percent of all college types reported that deferred maintenance increased or stayed the same since 1988; only 25 percent reported decreases.
- 20 percent of the colleges in the study accounted for nearly 60 percent of the accumulated deferred maintenance.

- Public colleges typically have a greater deferred maintenance backlog than private universities, with 78 percent of the public research universities reporting an increase in deferred maintenance backlogs.
- By assuming that deferred maintenance of the infrastructure – site repairs, road and parking lot maintenance, exterior lighting, etc. – was not included in the figures provided by the campuses in the study, the estimated cost to eliminate accumulated deferred maintenance increases to \$32.5 billion – with urgent needs increasing to \$7.1 billion.
- When senior school administrators made deferred maintenance a priority, the institution made progress in reducing its backlog.

The most important point to remember is that even if universities and colleges spend these amounts, this will only eliminate the existing deferred maintenance backlog. There needs to be a coordinated, funded plan put into place at colleges and universities to maintain the condition of the facilities once they have been repaired – or time will again take its toll.

Vital Statistics:

This updated assessment for Monroe County Community College (MCCC), focuses on 18 buildings totaling almost 390,000 square feet at the Monroe main campus, Whitman Center campus, and Hurd Road Center campus. The estimated Current Replacement Value for these facilities is approximately \$80.7 million.

The date of completion for the assessed facilities ranges from 1968 to 2004. While almost all mission critical buildings are currently in good condition, the buildings contributing most significantly to overall long-term deferred maintenance and end-of-life issues are the original academic buildings. Factors contributing to the condition of these buildings include the age and condition of plumbing and mechanical systems, typical wear and tear on high-use items such as doors, and building use.

By APPA standards, short-term critical issues (those considered critical to operation, safety-related or having potential for collateral damage) are minimal. This situation is typical for most institutions, but MCCC has done a particularly good job containing these issues. Few items of great cost are likely to fail or significantly impact building viability within the next year. When looking forward five years, however, long-term conditions for several buildings quickly become rated fair to poor. This is also common, as over this longer timeframe, systems in older buildings become critical due to age or failure. The significantly higher five-year Facility Condition Index (FCI) for these buildings is predictive of these failures and based on two assumptions: that everything anticipated to fail will do so, and nothing is invested to correct the problem proactively.

Issues found across campus include:

- Several roofs are near the middle of their service life, with leaks and other issues typical for roofs of this age. A roof condition assessment was performed by Professional Services Inc. prior to this assessment.

- HVAC systems near or past the end of their service life indicate a need to budget for replacement in the next few years. Valves on some systems are also failing.
- Original window systems are showing air infiltration, failed hardware, and deteriorated glazing compound.
- Doors are past the end of their service life on older buildings, especially exterior main entrance doors. Hardware is failing, thresholds are deteriorating, and hinges are wearing out. All require increasing levels of maintenance.
- ADA compliance issues in older buildings include knob-style door hardware, non-compliant dimensions of entrance vestibules, and some toilet rooms limited by available space. To meet current accessibility codes, any significant renovations will trigger modifications to meet current ADA requirements.

Summary:

The jump from the “Priority Issues FCI” of 1.6% to the long-term “0-5 Year FCI” of 7.3% is typical for older campuses and, at a campus the size of MCCC, represents a sizeable capital investment, even to maintain conditions in their current state. These numbers also represent an increase from the 2008 Assessment, primarily driven by long-term issues that are becoming more urgent.

This potential FCI increase, while driven by many buildings, is most attributed to a few older facilities facing equipment end-of-life issues, including significant HVAC equipment in the Physical Plant Building. As an example, the 5-year FCI numbers for the CLRC and the two Technology Buildings contribute almost 50 percent of the total deferred maintenance backlog although they comprise less than 30 percent of the College’s square footage.

As stated in the Deferred Maintenance Backlog background, the investment solution has two facets:

- The funds needed for immediate repair projects – repairs and/or replacements that will prevent further deterioration of the buildings and infrastructure and help the college stay ahead of life-safety concerns.
- The funds required to maintain and/or improve the condition of the buildings. These funds need to be budgeted in advance to

allow for repairs at the appropriate time - before items become critical or cause additional damage.

The following pages of this report break this data down into a building-by-building review to clarify where attention is most needed.

Recommendations:

Short Term Recommendation:

Monroe County Community College should review the items that comprise the One Year Deferred Maintenance Backlog of approximately \$1,258,000 and address those affecting life/safety issues, those having the greatest potential for future damage to other building components, and those that are code compliance issues.

In addition to the first year issues that will carry over into the next five years, the College should also immediately begin budgeting for the projected \$5.89 million in deferred maintenance issues over the next five years and evaluate alternative solutions where the cost of repairs outweighs the benefits.

Long Term Recommendation:

The College should budget as much as possible of the industry recommended "2% of CRV" maintenance fund of \$1.6 million annually for ongoing repairs to maintain the buildings once they are upgraded. While this benchmark is difficult for most institutions to attain, the goal of setting aside as close to this amount annually as possible is to ensure the buildings remain in stable condition and that funds are available in advance when systems reach the end of their lives.

