What the Eyes Don't See is the inspiring story of how Dr. Mona Hanna-Attisha, alongside a team of researchers, parents, friends, and community leaders, discovered that the children of Flint, Michigan were being exposed to lead in their tap water. Paced like a scientific thriller, *What the Eyes Don't See* reveals how Hanna-Attisha discovered the lead levels in the water supply, and then battled her own government to expose that truth to the world. At the center of the story is Dr. Mona herself — an immigrant, doctor, scientist, and mother whose family's activist roots inspired her pursuit of justice.
