

MCCC - Security Incident

Date: 30 Jan 2020

Time: 01:00 PM

Reporting Officer: kwassus

Subject: Accident

Location: parking lot #2 in front of CTC

Witness: n/a

Victim:

Complainant:

Suspect: n/a

Narrative:

Vehicle involved.

2016 Black GMC

Michigan Registration

vin:

Owner:

On this date 1/30/2020 at approximately 12:30 pm the undersigned security officer was contacted by a student. The student contacted the officer by the campus security number. She informed the officer that upon returning to her vehicle which was parked in Lot 2, she noticed damage to the rear of her parents' vehicle. The officer informed her to wait by her vehicle and the officer would respond to her location.

Upon arriving at the location of the vehicle and the student, the officer was informed of the following information. The student indicated that at approximately 7:40 am of this date she was traveling southbound on Rainsville Rd. and was about to turn left into the main north driveway of campus. Due to the slippery road conditions, as it was snowing, she advised that she slid into the back of a vehicle. She added that she lurched forward from the impact as she had been slowing down for the turn and wasn't going very fast when the impact occurred.

After the collision the student pulled over and spoke with driver of the vehicle she slid into. Due to the minor damage to both vehicles, she exchanged numbers with the driver of the other vehicle but did not report it to the Sheriff's Dept. The only information she had of the other driver was her first name and a number she provided. After exchanging information she continued on to class.

Upon returning to her vehicle at approximately 12:30 pm she noticed that there was a scuff mark to the back tailgate of her vehicle. Upon further investigation she noted a broken molding on the bottom of the tailgate. The officer in observing the damage noted that it appeared minor and there was some fresh dirt and mud that appeared to have been recently disturbed due to the impact. However the officer noted that the broken molding was not lying on the pavement below where the vehicle was parked, and there was no dirt or mud indicating that the damage occurred

at that location. The officer took a picture with the campus security phone for documentation purposes.

The student advised the officer that when she had the earlier accident out on the roadway and slid into the back of the vehicle if another vehicle slid into the back of hers. However no one approached her and admitted or advised that they slid into the rear of her vehicle, so she was not sure. Due to no damage residue in the parking area of her vehicle, the officer feels her theory is correct.

The officer inquired if the student had advised her parents yet of what has occurred. She indicated that she had not as she just got out of class. The officer advised her that the college would generate a report of the information, but since it appears to have happened here, parents may want to contact the Sheriff's Dept. to make a report if needed for insurance purposes.