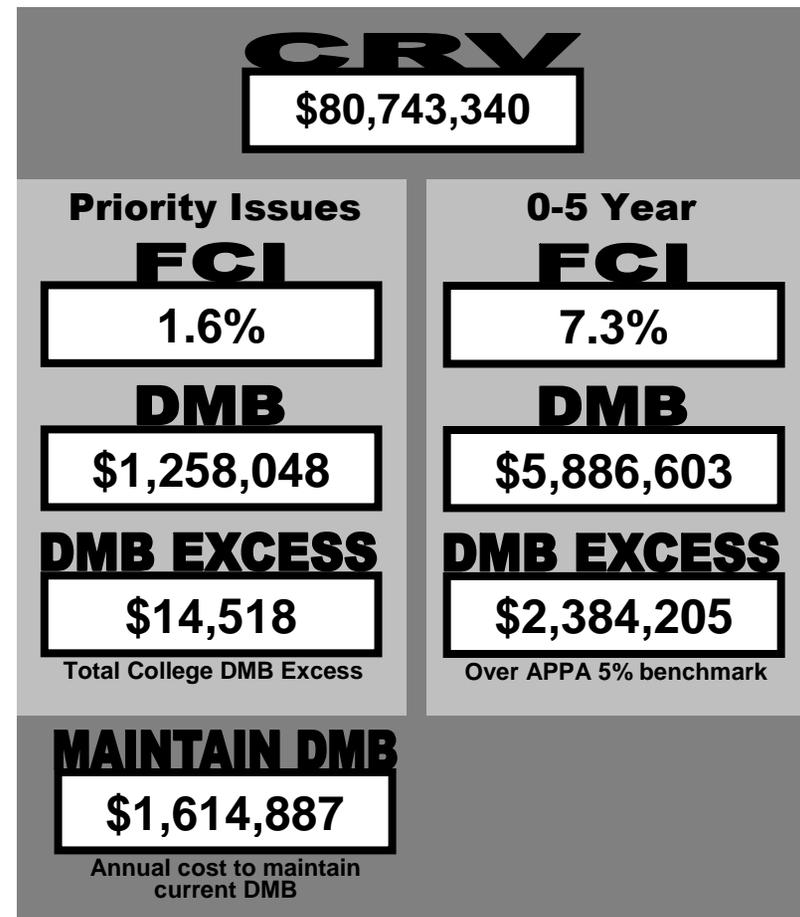

*Note: The DMB Excess value listed on the summary table to the right is the sum of all individual building excess values, not calculated at the campus-wide level. Therefore, a College DMB Excess number is present even though the College-wide FCI number is well below the APPA 5% threshold value.

1 YEAR

5 YEAR

College-wide Condition

Monroe County Community College

Campus Condition Examples

The following images are indicative of some of the deferred maintenance issues present across the campus.

Whitman Center – breach in fire-rated ceiling assembly.

Whitman Center – water infiltration along exterior wall has caused deterioration of the plastic-laminated windowsills.

Whitman Center – settlement/heaving of exterior concrete slab (at main entrance) presents a tripping hazard.

Student Services/Administration - Aluminum entrance doors and hardware at end of life.

La-Z-Boy Center – It appears there is a void within the exterior aluminum, curtain wall assembly allowing the environment to enter the interior.

Health Education Building – Typical sealant joint is at end of life.

Physical Plant – Cooling tower and basins are near end of life.

Health Education Building – Daylighting controls for the Atrium would save energy.

Vital Statistics:

Campbell Learning Resources Center

Use Type(s): Library, Classroom, Lab

Built: 1968

Area: 52,369 SF

Floors: 3

Observation Highlights:

- Moisture problem in basement in Room C-3 requires additional investigation and remediation.
- Professional Services Inc. (PSI) rates the roof condition as "generally fair to good, no current roof leaks were reported." Roof perimeter at the gravel stop edges was repaired in 2010.
- Windows (glazing and frames) on levels 1 and 2 are due for replacement. Some window units are fogged at the first floor.
- Minor amount of brick tuck-pointing required at north elevation. Sealant joints at fascia panel joints were replaced in 2010.
- Level 2 ductwork and selective ceiling replacement is scheduled for rework as part of 2009 classroom renovations.
- Chilled water valves are at end of life and due for replacement.
- Reduced voltage starter for 40HP fan motor is at end of life.
- Electrical Room areaway floor drain is either too small or partially plugged. Damage has occurred to ventilation dampers.
- PRV is needed for elevated City Water pressure issue.
- Domestic water piping will need epoxy lining or replacement.
- Wireless equipment is at end of life and requires replacement.
- Investigate and remediate why battery-backup for digital PBX is not connected and in use.
- Minor cracking observed in brick walls at main stairwell. Recommend monitoring condition.

Campbell Learning Resources Ctr.
Monroe County Community College

Campbell Learning Resources Center

- Original exterior aluminum doors, frames, and hardware are nearing end of life.
- Stairwell doors are in poor condition and at end of life.
- Rear double doors at Learning Assistance Lab - hinges damaged, doors stick, doors swing into corridor.

Vital Statistics:

Student Services / Administration

Use Type(s): Kitchen/Food Service, Classroom, Student Union, Administration

Built: 1968, additions in 1978, 1988

Area: 72,219 SF

Floors: 1

Observation Highlights:

- PSI rates the roof condition as “generally in fair condition.” Minor leaking reported.
- Previous infrared images indicate areas of moisture within the insulation. Leaks at penetrations will require corrective action. Some repairs made in 2010.
- Original anodized aluminum window framing with non-insulated glazing not energy efficient.
- Sealant joints at fascia panel joints were replaced in 2010.
- Reheat control valves, isolation valves, and thermostats are at end of life and are due for replacement.
- Outside air damper for main air handler is not bolted to concrete wall.
- Galvanized piping throughout is near or at end of life. Assume replacement or epoxy lining within 10 years.
- PRV is needed for elevated City Water pressure issue.
- Wireless equipment is at end of life and requires replacement.
- Original exterior aluminum doors, frames, and hardware are nearing end of life.
- East entry concrete steps poorly constructed - risers vary in height, treads are too shallow and uneven. Creates tripping hazard.
- Glass covered walkway between this and East Technology Building leaks in multiple locations. Repaired repeatedly, but steel rusting, paint peeling.

Floors: 1

Observation Highlights:

- Salt has pushed the rear wall of the building out of plane. Currently the wall is restrained using a series of wooden braces. Wall should be restored to plumb and level condition once the salt supply is emptied.
- No reported roofing problems. Roof evaluation was not included in PSI's roofing condition report. No visual defects were noted.
- Overhead door tracks and associated door hardware are failing due to the corrosive nature of the salt and are nearing end of useful life.
- No visual inspection of floor surface was possible.

