

Building Report | E/W Tech Renovations & Addition

7.17.20

The following are pictures from the weeks ending in 6.3.20 thru 7.17.20 in regards to the East/West Technology Buildings (Founders Hall) Renovations and Addition Project. This project is nearly complete as items such as the fixtures, furnishings, and equipment are being installed. Both the fire marshal and local building inspectors have inspected and approved the building and we have official occupancy. In addition the architects/engineers and the College have completed their punch lists (items that need finishing or correction) and provided to the construction manager who will see that the items listed are addressed appropriately. It won't be long now before we start moving staff into the building in preparation for the fall semester. The first order of furniture is in and installed, with the second order coming in at the end of the month. The A/V systems are starting to be installed which will help make the building fully functional for the College's staff and students. The College's custodial crews are busy cleaning the building so soon this project will be officially completed!

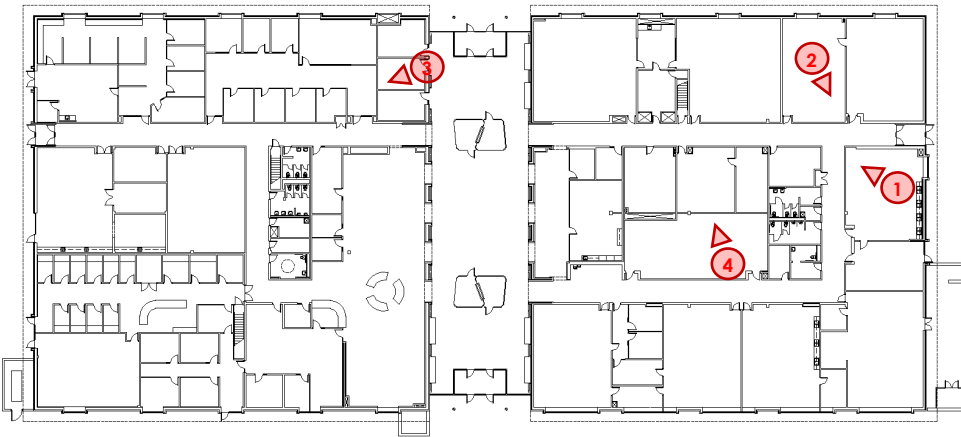

Photo #1 was taken in the new art classroom and shows the installation of the new teaching station in that space. Like Photo #2 was taken one of the new classrooms that was created through renovations in the east wing and shows the teaching station there. These two photos demonstrate how the differing room layouts dictated the shape of the new teaching stations. Soon these stations will be populated with all new A/V equipment and computer hardware for instructional use. Photo #3 was taken in one of the study rooms, and Photo #4 in the TEAL classroom and show some of many new flat panel televisions being installed that will assist students with their education by providing the capability of group studying and learning.
