

MCCC - Security Incident  
Date: 27 Mar 2019  
Time: 09:30 AM  
Reporting Officer: kwerner

Subject:: Accident  
Location: Road south of the Physical Plant  
Witness:  
Victim:  
Complainant:  
Suspect:

Narrative:  
Single vehicle Property Damage Accident

Driver:  
Vehicle: 2005 Jeep  
Damage: Passengers side front grill, fender, and headlight.  
Insurance:  
Owner:

Officer was contacted by the Grounds Crew and advised that a vehicle had struck a tree near the Physical Plant building. Upon arrival Officer found driver and the above Jeep off of the east side of the road just south of the Physical Plant, at the big curve. The Jeep had a damaged passenger side front end next to one of the small trees growing at that location.

Officer checked to make sure that driver wasn't injured and she assured him that she was not. The vehicle airbags did not deploy. She was the lone occupant of the vehicle. Driver advised that as she was driving she felt the steering go out of her control as the right front tire contacted the curb on the curve and it pulled her over the curb and into the tree.

Officer observed that there were no skid marks on the pavement prior to a black mark on the curb itself where the vehicle had left the roadway. There was little marking on the lawn and only minor damage to the bark on the small tree.

The Vehicle appeared drivable and driver advised that she did not want a wrecker. MCCC Grounds Crew were on the scene and cleaned up the plastic debris. They did not witness the accident.

Driver was going to check with her mother to determine if they would be contacting the Sheriff's Office for a report. She was advised that we will have a Campus Security report if needed.  
Disposition: Closed