La-Z-Boy Center

Use Type(s): Auditorium, Classroom, Administration

Built: 2004

Area: 53,329 SF

Floors: 1 with mechanical mezzanine & balcony

Observation Highlights:

- Coping metal at metal panel system does not properly slope back to the roof. A line of sealant was added to keep water from streaking the visible face of the metal panels. Condition should be carefully monitored for evidence of water infiltration into and behind the metal panel system
- PSI rates the roof condition as “generally in fair to good condition.” Roof to wall transitions may need to be repaired as they are identified.
- Sealant where window frames abut metal panel system is failing and is due for replacement.
- Exterior soffit: Synthetic stucco on cementitious backer panels is cracking at panel joints.
- Exterior masonry joints are beginning to age and will require tuck-pointing in the near future. Masonry expansion / control joint sealants are likewise nearing end of life and will require general repair and replacement. Slight efflorescence was returning in selected areas.
- IT Room H143 needs a door grille added to provide proper ventilation.
- PRV is needed for elevated City Water pressure issue.
- Wireless equipment is at end of life and requires replacement.

Observation Highlights:

- Cracks in CMU exterior wall, primarily at the ends of steel lintels over the overhead sectional doors should be monitored.
- No reported roofing problems. Roof evaluation was not included in PSI's roofing condition report. No visual defects were noted.
- Gutters currently drain to immediate grade. Splash blocks should be installed to limit splash onto the building
- Doors and frames are protected with primer only. Doors and frames should be painted to protect them from moisture damage.

Built: 1991

Area: 17,650 SF

Floors: 1

Observation Highlights:

- PSI rates the flat roof condition as “generally in fair to good condition” and the sloped roof is in “generally good condition.” Flat roof over Main Entry is in generally poor condition.
- Plastic laminate windowsills are failing and due for replacement. Evidence of moisture infiltration at and around windows.
- Monitor moisture levels within CMU veneer masonry. Topical sealer may aid in limiting moisture infiltration and reduce evidence of moss/mildew on the north side of the building.
- IT closet near the Lobby requires ventilation to remove heat build-up.
- Repair 12” x 12” hole in closet fire-rated ceiling near Lobby.
- Repair small hole in Maintenance Room fire-rated wall near Lobby.
- Wireless equipment is at end of life and requires replacement.
- Corrections to cracking and moisture damage at Lobby were performed, recommend that condition is monitored. Isolation joints were installed to reduce the appearance of future cracking in some locations. This may prove to be a temporary correction.
- College has replaced fire alarm panel.
- Student Lounge Area exterior concrete slab joint material between sections needs replacing.

	%	\$	Immed. Priority 1	1-5 Years Priority 2	6-10 Years	11+ Years	
Structure	20	\$1,958,601	0	2	5	93	<p>Description: Poured concrete basement with slab on grade foundation. Concrete frame with concrete masonry block infill.</p> <p>Priority 1: None observed / reported</p> <p>Priority 2: Moisture problem in basement (at room C-3) requires additional investigation and remediation</p> <p>2011: It was reported that problem in Room C-3 still exists, the problem in Room C-16 appears to have been corrected.</p> <p>2008: -Ongoing water / moisture infiltration through the foundation walls. The moisture appears to be the result of underground or hydrostatic sources; minimal leaking is associated with heavy rains. Efflorescence / evidence of moisture was specifically noted in the small theatre and within IT storage area. Problem is on-going. -Limited masonry cracking observed at main stairwell. The fractures appear to be stabilized.</p> <p>Previous Comments: -Room C-3 leaked from cracks, room C-10 leaked at roof conductor exit. In-house team excavated, waterproofed and backfilled in 2001</p>

CHAPTER 10

MAINTENANCE AND REPLACEMENT FUND

The Maintenance and Replacement Fund is used to account for major repairs and maintenance of College facilities.

At Monroe County Community College, the objective of this fund is to set aside and account for funds that will be necessary to meet the expenses of major plant maintenance and replacements as well as to provide a contingency to help assist in meeting certain physical plant emergencies that may arise. This fund may also be used as a source for inter-fund borrowing, as well as direct funding to other funds such as the Unexpended Plant Fund through Board approved transfers.

Other than some interest earned from its fund balance and a minor endowment distribution, the fund does not generate revenue. Since the establishment of the Maintenance and Replacement Fund in the 1980-1981 fiscal year, its primary source of funding has been transfers from the College's General Fund.

Funding is budgeted for replacement of eight medical oxygen valves in the Health Education Building, replacement of the garage door on the salt storage garage, cleaning of the drainage ditch on the east side of main campus as well as contingency funding for emergencies that may arise for a total budget of \$88,000. The table below lists the projects planned for FY 2018-2019. In addition, \$500,000 is being transferred from the General Fund to this fund for potential reimbursement to the DTE Electric Company should they be successful in their tax appeal. If the Michigan Tax Tribunal rules to decrease the taxable value of the Monroe Power Plant and/or Fermi 2, MCCC could be obligated to refund the taxes paid retroactive to the date of filing with interest (current interest rate is 5 percent), in accordance with the order.

2018-2019 Projects

BUILDING	REPAIR	COST
Health Education Building	Replace(8) Medical Oxygen Valves	\$2,500
Maintenance	Replace Salt Garage Door	\$2,500
Maintenance	Landscaping: Drainage Ditch Cleaning	\$3,000
	Contingency	\$80,000
TOTAL		\$88,000

CHAPTER 11

MILLAGE MAINTENANCE AND REPLACEMENT FUND

The Millage Maintenance and Replacement Fund is used to account for maintenance and renovation projects funded through the 5-Year Maintenance and Improvement Millage.

The objective of this fund is to account for revenue received from the 5-year .85 mill property tax levy approved by the Monroe County voters on November 8, 2016, and the expenses for the maintenance and renovation projects planned. Transfers may be made to other funds such as the DTMB Project Fund through Board approved transfers. Fund revenues may be adversely affected by the DTE Electric Company's Michigan Tax Tribunal filings (see page 27).

There are ten projects proposed for FY 2018-2019 for a total cost of \$3,178,250 in addition to the East and West Technology Buildings project. The table below lists the projects planned.

2018-2019 Projects

BUILDING	REPAIR	COST
SS/Administration Building	Roof Restoration	\$475,000
SS/Administration Building	Architectural Fees	\$200,000

Note: \$80,000 of \$3,861,419 restricted for potential reimbursement of DTE tax revenue.

Table 11.2

5-Year Maintenance and Improvement Millage *Protecting Our College*

On November 8, 2016, Monroe County voters approved an additional .85 mill property tax levy for a period of 5 years. The money will be used for critical maintenance and renovation projects, protecting the community's more than 50-year investment in the College's buildings and infrastructure.

