

Building Report | Parking Lot Renovations | Lots 4-6

7.17.20

The following are pictures from the week ending in 7.17.20 in regards to Parking Lots Renovations Project. This is the first of only a few reports for this project. This year we are focusing on Parking Lots 4, 5, and 6 to be renovated leaving only Lots 3 and 7 to be redone next year as 1 and 2 were finished last summer. Parking Lot 4 will just be redone with the work consisting of milling, compacting, repaving, and restriping. Additionally, there may be an area or two of curbs that will need to be replaced as per the civil engineer's field verification. Parking Lots 5 and 6 will see more work done with the two being linked together via a new boulevard style entrance in front of the new Founders Hall Building. Lot 6 will be expanded with the demolition of the old SAE Garage Tech Butler Building. Both lots will also receive a LED lighting upgrade.

The top-left photo shows the progress of the removal of the old Tech Butler Building. This building is actually being disassembled from it's Main Campus site and reassembled on a farm in Manchester, Michigan for use by a local farmer there.

The top-right photo shows the remains of what was the old SAE Garage. Due to it's construction this building could not be reused and therefore was completely demolished. All the associated landscaping around both buildings was also removed.
