

How to Connect to the monroeccc Wireless Network for Macintosh OS X Mavericks 10.9

1. Click on the **Airport** icon at the top right of your screen and select **monroeccc**.

2. If you have never signed into monroeccc with your current machine you may get a prompt for a server certificate. Click **Continue**. If you do not see a request for certificate continue to Step 4.

3. In the **Name** field enter the name of your computer and at the **Password** field enter your computer's password. Click **Update Settings**. You may not see this window if you have not set a lock on your computer.

4. At the **Wi-Fi network "monroeccc"** window, enter your **user name** and **Password**, if you are a student/employee.

Click **Remember this network** then **Join**.

Enter **User Name**: mcccguest **PW**: guestmccc if you are a guest user.

5. Your computer will now authenticate and connect to the **monroeccc** wireless network. A check will appear next to **monroeccc** in your **Airport** status window.

OPEN a browser put in an address and accept the acceptable use policy you will immediately go to the address you typed in e.g.: msn