The funds will be used for:

- **Safety:** Enhance and improve safety and security across campus, including a door key card system, emergency lighting, security cameras and fire sprinkler systems
- **Accessibility:** Bring facilities up to standards for people with disabilities, including the Learning Assistance Lab, accessible restrooms, proper elevator access and door hardware
- **Technology:** Upgrade technology network infrastructure, including updates to classrooms and the fiber optic network
- **Updating the Learning Environment:** Renovate specific areas to maintain and improve the academic environment. These include the Library and various classrooms.
- **Deferred Maintenance:** Ensure and maintain the quality of campus-wide facilities through roof repairs and replacement of doors, windows, roofs and other outdated items.

Following is the list of the maintenance and/or improvement projects that were shared with the voters and served as the basis for their approval of the millage funding request:

Accessibility Projects	Building(s)	Costs
ADA door hardware retrofit	LS Bldg, E/W Tech, A/SS, LRC	\$ 275,800
East and West Technology Building Renovations	E/W Tech	\$ 3,889,560
Elevator	A/SS	\$ 378,000
Library/elevator lobby renovations	LRC	\$ 868,400
Life Science Building First and Second Floor Renovations	LS Bldg	\$ 451,000

Table 11.3

**FISCAL YEAR 2020
CAPITAL OUTLAY PROJECT REQUEST**

Institution Name: Monroe County Community College

Project Title: Renovation and Addition to Welch Health Education Building

Project Focus: Academic

Type of Project: Renovation and Addition

Program Focus of Occupants: Health Sciences

Approximate Square Footage: 33,572 (Renovation 16,822 sf; Addition 16,750 sf)

Total Estimated Cost: \$7,262,000

Estimated Start/Completion Dates: September 2019 – July 2021

Is the Five-Year Plan posted on the institution's public internet site? Yes

Is the requested project the top priority in the Five-Year Capital Outlay Plan? Yes

Is the requested project focused on a single, stand-alone facility? Yes

Project Purpose

The purpose of the renovation and addition to the Welch Health Education Building is to add needed classroom and laboratory spaces in support of the College's Registered Nursing, Practical Nursing, Certified Nursing Assistant (CNA), and Respiratory Therapy Programs. In addition, the project will add needed classroom and laboratory space for other health-related courses and programs including Phlebotomy Technician, Personal Trainer Certification, and health, physical education, and dance courses.

Scope of the Project

This project is a renovation to existing classrooms and laboratories (16,822 sf) as well as adding a 16,750 square foot addition to the building. The project includes parking and site improvements that will add 86 parking spaces (including two ADA compliant spaces) in keeping with Monroe Charter Township regulations. The project also includes window and doorframe replacement and the installation of a rain screen system to address building envelope issues.

The renovated space will include the following:

- Renovation of the existing Respiratory Therapy Skills Lab and converting the existing Respiratory Therapy classroom into a second skills lab bringing the total number of teaching/student stations to six.

- Renovation of two existing classrooms/labs into technology-rich classrooms with seating for 30 students that will support the Respiratory Therapy Program students.
- Renovation of the existing Nursing classroom and Skills Lab into two technology-rich classrooms with seating for 40 students and renovation of the AV Learning Lab into a seminar room that will seat 16.
- Renovation to the staff office suites to add a second entrance/exit in keeping with best practice workplace security plans and adding two faculty offices.

The addition will include the following:

- Two Nursing classrooms with seating for 40 students
- Three Skills Labs equipped with six beds each
- A Computer Lab with seating for 50 students
- A Simulation Lab and control room
- A lecture room with seating for 30 students
- A general classroom with seating for 40 students
- Two new faculty offices and a staff lounge
- Two new unisex ADA restrooms and a lactation/meditation room

Program Focus of Occupants

The program focus for students in health sciences is Registered Nursing, Practical Nursing, Certified Nursing Assistant (CNA), Respiratory Therapy, Phlebotomy Technician, Personal Trainer Certification, and health, physical education, and dance students. Monroe County Community College offers an associate degree nursing program that was established in 1974 and is approved by the Michigan Board of Nursing and accredited by the Accreditation Commission for Education in Nursing (ACEN). The Registered Nursing Program's NCLEX-RN pass rate in 2017 was 92 percent, exceeding the national average of 84 percent. The NCLEX-PN pass rate for 2017 was 100 percent, exceeding the national average of 84 percent. The College's Respiratory Therapy Program is accredited by the Commission on Accreditation for Respiratory Care (CoARC). The program's Registered Respiratory Therapy Credential pass rate for 2017 was 100 percent.

Additional Information:

1. How does the project enhance Michigan's job creation, talent enhancement and economic growth initiatives on a local, regional and/or statewide basis?

As the only higher education entity in Monroe County, MCCC plays a key role in the region's economic development. The college remains committed to providing comprehensive educational opportunities, offering transformational learning through

educational excellence, and delivering entrepreneurial and responsive leadership to address community needs. Our community's ability to attract new investment and jobs, as well as retain existing employers, is dependent upon developing new pathways to certificate and degree credentials that align with emerging business and industry needs. This renovation and addition project is necessary to deliver the elemental instruction in the classrooms and labs essential to meet this need.

The health care workforce has become one of the cornerstones of Michigan's economy and it is imperative that community colleges continue to provide the pipeline of new entrants into the health care workforce. The return on investment in the healthcare workforce is significant and immediate. The Michigan Bureau of Labor Market Information and Strategic Initiatives projected that the health care cluster would expand by 18 percent by 2018 with widespread growth throughout the occupations reporting in this cluster. The current Michigan's HOT 50 jobs listing includes Registered Nurses with an anticipated 13.5 percent 10-year (2016-2026) job growth rate with hourly wages in the range of \$28-\$38 per hour. To meet the employment needs of the health care industry, the Bureau cautions that the anticipated growth in health care employment will not come to fruition unless the workforce is adequately trained. (Health Care Cluster Workforce Analysis, 2013) This project expands and enhances the teaching and learning facilities at Monroe County Community College assisting us in educating the health care workers of the future.

2. How does the project enhance the core academic, development of critical skill degrees, and/or research mission of the institution?

