

# Building Report | Little Theater Renovations

12.20.19

The following are pictures from weeks ending in 12.13.19 and 12.20.19 in regards to the Little Theater Renovations Project. This project is nearly complete as now the work happening is mostly just the new A/V and theater equipment being installed. For example portions of the new lighting and sound system have been installed. The new projector and screen are set to be installed soon along with all the electronics necessary for instructional purposes. Some of the new hardware such as the new lighting and sound boards necessary for the theater usage of the space is being installed as well. The tracks for the cyclorama curtains on the stage is in place and ready for the new drapes to be installed. Additional items being finished are the new ADA compliant doors and frames being installed to not only secure the space, but allow it to be fully accessible for those building occupants with mobility limitations.

Photos #1 and #2 show the process and finished installation of the new seating. These new seats are comparable to those in the Meyer Theater, however they include a tablet art that students can use the Little Theater will not only serve as a theater, but also a lecture hall. Photo #3 shows one of the many new pieces of A/V equipment being installed in the Little Theater. The sound system in this space has been upgraded to meet the needs of the theater and to help deliver instruction as well. Photo #4 shows some of the new casework that has been installed in this space. Here you can see the new teaching station that will house all of the electronic equipment for the classroom use of the space.
