

Building Report | Unisex Restroom/Private Room Project

12.10.21

The following are pictures from the week ending in 12.10.21 in regards to the Unisex Restroom/Private Room Project located in the Student Services/Administration Building. The backerboard and ceramic tile wall and floor tiles were installed this past week in the new unisex restroom. Additionally, the tile was grouted which will then allow for the new plumbing fixtures such as the lavatory and toilet to be installed. The private room had it's wallboard finished and painted to match other areas in the vicinity. Soon both spaces will receive their respective ceiling systems and lighting. This project is tracking well and should be finished before the end of the month and will then allow both spaces to be ready for use by building occupants after the first of the year.

The top-right photo shows the exterior face of private room with the wallboard finished and painted. The door frame has been painted to match others in the area. Soon the ceiling systems in both spaces will be installed along with the doors.

The top-left photo shows the new unisex restroom with it's wall and floor tile finish installed and grouted. This tile was specially chosen so that it matches not only that of the other restrooms in the building as well as those campus-wide.