The renovation project aligns perfectly with the College's mission and is in support of our core values of providing relevant educational offerings, instructional excellence, accessibility, diversity and inclusion, and accountability to students and stakeholders.

3. Is the requested project focused on a single, stand-alone facility? If no, please explain.

Yes, the request is for renovation and a new addition to the Welch Health Education Building.

4. How does the project support investment in or adaptive re-purposing of existing facilities and infrastructure?

The project requested re-purposes and enhances existing classrooms and laboratories while also adding additional instructional spaces to support student learning in health care occupations. The Capital Outlay Project Request will provide investment in the existing facility while adding enhanced Skills Labs to assist in preparing our students for employment in these high growth, high demand fields.

The project includes a renovation of interior spaces as well as improving the energy efficiencies of the exterior envelope of the existing building while adding additional space to meet enrollment demands. The College is committed to the goal of integrating sustainable design principles and systems throughout this project.

5. Does the project address or mitigate any current life/safety deficiencies relative to existing facilities? If yes, please explain.

At this point, no life/safety deficiencies/issues have been identified relative to this project.

6. How does the institution measure utilization of its existing facilities, and how does it compare relative to established benchmarks for educational facilities? How does the project help to improve the utilization of existing space and infrastructure, or conversely how does the current utilization support the need for additional space and infrastructure?

During academic program development and review, the utilization of existing facilities is a major consideration. The accreditation processes for both the Registered Nursing Program and the Respiratory Therapy Program includes a thorough review of the teaching facilities as related to the maximum number of students that can be accommodated to meet learning outcomes. While the current classrooms have received technology upgrades, physical space limitations are effecting the College's ability to expand programmatically and meet the Skills Lab resources needed to help facilitate student learning. To accommodate limited classroom availability in the Welch Health Education Building, the Nursing Department utilizes classrooms in other buildings on campus.

Room utilization for all classrooms and labs is tracked on a semester basis and the data is used by the instructional area to determine program and course offerings. This information is used in concert with program enrollment data, economic forecasts and workforce analysis, and community interest as a benchmark by the academic disciplines to determine additional facility needs. Research has shown that expansion of technology-rich classrooms and laboratories is vital to the continuing success of our students both in the classroom and in the workforce.

7. How does the institution intend to integrate sustainable design principles to enhance the efficiency and operations of the facility?

The College is committed to incorporating sustainable design features into all of its renovation and new construction projects as was done in the construction of the Career Technology Center and the College's current Capital Outlay Project – Renovation to the East and West Technology Buildings. All designs will include appropriate sustainable design principles to improve efficiencies.

- 8. Are match resources currently available for the project? If yes, what is the source of the match resources? If no, identify the intended source and the estimated timeline for securing said resources?**

The College has the matching funds available for the project via a five-year maintenance and improvement millage approved by the Monroe County electorate in November 2016.

- 9. If authorization for construction, the state typically provides a maximum of 75% of the total cost for university projects and 50% of the total cost for community college projects. Does the institution intend to commit additional resources that would reduce the state share from the amounts indicated? If so, by what amount?**

The College does not intend to add additional funds to reduce the State share. The request is for full funding of 50 percent of the project.

- 10. Will the completed project increase operating costs to the institution? If yes, please provide an estimated cost (annually, and over a five-year period) and indicate whether the institution has identified available funds to support addition cost.**

It is anticipated that the additional space added to the Welch Health Education Building will increase operating costs for utilities (electric, gas and water) by approximately \$9,925 in year one (16,822 sf X \$0.59/sf). The five-year projection includes a 3 percent inflation factor in years two through five resulting in increased utility costs for the first five years of operation of approximately \$55,700. We do not anticipate that there will be additional staffing costs. General fund revenues will be utilized to support the additional utility costs to operate the new addition.

It is expected that the overall operating costs will be reduced in the future through College sustainability efforts. Phase 2 of this project includes the installation of LED lighting throughout the entire building and upgrading the HVAC system to a geothermal system in keeping with the HVAC system currently operating throughout the majority of the campus.

- 11. What impact, if any, will the project have on tuition costs?**

There should be no impact on student tuition and fees.

- 12. If this project is not authorized, what are the impacts to the institution and its students?**

The current space allocated to the health programs is quickly becoming inadequate for the program growth needed in these high-demand, high wage occupations. Without the State's support of this project, the College would have to limit enrollment

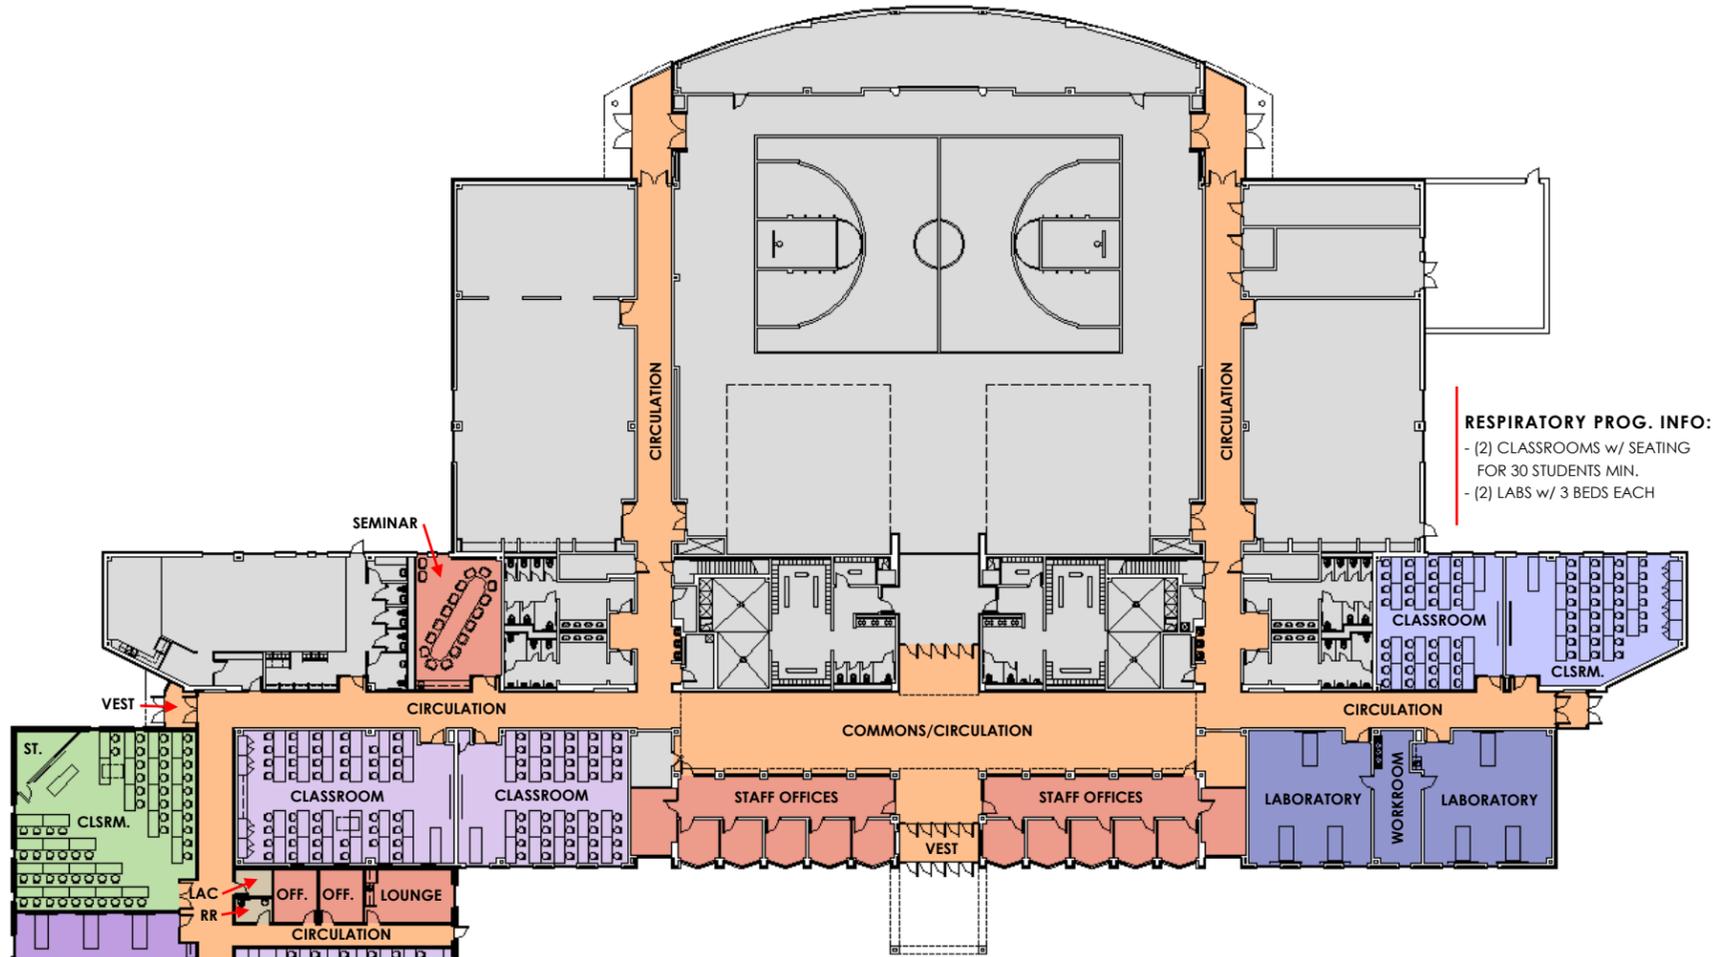

and turn-away students, lease facilities off-campus, or reduce the scope of the project in keeping with the College's current resources.

13. What alternative to this project were considered? Why is the requested project preferable to those alternatives?

The project as proposed allows the College to improve and expand the instructional resources for our health courses and programs and will result in an enhanced learning environment for our students.

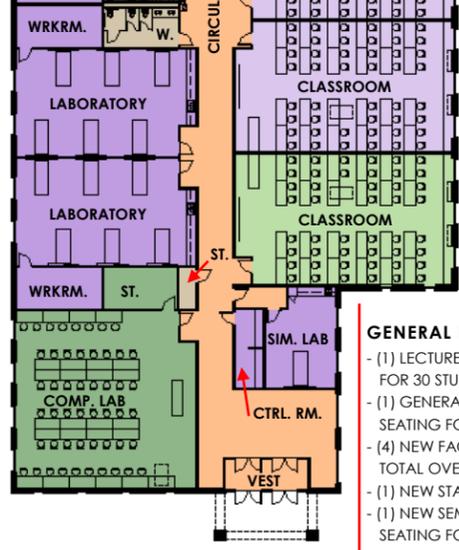

The College has considered scaling down the project and using existing funding to add additional classroom and lab space for the Nursing Program; however, this alternative does not address the growing instructional needs for all of the health courses and programs nor space to launch new programs. The option chosen is the best alternative to balance investment with efficient utilization of space and capacity growth for the College's health-related courses and programs.

BUDGET LETTER -- CAPITAL OUTLAY

TO: University and Community College Presidents

**Fiscal Year 2020 Capital Outlay Budget Information
Due Date: October 31, 2018**

Michigan universities and community colleges are invited to participate in the capital outlay budget development process in preparation for the Fiscal Year 2020 Executive Budget Recommendation. There are two submissions related to this process, one statutorily-required and the other voluntary. The Management and Budget Act, Public Act 431 of 1984, as amended, requires universities and community colleges to present a Five-Year Capital Outlay Plan no later than November 1 of each year. Universities and community colleges may also elect to submit a capital outlay project request for state cost participation. No capital outlay project request will be considered for planning without its inclusion in the corresponding Five-Year Capital Outlay Plan. The details of these submissions are further outlined below.

Five-Year Capital Outlay Plan

The Five-Year Capital Outlay Plan is intended to provide state policymakers with the most current information available on institutional priorities and needs. The Five-Year Capital Outlay Plan should be revised as appropriate, and approved annually by the institution's governing body. It is to evaluate all capital priorities in light of current programming efforts, anticipated programming changes, and the current capital base. At a minimum, the Five-Year Capital Outlay Plan should cover fiscal year 2020 through fiscal year 2024. It is to include both self-funded projects and those in which future state cost participation may be requested. The Department of Technology, Management and Budget has developed a set of minimum criteria the comprehensive planning documents are to incorporate. These criteria are listed in an attachment and remain unchanged from fiscal year 2019. Institutions may amend their Five-Year Capital Outlay Plan during the fiscal year by providing notification of the revision to the State Budget Office and other recipients.

Fiscal Year 2020 Capital Project Request

Requests for state funding of capital outlay projects are to be a logical extension of information contained in the comprehensive Five-Year Capital Outlay Plan. Capital project requests should focus on addressing specific academic or research needs of the institution. To facilitate state cost participation, all capital project requests must

comply with the State Building Authority Act, Public Act 183 of 1964, as amended, regarding the use of State Building Authority bond revenues. Projects should be narrowly focused on a specific facility or programmatic need. Project requests to renovate and/or construct multiple, independent facilities will not be considered, nor will projects related to self-liquidating facilities, such as dormitories, performance halls, parking garages, or athletic facilities.

A university or community college request for a capital project will be carefully reviewed and evaluated, and balanced against other competing capital outlay and statewide budget priorities for potential inclusion in the Executive Budget Recommendation. A scoring panel convened by the State Budget Office will review and evaluate the top priority capital project request from each institution relative to a set of minimum statutory criteria (MCL 18.1242), which includes the following:

- a. Investment in existing facilities and infrastructure.
- b. Life and safety deficiencies.
- c. Occupancy and utilization of existing facilities.
- d. Integration of sustainable design to enhance the efficiency and operations of the facility.
- e. Estimated cost.
- f. Institutional support.
- g. Estimated operating costs.
- h. Impact on tuition, if any.
- i. Impact on job creation in this state.
- j. History of prior appropriations received by the institution through the capital outlay process.

Note: The State Budget Office may also consider additional criteria that it believes will enhance the objective evaluation of projects as part of the upcoming gubernatorial transition.

If new capital outlay projects are included in the Fiscal Year 2020 Executive Budget Recommendation, only planning authorizations will be recommended. If planning is authorized by the Legislature in a subsequent appropriations act, the university or community college shall prepare professional preliminary design documents to secure support for construction. Once professional planning documents have been reviewed and approved for authorized projects, state funding will provide a maximum of 75% for universities and 50% for community colleges of the total cost of each project. As in prior years, the state share of financing for recommended large-scale projects may be capped at a dollar amount less than those levels.

A planning authorization approval does not guarantee support for a future construction authorization. A full assessment of the State Building Authority bond cap and available state budget resources to fund future State Building Authority Rent costs will be completed before advancing projects beyond the planning stage. Projects for which final planning costs significantly exceed original estimates will be carefully

scrutinized and may require additional program and scope refinement. Due to continued budgetary pressures, universities and community colleges may submit only their top priority capital outlay request. Institutions with a current planning authorization should continue to identify that project as their top priority request pending the enactment of a construction authorization.

Submission to the State Budget Office

Fiscal Year 2020 budget development continues with the use of the Statewide Integrated Governmental Management Applications (SIGMA) system for the collection of the university and community college capital outlay submissions.

To facilitate the submission of Five-Year Plan internet links and capital outlay project requests to the State Budget Office, university and community college end users will use virtual private network (VPN) hard tokens provided by the state to access the SIGMA system. In order to properly identify the appropriate end users at each institution, the SIGMA Budget Help Desk will be contacting, via email, those university and community college users who were identified in the previous year's capital outlay budget development process to ascertain whether or not those individuals will remain as each institution's SIGMA end user. The SIGMA Help Desk will be monitoring these communications to ensure that an end user for each institution is identified prior to mailing out the VPN hard tokens. If a university or community college is aware that their designated SIGMA end user has changed, please contact the SIGMA Budget Help Desk and notify them of this change. Additionally, communications regarding the availability of job aides, access to a training video, VPN access and any other steps required to access and properly complete the capital outlay submissions within SIGMA will occur directly with those identified end users.

We appreciate your cooperation as we continue to work diligently to make access and use of the SIGMA interface as seamless as possible for all users. Any questions regarding access to, or use of, SIGMA should be directed to the SIGMA Budget Help Desk at (517) 284-7270, Monday – Friday from 7:00 a.m. – 6:00 p.m.

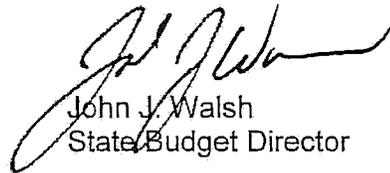

Submission guidelines for the Five-Year Capital Outlay Plan and Fiscal Year 2020 Capital Outlay Project Request are as follows:

- 1. Five-Year Capital Outlay Plan:** To comply with the statutory requirement, institutions are to post their Five-Year Capital Outlay Plans in a searchable electronic format (preferably PDF) on a publically viewable location on the institution's internet site. The documents are to be archived on the internet site for a period of no less than three years. Utilizing SIGMA, institutions are to submit the internet hyperlink of the posting from their institutional internet site no later than ***Wednesday, October 31, 2018. The State Budget Office will subsequently report these hyperlinks to the required statutory recipients, including Joint Capital Outlay Subcommittee members and the House and Senate Fiscal Agencies.***

- 2. Fiscal Year 2020 Capital Project Request:** Utilizing SIGMA, institutions may also submit a capital project request on the designated input form. The SIGMA form mirrors previous State Budget Office budget templates and is closely aligned with the statutory evaluation criteria. In addition, SIGMA allows for the upload of support documents via an attachment function, which institutions may utilize at their discretion. Institutions electing to submit a capital project request are to complete the input form in SIGMA no later than **Wednesday, October 31, 2018. The State Budget Office will subsequently report these submissions to the same statutory recipients as the Five-Year Plans.** A blank SIGMA report that combines all of the elements of the designated SIGMA input form for the major project request is attached.

Thank you in advance for your submission. We look forward to working with you in developing the Fiscal Year 2020 Executive Budget Recommendation. Any questions regarding the capital outlay process should be directed to Ryan Fink, Capital Outlay Coordinator, at finkr@michigan.gov or (517) 335-4075.

Sincerely,

John J. Walsh
State Budget Director

Recommended Five-Year Master Plan Components Michigan Universities and Community Colleges

I. Mission Statement

Summary description of the overall mission of the institution.

II. Instructional Programming

As part of the Five-Year Capital Outlay Plan, each college and university shall provide an overview of current academic programs and major academic initiatives. This "instructional programming" component should:

- a. Describe existing academic programs and projected programming changes during the next five years, in so far as academic programs are affected by specific structural considerations (i.e., laboratories, classrooms, current and future distance learning initiatives, etc.);
- b. Identify the other unique characteristics of each institution's academic mission:
For Universities:
Major research institution, liberal arts, technical/vocational center, geographic service delivery area(s), community presence activities, demographic profile, etc.
For Community Colleges:
Two-year degree and certificated technical/vocational training, workforce development activities, adult education focus, continuing or lifelong educational programming, partnerships with intermediate school district(s), community activities; geographic service delivery area(s), articulation agreements or partnerships with four-year institutions, etc.
- c. Identify other initiatives which may impact facilities usage;
- d. Demonstrate economic development impact of current/future programs (i.e., technical training centers, life science corridor initiatives, etc.).

III. Staffing and Enrollment

Colleges and universities must include staffing and enrollment trends in the annual Five-Year Capital Outlay Plan. This component should:

- a. Describe current full and part-time student enrollment levels by academic program and define how the programs are accessed by the student (i.e. main or satellite campus instruction, collaboration efforts with other institutions, Internet or distance learning, etc.);
- b. Evaluate enrollment patterns over the last five years;
- c. Project enrollment patterns over the next five years (including distance learning initiatives);
- d. Provide instructional staff/student and administrative staff/student ratios for major academic programs or colleges;

- e. Project future staffing needs based on five-year enrollment estimates and future programming changes;
- f. Identify current average class size and projected average class size based on institution's mission and planned programming changes.

IV. Facility Assessment

A professionally developed comprehensive facilities assessment is required. The assessment must identify and evaluate the overall condition of capital facilities under college or university control. The description must include facility age, use patterns, and an assessment of general physical condition. The assessment must specifically identify:

- a. Summary description of each facility (administrative, classroom, biology, hospital, etc.) according to categories outlined in "net-to-gross ratio guidelines for various building types," DTMB-Office of Design and Construction Capital Outlay Design Manual, appendix 8. If facility is of more than one "type," please identify the percentage of each type within a given facility.
- b. Building and/or classroom utilization rates (percentage of rooms used, and percent capacity). Identify building/classroom usage rates for peak (M-F, 10-3), off-peak (M-F, 8-10 am, 3-5 pm), evening, and weekend periods.
- c. Mandated facility standards for specific programs, where applicable (i.e. federal/industry standards for laboratory, animal, or agricultural research facilities, hospitals, use of industrial machinery, etc.);
- d. Functionality of existing structures and space allocation to program areas served;
- e. Replacement value of existing facilities (insured value of structure to the extent available);
- f. Utility system condition (i.e., heating, ventilation, and air conditioning (HVAC), water and sewage, electrical, etc.);
- g. Facility infrastructure condition (i.e., roads, bridges, parking structures, lots, etc.);
- h. Adequacy of existing utilities and infrastructure systems to current and 5-year projected programmatic needs;
- i. Does the institution have an enterprise-wide energy plan? What are its goals? Have energy audits been completed on all facilities and, if not, what is the plan/timetable for completing such audits?
- j. Land owned by the institution, including a determination of whether capacity exists for future development, additional acquisitions are needed to meet future demands, or surplus land can be conveyed for a different purpose.
- k. What portions of existing buildings, if any, are currently obligated to the State Building Authority and when these State Building Authority leases are set to expire.

In the event that comprehensive, current physical facility assessments are not available, the Five-Year Capital Outlay Plan must include data from the most recent physical facility assessment and describe the schedule by which a new assessment will be completed.

V. Implementation Plan

The Five-Year Capital Outlay Plan should identify the schedule by which the institution proposes to address major capital deficiencies, and:

- a. Prioritize major capital projects requested from the State, including a brief project description and estimated cost, in the format provided. (Adjust previously developed or prior years' figures utilizing industry standard CPI indexes where appropriate).
- b. If applicable, provide an estimate relative to the institution's current deferred maintenance backlog. Define the impact of addressing deferred maintenance and structural repairs, including programmatic impact, immediately versus over the next five years.
- c. Include the status of on-going projects financed with State Building Authority resources and explain how completion coincides with the overall Five-Year Capital Outlay Plan.
- d. Identify, to the extent possible, a rate of return on planned expenditures. This could be expressed as operational "savings" that a planned capital expenditure would yield in future years.
- e. Where applicable, consider alternatives to new infrastructure, such as distance learning.
- f. Identify a maintenance schedule for major maintenance items in excess of \$1,000,000 for fiscal year 2020 through fiscal year 2024.
- g. Identify the amount of non-routine maintenance the institution has budgeted for in its current fiscal year and relevant sources of financing.

How does the project support investment in or adaptive re-purposing of existing facilities and infrastructure?

Does the project address or mitigate any current health/safety deficiencies relative to existing facilities? If yes, please explain.

How does the institution measure utilization of its existing facilities, and how does it compare relative to established benchmarks for educational facilities? How does the project help to improve the utilization of existing space and infrastructure, or conversely how does current utilization support the need for additional space and infrastructure?

How does the institution intend to integrate sustainable design principles to enhance the efficiency and operations of the facility?

Are match resources currently available for the project? If yes, what is the source of the match resources? If no, identify the intended source and the estimated timeline for securing said resources.

If authorized for construction, the state typically provides a maximum of 75% of the total cost for university projects and 50% of the total cost for community college projects. Does the institution intend to commit additional resources that would reduce the state share from the amounts indicated? If so, by what amount?

Will the completed project increase operating costs to the institution? If yes, please provide an estimated cost (annually, and over a five-year period) and indicate whether the institution has identified available funds to support the additional cost.

What impact, if any, will the project have on tuition costs?

If this project is not authorized, what are the impacts to the institution and its students?

What alternatives to this project were considered? Why is the requested project preferable to those alternatives?
